2ND HANTS ARTILLERY.—This corps has commenced practice with blank cartridge. The guns placed at their service by their authorities are five 32-pounders on the Spur Redoubt, Portsmouth. They are 53 years old, having been cast at the Carron Works in 1807. No record of the number of times they have been discharged has been kept from the date of their casting until the practice of this corps on Wednesday last, when a record of that event was made, evidently in consequence of an order issued from head-quarters. It is certain that these guns have seen some service, for their vents have all been enlarged. They have not, however, as far as we can learn from inquiries made upon the spot, been searched, an operation which, since the late lamentable accident at Dover, where the bursting of an old 32-pounder killed two artillerists, and severely wounded many others, ought to be performed previous to putting them into the hands of our Volunteers. This corps, which is fast getting into serviceable order, will commence firing shot at Southsea Castle on Wednesday next.

3RD (PORTSMOUTH CIVIL SERVICE) HANTS ARTILLERY.—The following appointments have been confirmed by the Lord-Lieutenant, under Her Majesty's approbation:—Date of commission 5th September, 1860, viz.: George Rogers, Esq., Captain, James Helby, Esq., Captain, and H. C. Conolly, Esq., Captain; Mr. G. Slater, 1st Lieutenant, Mr. E. C. Warran, 1st Lieutenant, Mr. William Smith, 1st Lieutenant, and Mr. William H. Short, 1st Lieutenant; Mr. J. J. Watson, 2nd Lieutenant, Mr. A. Mott, 2nd Lieutenant, and Mr. R. S. Chapman, 2nd Lieutenant. W. H. Garrington, Esq., Mayor of Portsmouth, has been appointed Surgeon, and the Rev. E. S. Phelps, B.A., Honorary Chaplain to the corps. The following appointments will take place on the 7th of September next, subject to the approbation of the Lord-Lieutenant of the county:—William Brain, Esq., Captain 4th company; Mr. H. Miller and Mr. J. Brooks, G. Boghurst, and William White, Sergeants. The corps numbers at present 360 men and officers, and commenced battalion drill for the first time on Tuesday last on the parade-ground in front of the Long Row in the dockyard. The clothing of the men will soon be complete in every department. Sixty suits of uniform arrived on Wednesday, and forty on Thursday; and the corps furnished a Guard of Honour to the Lords of the Admiralty on their recent visit to Admiral Bruce, on the occasion of their lordships dining with the gallant Admiral at his official residence in the dockyard.

KENT.

THE 1ST B. (FOLKESTONE) CINQUE PORTS ARTILLERY.—This corps still continues weekly drill, and has attained, by the exertions of the drill instructor, Bombardier Currie, of the Coast Defence Brigade, considerable proficiency. Great gun drill is also carried out on Tuesday evenings.

5TH (FOLKESTONE) CINQUE PORTS RIFLES.—Lieut.-Colonel Charles G. Perceval, captain of this corps, has tendered his resignation. No other officer has as yet been named to succeed the gallant captain, who leaves Folkestone on this day (Saturday).

THE 11TH (SANDGATE) KENT ARTILLERY.—This corps assembled at Sandgate Castle on Tuesday last for shot practice, but, in consequence of a great number of vessels lying wind-bound in Sandgate Roads, the intended practice was not carried out.

On Wednesday afternoon a volunteer *fête* on a most extensive scale, in aid of the funds of the 26th Kent Rifles, took place in the park of Sir Thomas M. Wilson, Bart., at Old Charlton. At least 3000 persons were present, and amongst these were Mr. Angerstein, M.P., for Greenwich; Colonel Tulloh, Commandant of the Royal Arsenal Volunteer Artillery and Rifle Force; the commanding officers of various Volunteer corps of the 1st Kent Battalion, and numerous officers of Royal Artillery, Royal Marines, and other branches of the Service.

NORFOLK.

ATTLEBOROUGH.—The result of efforts made here to promote the organisation of a Volunteer corps has been a subscription of 270*l.* and an enrolment of 52 "effectives." A company is to be at once formed which will, in all probability, be commanded by Sir R. J. Buxton, of Shadwell Court.

SOMERSETSHIRE.

THE 19TH (GLASTONBURY) SOMERSET RIFLES.—The first official inspection of thise orps by Major Hume, the Government Inspector for the Western Counties, took place on Monday afternoon the 3rd inst. Captain Hood having put the corps through various movements and evolutions, which were executed in a highly successful manner, the Inspector

Digitized by Google

addressed them, saying that he was particularly pleased with the very satisfactory manner in which they had performed their duties that day. Theirs was only the third corps in the county he had inspected in which all the members were present, and he had inspected only two corps who were equal to them, and no other corps in the county which had loaded and fired as a double file kneeling. Their manual and platoon exercise and skirmishing was extremely good, and quite calculated to prepare them for firing practice, as he felt sure they might safely do so under the guidance of so able and experienced a commander as their captain. He was glad he should be able to give so very favourable a report of their efficiency to head quarters.

FROME RIFLES.—On Thursday evening the members of this corps were presented with a massive silver bugle, valued at 40 guineas, by the lady of the Hon. and Rev. Richard Cavendish Townshend Boyle.

SUFFOLK.

IPSWICH.—About 50 gentlemen have been enrolled as members of a proposed "Scotch Company" here, but the lord-lieutenant of the county has declined to sanction the corps as a separate company in consequence of the difference of the contemplated uniform from that of the present Ipswich corps. The subject is to be brought under the notice of the Secretary-at-War.

SUSSEX.

16TH (BATTLE) SUSSEX RIFLES.—On Wednesday last this corps, having received an invitation from the Rev. B. Hayley, Catsfield Rectory, assembled in front of the George Hotel, at six p.m., and, headed by the Battle band, marched to Catsfield, under the command of Captain Combe. On their arrival they were met by the Catsfield detachment of the corps, and a very pleasant evening was spent.

WARWICKSHIRE.

BIRMINGHAM.—Company ball practice has been pursued in a spirited manner at the rifle range at Bourne Brook. The title which the local Volunteers have hitherto borne—namely, "1st Battalion of Warwickshire Rifle Volunteers," has been altered by the authorities of the War Office to that of "The Birmingham Rifle Volunteer Corps," and by it they will henceforward be officially recognised. The ladies of the town are engaged in embroidering colours for presentation to the corps. Major Mason has also entered into a correspondence with the railway authorities for the conveyance of such of the Volunteers as are desirous of being present at the review for the Midland and Western districts, before His Royal Highness the Commander-in-Chief, at Gloucester. He has been informed in answer that the Midland Railway Company will run a special train, to arrive in time for the review and to return the same evening, at the fare of 3*s.* 6*d.* per head for the double journey, with the privilege, of those who may desire to be present at the ball at night, of coming back the next afternoon on the payment of an additional shilling. It is expected that there will be a large muster of the Birmingham corps on the occasion.

WILTS.

THE NEW SWINDON RIFLE VOLUNTEERS.—The presentation of a silver bugle by Earl Sherburne to the 11th Wilts, or New Swindon Rifle Volunteer corps, took place on Tuesday in the cricket-field adjoining the Great Western Railway, Swindon. His lordship also presented the corps with a set of drums, and advantage was taken of the occasion for the presentation of a set of colours to this corps by Mrs. Gooch, wife of Captain Gooch. The day was observed as a general holiday.

RIFLE ASSOCIATION.—The provisional committee of the proposed Wiltshire Rifle Association are taking energetic measures to carry out the resolutions passed at the preliminary meeting held a short time since in the City of Salisbury. The Right Hon. Sidney Herbert, Secretary for War, has just kindly signified his willingness to act as president of the association.

YORKSHIRE.

QUEENSHEAD.—Steps are taking for the formation of a Rifle Corps in this district in the West Riding. It is proposed that the corps shall consist of 100 men, and be called the Shibdendale Rifle Volunteers; and Mr. M. Stocks, of Catherine House, Halifax, has generously offered to completely equip them all at his own cost. Above 30 Volunteers have already been enrolled at Queenshead.

YORK.—On the 4th and 5th proximo prizes given by the citizens of York, of the value of 50*l.*, 15*l.*, and 5*l.*, will be shot for at York, by rifle Volunteers from any part of the county.

THE REVIEW IN KIRKLEES PARK.—It is now definitely arranged that the Leeds, Bradford, Wakefield, Halifax, and Huddersfield Rifle Corps shall be reviewed in Kirklees Park, by Major Harmond, on Saturday, the 15th inst. This was announced to the Wakefield corps on Wednesday evening last by Major Holdsworth. The major announced at the same time his intention of bearing the whole of the expense himself of taking the corps to and from the park.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, SEPTEMBER 11.

1st Surrey Rifle Volunteer Corps—John Watkins Froeman, Gent., to be Adjutant.

Robin Hood Rifle Volunteer Corps—James Wilson, Gent., to be Captain; Nathan Pratt, Gent., to be Lieutenant; Laslett John Pott, Gent., to be Ensign.

Dumbartonshire Artillery Volunteer Corps—2d Company—The Rev. David Shanks to be Honorary Chaplain; George Thomson Gossling to be Honorary Assistant-Surgeon.

31st Corps, 3d Battalion—Cornwallis Wykeham Martin, Esq., R.N., to be Captain, vice Charles Wykeham Martin, Esq., resigned, and appointed Major 3d Battalion.

Memorandum—Kent Rifle Volunteers, 2d Battalion—The following notice of commission to be substituted for the insertion in the *Gazette* on the 22d August, 1860:—Joseph Hogg Baller, M.D., to be Surgeon.

Her Majesty the Queen has been pleased to accept the resignation of the following commission:—

24th Corps, 4th Battalion—Captain Frederick Mares Godden.

Tower Hamlets Rifle Volunteers (No. 2)—Lieutenant Charles William Laws to be Captain, vice Ward, resigned; Ensign Edward Stillard to be Lieutenant, vice Laws; Samuel William Linden, Gent., to be Ensign, vice Stillard.

Tower Hamlets Rifle Volunteers (No. 4)—William Edward Spencer, Gent., to be Captain; Ephraim Sparrow, Gent., to be Lieu enant; William M'Nab Soul to be Ensign.

1st Battalion Cumberland Rifle Volunteers—William Brougham, Esq., to be Major.

Memorandum—The 11th Cumberland Rifle Volunteer Corps (Wigton) has been united to the 1st Administrative Battalion of Cumberland Rifle Volunteers. The corps will retain its present number and designation in the county force.

3d Hampshire Artillery Volunteer Corps—George Rogers, Gent., to be Captain; James Helby, Gent., to be Captain; Henry Charles Lawrence Connolly, Gent., to be Captain; George James Slater, Gent., to be First Lieutenant; Edwin Caleb Warren, Gent., to be First Lieutenant; William Smith, Gent., to be First Lieutenant; William Henry Short, Gent., to be First Lieutenant; Joseph Smart Watson, Gent., to be Second Lieutenant; Andrew Mott, Gent., to be Second Lieutenant; Richard Sands Chapman, Gent., to be Second Lieutenant; William Hawkins Garrington, Gent., M.R.C.S., to be Surgeon; the Rev. Edward Spencer Phelps, B.A., to be Honorary Chaplain.

5th Hampshire Rifle Volunteer Corps—Captain (Major) George Preston Vallancey to be Major.

21st Hampshire Rifle Volunteer Corps—Cecil Rivers, Esq., to be Lieutenant.

10th Suffolk Rifle Volunteer Corps—Lieutenant Sir Edward Clarence Kerrison, to be Captain, vice Michell, promoted; Ensign the Hon. John Major Henniker, to be Lieutenant, vice Kerrison, promoted; John Allen, Gent., to be Ensign.

15th Derbyshire Rifle Volunteers—Hobart Anderdon, Esq. (late Captain 21st Fusiliers), to be Lieutenant, vice Reynolds, resigned.

16th Derbyshire Rifle Volunteers—Meynell Horton Miller Mundy, Esq., to be Captain; Edwin Whitehouse, Gent., to be Lieutenant; Philip Potter, Gent., to be Ensign.

59th Lanarkshire Rifle Volunteer Corps—Ensign Patrick Robertson to be Lieutenant, vice John Baukier, resigned; Moses Provan, Gent., to be Ensign, vice Robertson, promoted.

26th West Riding of Yorkshire Rifle Volunteers (Ingleton)—Richard Elletson, Gent., to be Honorary Assistant-Surgeon.

28th West Riding of Yorkshire Rifle Volunteers (Goole)—Ensign Robert Storr Best to be Lieutenant, vice Rockett, who retires; Thomas Eadon, Gent., to be Ensign, vice Best, promoted.

Memorandum—The commission (signed by the Queen) of Captain Francis Lepper, as Adjutant, is to the 3d West Riding of Yorkshire Rifle Volunteers (Bradford), and not the 3d Administrative Battallion of the Riding, as gazetted.

Memorandum—7th West Riding of Yorkshire Rifle Volunteers (Leeds)—The proper description of the Adjutant appointed (by Her Majesty's Commission) to this corps is Henry Leslie Hunt, Esq., late Lieutenant 67th Foot, and Captain Royal Wiltshire Militia.

1st Battalion Leicestershire Volunteer Rifles—Frank Fullagar, Esq., to be Surgeon.

1st Company of Ross-shire Volunteers—James Vass, M.D., Gent., to be Honorary Assistant-Surgeon.

11th Lancashire Rifle Volunteer Corps—Captain Henry Newsham Pedder to be Major; Lieutenant James Catterall to be Captain; Ensign Hugh Dawson to be Lieutenant; Charles Wilson, Gent., to be Ensign; Richard Dickson, Gent., to be Ensign; Robert Clarke, Gent., to be Supernumerary Lieutenant.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the commissions held by Lieutenant George Henry Garratt and Ensign Frederick Allender, in the 32d Lancashire Rifle Volunteer Corps; by Lieutenant John Holgrate, in the 33rd Lancashire Rifle Volunteer Corps; and by Captain Edward Lister Glover and Ensign Arthur David Foulkes, in the 3d Manchester, or 40th Lancashire Rifle Volunteer Corps.

3d Durham Rifle Volunteers—George Jackson Hay, Gent., to be Ensign.

8th Durham Rifle Volunteers—William Thomas Wailes, Esq., to be Captain; Ensign George Greene to be Lieutenant, vice Brooksbank, resigned; Robert Joseph Banning, Gent., to be Lieutenant; Frederick Springmann, Gent., to be Ensign, vice Greene, promoted; Edward Davidson Milvain, Gent., to be Ensign.

1st Administrative Battalion of Ayrshire Rifle Volunteers—The Most Noble Archibald, Marquis of Ailsa, K.T., to be Lieutenant-Colonel.

1st Company of Ayrshire Artillery Volunteers—William Shields to be Honorary Assistant-Surgeon.

4th Elgin (Rothes) Rifle Volunteers—Alexander Bremner Thomson, M.R.C.S.L., to be Honorary Assistant-Surgeon.

City of Edinburgh Rifle Volunteer Corps—William Taylor to be Ensign, vice Ballantyne, promoted.

Memorandum—8th Aberdeenshire Rifle Volunteer Corps—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Ensign James Hamilton Irvine.

WAR OFFICE, PALL MALL, SEPTEMBER 14.

1st Monmouthshire Rifle Volunteer Corps—Edward Penderill King, Gent., to be Honorary Assistant-Surgeon, vice Morris, resigned.

9th Monmouthshire Rifle Volunteer Corps—James Charles Hill, Esq., to be Captain; Cornelius Lloyd, Gent., to be Lieutenant; Richard Baker Gabb, Gent., to be Ensign; Robert Smythe, Gent, to be Honorary Assistant-Surgeon.

19th North Riding of Yorkshire Rifle Volunteer Corps—Francis Richard Gibbes, Gent., to be Honorary Assistant-Surgeon.

5th Essex Rifle Volunteers—Robert Gordon Ferguson, Esq., to be Captain; Henry Sewell, Esq., to be Captain; Edward Cruse, Esq., to be Lieutenant; Francis Robinson, Esq., to be Lieutenant; Thomas Winship Dixon, Esq., to be Ensign; Thomas Leslie Gregson Bell, Esq., to be Ensign.

The following are substituted for the appointments which appeared in the *Gazette* of 14th August last:

5th Essex Rifle Volunteers—"Robert Barclay Reynolds," instead of "Barclay Reynolds, Esq.," to be Lieutenant; "George Walter Tyser," instead of "George Tyser, Esq.," to be Ensign.

21st Middlesex Rifle Volunteer Corps—Henry Spencer Smith, F.R.C.S., to be Surgeon.

Memorandum.—2nd Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the Commission held in this Corps by Lieutenant the Lord Ashley, M.P.

Memorandum.—22nd Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the Commission held in this Corps by Major Richard Radcliffe Twining.

Memorandum.—37th Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the Commission held in this Corps by Lieutenant Francis Robert Warren.

1st Company of Cheshire Artillery Volunteers—First Lieutenant William Jackson, jun., to be Captain, vice Thomas Hughes Jackson, resigned.

19th Company of Cheshire Rifle Volunteers—John Taylor Pearson, Gent., to be Honorary Assistant-Surgeon.

Memorandum.—1st Company of Cheshire Artillery Volunteers—Her Majesty has been graciously pleased to accept the resignation of the Commission of Captain Thomas Hughes Jackson.

Memorandum—1st Corps of Northumberland Artillery Volunteers—William Alexander Falconar, Gent., to be Second Lieutenant.

2nd Lancashire Rifle Volunteer Corps—Joseph Scholfield Radcliffe, Gent., to be Ensign, vice Yates, promoted.

Kent Artillery Volunteers—2nd Corps—1st Brigade—The Reverend Charles Collins, M.A., to be Honorary Chaplain.

3rd Lanarkshire Rifle Volunteer Corps—John Turnbull, Gent., to be Lieutenant, vice Thomas Reid Kerr, resigned; John Mackinnon, Gent., to be Ensign, vice Robert Maclean Black, promoted.

3rd Administrative Battalion of Lanarkshire Rifle Volunteers—Major Samuel Simpson to be Lieutenant-Colonel.

19th Lanarkshire Rifle Volunteer Corps—William Burn, Gent., to be Lieutenant vice Alexander Buchanan Dick, resigned.

93rd Lanarkshire Rifle Volunteer Corps—John Robinson Irvine, Gent., to be Ensign.

6th Buckinghamshire Rifle Volunteers—Samuel Newman, Gent., to be Ensign.

1st Administrative Battalion of West Riding of Yorkshire Rifle Volunteers—Major George Briggs to be Lieutenant-Colonel.

6th West Riding of Yorkshire Rifle Volunteers (Huddersfield)—Lieutenant Joseph Batley, Jun., to be Captain; Thomas Rymer Webb, Gent., to be Lieutenant; Henry Broughton Dyson, Gent., to be Ensign.

7th West Riding of Yorkshire Rifle Volunteers (Leeds)—Lieutenant D'Arcy Stanfield Blackburn to be Captain; Frederick William Kitson, Esq., to be Captain; Ensign Andrew Fairbairn to be Captain; Thomas Greenwood, Esq., to be Captain; Ensign Robert John Hudson to be Lieutenant; Ensign William Lyndon Smith to be Lieutenant; Grosvenor Talbot, Gent., to be Lieutenant; William Pollard, Gent., to be Lieutenant; Thomas Stuart Kennedy, Gent., to be Ensign; George Greenwood, Gent., to be Ensign; Edward Bishop, Gent., to be Assistant-Surgeon.

1st Administrative Battalion of West Riding of Yorkshire Rifle Volunteers—The 31st (Tadcaster) corps of West Riding of Yorkshire Volunteers has been united to this Battalion, the Staff of which will consist of 1 Lieutenant-Colonel and 1 Adjutant. The Tadcaster Corps will retain its present number and designation in the County Force.

3rd Administrative Battalion of West Riding of Yorkshire Rifle Volunteers—The Commission of Major Joseph Hulme Holdsworth has been antedated to 26th June, 1860, instead of 11th August as previously gazetted.

1st West Riding of Yorkshire Rifle Volunteers (York)—Her Majesty has been pleased to approve of Captain James Meek, Junr., bearing the title of Captain-Commandant of this Corps.

6th West Riding of Yorkshire Rifle Volunteers (Huddersfield)—Her Majesty has been pleased to accept the resignation of the Commission held by Ensign Joseph Acheson Harrison.

1st Battalion of Staffordshire Rifle Volunteers (3rd Company)—The Reverend Francis Bazet Grant to be Honorary Chaplain.

15th Derbyshire Rifle Volunteers—Reverend Charles Rawlins to be Honorary Chaplain; Joseph German, Gent., to be Honorary Assistant-Surgeon.

REVIEW IN WINDSOR PARK.—The meeting of the Berkshire Volunteers took place on Thursday in the Great Park, when the Windsor, Reading, Wokingham, Abingdon, Newbury, and Maidenhead corps competed for the prizes which were offered by the county. The day was observed as a general holiday, the shops were all closed, and flags and banners were displayed. The whole county was stirred, and every town and village sent forth its people to swell the aggregate, which could not be far short of 30,000 persons. The whole way from Windsor to the shooting-ground, a distance of about four miles, resembled the road leading to Epsom Downs on the Derby-day. The shooting for the first prize, a silver cup, given by the ladies of Berkshire, took place at distances of 300, 400, and 500 yards, five rounds each distance. The cup was won by Private Salter, of Reading, who obtained 13 points. To the cup were added prizes of 3*l.* and 2*l.* for each distance. Mr. Bembridge, of Windsor, won the 3*l.* prize, and Mr. G. Smith, of the same place, the 2*l.* prize. At the 400 yards' distance, Private Hounslow gained the 3*l.* prize, and Private Accup the second prize of 2*l.* At the 500 yards' distance, Private Salter, the winner of the cup, made five points, and won the first prize of 3*l.*, and Private Hounslow made four points, and won the second prize. The first prize, for all comers, was won by Mortimer of Abingdon; and the second prize by Sergeant-Major Palmer, of the Royal Military College, Sandhurst. At 400 yards Mortimer gained the first prize, and Sergeant Green, of the Coldstream Guards, the second. At 500 yards Sergeant Brown gained the first prize, and the second prize of 2*l.* was won by Mr. Cartwright. Mortimer having made the highest aggregate score—viz., 14 points, won an extra prize of 10*l.* The competition for the breech-loading rifle, by Westley Richards, given by the Hon. Mrs. Loyd Lyndsay, the wife of the gallant colonel of the Berkshire Volunteers, took place by skirmishing, the first occasion on which it was ever attempted at a prize meeting. The trial proved eminently successful. Mr. Blatch, of Reading, won the rifle and case; Mr. May, of same town, gained the second prize, 6*l.*; Mr. Wheeler, 4*l.*; and Mr. Jackson, 2*l.* For the county challenge cup Mr. Jackson obtained the first prize, Mr. Snowden the second, and Mr. Blatch the third. The firing terminated shortly after three o'clock, and the review took place at four o'clock, in a portion of the park which was admirably suited for the purpose, and the scene presented was most striking. From the valley where the evolutions took place the ground was gradually on the ascent, giving the appearance of an amphitheatre, and affording an excellent view of the spectacle. At least 10,000 persons occupied this space, and a grand stand was thronged by spectators, whilst a large number of tents, marquees, and refreshment booths were also filled to overflowing. The following companies assembled at the hour named, accompanied by the bands of the Fusilier Guards, the Royal Horse Guards, the drum and fife band of the Coldstream Guards, and the Reading and Windsor Volunteer bands, viz.:—1st Reading, Captain-Commandant Sir C. S. P. Hunter, Captains Stevens and Atkins, Lieutenants H. B. Blandy, H. A. Simonds, and W. Eall, Ensigns B. Simonds, J. T. Morris, and L. Cooper; 2nd Windsor, Captain the Hon. A. L. Ruthven, Lieutenant S. T. G. Evans, Ensign R. H. Cooper; 3rd Newbury, Captain H. R. Eyre, Lieutenant G. C. Cherry, Ensign B. Pinniger; 4th Abingdon, Captain J. S. Bowles, Lieutenant J. B. Jenkins, Ensign E. Morland; 5th Maidenhead, Captain R. Vansittart (Lieutenant-Colonel late of the Coldstream Guards), Lieutenant E. Sawyer, Ensign H. Micklem; 6th Wokingham, Lieutenant-Commanding J. E. L. Grover, Ensign F. L. Soames. The force, after being inspected, went through various evolutions with the utmost precision. At six o'clock, the Commandant and officers of the force, with numerous officers of other branches of the service and influential residents of the county, amounting to 800 guests, sat down to a dinner provided in a spacious tent erected on the ground, and the old park was a scene of animation until a late hour.

WILTSHIRE.—By permission of Sir Frederick Hutchinson Bathurst, Bart., a grand review of the Rifle Volunteers of Wiltshire and the adjoining counties will take place at Clarendon Park, near Salisbury, on Wednesday, Sept. 26.

NEWS FROM THE SEAT OF WAR IN ITALY.

[From our own Correspondent.]

Naples, September 8, 1860.—The events of the week are without doubt the departure of the King on Thursday the 6th inst., for Gaeta; and the arrival of General Garibaldi on the 7th. These, as may well be supposed, surpass all others in interest, and completely occupy the attention of the metropolis. The reports from the provinces during the early part of the week were more and more discouraging to to the royalist party, fresh provisional governments forming in all directions, desertions from the army, and capitulation of the troops, boded ill for the descendants of the Bourbons; to add to the confusion, the ministry resigned, and the King was left to his own counsels. On Wednesday it was reported in the city that Garibaldi had arrived at Salerno; a telegraph message sent from the Palace to inquire what was the real state of affairs at Salerno was intercepted by the Garibaldians at an intermediate office, from which the clerks had fled; they immediately insisted upon the return of the officials, and caused a telegraph to be sent in answer, as if from the authorities at Salerno, announcing the successful entry of Garibaldi at the head of a large force the surrender of the troops, all of whom were represented as having laid down their arms. This intelligence, although at that time untrue, being so like what had taken place in many other localities, was implicitly believed, and had the effect of precipitating matters here and hastening the departure of the King for Gaeta. Francesco Secondo, thus beset with doubts and dangers, finally determined to embark; and, quitting Naples in a Spanish war-steamer, stopped for a short time off Baia, steamed out, an Austrian steamer following him. As soon as this event, so long expected, was certainly known, a deputation composed of the principal inhabitants of Naples left by train for Salerno, to wait on Garibaldi, and request his immediate presence in the capital. A second and a third deputation are said to have followed, urging upon him the nesessity of this step to the preservation of quiet and good order. To all these the Dictator, as is his wont, returned courteous answers. It was soon known in Naples that he would arrive about half-past 1, p.m., upon Friday, the 7th, yesterday. At an early hour the town was in a state of great excitement, and the whole force of the national guard was under arms. Banners were hastily made by sewing pieces of coloured stuff together in the order of green, white, and red, and no sooner made than they were displayed from all the windows and balconies; pocket-handkerchiefs and everything else exhibiting by any combination a union of these colours were eagerly bought up; and striped ribands of every description flowed in streamers from poles, or were worn scarf-wise by the ladies. Persons possessed of private carriages were requested by notice posted on the walls to send these vehicles to the railway terminus to be put at the disposal of the Dictator and his suite, as it was not known in what number they might come. At length, punctual to the hour, the train arrived, and with it the expected visitors; the crowd of spectators awaiting it may be more easily imagined than described. It was no easy matter to extricate the carriages from the crowd, but once out of it the drive was a rapid one. The General put up first at the Palazzo della Foresteria, and there, from a balcony addressed the immense crowd (that his name had in a few minutes collected) in a brief speech, of which the following is the translation:—"You are right to rejoice. I have come here to vindicate your rights. This is indeed a day of exultation for all Italy, of which you are the most beautiful portion—Italy, a great nation, but nevertheless unfortunate. This is a period in which you quit the days of tyranny in order to commence those of liberation. I thank you for this solemn act, not only in my name and that of the Italians, but in the name of humanity, and of all Europe."

At the close of this speech, which was received with unbounded applause, the general was forced to remain upon the balcony for some time, to gratify the anxiety of the multitudes that desired to catch a glimpse of the deliverer, of whom not only they, but the whole civilised world, have heard so much. About half-an-hour afterwards Garibaldi left the Palazzo della Foresteria, which is in the Palace Square, and drove through the Via Toledo to the Palazzo di Augri, where he has taken up his abode for the present. The passage of the Toledo was a triumphal march, slow by necessity, owing to the crowded state of the streets; and, in consequence, every one had an abundant opportunity of seeing the famous warrior as he passed. The waving of banners and cheering were unceasing along the whole route, and it must have been no little relief when the palace was at last reached. The noise now became deafening, and Garibaldi was forced to show himself upon the balcony. The triumphal cars, processions, waving of banners, shouting and cheering, were kept up until a late hour, excepting only in the neighbourhood of the Palazzo di Augri, where, when it was known that the general was reposing, the intelligence spread like lightning, and a silence, as if produced by magic, was the result. The town was brilliantly illuminated last night, and several decrees from the Dictator posted on the walls; one declaring that all the Neapolitan men-of-war at present in harbour were handed over to Admiral Pesano (Sardinian) for the King of Sardinia. The Neapolitan ships saluted Garibaldi, after which the forts also saluted. The royal palace and several other places are still guarded by the royal troops, but few in number, and all will be, it is expected, surrendered to-day. The names of a provisional government were published yesterday, but at a later period a notice appeared to the effect that this had taken place without authority, as no government had as yet been formed. The King still reigns at Gaeta, and has 8000 troops; it is said he is going to make a junction of forces with Lamoricière, and give the war steamers he has at Gaeta to Austria.

On Tuesday morning last Vice-Admiral Hope Johnstone, Commander-in-Chief at the Nore, arrived at Chatham in his steam yacht, and proceeded on board the Wellesley, 72, Captain G. Goldsmith, C.B., where he inspected the officers and crews of the whole of the ships in ordinary, who were mustered for that purpose. After making an inspection of the vessel, the admiral re-embarked on board his yacht, and returned to Sheerness.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

ELSTOB'S RIDING BELTS,
Hunting Drawers, Breeches, Knickerbockers, Elastic-seated Riding Trousers, 32*s.*; Bedford Cords, best quality, 42*s.*; Belts and Drawers, 21*s.* each.—
12, AVERY ROW, BROOK STREET, NEW BOND STREET, W.,
(Exactly opposite Ford's Hotel in Brook Street).

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

RIFLE & ARTILLERY DUTY-BUGLES, TRUMPETS, &c.—Volunteer Corps are respectfully informed that the patterns approved by Her Majesty's War Department can now be had of the Makers, Messrs. RUDALL, ROSE, CARTE, & CO. Price, with Lines and Tassels complete, Two Guineas.
SILVER BUGLES, for Presentation, from Twenty Guineas.
ELECTRO-PLATED BUGLES, in Case, Four Guineas.
BUGLE and TRUMPET-MAJOR DUTY-BOOKS, 3*s.* each, giving instructions, and all the regulation sounds.
DRUM MAJOR DUTY-BOOK, 4*s.* FIFE-MAJOR DUTY-BOOK, 3*s.*
PERCIVAL HUNTING-HORNS in Copper and Sterling Silver.
RUDALL & CO.'S PRICE LIST, with Guide for the Formation of Bands, and Corps of Flutes and Drums, and Estimates of Cost, sent free per post.
Military Musical Instrument Manufactory, 20, Charing Cross, London, S.W.

NOTICES TO CORRESPONDENTS.

O. E. M. D.—The 61st Regiment is daily expected home, but we do not know the exact date of its departure from the Mauritius.

A correspondent from Portsmouth writes to correct an error in our last. The "clerks and others" employed in the Gun Wharf, however much they may admire the Volunteer movement, are too fully occupied in the performance of their official duties to take any active part in it, and are not about to join the local Volunteer Rifles.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, SEPTEMBER 15, 1860.

It is well worth while to draw attention to a question which may be rudely solved for us, if there be any foundation for our suspicious and ill-concealed apprehensions. It is a question indeed which cannot be said to be new or neglected. The Admiralty are supposed to be considering it. The *Times* has more than once, and again very recently, discoursed of it; but as yet there is but experimental tentatives to guide us towards any result; and it is because we think the experiments have been taken to mean too much and too little, because we are of opinion the arguments founded on them are fallacious, that we propose to offer a few observations for the consideration of those who take an interest in the most important problem which can affect the naval power, and with it the whole power, of England. With the political calculations and chances of war with France we have nothing to do. It is enough to remark that we are reasonably jealous of the efforts made by France to raise her Navy to a magnitude which, as we contend, is beyond her legitimate requirements; and that the Admiralty, in which the nation confides, not merely for its defence, but for the maintenance of its naval supremacy, and to which, in virtue of that confidence, enormous estimates and all but absolute irresponsibility are freely given, is engaged in the work of capping the Emperor as hard as it can. Paper returns show that the Admiralty has not been unsuccessful. We have more ships afloat than the French, so many more that we can almost claim the attainment of our old ratio of preponderance in pendants and seamen afloat; and although we may not show to the same advantage in ships on the stocks and in ordinary, we have a decided substantial superiority over our ally in all respects, with the exception of our naval reserve, of the machinery for manning our ships, and of one matter which we shall advert to immediately. Our fleet consists of wooden ships, armed with smooth-bored guns. Whatever the cause may be, there is delay and difficulty in procuring the new breech-loading cannon of precision, whether they are Whitworth's or Armstrong's, for our ships of war. There is, indeed, reason to fear that these new species of ordnance give better results in the small diameters, and that it will be a long time ere large guns, like our old 95-cwt. smooth-bores, or our 10-inch guns, can be manufactured and tested satisfactorily in sufficient numbers to meet the wants of our Navy. The larger breech-loaders seem to have a facility in bursting—at least we read of the Elswick guns going off the wrong way very frequently. If we are to judge by the published results of practice at low elevation, obtained from Mr. Whitworth's 100-pounder at the official trial, we should be little disposed to concur in the extreme satisfaction which the officers are said to have expressed thereat; and we know that the gun, however excellent it may be, is rather short, though it weighs four tons, for good sea-service. Be that as it may, our ships are armed with smooth-bore guns, and very few of the Armstrongs, and none of the Whitworths, as far as we know, have yet found their way to the deck The heavy guns on board our fleet, whether they be 68's, or 95 cwt., are most formidable ordnance. No combination of wood can stand them; if men will stick to them and work them with precision, the target which does not return their fire as rapidly and as truly must be smashed. Neither can stonework resist them long if they can be brought close enough. It has been found, however, that iron or steel plates of sufficient thickness placed on wood, either at an angle of 45 degrees, as Mr. Jones proposes, or at the usual inclination of a ship's sides offer the most formidable opposition to the flight of the heaviest shot fired at very short ranges, and that therefore—mark this!—at ordinary ranges vessels covered with such plates, and properly constructed, may be considered proof in the hull against the horizontal fire of smooth-bore guns. Now, what we wish to point out is the important question involved in the words "short" and "long ranges." The Admiralty experiments, ably conducted and costly as they have been, are necessarily limited. A section of some inventor's realised idea is bolted to a ship's side, and then from a distance of 200 yards or so the best gunners in the service send shot after shot to the same mark—to the very same bull's eye—within a few inches of each other. If the invention does not stand that test it appears to be laid down that the plates are useless, and that the project is worthless—so at least we read the judgment pronounced in public after the experiments. Now, it may so happen that a vessel covered with plates of iron, though these plates individually could not resist the continuous fire of 68-pounders on the same spot at 200 yards, may be a tremendous antagonist, capable of destroying a fleet of wooden first-rates with something like impunity, provided she can steam thirteen knots an hour, carry a week's coal for full speed, and be armed with guns at least as heavy as those of her antagonists. We will go so far as to admit that Mr. Whitworth certainly, and Sir William Armstrong probably, could pierce the plates on that ship's sides at 400 yards, and that some of their guns may be on board the fleet to be assailed. The broadside of a line-of-battle ship is very formidable, but if it were delivered at a distance of 500 or 600 yards against an iron-plated ship, the probability is that a number of shots would go for nothing, and that few plates would receive even two shots at once. It must be remembered that broadsides are delivered in running fire, and that salvos would soon shake a ship to pieces. The return fire of the iron ship on the wooden ship would be tremendous, because at 500 or 600 yards heavy shot would tear open the heart of oak as if they were of paper. But suppose that the cuirassed floating battery carried heavy rifled guns, firing from exceedingly small ports, covered with proof mantlets, what resistance can an ordinary liner hope to make? She cannot come to close quarters, for the speed we have given to our man-of-war-in-armour, and which is claimed for one specimen of the class in possession of our neighbours, can only be attained by a few exceptional liners. She cannot get away for the same reason. The enemy, in fact, holds the same relation to his antagonists, that the knight clad in mail of proof, bore to the half-naked press of footmen through which he ploughed his way as he chose in chivalric battle-fields, except that he professes far greater relative speed than his prototype. She can select her mark—doubtless the weakest and worst will come first; and

Digitized by Google

there is really no reason why a steel-cased floating battery, under the conditions we have named, might not destroy a whole fleet of wooden ships, unless they were provided with some extraordinary and unindicated means of destroying their awful opponent. Such, we maintain, would be the result, if the battery were covered with plates, which might be pierced indeed by Whitworth's bolts at short ranges, but each of which would give way to nothing less than fifteen or twenty rounds of a 68-pounder at 200 yards. If her opponent had no Armstrong or Whitworth, the case becomes all the stronger. If she be cased in plates which can resist the only arms of precision we can hope to see on board our ships for years to come, we confess that she is a tremendous engine, more formidable than an armada — a political machine which may change the destiny of empires. Can such a vessel be made? The French say "Yes;" the Admiralty (which is here in effect England), say, "We don't know—we think about it—we are busy trying the question." Is there such a vessel? The French say "Yes." The Admiralty diffidently say, "Certainly not in England." But the Warrior is getting on, not off the stocks though, and we are making experiments.

The Gloire, which is now afloat, is represented to us as completely and astonishingly successful. The Normandie has not yet a plate on her sides. But at Brest and Toulon there are, it is stated, six sister ships to the Gloire in various stages of forwardness. The experiments on iron plates have long been carried on in France. We have reason to believe indeed that a composition of metal more tough, light and elastic than iron or steel has been discovered in France, whereas our plates have been broken, except when placed at angles, or prepared with great care and at much expense. It is assumed that our new guns are far better than the French canons rayés; but our personal knowledge induces us to doubt if the advantages in range and precision of the Armstrong over the new rifled gun of our neighbours are very considerable, and the French gun has pierced the English plates submitted to the test with disagreeable facility, if we are to credit our informants. In America, Steevens's steam-ram is by no means given up. On the contrary, the whole mechanical skill of the navy department has been exercised in fitting the machine for service; and when war arises, she will be ready for it. The only occasion on which iron-plated vessels were actually exposed to an enemy's fire was at Kinburn, when the French had the honour of mooring their floating batteries, the Devastation, Lave, and Tonnant, within 500 yards of the sea-face of the fort, and received a fire which might as well have been of snipe-dust, whilst their broadsides brought down masses of masonry; and so far the experiment was successful. Solferino and Magenta have borne witness to the excellence of the new system of warfare adopted by the Emperor of the French. We do not believe he is an infallible guide, but if he really entertains the designs which are attributed to him, we ought to fix our eyes on the machinery which he is preparing to carry them into effect. It is conceded that the money consideration goes for very little in considering the means of assuring our superiority at sea. It would be a small satisfaction to the nation to have the Board of Admiralty in its power if we lost the Channel fleet; nor would it be accepted as an excuse for catastrophe, that Captain Hewlett's experiment had not been completed when the war broke out. We should like, in fact, to see iron-cased vessels, as good as we can make them, launched and on the stocks, one for one as France puts her cuirassed men-of-war to sea or on the slips. The precaution may be expensive, but events may prove that it has been adopted in a spirit of the wisest economy.

With reference to the animadversions of some of our contemporaries upon the conduct of Colonel Gold in the affair with the New Zealand rebels, we may mention that that officer returns to England upon his promotion by seniority to the rank of Major-General, which took place in June last. It is already known that Major-General Pratt had proceeded from Melbourne to take the command, which he had a right to do, New Zealand being included in the Australian military command. In taking this step Major-General Pratt only anticipated the wishes of the home government, from whom instructions had been sent out some time since that he should repair to the disturbed colony. We may add that a regiment (the 2nd battalion of the 14th) sailed last week to augment the force in New Zealand.

Whenever a military disaster, great or small, happens to our Army, there is good reason for believing that the commander was incompetent, or the arrangements made by him were deficient. No one ever can for a moment question the gallantry of the men—even the disgraced officers dare not openly impute want of courage to their soldiers. In this unfortunate affair in New Zealand it would seem as if Colonel Gold, who was near the scene of an action then going hard against our soldiers, did not hasten up to their relief with the proportionably considerable force under his command. It is intimated that there was a river between him and Major Nelson's party, and if it was not fordable, or could not be turned, there is an end of the question. Let us suspend our decision on that point. On another part of the intelligence there is, however, no need to speak hesitatingly.

The Grenadier Company of Her Majesty's 40th Regiment, if accounts be true, seems to have been annihilated; for, if thirty-three men of it fell in the engagement, very few can have survived. The disaster would have been impossible if the whole force had been kept together, and advanced with its guns, instead of being split up into three small parties, so separated that one appears to have been of little use to the other. Armed with fowling-pieces and towahawks, the natives not only repulsed the charge with the bayonet, made by one party of infantry under the fire of their artillery, but attacked the guns, and killed some of the artillerymen. Now, it is rather ridiculous to insinuate that the troops were beaten because they were disciplined. It might as well be argued that they should have been armed with hatchets and fowling-pieces instead of rifle and bayonet. As far as we can make it out, the natives managed to outwit us. It is very likely that our men advanced confidently to the stockade, thinking the enemy were cowed by the artillery fire, and that they found themselves suddenly confronted with a much larger force of the New Zealanders, who started up out of the trenches, and attacked them vigorously. We may well suppose the fight was stoutly maintained by our men, but we are struck with the disparity of the losses among the sailors, who numbered 60, and who had 10 casualties, and that in the two companies of the 40th, which lost 46 killed and wounded. One officer was unfortunately killed in the retreat, which was necessarily precipitate. The largest estimate of the number of the natives is 1000, and it is something astonishing and mortifying to learn that 347 British soldiers and sailors, led by experienced officers and supported by the fire of grape, and shot, and shell from regular artillery, were obliged to retreat before three times their number of men armed with tomahawks and fowling-pieces, and to leave their dead and wounded in the hands of men whose immediate ancestors were barbarous savages.

It is impossible to exaggerate the importance of the principles laid down by the Commander-in-Chief of the Indian Army in the General Order of 26th July, which all our readers must have perused with great satisfaction. The very atmosphere of Simla was, no doubt, laden with protests against Sir Hugh Rose's doctrines, heard for the first time in the head-quarter bungalows. We have known more than one appointment to have been bestowed there on very different principles from those which are, we are told, henceforth to guide the new commander. We have heard of regiments being moved to pleasant stations by the influence of a few soft words, to the astonishment and indignation of the unfortunate battalions which did not possess such fair advocates, and which were in consequence sent to military limbos out of their turn. Those who are acquainted with the peculiar forms of interest which are developed in India more largely than at home, will not require to be informed how potential they have been, and in what varied shapes they exercise their influence. But now they will be submitted to a rigid alchemy, and must all pass through the same alembic. The testimonials required from candidates for appointments, if given in the spirit in which they are asked for, are as satisfactory tests of fitness as the most elaborate competitive examinations, and will go far to secure the highest efficiency in the military service of India.

Sir Hugh Rose is assuredly bidding high for the regard of his countrymen by adding to his brilliant military services in the great Indian campaign, administrative successes, the career of which has been inaugurated. His moral victories will be as remarkable as his strategy, if he carries out his programme in the face of the traditions and impediments, of which all who are acquainted with India must appreciate the strength. It must not be forgotten that the Commander-in-Chief is a man who has given many proofs of sagacity, as well as of other mental powers. His energetic and excellent dispatch to Admiral Dundas when, left as consul at Constantinople at the period of the Menschikoff mission, he urged that gallant officer to bring up the fleet from Besika Bay, is better known than many of his more important writings; but Sir Hugh Rose was esteemed as a valuable diplomatic servant of the Crown ere he achieved the reputation of being one of the first soldiers in the British Army. We shall watch with great interest the course of appointments in India, as the names will now be a sort of calendar of good officers, and we trust that Sir Hugh Rose will soon find himself able to leave Simla, and to inaugurate the camps of instruction which he has promised, and from which the greatest benefits may be expected to accrue to the Service.

Vice-Admiral the Hon. Sir Richard Saunders Dundas, K.C.B., left London on Monday last for Devonport, and Rear-Admiral the Hon. F. T. Pelham, C.B., returned to the Admiralty. The members forming the Board at Whitehall during the week have been Rear-Admiral Pelham, Captain Charles Frederick, and Mr. W. G. Romaine, C.B.

In our last number we mentioned it as probable that Major-General Sir George Buller would succeed to the colonelcy of the 88th, vacant by the death of Lieutenant-General Horatio Broke. The gallant general's appointment will be shortly gazetted.

Colonel Percy Herbert, the newly appointed Deputy-Quartermaster-General, will not we believe enter upon his duties until the 1st of November, when Colonel Gordon will be relieved. Colonel Pocklington, whose nomination to be Assistant-Quartermaster-General in succession to Major-General O'Brien we have already announced, will at once undertake his new duties at the Horse Guards.

A respected contemporary, who has the advantage of appearing six times for our once, has rather pleasantly and learnedly taken us to task for expressing our opinion that, unless a soldier felt himself justified *in foro conscientiæ*, and by the belief he was fighting for liberty, he had no business to join the Italian army of Garibaldi; and that, if from the mere "desire of excitement," or of "seeing service," and without any other motive or excuse, he fought in the field against the regular troops of a State with which we were not at war, he was committing something very like murder as accessory or principal. We quite agree with Mynheer Grotius on the matter; and, though we have not consulted either him or Puffendorf, or Vattel, on the subject, we are quite sure that the principles laid down by us were in strict consistence with international law, and the *publicum jus gentium*. As to fighting for liberty, well and good. Heart and hand fight for it and support it. But then we must be prepared for the application of the doctrine and the use of the right in other quarters. Our definition of liberty may not be accepted by others—Our contemporary will understand what we mean.

The Anson, 91, screw liner, is to be launched this day, at the top of high-water, from Woolwich dockyard. It is expected that a vast concourse of people will be present to witness the ceremony, and tickets for admission to the yard have been liberally granted by the authorities. We would, however, suggest to those persons who have not been so fortunate as to obtain tickets, that they will obtain a capital view of the launch from the Essex shore, to which trains will run from the Fenchurch Street Station during the morning.

We are sorry to learn that the illness under which we stated that Lieut.-General Sir Harry Smith was suffering, has assumed an aspect serious enough to cause great anxiety as to the result.

The following gentlemen passed their examinations as naval cadets and masters'-assistants at the Royal Naval College, Portsmouth, on the 5th, 6th, 7th, and 8th inst., and have received their certificates accordingly:—For naval cadets, in the order named—Between 14 and 15 years of age——Messrs. J. D. B. Pryce,† E. H. Holdham, G. S. M'Ilwaine, M. D. Daubenay,* E. S. Ensor, G. Worth,† and E. Darval. Between 13 and 14 years of age—B. Watson. Between 12 and 14 years of age (new system)—Messrs. A. W. Hamilton, E. W. Turner,* D. G. Boyes,* W. H. Fawkes, C. L. Rooke, H. C. Bigge, R. Custance, Hon. R. Bingham, T. H. Hemery, J. Hicks, G. Mainwaring, C. Harding,* Hon. H. L. Culfe, D. O. Murray, W. C. Haynes, T. T. Hodgson, A. C. Carew, C. R. Congreve,* J. J. L. Sisson, A. D. Fanshawe, E. H. M. Davis, E. J. Foljambe, E. V. Bridgman, C. T. Turner, S. S. H. Dickens,* H. M. Barkley, C. H. Herring,* E. M. S. Claremont,* H. E. S. Cruttwell,* A. C. B. Bromley,* H. T. G. Tipping, R. L. Smart, W. B. Kennell, C. C. de Crespigny, A. Carpenter, Hon. E. T. Needham, S. J. Johnstone, O. F. Glanville, J. D. B. Lopez, J. P. de la Pole Beresford, C. K. Hope, W. D. Morrish, J. H. Jacob, E. J. V. Pritchard, R. B. Clements,* A. K. B. Granville,† H. N. Lowe,* L. A. de Saumarez, and J. E. F. King.* For masters'-assistants.—First Section.—A. Douglas and F. G. Freeman.† Second Section.—Messrs. L. B. Palmer, C. Brent, G. S. Brodie, F. H. Smith, F. N. Maxwell,† G. A. Broad, J. E. Petley, M. S. Bell, and H. J. Parker. Third Section.—Messrs. N. Child, F. C. Baker, G. G. MacEvan,† and J. A. Jones.† There were 88 candidates in all for examination. Those marked † passed from the Eastern Parade, Academy, Southsea; and those marked * from North Grove House, Southsea.

Mr. Sidney Smith Dickens, who figures in the list of young gentlemen who have lately passed as naval cadets at Portsmouth, is the son of the eminent author, Mr. Charles Dickens.

THE ORGANISATION AND USE OF CAVALRY.

(*From the posthumous papers of the late* FIELD-MARSHAL RADETZKY, *written in* 1837 *to* 1838.)

Under the above title the last number of the Austrian Military Review* publishes the following document, which, from the name attached to it, acquires an importance of no common order. We have translated the document literally, without omission or condensation:—

Since I entered the army, now more than 50 years ago (writes the late Field-Marshal), cavalry was that branch of the service for which I had the greatest predilection, not because one weapon should necessarily have a positive preponderance over another, but because its peculiarities and practical working were most in keeping with my inclination and character. I have, therefore, often made the cavalry, its organisation, its use, its perfection, the favourite subject of my study.

In the great and warlike epoch through which I have lived I have acquired much experience. Often have I seen the cavalry achieve brilliant successes, but much oftener I have seen it improperly used or not brought into action at all, either because the commander did not possess that falcon glance which, like lightning, sees and takes advantage of the propitious moment, or because it was at the outset badly placed, and when wanted, not at hand; but especially because it was scattered, placed here and there, and thus, like a giant, deprived of its strength.

It is the fault of many generals—I except those of the Austrian army—that they fancy they cannot do anything without cavalry. If the commander-in-chief gives in to this weakness, the result is a scattering of the cavalry, which is decidedly detrimental to the operations.

The strength of cavalry lies only in attack; is so far only in defence when it drives back the attacks of an opponent. Standing still, it can never fight; consequently it is most erroneously employed when made a sort of military display of, a rhodomontade of the battle-field, ordered up into position, and exposed to the enemy's artillery. How many regiments have I not seen decimated, which would have decided the fate of a battle.

If in the history of warfare it is seldom found that a victory has been gained by cavalry alone, it is also equally true that victories gained without the proper employment of cavalry, have never led to decisive results. Troops should fight, not for the honour of the day, but for the advantages to be derived from victory, and the whole advantage of a victory lies in the further advantages that are derived from it. Victory itself is often a chance; the use of a victory never; for that alone proves that the general had an object clear in view. Many a general gains a battle and does not know himself how he did it, and consequently is at a loss to know how to turn it to account; he is like a poor man who has suddenly fallen into a rich inheritance.

Cavalry, from its very nature, is a weapon which achieves a quick but not a lasting success, because its power though destructive is not permanent. Armies of cavalry, of which history gives us many examples, have never achieved conquests of duration; they sweep over the earth and vanish as quickly as they appear. The most permanent conquests made by any people are those of Rome! It might be said that their effects may still be traced in the political structure of Europe, as well as in modern strategy. But Rome did not owe her victories to her cavalry, but to her immortal legions. The East has always been distinguished for its splendid cavalry, for where a country produces many and excellent horses the people naturally acquire a particular predilection for that weapon; constant company with horses makes a good rider, and a good rider makes a good and daring cavalry soldier. The Persians, Parthians, the Saracens, the Tartars, the Turks, and the numerous Bedouin tribes of the desert prove this; and should even the modern tactics of war, with all the science which is brought into play, reach those tribes, their predilection for serving on horseback would still prevail, for nature is more powerful than art. The Greeks and the Romans, the two great nations of antiquity who soon gave a scientific organisation to the art of war, did not, like the barbarians, follow a natural impulse or national peculiarities; they introduced art and order into the organisation of their armies, and endeavoured to organise their cavalry in proportion to the numerical strength of their infantry.

With the Greeks we soon find light and heavy cavalry (kataphrakt); the Thracian and Ætolian horse were celebrated; the early development which this arm acquired with the Greeks is to be attributed to their intercourse with the East, and in the care they bestowed on breeding horses, which was encouraged by warlike games.

The Roman cavalry was, as regards the moral elements of which it was constituted, a perfect model of perfection; for all that was noble in Rome served in the horse, and so much so that later the cavalry formed a third class between the patricians and the people; but, as regards equipment and mounting, it was inferior to the cavalry of many other nations whom the warlike genius of Rome nevertheless subjugated. It was, proportionally, too weak. A legion only numbered 300 horsemen; hence, in a usual consular army of four legions only 1200 horsemen. This proportion was afterwards increased.

In its early wars Rome had no enemy to meet whose cavalry it need have dreaded; it was only when it came in contact with Hannibal that it learnt to appreciate the value of efficient cavalry. The Numidian horse, which may probably be compared to the Bedouin cavalry of the present day, was not to be compared, as regards its moral value, to that of Rome; but it was much more numerous, and the horses were better and more ably handled, for Rome has never produced any great cavalry commanders. The only one who deserves mention in this respect is Lælius, the noble friend of the great African, and this general developed and formed his genius in the wars against Hannibal.

To its want of good cavalry Rome must attribute many of her defeats, and I believe that it is to this want especially that it is to be attributed that she did not extend her conquests beyond the Euphrates; and I am also convinced that any conqueror of our own day, who would wish to follow in the steps of Alexander, would have to organise a complete reform in the present European cavalry system. Crassus, not his legions, was conquered by the Parthians, because he dared to enter the plains of Mesopotamia without cavalry in proportion to that of the enemy. Under a broiling sun, emaciated by thirst, harassed by the numerous cavalry of the enemy, the legions let drop their unconquered sword, and he was defeated without a battle. To this was added, that the equipment of the Roman infantry—so terrible against infantry—was not efficient against cavalry, as the short sword was of no avail against cavalry clothed *cap-à-pie* in steel, and armed with a long lance. The ancients had regular fixed rules for placing their cavalry and infantry. Thus it was a universal plan always to place the cavalry on the wing of an army. This rule is deserving of some consideration. The battle-fields of the ancients were in a much smaller space than those of modern times. The heavy masses, the short distances that could be left, as there were no weapons to sweep over large vacuums, crowded the armies of the ancients into a small space. Thus it was difficult to find efficient points of support for the wing, and the ancients employed their cavalry to make up for the deficiency, as the wing of an army is always its most difficult point.

On the wings the cavalry has free scope for its movements, and does not interfere with those of the infantry. It cannot be driven back upon its centre, and throw the infantry into confusion, and hurry it along in its flight. If it succeeds in routing the enemy's cavalry it at once attacks the enemy in flank and rear. This is what made the defeat of Rome at Cannæ so decisive; and if Römer, in the battle near Mollwitz, had followed the example of Hasdrubal, the battle would have been won, and the lucky star of Frederick the Great would perhaps have been extinguished at its rise.

The ancients rightly understood that it is useless, erroneous, and contrary to the calling of cavalry, to order it to advance against the front and columns of bodies of infantry not yet shaken by battle.

Let us take an historical leap into the Middle Ages, and we find that the armies of those days consisted almost exclusively of cavalry; the infantry were a mere handful, and not considered of importance. The cause of this was the rise and development of chivalry, chiefly advanced by the Crusades, and kept up by tournaments. The predilection for cavalry was not however a national peculiarity; for the strength of the German tribes who defeated Rome did not lie in their cavalry, but in their infantry.

As regards the moral element, the cavalry of the Middle Ages was again the most perfect institution that could be conceived, for it consisted exclusively of the nobility, who from childhood were brought up to the use of arms, and knew no other ambition or occupation.

On the tactics of those days we have only uncertain data: so much however is certain, that they were very imperfect. The cavalry always fought in the first rank, as it was deemed cowardly to fight in the second. This rank was also thin, that each individual knight might have space to manage his horse, for each individual wished to conquer, not the whole body. The second rank consisted of pages and squires, whose sole occupation consisted to bring weapons and horse to the knight, and help him on again if unhorsed. The employment of the cavalry was equally faulty. A battle was a great duel. No man thought of taking advantage of a victory, as they only fought for the honour of chivalry. A miserable castle, a small circumvallated town, which now-a-days could not resist a battalion for an hour, would stop a victorious army. If a river was to be crossed, a permission was requested—a small noble would beard a powerful monarch. With all the noble elements of chivalry, with the many personal and great qualities which the history of those times has handed down to us, their wars can only make us smile; they do not provide anything for the advancement of science. It is usually asserted that the invention of gunpowder, and the revolution it caused in warfare, was the death-blow of chivalry and all its accessories, and its influence on the organisation of armies, and that it drew forth infantry from the oblivion and contempt into which it had sunk. This assertion is only partially true, for the greater portion of this change is to be attributed to the revival of the sciences and the study of classical antiquity. I am of opinion that infantry has not gained in power by the introduction of fire-arms, and that cavalry has not lost by it. The legions of Lucullus, who discomfited the kataphrakt cavalry of Tigranes, had no fire-arms; the Swiss who broke through the ranks of the Austrian chivalry had none either; and the Count Carmagnola could only conquer the Swiss battalions by making his cavalry dismount and fight on foot as best they could. Cavalry had fallen back again into its old position; from being the only and principal arm, it has become an influential side support.

Nevertheless, the invention of gunpowder had a decisive influence upon the spirit of warfare,—feudal armies gradually vanished, and standing armies took their place. The cavalry was no longer simply an institution for the nobility, it was formed from the same elements as the infantry; but centuries passed before the dislike to serve in the infantry was overcome, before men could be persuaded that cavalry without good infantry was a powerless arm: and the genius of great generals was required to solve this problem.

A marked change took place in the equipment and arming of cavalry. Over-estimating the value of fire-arms, the lance was taken away, and the cavalry armed with useless carbines, the calling and character of cavalry being lost sight of. The strength of fire-arms lies in its power of doing harm at a distance; but the duties of cavalry do not consist in fighting at a distance, it must meet its enemy face to face; its strength lies in cold steel, and in the rapidity and efficiency of its movements in getting out of range. Actuated by the same false views it was gradually deprived of all defensive weapons, forgetting that the horseman has to fight not only against bullets, but also against the bayonet, lance, and sword, and that a well cuirassed breast, a shielded head and hand give protection and confidence to the warrior in the fight. Extremes meet, and it is difficult to hit upon the *juste milieu*.

There was a long groping in the dark before a clearer view was taken in this chaos. At last it was seen that a horseman cannot be heavy and light at the same time, and that it is consequently necessary to keep those two qualities apart, and thus the necessity presented itself of forming light and heavy cavalry. In this manner (if I may so express it) the map-model of cavalry was drawn which we now find in all European armies, which was organised without regard to nationality, without a sufficiently clear conception of object and requirement: every army wished to have hussars, because they were once the dread of the enemy.

Every branch of science when it falls into the hands of learning loses in simplicity in proportion as it gains by many sided investigations. So it happened with the science of war; but there is nothing so dangerous as to attempt to improve strategy at the cost of simplicity. Nothing can be more useful than a study of the examples of great men; but to imitate them with slavish exactitude will assuredly not produce us great men. Gustavus Adolphus for instance mixed up small bodies of infantry with his cavalry, and is said to be indebted to this piece of military tactics for the victory at Leipzig. I will not challenge the authority of history, but should never follow such an example, for nothing would be more likely to throw the ranks into disorder. Why the formidable Imperial cuirassiers did not put a line thus composed to rout, the generals of that day must answer; but it is probable that they were badly placed and badly employed.

If the history of warfare were divided into epochs, the "Seven Years War" is incontestably the period where the history of modern warfare commences, whether it is that strategy, which hitherto slumbered in the genius of the commander, henceforth acquired a scientific treatment, or because the organisation of armies and their tactical development acquired a firm foundation.

For a long time the Austrian cavalry justly maintained a distinguished renown, in consequence of the many first-rate elements which Austria possesses for the formation of this branch of the service.

A castle won, and turned to good account, could advance the affairs of Frederick the Great in such guise that, with his comparatively small resources, no hopes could be entertained of retrieving the loss. He had the more to fear from the superiority of the cavalry of his enemies as his new infantry sorties, his quick-firing system, had not yet stood the proof, and then the belief in the superiority of cavalry over infantry was deeply rooted in the army. He therefore devoted the greatest care to the organisation of his cavalry, and the happiest success crowned his efforts. Aided by distinguished cavalry officers, his cavalry acquired the highest perfection according to the wants of that period. When enterprises of warlike princes are usually supported by distinguished commanders, the fact must be attributed less to their lucky star, than to their talent in discerning qualities in individuals, and selecting them from the masses. For many of his victories, but especially for that of Rossbach Frederick is indebted alone to the able manner in which his cavalry was handled.

MANNING THE NAVY.*

Captain Coles has been accustomed to a stirring life, and cannot remain idle. One day he appears before us as an artist possessed of no mean merit; on another he figures as a public lecturer, urging his plans for national defence with a degree of earnestness which proves his own conviction of their practicability; again, as at present, comes forward with a scheme to solve the problem of how our navy ought to be manned. Captain Coles tells us that he has had twenty-five years' experience in continuous and active employment at sea, and that he has never lost an opportunity that presented itself of interrogating seamen as to their predilection for the Royal or Mercantile Navy.

We have in this journal from time to time advocated the policy of entering, training, educating, and apprenticing boys in the Navy, and we are glad to find that our recommendations have found a warm advocate in Captain Coles, who, however, goes further than ever we dreamt of doing, for he actually advises the keepers of the public purse to maintain at a cost of about one million and-a-quarter sterling, a sufficient number of boys, who would always be at hand to supply the demand for lads, whether coming from Her Majesty or from our merchants.

"When the market is overstocked with any mercantile commodity, that commodity is cheap, but on the other hand, if scarce, the price is much raised. Just so with a sailor, he is always in the market, goes where he fetches the best price, and where he thinks he can better himself; in fact, taking advantage of the price of sailors in the market.

"The first point I would consider, and lay down as a rule, is, *that we must pay the market price!* But let us see if we cannot reduce the market price to a minimum.

"The Government being great consumers, will be repaid with interest by the cheapness and quality of the article—a sailor—by meeting the demand or overstocking the market.

"For example, suppose that we require 200,000 men for the navy and mercantile marine, I would keep up the supply for 210,000, thus having 10,000 seamen, or 5 per cent., always seeking employment in the market.

"The populace of the United Kingdom supplies the raw material, the boys, which must be collected by the Government and manufactured into a saleable shape at the expense of the country.

"To do this we must not trust, as at present, to the dregs of the seaports for boys, but get a good wholesome stock from the hardy, able-bodied, healthy country-people.

"A sufficient number of these boys must be educated in training ships or schools to supply the market with 210,000 seamen, or whatever number would be necessary to supply the demand for British seamen according to the annual return. These training ships or schools would be in certain numerous ports for the boys, who would be taken from twelve to thirteen years of age, and trained until fourteen or fifteen. According to their capabilities, they should be taught discipline, truth, cleanliness, reading, writing, cyphering, and the duties of a sailor; any of them showing a decided turn for mechanics, to be instructed as artificers, &c. Above all, let them be made good gunners, small-arm men, and swordsmen; teach them to be right good shots. The very idea of firing at a mark (which would only be done for the last six months of their schooling) for a few prizes and medals with our beloved Queen's head upon them, would greatly stimulate them to perfect themselves in the dry or less exciting part of a seaman's and a gunner's education, and create among them a loyal and a martial spirit.

"On leaving the training schools, let these boys be given their free choice of entering the Royal Navy or the Mercantile Marine, taking care that the different advantages of both services shall have been clearly put before them."

We fear that the free-trade arguments adduced by the gallant writer will be among the strongest that can be brought against the adoption of his views. Our knowledge of seamen would lead us to infer, that in the majority of cases the temptation of high wages held out, if not in our own merchant service, in those of the rapidly increasing American and colonial commercial navies, would be too great, and that we should find, as in the case of the Excellent, gunnery ship, which has given our transatlantic cousins a succession of naval gunners, we had taken another step to provide our most dangerous competitors in the commerce of the world with a ready supply of a body of men, the value of which to ourselves could be duly estimated by considering the money and time devoted to them. We would rather see a plan devised for the certain manning of our Navy, plain and simple in its bearing, and entirely free from complication. We would desire to have an ever-flowing stream of boys from our training ships, and a thoroughly well-organised fleet of transport vessels of the Himalaya class. Thus provided, we should have no fear of a dearth of able-bodied disciplined seamen.

We have in the present day statesmen of vast administrative powers, a staff of officials endowed with great capacity, and naval officers of unquestioned talents. There can therefore be no valid reason why we should not very shortly set at rest all doubts as to "How our Navy is to be Manned?" We will conclude our notice of Captain Cole's letter by indorsing, with all possible goodwill, the following recommendation, which he makes while dwelling on the necessity of encouraging trained men in the Service:

"*A consideration of this magnitude must not be dealt with by mere makeshifts to meet present difficulties, but by a permanent, systematic, and well-organised supply of seamen gunners.*"

* *A Letter on Manning the Navy. Addressed to His Grace the Duke of Somerset, First Lord of the Admiralty.* By Captain Cowper Phipps Coles, R.N. (London: Bradbury & Evans, 11, Bouverie Street.)

THE NAVAL POWER OF AUSTRIA.

In proposing the estimates for the Austrian Navy, His Imperial Highness Archduke Ferdinand Max of Austria recently laid before the Council of the Empire a report on the origin and rise of the Austrian navy, pointing out the urgency of keeping the maritime strength of Austria on as efficient a footing as possible. This document is of considerable interest as an historical document, and, moreover, contains reliable data on the actual strength of the Austrian navy.

Already the great Empress Theresa, whose keen glance ranged far beyond an every-day policy, entertained the idea of founding a colony, and with that view sent an expedition to the Nicobar Islands to form a commercial settlement. With her death this plan fell to the ground; and Austria found herself in the sad position of possessing an unprotected coast.

The French wars inundated Europe, and the defenceless sea provinces fell a prey to the enemy, and in the vicissitudes of war Austria acquired a large portion of the inheritance of Venice. Long lines of coast became incorporated into the kingdom, and with them arose the feeling of the necessity of a navy. The task was however badly taken up, badly conceived, and badly carried out. Instead of laying the ground-work for a strong Austrian navy, the Venetian republican naval administration was continued without energy or foresight; instead of creating a new system, an old rotten one was engrafted upon. It may be observed, *en passant*, that a far greater political fault was committed at the same time: from a dislike to maritime innovations, with the most impolitic blindness, Wellington's proposal that Austria should take Corfu and the Ionian Islands was rejected. The above inherited marine was up to 1848 carried on under a slovenly organisation. Nevertheless this decaying body rendered good service in advancing the position of Austria and the then flourishing trade, in the Greek insurrection, and in the war in Syria—services which were acknowledged in the English Parliament. After passing in review the events of 1848, the Imperial writer dwells with bitterness on the fact that a Piedmontese admiral, with a small squadron, was able to command the Adriatic and blockade Trieste. Naval reform was then taken up by Schwarzenberg, Radetzky, Hess, Nugent, and others, and the appointment of Admiral Dahlerup gave a new impulse to the Austrian navy.

What (continues the Archduke) ought then to be the object of an Austrian navy? Its duty should be to defend the coast line, which, including the numerous islands, has almost the extent of that of France, to give impulse to commerce, to foster and protect it, to protect the honour, lives, and property of Austrian subjects abroad, and finally to attain a position which would render great service to either of the two great maritime powers by an alliance in the Mediterranean. By thus holding the balance Austria would be prevented sinking to a second-rate power.

Recently the naval question in Austria has, in a statesmanlike point of view, entered a still more important phase. The long coast-line and tracts to be defended remains the same, but in the Mediterranean, and especially in our inland sea, a first-rate power is being formed under the blinded eyes of Europe, with a long extent of coast, a numerous body of excellent seamen, and well-developed pirate principles. This power will soon count, with the Sardinian and Neapolitan fleets, 2 screw-liners, 16 steam-frigates, and 40 other steamers and sailing vessels; it will command the strong points on the Adriatic.

If Austria after these considerations should neglect to develop her naval resources, she will inevitably fall to the rank of a second-rate power; it will be optional for Italy to plant its victorious tricolor in Istria and Dalmatia. It is an unquestionable fact, that from any point of the Italian coast an invading army of 15,000 to 20,000 men can, in less than twenty-four hours, be landed on any one of our maritime provinces, unless prevented by a powerful steam squadron.

We must then come to the conclusion that Austria must either raise her naval strength to that point which will enable the state to do its duty towards its subjects, towards commerce, and towards its own dignity and position as a great power, or that, like Germany, it must bring its ships under the hammer; for a small navy is for a great state simply a piece of luxury which leads to inconveniences.

But then, let Austria at once abandon her whole line of coast. It is more honourable to give them up betimes, than have to yield them in the next war.

But, if Austria can get up a fleet capable of defending her coasts, which would in time of peace protect her commerce far and wide, our maritime provinces would become flourishing and prosperous, and our maritime commerce would assume that high position Nature intended for it, and the great political result be attained, that England and France would court our alliance; for, in a European war, it could not be indifferent to France or England that a well organised steam squadron should be stationed a few hours from Corfu and the Italian coast.

Let us now take a glance at the possibility of achieving this object. It must fill every true Austrian with joy to find what excellent ports, what good materials, what able sailors, we possess.

What is wanted then to attain this desired end, except sufficient funds? Let not the Imperial councillors start at this assertion! The navy does not require large sums down at once; it is a body which develops itself gradually, that wants a reliable budget to count upon. As to form a navy time is requisite, the great works must be divided into periods; to render this possible we must be able to rely upon certain well-divided sums.

Already do we possess, thanks to the exertions made during late years, few, it is true, but excellent ships. We have a ship of the line produced exclusively from home resources; we have 3 steam-frigates, and steam-corvettes and sailing vessels. Docks on a large scale are being erected at Pola; we have a floating battery to protect the entrance to Venice; we have gun-boats of the most recent construction on the Garda Lake and on the Lagunes of Venice.

Despite these outlays we have as yet on the average not used more than 2 per cent. of the state's revenues.

As will be seen from our budget, we have, I may publicly state it, saved money to construct, which cannot be said of any other branch of the service in Austria.

With a bleeding heart we only estimated the navy budget for 1861 at 5,000,000 florins (500,000*l.*)—Owing to the wants of the army we have put down the budget of the flotilla at 1,000,000 florins (100,000*l.*); and, despite this, we hope by hard exertions, and unhappily without being able to attend to the commercial marine, to put on the stocks the ship-of-the-line Œsterreich, and to complete the steam-frigate Habsburg, of 51 guns, to build 2 large and 1 small gun-boats, to convey the material and machines for building from the dockyard of Venice to Pola, and to make Venice simply the port of the Lagunes. To do all this with such little means, we have reduced the staff of admirals to three, and introduced the strictest economy.

The present condition of our navy now stands as follows:—

The navy counts 6952 men, viz.: 3 admirals, 215 staff and commanding officers, 161 midshipmen, 7 chaplains, 7 commissaries, 6 auditors, 48 surgeons, 95 engineers, 119 surveyors, 125 servants, 1990 sailors, 1225 artisans, 1616 marines, 71 supernumeraries, and 1264 civilians.

Vessels in ordinary: 3 frigates, 4 corvettes, 12 steamers, 4 brigs, 8 schooners, and 1 sloop; the ship-of-the-line Kaiser, and 2 sailing-frigates have their guns in; 1 screw-frigate and one screw-frigateare nearly ready, and 2 brigs and 1 sloop are preparing as transports for 1861.

The flotilla in the Lagunes and on the Lake of Garda count 56 superior officers, 4 surgeons, 14 officials, 1851 men (crews); and the flotilla on the Danube, 22 officers, 2 surgeons, 13 officials, and 853 men. The vessels of the flotilla are: On the Lagunes and Garda Lake—the steamer Gorzkowsky, an iron steamer for transport; the gun-boat Galatea, as guard-ship at Chiogia: the Vesuvio, as guard-ship at Alberoni; the steamer Franz-Josef, on the Garda Lake; 1 boat on the Mantua Lake; and the steamer Verona, on the Po. Of the Danube flotilla, the steamer Albrecht is at Pesth, the steamer Schlick, at the mouth of the Danube, and 2 steam gun-boats at Semlin.

THE NATIVE WAR IN NEW ZEALAND.

(From the *Sydney Morning Herald.*)

By the Prince Alfred mail steamer we have papers from New Plymouth (Taranaki) to the 30th of June.

She brings news of a very painful and disastrous character. An advance upon the rebels' pah at Waitara has been made, and, after fighting for more than four hours with great gallantry against large numbers of natives, covered by their entrenchments, our forces were obliged to retreat, leaving 29 dead and 33 wounded on the field. The die is cast. It is plain that we have a foe to deal with who is not to be despised; it is equally so that he must be put down at all cost. Major Nelson and Captain Seymour, with the whole of their men, appear to have behaved with great gallantry, and in a manner equally removed from over-caution or foolhardiness. The *Taranaki Herald* says:—

"While last Saturday's sheet was printing guns were heard at Waitara; and the Tasmanian Maid on Tuesday brought intelligence that a reconnoitering party of the 40th had been fired on by the natives from the pah restored at Puketakauere. This act of aggression loosened the hands of our military commander, and steps were taken to punish the insurgents for their growing boldness. Wednesday morning was fixed for attacking the pah. Guns and reinforcements of the 40th Regiment and of the blue-jackets were dispatched from town, and plans of proceeding canvassed by men with and without authority. Weather of the most inclement kind that this country knows added to the hardships of this preparing for the rough business. The reinforcements waded out through a sea of mud, under south-west squalls and showers. The Puketakauere pah consists of two stockades; one upon the intrenchments of the old pah of the same name, the other new, and apparently without entrenchments. They stand on a ridge formed by two small gullies. These gullies meet a little below the pah, and open on a swampy ground in the Waitara Valley, forming a sort of long Y, the stalk towards the river, and the stockades in the fork. The main body, consisting of the grenadier and light companies of the 40th Regiment, under Captain Richards, and 60 blue-jackets under 1st Lieutenant Battiscombe, of the Pelorus, with the artillery, approached the pah by the directest road from the camp, and at 6 o'clock a.m. the guns were brought to bear, and the men extended on the north-west or seaward side of the pah, the smaller gully between them and it. With this division were Major Nelson and Captain Seymour, of the Pelorus. A second division of about 50 men, under Captain

Digitized by Google

Messenger, was posted, on the flat of the Waitara, to cut off the retreat on that side; and a third, under Captain Bowdler, passed along the river banks, and attempted to take the pah in the rear. The natives were aware of the movement, and on the alert. The first firing was on the rearward party, and a Maori informant states that, finding the troops advancing on that side, many of the natives went out of the stockade, some of them endeavouring to escape, and some occupying the entrenchments of a second old pah, to the rearward of—that is to say, nearer to the Waitara than—the two stockades. It could be seen that the party under Captain Messenger was doing great execution on the stragglers who attempted to escape, and for a time it appeared as if the attack in the rear would succeed; but, after a short space, a large reinforcement from the inland settlements of Wi Kingi arrived among the high fern, and a fierce battle ensued, the natives greatly outnumbering the troops. The grenadier company of the 40th Regiment and the blue jackets formed the right wing of the main party in front, and extended beyond the head of the gully facing partly round towards the south-west side of the pah. Large numbers of the enemy came to the brink of the gully, and the pah was probably almost empty. The combatants were about 150 yards apart, divided by the gully, firing briskly and steadily, but not able to close except where the right wing overlapped the head of the gully, and here a desperate struggle took place with a party of natives who had a trench at one of the outworks of the old fortifications. Here was the hottest fighting and the greatest loss sustained by this division. Early in the day a messenger of the rebels was seen to start from the rear, and between 9 and 10 o'clock large reinforcements came from inland, part of which, as we have already said, attacked the 2nd and 3rd divisions, and the remainder outflanked the main body in front. Having held his ground for some time without reinforcements arriving, or any signs of a diversion appearing, Major Nelson gave orders to sound the 'retire.' Some attempt to follow was checked by a murderous fire from the artillery, and the main body retreated in order, and without serious molestation, and arrived in camp at 1 p.m. The other divisions were much harassed in their retreat, not having heavy guns to support them. We believe it was in retreat that Lieutenant Brooke and the other gallant fellows of these divisions were killed. They endeavoured to retire as they had advanced, but we fear some misunderstanding or mistake of the ground was partly the cause of the serious loss on this side. They had to fight their way back to the camp. There were men present cool enough to see that the British honour was not only sustained but exalted by this fierce struggle. The great numerical superiority of the natives alone made it necessary for our troops to retire. Officers and men fought with steadiness and energy under a fire which an Indian officer compares to that of Ferozeshah and Sobraon, and which a soldier of the Crimea states to have been hotter than that in the Redan. The gallant Captain Seymour, of the Pelorus, received a bullet in the leg. Lieutenant Brooke sold his life dearly, and fell only when his sword arm was helplessly wounded. Non-commissioned officers and privates were recognised in some cases singly and coolly firing on large bodies of the enemy, and then as coolly retiring. The enemy, too, showed unexpected resolution, and have proved the first body of men able to meet the British bayonet. It must not be omitted, either, that thoughtful preparations had been made by the excellent commander of the 40th for the day's work. Double rations of food were cooked; carts, bullocks, ammunition, everything was punctually at its place; and the excellent plan of operations and gallant conduct of the attack did fresh honour to the name idolised by Britons. This sanguinary fight would have been the annihilation of the native force at Waitara had more troops been present. The large army assembled about Kingi is a fine comment on the policy of our government, which stands trifling with mild addresses and Maori parliaments, while the men whom it seeks to conciliate gather by the thousand, with arms in hand, to give that dignity to the deliberations of their senators which belongs to a sense of their power. The blazing houses of Tataraimaka, in the rear of our retreating column on that side, are a further illustration of the system of pausing between every blow in a struggle to make overtures to the foe, and ascertain if he has made up his mind to continue the contest. Clemency is the privilege and embellishment of vigour. India might have taught what New Zealand is repeating, that the most tremulous hand makes the bloodiest work. The officers engaged were:—Naval Brigade.—First Lieutenant Battiscombe, Midshipman Wadlow, Midshipman Garnett; Lieutenant Morris, Royal Marine Artillery. Royal Engineers.—Lieutenant Mould. Royal Artillery.—Lieutenant M'Naughten. 40th Regiment.—Major Nelson, Lieutenants Brooke (killed), Dowman, Jackson, and Rees, and Ensign and Adjutant Whelan."

On the reception of this news at Melbourne, the fast steam-ship City of Hobart was dispatched for New Plymouth, carrying Lieut.-Colonel Leslie and 210 officers and men of the 40 Regiment. Major-General Pratt, Commander-in-Chief of Her Majesty's forces in Australasia, proceeded to the seat of war, with his staff, and the head-quarters of the 40th. The Volunteer Rifles have responded in the most loyal manner to the call to take up the garrison duty hitherto performed by the military. The Assembly took up the subject simultaneously with the arrival of the dispatches, and, on the motion of Mr. Wilson Gray, one of the ultra-democratic members, voted an additional sum of 5000*l.* to provide prizes for the best marksmen among the Volunteers, the erection of butts, the formation of bands, &c.; while the Ministry brought in a bill to increase the number of the Volunteer force from 2000 to 10,000, and announced that, should an emergency arise during the recess, they would be prepared to meet any expenditure that might be called for, trusting to the loyal feeling of the House for a bill of indemnity next session. Victoria therefore, at this moment, is without a single military representative of Her Majesty, and is engaged in her own defences, in the most loyal spirit to the crown.

Messrs. Pinches, the medallists, have prepared a die for striking prize medals, to be presented to the best shots of the various corps. One side represents a rifleman in the act of firing; the obverse is intended to contain the name, &c., enclosed in a wreath of laurel.

THE PROGRESS OF THE LORDS OF THE ADMIRALTY.

On Thursday the 6th inst. the Lords of the Admiralty proceeded in Her Majesty's steamer Lightning, and steamed round the whole of the Channel Fleet; all of which, together with the blockship Blenheim, 60, Captain Tatham, manned yards in splendid style, presenting a spectacle seldom seen anywhere, much less in Milford Haven. Their Lordships then went on board the flagship Royal Albert, 121, and soon after left under a salute of 19 guns from the fleet. The result of the visit to the Admiral was soon apparent by the signal being made to "hoist in boats and prepare for sea." This, followed by an order for all the fleet to be "hove short" by 4 a.m. next morning, made it generally known throughout the fleet that Friday was to be a day of exercise and evolutions before their Lordships, outside the haven. Accordingly, a little after 6 o'clock a.m., on Friday, the order was made to "weigh in succession" and "stand out to sea," which they did in the following order, viz.:—The Diadem, 32, Captain James H. Cockburn; the Mersey, 40, Captain Henry Caldwell, C.B.; the Mars, 80, Captain James N. Strange; the Algiers, 90, Captain George W. D. O'Callaghan; the Trafalgar, 91, Captain Edward G. Fanshawe; the Aboukir, 90, Captain Douglas Curry; the Edgar, 91, Captain James E. Katon, flagship of Rear-Admiral Erskine; the Centurion, 80, Captain Henry D. Rogers; the Conqueror, 101, Captain Edward Sotheboy, C.B.; the Royal Albert, 121, Captain H. J. Lacon, flagship of Vice-Admiral Sir Charles Fremantle, K.C.B.; and the Donegal, 101, Captain Henry Broadhead. In about one hour and a half the whole were under weigh, and steaming out to sea. Shortly after 7 o'clock a.m., the Osborne, with the Admiralty flag at the main, slipped her moorings and went down the haven, accompanied by the gun-boat Violet and Her Majesty's ship Lightning, with the Earl of Cawdor on board.

The ships having made an offing of about seven miles, the Osborne, which had previously joined, with the Lords of the Admiralty on board, made the signal for the fleet to form a double line. They accordingly broke into two divisions; the starboard one, consisting of the Royal Albert, 121; the Donegal, 101; the Conqueror, 101; the Mars, 80, and the Trafalgar, 91, was led by Vice-Admiral Sir Charles Fremantle, K.C.B., in the Royal Albert. The port division, under Rear-Admiral Erskine, in the Edgar, 91, which was leading, comprised also the Algiers, 91; the Aboukir, 90; the Centurion, 80; the Mersey, 40; and the Diadem, 32. This manœuvre having been executed with great precision, the Osborne signalled for the fleet to make sail under easy canvas, followed by an order from the Admiral to bank up the fires. Having stood on thus for some time, the two divisions tacked in succession to the starboard, after which the order was given to form a single line of battle. This was effected by the ships of the starboard division standing on their course, and those of the port one tacking until they came into line, when they followed in the wake of their predecessors, an interval of two cables' length separating each ship. The concluding and most exciting manœuvre of the day was then made by the whole getting orders to make all sail that could be done with safety, and running before the wind. Studdingsail booms were then run out, and every inch of canvas both alow and aloft that would draw was set. The order was then given to make for the nearest port, on which the fleet bore up for Milford Haven. The Osborne then steamed up to the Admiral's ship, and Rear-Admiral Pelham, C.B., hailed Vice-Admiral Sir Charles Fremantle, K.C.B., and expressed, on the part of His Grace the Duke of Somerset and the rest of the Lords, the extreme satisfaction they all felt, not only in the appearance of the fleet, but also in the admirable precision with which all the manœuvres had that day been performed, and it is stated that Captain Ramsay, C.B., the superintendent of Pembroke Dockyard, was commissioned to convey the above opinion in writing to the Admiral of the Fleet. The Osborne then parted company, the Royal Albert giving the Lords of the Admiralty a salute of 19 guns, which the Osborne acknowledged by dipping her ensign, after which she stood to the southward. Nothing could have been more favourable than the weather; it was slightly hazy up to 8 o'clock, a.m., when it cleared up, and a fine fresh breeze came from the north-east, which lasted up to 3 o'clock p.m., when it died away. The whole of the signalling was done by bunting, and not by Ward's new system, as was generally supposed that it would be, and the brilliant flags had a very pretty effect as rapidly repeated by every third ship.

The whole of the fleet returned to port in the evening, and the ships took up their original position off the town of Milford, where they moored in single line. Their Lordships paid an official visit to the Scilly Islands, *en passant*, and steamed on to Fowey and Falmouth, which latter port they reached on Saturday last, and left again for Devonport on Sunday afternoon. The Osborne had on board his Grace the Duke of Somerset (First Lord of the Admiralty), Rear-Admiral the Hon. F. T. Pelham, C.B., Captain Charles Eden, C.B., and Samuel Whitbread, Esq., M.P.; the First Secretary, Rear-Admiral the Right Hon. Clarence Paget, C.B., M.P.; Captain Moore, C.B., R.N., Private Secretary to the First Lord; Rear-Admiral Sir B. W. Walker, Bart., K.C.B., Comptroller of the Navy; and Colonel Green, Director of Works. The usual salutes were given to the flag on the arrival of the yacht.

At eleven o'clock on Monday morning their Lordships landed at the dockyard, where they were received by Rear-Admiral Pasley, Bart. (Superintendent), who had returned from leave for the occasion, and the other principal officers of the establishment. A guard of honour, furnished by the second battalion of the 12th Regiment, was also in attendance. The Board then proceeded to the office of the Admiral Superintendent, where different subjects were submitted to their consideration. They subsequently visited the ships building, the new dock, the several workshops, &c., and at noon proceeded through the tunnel to the steam factory at Keyham, where they were received by Commander Biddlecombe, master attendant, and other officers. After the inspection of the various docks and works, their Lordships returned to the yacht to luncheon. They then visited and inspected the several ships in commission in harbour, as also those in advance. The Revenge, new screw ship of 91 guns, 800 horse-power, received special notice and inspection; it is therefore inferred she will be early brought forward for commission. The board also landed on the opposite shore, inspecting the land and sea bounding in the neighbourhood of Torpoint.

It is asserted that the work now done at Keyham steam-yard has been calculated at 25 per cent. only of what the place is capable of having done in it in case of a war emergency.

The Lords went up Hamoaze and visited the training-ship Implacable, 72, Commander J. W. Dorville; the gunnery-ship Cambridge, Captain Jerningham; and several other ships.

Their Lordships dined in the evening with Vice-Admiral Sir Arthur Fanshawe, K.C.B., commander-in-chief, at the Admiralty House, Mount Wise, when the principal officers of the several departments were invited to meet them. Later they attended the ball in aid of the funds of the Royal British Female Orphan Asylum, at St. George's Hall, Stonehouse, which is annually patronised by the First and other Lords of the Admiralty.

On Tuesday morning His Grace the Duke of Somerset held a levée in the office of the Admiral-Superintendent at Devonport, which was attended by three admirals, seven captains, twelve commanders, and other officers, forty in all—a less number than usual, through the sudden arrival of the Osborne, and the consequent short notice.

During the morning the riggers of the yard appealed to the First Lord in reference to an alteration of the scale of time for superannuation. By the present arrangement a term of service at sea counts disadvantageously by comparison with a term ashore. Their Lordships promised to give the subject due consideration. Before leaving the yard the Duke inspected the screw steam gun-vessel Penguin, 5, fitting for foreign service, and examined the new dock in course of enlargement.

Shortly before 2 o'clock His Grace, accompanied by Vice-Admiral Sir Richard Dundas, Captain Charles Eden, R.N., Mr. Whitbread, M.P., Lord Clarence Paget, Captain John Moore, and Colonel Green, landed at Stonehouse Hard, and went to the Marine Barracks and inspected the Plymouth division. Their stay was very short, and they could not find time to witness the evolutions of the Light Infantry with the Artillery under Captain Wright, the gun-room captain. Their Lordships at 3 o'clock proceeded to the Royal Naval Hospital, where they were received by Captain Superintendent Lyster, Dr. Hilditch, inspector-general, Dr. Dunn, deputy inspector-general, and all the officers of the establishment. The number of patients in the wards is 205. The attention of the ward was directed chiefly to a recent proposal to erect improved receiving-rooms and baths for the sick. Shortly after 4 o'clock the Duke of Somerset, Captain Eden, and Captain Moore joined the gun-boat Redwing, tender to the gunnery-ship Cambridge, off the Victualling-yard, where they were received by Captain Jerningham, and were conveyed outside the Breakwater to witness the firing of the Armstrong guns from the tender. The Redwing, after lying a short time off Bovisand, proceeded along inside the Breakwater. On returning through the Sound she steamed round the screw steam gun-vessel Espoir, Commander Sholto Douglas, bound to the Coast of Africa. While the First Lord was holding his levée, Captain Eden, Superintending Lord of the Victualling Department, who was joined by the Comptroller of Victualling and Director of Works, went at half-past ten o'clock to the Royal William victualling-yard, where they were received by Captain-Superintendent Lyster, Commander Wheeler, the master-attendant, Mr. Samuel Triscott, storekeeper, and the clerk of the works. Captain Eden inspected the different stores and manufactories, and arranged with the officers respecting certain unimportant works proposed to be executed. He left shortly before 12 o'clock. The workpeople were not mustered.

At noon Vice-Admiral the Hon. Sir R. S. Dundas, K.C.B., who had joined his colleagues on Monday, accompanied by Sir Baldwin Walker, Comptroller of the Navy, was conveyed by Rear-Admiral Sir Thomas Pasley, Bart., to his flagship, the Royal Adelaide, 104, Captain W. K. Hall, C.B., the guardship of ordinary in Hamoaze, which they inspected.

While His Grace the Duke of Somerset was in Hamoaze on Monday, and was attended by his private secretary, Captain John Moore, C.B., and accompanied by Captain Charles Eden, C.B., he went on board the Implacable, 72, Commander John W. Dorville, which has recently been established as a training-ship for above 400 boys, some of whom, second-class boys, formed the guard for the First Lord's reception. Their performance of several evolutions with great guns, rifles, and cutlasses, and the general condition of the ship, gave much satisfaction, which was increased on the departure of the visitors when they saw the Implacable quickly and skilfully placed under full sail by her youthful crew. Lieutenant Josiah H. Hatchard has been on duty on board since April last.

The Lords of the Admiralty dined on Tuesday evening at Moorshead's Royal Hotel, Devonport, and on Wednesday morning sailed in the Osborne from Plymouth for Portland.

Their Lordships, after making an inspection of the works in progress at Portland, started in the Osborne for Portsmouth, where they arrived on Thursday morning at 10 a.m. At 11 a.m. the First Lord, accompanied by Vice-Admiral the Hon. Sir R. S. Dundas, C.B., Mr. Samuel Whitbread, M.P., Captain Charles Eden, C.B., Rear-Admiral Lord Clarence C. Paget, C.B., M.P., First Secretary; Captain John Moore, private secretary to the First Lord; Sir Baldwin Walker, Bart., K.C.B., Comptroller of the Navy; and Colonel Godfrey Greene, civil engineer and architectural works, landed at the King's Stairs in the dockyard. After paying a visit to the Admiral Superintendent's office, Captain Eden went on board the Megæra, lying alongside the jetty, embarking the Durham Militia. Afterwards their Lordships examined the new dock now constructing, and which is intended to unite No. 10 with No. 7 dock, which will be, when completed, available for three caissons. Their Lordships then inspected the Glasgow, 51-gun frigate, now building in No. 1 slip. This fine frigate is 250 feet in length, and is a remarkably fine specimen of her class. Two more frigates are to be laid down in Portsmouth, to be named the Barham and the Briton, upon the same lines as the Glasgow. The slipway under which this frigate is being built, has been prolonged 63 feet, the height

Digitized by Google

of the new portion being about 72 feet. Their Lordships inspected the blacksmiths' shop, and examined the Chanticleer, 17, screw, built upon the plan of the Rinaldo. After surveying the Dryad, 50-gun frigate, and the Royal Alfred, both of which vessels are only in frame, their Lordships passed round the north corner and along the quays of the steam-basin, when Lord C. Paget went on board his old ship, the Princess Royal, now fitting for first-class steam-reserve. The Cygnet, gun-vessel, lying at the north wall, underwent an inspection, after which their Lordships examined the site of the proposed new dock on the north-east side of the steam basin. Afterwards the coal stores, wood-yard, and new foundry buildings underwent inspection. Returning again into the centre of the yard, their Lordships examined No. 4 dock, now all but finished lengthening, and then visited the Coquette, gun-vessel, undergoing very extensive repairs in her midship and fore body; her after body has not been opened up yet, and until this is done, it is impossible to say that the Coquette has been thoroughly repaired. Their Lordships then left the yard and embarked at the King's Stairs, and went on board the Osborne.

Their Lordships dined with Admiral Bruce at his official residence in the dockyard in the evening, and on the following day, after inspecting the Britannia training-ship, Captain R. Harris, their Lordships landed at Gosport, inspected the gunboats at Haslar and Forton Barracks, the head-quarters of the Royal Marines at Portsmouth. Their Lordships gave their official dinner at Dent's George Hotel last evening. The usual ball on the occasion of the annual visit of their Lordships in aid of the funds of the Royal Seamen and Marines Orphan Schools, and Female Orphan Home, was held at Hollingsworth's Rooms the same evening, and which was very well attended.

Their Lordships will, if the weather permits, proceed this day by sea to Newhaven, Dover, and Sheerness, but otherwise they will return to London by rail in the course of the morning.

THE CHINA EXPEDITION.

The special correspondent of the *Times*, writing from the rendezvous of the British force at Ta-lien-whan on the 12th of July, gives some interesting and gratifying details of the condition of the expedition, which we extract.

Admiral Hope anchored in the bay on the 25th of June, and found the English expeditionary force assembled and ready for action. The 25th of June was the anniversary of the disaster at the Taku Forts last year, and both Admiral and General would gladly have been before them again on that day. But they could not advance without our allies, and the French were not prepared. They are not ready now, but have undertaken that before the 20th inst. they will name a time by which their preparations will be completed. Their men are doing all in their power to make up for lost time, but the end of the month will arrive before they are in condition to start, and they will take the field with a much smaller force than was anticipated. They brought out no artillery horses, and the ponies purchased in Japan and Manilla have never seen a gun. They have just been despatched to Chefow, where every exertion is made to render them efficient as speedily as possible. Their gunboats were sent in pieces on board the transports. Some have turned up and are being put together, but many are still wanting. Now, let there be no mistake on this subject. The summer is waning fast, the time for prompt and immediate action has arrived, and yet our expeditionary force, which costs at least a million monthly, is lying idle at Ta-lien-whan. It could be embarked and sail to-morrow. It has been ready for days. The delay lies with the French, and with them alone. I readily admit the difficulties encountered by our allies at such a distance from here, and with no depôts at Hong Kong and in India. I make every allowance for the increase in difficulties from the loss of many of their transports. But the consequences of delay may be so serious, and the facts are so unquestionable, that I should fail in my duty did I omit to state them.

This bay was intended as a rendezvous only. It was never imagined that the troops would disembark. When Sir Hope Grant saw we should be kept back for some weeks he determined at once to get men and horses out of the ships, and put the men under canvas. This was accordingly done, and the whole force—horse, foot, and artillery—is now encamped on either side of the bay.

The effective force of this army consists of 6357 British, and 2178 Native Infantry, 1012 Cavalry, 1793 Artillery, 485 Engineers, and 286 Military Train; making a total of 12,111 men. There are two batteries of Armstrong guns (12-pounders), three batteries (9-pounders), two and a half Madras mountain train batteries, and a siege train, consisting of light 32-pounders and 8-inch howitzers; 1689 horses are in camp, besides a number of ponies and bullocks.

The climate is delicious. The thermometer in the shade has never exceeded 84, and a fine breeze springs up in the evening. August among the hills will give a fair idea of it.

The villages are peaceful, unarmed, and well-disposed, though terribly frightened at seeing the large force.

Most stringent orders have been issued by the Admiral and General against annoying the people. These orders have been well carried out, and supplies are consequently brought freely into camp.

The place is so safe and convenient, so near the Peiho and the scene of future operations, that the naval and military authorities have determined on making Ta-lien-whan a depôt for stores, provisions, and munitions of war, during the expedition. The Engineers are erecting two small forts to command the landing, and a battery of artillery, with some infantry, will remain behind in charge when we sail for the Peiho.

Let us land and see the camp of the first division. To the left of a rude jetty, thrown out by our men, are the tents of the Royal Engineers. They are busy directing Coolies at work sinking wells and obtaining a supply of water, which is more scarce here than on the other side. Turning to the right we come among the Royals—the weakest regiment of the force, being little more than 500 strong. Having garrisoned Hong Kong for nearly two years, the climate has produced its usual effect. But the fine brisk breeze from the bay is fast setting them right. A visible improvement has taken place, and their hospital list is sensibly diminished. Their band is playing before a host of lounger, naval and military, and the men are lying about their tents enjoying their *otium* after a hard day's work. The 31st are next to the Royals, and have the best camp in the army. Branches of fir-trees adorn their encampment, and the soldiers have made excellent walks between each row of tents, so that the place has all the air of being tenanted by old campaigners. The 31st is the strongest regiment in the force. Many of the men are volunteers from the 64th and other regiments distinguished during the Indian mutiny, and they evidently know how to make themselves comfortable. Half-an-hour's walk through the corn-fields brings us to the second battalion of the 60th Rifles, who are out for drill and exercise. Fine active fellows are they as eye could desire to look on, quick and ready in their light infantry movements, and steady as a wall in marching. The Sikhs are on an eminence beyond them. They have just killed a goat, and are cooking it for their evening meal. *Mirabile dictu!* not one of them has been up before the Provost-Marshal for looting. The 2nd Queen's are to the extreme west of the camp, just on the border of a large village where one of their sentries is stationed.

Crossing the bay, we reach Odin Bay, where the artillery and cavalry have been landed. The Armstrong guns are still on board ship, but some of the ammunition waggons have been landed, and are perfectly sound and good. The carriages have been shipped and transhipped some half-dozen times, but I am assured on all hands that nothing could be sounder than their condition, and they were well worked at Kowloon. The waggons I can vouch for myself. Ample supplies of ammunition have arrived, and Brigadier Crofton and Major Hay are perfectly satisfied of the entire efficacy of this most important arm. Beyond the Artillery are the King's Dragoon Guards, Probyn's Horse, and Fane's Horse. Both man and beast are in splendid condition. Indeed, out of 1689 horses there are but 40 sick. Colonel Mackenzie understands how to disembark horses; not one was lost, and but two or three suffered injuries of any consequence. What a *beau ideal* of light cavalry these irregulars afford, and how their marches would astonish our so-called Light Dragoons! Probyn and Fane started nearly at the same time from Cawnpore and Lucknow to embark at Calcutta. They marched one against the other, and performed the distance—700 miles—in less than a month. Probyn outmanœuvred Fane by leaving the main road about 200 miles from his destination, and making a flank march across country, but he only won the race by a couple of days. I have not had time to visit General Napier's division, but I hear it is most efficient. The 67th has but 1 per cent. on the sick list. The sanitary arrangements are excellent. There is no foul smell about the camps, which vie with each other in cleanly neatness. The natural consequences have ensued. There are but 13 officers and 648 men on the sick list out of the 12,000 composing the force. With the exception of 116 cases on board the hospital ships, the diseases are of a very trivial character. This speaks volumes in favour of Dr. Muir and the medical staff, and particularly of Dr. Rutherford, who is charged with all local sanitary arrangements. The Coolie corps has not been so successful as might be desired. Sir Hope Grant wished to raise a force of 6000 coolies, but rather less than 2000 have been secured. There is no hope of procuring any addition before we reach Tien-tsin. However, we shall never be far from the sea, and the Land Transport has a fine supply of ponies.

No plan of operations has yet been settled. Sir Hope Grant went to Chefow on Tuesday, and returned yesterday. The French admiral and general are expected to-morrow, and we hope they may be able to fix a day by which they will be prepared. This much, however, seems certain,—the French will land to the south, the English to the north of the Taku forts. The place selected by us is Peh-tang, about eight miles from the Peiho, and at the mouth of the river which Mr. Ward the American Ambassador ascended on his late journey to Pekin. A naval brigade will probably be formed from the blue jackets and the marines, which will act with the army, and while the troops attack the forts in the rear, the gunboats will tackle them in front.

THE EARL OF DERBY AND THE KNOWSLEY REVIEW.—The Knowsley review committee, representing the Volunteers of the county, have received the following letter from the Earl of Derby:—"Knowsley, September 4, 1860. Dear Colonel Bourne,—I cannot allow the proceedings connected with the Knowsley review to come to a close without begging of you to accept for yourself, and to offer on my part to all the members of your committee, and to their zealous and efficient secretary, my warmest thanks for their anxious and persevering exertions in arranging the multifarious details which had to be considered and settled. It is mainly to your and their efforts that we are indebted for the complete success which I think I may venture to say has attended this brilliant county gathering; but I am sure you will consider yourselves more than repaid for all the trouble you have taken if the result shall be, as I confidently believe, not merely the momentary gratification of a successful pageant, but an additional stimulus to the great and important national movement which has already added so greatly to the military strength of the country.—I am, yours faithfully, DERBY.—Lieut.-Colonel Bourne." The committee have resolved—"That this committee congratulate the Earl of Derby on the perfect success of the review on Saturday last, and beg to thank his lordship for his courteous hospitality. That the committee cannot separate without acknowledging the valuable assistance rendered by Captain Hornby, R.N., to whose judicious arrangements the success of the gathering must in a great degree be attributed."

VOLUNTEER REVIEW AT NAZING WOOD.—A volunteer encampment will be formed upon Nazing Wood Common, near Broxbourne station of the Eastern Counties Railway, on Saturday the 13th of October, when the West Essex Yeomanry Artillery and Cavalry, the Hon. the Artillery Company of London, and the Victoria Rifles, will meet: and should any of the other Volunteer Rifle Corps of the counties of Essex, Herts, or Middlesex, feel disposed to avail themselves of the advantage of brigading with artillery and cavalry by joining in the review, on making their wishes known through their commandants or adjutants, to Lieut.-Colonel Palmer, Nazing Park, Waltham Abbey, their desires will be complied with.

Obituary.

Commander Rowley, whose death was recorded in this journal last week, was the son of Admiral Sir Charles Rowley, Bart. (not of Sir Josias). The late gallant officer was born in 1817, entered the Navy in 1832, and became lieutenant June 1, 1837. He served in the President, 52, in the Pacific; the Formidable, 84, at Sheerness; and on Feb. 7, 1842, was advanced to the rank of commander. From December, 1843, to the close of 1847, he commanded the Satellite, 18, in the East Indies and on the south-east coast of America station, and had been employed for some time past as one of the members of the mixed commission to settle the claims of the English and French subjects with the Monte Video government.

Colonel John Richard Ward, C.B., late of the 2nd Dragoons, died a few days since at Strangford House, county of Down, in the 69th year of his age. The gallant deceased entered the Army at an early age, and was present with his regiment at most of the engagements of the Peninsular campaign. He was one of the few officers still surviving who obtained the gold medal for their services, having received that decoration and two clasps for taking part in the engagements at Salamanca, Badajoz (at the assault of which he was severely wounded), and at the Pyrenees; he had also received the silver war medal with one clasp for Busaco.

We regret to notice the death of the Hon. James Lyon Browne, late lieut.-colonel of the 21st Regiment, which took place on Wednesday last at Harrogate, at the early age of 38. The gallant deceased was the eldest son of Lord Kilmaine, and commenced his military career in 1842 as second lieutenant of the 21st Foot (Royal North British Fusiliers). On the war breaking out with Russia, Lieut.-Colonel Browne accompanied his regiment to the Crimea, and was present at the whole of the engagements in which it took part, including the siege of Sebastopol, for which he received the war medal and clasps, and was decorated by the Sultan of Turkey with the order of the Medjidie (5th class). The gallant officer's commissions bore date as follows:—Second lieutenant, Jan. 14, 1842; lieutenant, Nov. 8, 1844; captain, Dec. 22, 1848; major, Dec. 29, 1854; and lieut.-colonel, April 24, 1855.

We have to record the death of Lieut.-Colonel Martin George Thomas Lindsay, late commander of the 91st (the Argyllshire) Regiment of Foot, which mournful event occurred at Old Charlton, Kent, on Tuesday last, in the 66th year of his age. The deceased officer entered the Army as ensign, December 16, 1813, and served in Holland in 1814 and 1815, and was present at the bombardment of Antwerp. He became lieutenant December 5, 1818; captain, June 26, 1823; major, April 28, 1837; and lieut.-colonel, April 8, 1842.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BOURCHIER—August 29, at 1, Westbourne Grove West, Bayswater, the wife of Lieut.-Colonel E. F. Bourchier, C.B., Royal Engineers, of a son.

CASTLE—September 6, at Walmer, Kent, the wife of Major Castle, of a son.

CREYKE—September 8, at Luton Vale, near Chatham, the wife of Captain Creyke, Royal Engineers, of a daughter.

DORRHILL—September 10, at Dover, the wife of Captain Dorehill, 43rd Light Infantry, of a son.

ELLIS—September 3, at Dover, the wife of Captain Ellis, 60th Rifles, of a daughter.

FORESTER—September 7, at Somerby, Leicestershire, the Hon. Mrs. Henry Forester, of a son.

GREEN—July 22, at Bunnoo, Punjaub, the wife of Lieut.-Colonel Geo. W. G. Green, C.B., 2nd Bengal Fusiliers, of a daughter.

JENYNS—September 7, at Aldershot, the wife of Major Jenyns, C.B., 18th Hussars, of a daughter.

MCGRIGOR—September 5, at 2, Glocester Place, Portman Square, the wife of Sir Charles R. McGrigor, Bart., of a son.

OSBURN—September 11, at the Coast-guard Station, Swanage, Dorset, the wife of Lieutenant Francis Osburn, R.N., of a daughter.

ROBINSON—September 11, at Sheerness Dockyard, the wife of Mr. Braham Robinson, Esquire, Major 1st Brigade Kent Artillery Volunteers, of a daughter.

STOTT—September 5, at 37, York Place, Edinburgh, the wife of Captain Gibson Stott, 92nd Highlanders, of a daughter.

TAILYOUR—September 6, at Newmanswalls, Montrose, the wife of Major Renny Tailyour, of a son.

THACKWELL—September 7, at Queen's Road, Regent's Park, the wife of Edward Joseph Thackwell, Esq., Barrister-at-Law, late Captain 50th Foot, of a son.

MARRIAGES.

BARTON—CLARKE—September 6, at Clonlara, county Clare, Ireland, by the Rev. J. Hastings Allen, M.A., uncle of the bride, the Rev. J. Yarker Barton, M.A., to Frances Jane, only daughter of the late Lieut.-Colonel J. Clarke, formerly of H.M.'s 66th Regiment.

ECCLESTON—GREEN—September 5, at St. Peter's, Newton-in-the-Willows, by the Rev. Peter Legh, M.A., incumbent, assisted by the Rev. John Fearon, B.A., incumbent of St. David's, Holmbridge, Yorkshire, Thos. Birley Eccleston, Esq., surgeon 4th Royal Lancashire Light Infantry, to Elizabeth, only child of the late John Green, Esq., M.D., of Newton, J.P. for the county of Lancaster.

FOWLER—TUTTON—September 4, at the parish church, Horfield, Bristol, by the Rev. Wm. Barclay, brother-in-law of the bride, the Rev. Henry Fowler, second son of Charles Fowler, Esq., of Totteridge House, High Wycombe, Bucks, to Julia Frances, youngest daughter of James R. Tutton, Esq., late of the Royal Horse Guards Blue.

GLANVILLE—CARRERAS—September 3, at Gibraltar, Francis R. Glanville, Esq., Royal Artillery, to Conception, second daughter of Francis Carreras, Esq.

GOREN—READ—September 12, at St. Nicholas', Brighton, by the Rev. W. W. Godden, M.A., Amos Goren, Esq., Captain H.M.'s 19th Regiment, to Agnes Clayton, younger daughter of the late Berkeley Read, Esq., formerly R.N., and grand-daughter of the late Captain T. Read, R.N., of Fishbourne, Sussex.

DEATHS.

BROWNE—September 5, at Harrogate, the Hon. James Lyon Browne, aged 37, eldest son of Lord Kilmaine, late Lieut.-Colonel H.M.'s 21st Fusiliers.

CALDECOTT—September 8, at his father's house, Lieutenant Barnes John Caldecott, 3rd Regiment (The Buffs), eldest son of Barnes Caldecott, Esq., of Ormesby St. Michael, Great Yarmouth.

CARNIE—September 7, at Cheltenham, Mrs. Alicia Carnie, relict of the late Colonel Carnie, of the 12th Foot, aged 83.

CHERMSIDE—September 8, at Oxford, Sir Robert Alexander Chermside, M.D., K.C.H., K.L.H., K.R.E.

DANE—September 9, at Hollywood, county Dublin, of consumption, Lieutenant John Dane, 18th Light Dragoons, aged 24.

ELLIOTT—August 23, at New York, James Sutton Elliott, Esq., late Principal Military Storekeeper, in H.M.'s Service, aged 54.

FAWCETT—September 5, at Ealing, by railway accident, Charles Fawcett, Esq, of the Admiralty, Somerset House, aged 36, only son of Captain Fawcett, R.N.

FLETCHER—September 10, at Putney, at the house of J. J. Paul, Esq., M.D., Maria, relict of Captain Richard Fletcher, late of Oxford, aged 73.

ARMY CONTRACTS.—TENDERS will be received at this Office until Noon on the 13th of October, from persons who may be willing to enter into Contracts for the supply of FORAGE, in such quantities as may be required, for the use of Her Majesty's Land Forces stationed in the following places, for 12 months from 1st November, 1860.

1. Hyde Park, Kensington, Regent's Park, and Horse Guards.
2. Hounslow and Kneller Hall.
3. Hampton Court.
4. Windsor.
5. Brighton.
6. Sandhurst.
7. Enfield.

Tenders must be made for each of the above-mentioned Stations as separately grouped and numbered.

Forms of Tender, and Conditions of Contract, may be obtained on application at this office, by letter or in person, between the hours of 10 and 4 o'clock.

Tenders on the printed forms must be properly filled up and signed, and delivered at the undermentioned Office, under closed envelope (marked on the outside "Tender for Commissariat Supplies,") before Noon on the 13th October next.

W. T. Power, Deputy Commissary-General.

Commissariat Office,
5, New Street, Spring Gardens, London, S.W.,
1st September, 1860.

THE EXMOOR PONIES, COBS, AND GALLOWAYS.—The ANNUAL SALE of SIXTY EXMOOR PONIES, the property of F. W. Knight, Esq., M.P., and TWENTY-FIVE COBS and GALLOWAYS, the property of Mr. Robert Smith, will take place (as usual) at Bampton Pony Fair, on Thursday, October 25.—Catalogues will be prepared one month prior to the sale, and every information given by Mr. Smith, Emmett's Grange, Southmolton.—Sept., 1860.

GREAT WESTERN RAILWAY.—TOURISTS' SEA-SIDE & FAMILY TICKETS, available for a Month, or longer by extra payment, are now issued at Paddington and other principal Stations.

To Exeter, Bideford, Barnstaple, Dawlish, Teignmouth, Torquay, and Paignton—50*s.* first class and 35*s.* second class. Truro, 60*s.* and 40*s.*, and Penzance, 65*s.* and 45*s.* (to parties of not less than three persons).

To Weymouth, Dorchester, and Bridport, 35*s.* and 25*s.*, to parties taking three or more tickets.

To the Isle of Man, Bangor, and Beaumaris, viâ Chester and Liverpool, 70*s.* and 50*s.*

To Llandudno, viâ Liverpool, 67*s.* and 47*s.*

To Carnarvon, viâ Llangollen and Llanberis, and to Bala and Dolgelly, viâ Llangollen, 70*s.* and 50*s.*

To Narberth Road and New Milford, for Tenby and Milford Haven. Tourists' Tickets, 72*s.* and 50*s.* Family Tickets (to parties of not less than three persons), 63*s.* and 45*s.*

To Limerick and Killarney, for the South of Ireland, viâ Milford Haven and Waterford, 5*l.* 5*s.* and 4*l.*

Bills, giving full particulars, can be obtained at the Company's Offices and Stations, or upon application to the Superintendent at Paddington.

PARIS.—LONDON TO PARIS DAILY.—SPECIAL DIRECT SERVICE, twice each way every day, except Sunday, by the BRIGHTON RAILWAY, viâ Newhaven and Dieppe. First class, 28*s.*; Second class, 20*s.* Return tickets (available for one calendar month), First class, 50*s.*; Second class, 36*s.* A steward's fee of 1*s.* 6*d.* respectively is also charged on board. Passports and visas for Paris may be had of the respective agents at Newhaven. Luggage booked through from London to Paris.—For tickets or further information, apply at the London Bridge and Pimlico Termini; 43, Regent Circus, Piccadilly, W.; 4, Arthur Street East, London Bridge, E.C.; or at any of the stations on the London, Brighton, and South Coast Railway.

SUNDAY AND MONDAY EXCURSIONS TO THE SEA-COAST, &c., 4*s.* Covered Carriages, by the SOUTH-EASTERN RAILWAY.

CHEAP EXCURSIONS every SUNDAY and MONDAY to RAMSGATE, Margate, Deal, Sandwich, Sturry (for Herne Bay), Canterbury, leaving London at Five minutes to 8 a.m.; and to DOVER, Folkestone (for Sandgate and Shorncliffe), Hythe, Hastings, St. Leonards, and Tunbridge Wells, leaving London at 8·30 a.m., at REDUCED FARES,

4*s.* 6*s.* 6*d.* 10*s.*

A. Davis, 33, Strand, W.C.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. Burrow, Great Malvern, Worcestershire.

MILITARY BAND INSTRUMENTS.—JOHN KOHLER, Military Musical Instrument Manufacturer to Her Majesty's Army and Navy, and Her Majesty's Indian Army, the Royal Militia, and the Volunteer Forces of Great Britain, 35, Henrietta Street, Covent Garden, London, W.C. Price Lists, Drawings, and Estimates for Köhler's celebrated Band Instruments sent post free on application.

ANTOINE COURTOIS' NEW MODEL SILVER BUGLES, for Presentation to Rifle Corps.—A. CHAPPELL & HAMMOND (late Jullien & Co.) forward on application a List of Prices of the above Bugles, which have been adopted by the Victoria Rifles, and numerous other Corps.

A. Chappell & Hammond (Sole Agents for Antoine Courtois), 214, Regent Street, London, W.

CHUBB'S PATENT DETECTOR LOCKS.
CHUBB'S FIRE & BURGLAR-PROOF SAFES.

CHUBB'S STREET-DOOR LATCHES.
CHUBB'S CASH AND DEED BOXES.

Illustrated Price List sent free.

Chubb & Son, 57, St. Paul's Churchyard, London, E.C.; 28, Lord Street, Liverpool; 16, Market Street, Manchester; and Wolverhampton.

H. J. & D. NICOLL'S Establishments for Gentlemanly and Moderate-priced Clothing, REGENT STREET, CORNHILL, & MANCHESTER.

THE CAPE PALETOT, INVERNESS CAPE, or SLEEVED CAPE, used in private life, as well as for Volunteer Corps.

H. J. & D. Nicoll, 114, 116, 118, 120, Regent Street, W.; 22, Cornhill, London, E.C.; and 10, St. Ann's Square, Manchester.

CLOTHING FOR YOUTH.—The KNICKERBOCKER, the Highland Dress, Ladies' Travelling Mantles, Riding Habits, and Pantalons de Dames à Cheval, with much novelty and general excellence, H. J. & D. Nicoll have for the remainder of this season at Warwick House, 142 and 144, Regent Street, W. In the autumn this branch will be removed to the rear of the old Establishment.

VISITORS TO THE SEASIDE AND TOURISTS will find much ease and comfort in the NEUTRAL-COLOURED LOOSE COAT, fastened by one or more buttons, with Trousers and Vest, all of one material, as originally introduced by Messrs. Nicoll, of Regent Street, W., and Cornhill, E.C.; they recommend also a Black Velvet Coat, and for gentlemen seeking a kind of half-dress morning coat the black cloth is specially prepared; this garment is edged with braid and cut somewhat as a riding-coat, and is getting into general use.

MODERATE PRICES WITH GENERAL EXCELLENCE.

E. MOSES & SON can confidently assert, that they possess advantages and facilities which are quite beyond the reach of any other house in the trade, and are thereby enabled to offer a REALLY GOOD ARTICLE at a VERY LOW PRICE. The most skilful cutters are employed, and durability of material and workmanship may be relied on.

The BESPOKE TAILORING DEPARTMENT is almost daily replenished from the best home and foreign markets.

The READY-MADE CLOTHING DEPARTMENTS are furnished with an immense assortment of goods for all classes, and all occupations. Also a great variety of CLOTHING for JUVENILES of all ages.

The HOSIERY and DRAPERY, HAT and CAP, and BOOT and SHOE DEPARTMENTS, contain a carefully-selected stock of the best and newest Manufactures.

N.B. Should any article not be approved of, it will be exchanged, or the money returned.

Gratis on application, or post free, E. Moses & Son's Book for the Present Season, containing "The Growth of an important Branch of British Industry," with rules for Self-measurement, and List of Prices. Also, just published, an elaborate Plan of their City Premises.

SPECIAL NOTICE.—E. Moses & Son's Establishments will be CLOSED on MONDAY and TUESDAY, the 17th and 18th inst., and will be re-opened as usual on Wednesday morning.

CORNER OF MINORIES AND ALDGATE, AND NEW OXFORD ST., CORNER OF HART ST., ALSO BRADFORD & SHEFFIELD, YORKSHIRE.

DAVIESON'S EVERLASTING TEETH.

THE LATEST DISCOVERY.

MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth. Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 448, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

ADAM S. GLADSTONE, Lieut.-Colonel Commanding 2d Batt. L. R. V.
R. J. TINLEY, Major 2d Batt. L. R. V.
Liverpool, 21st August, 1860.

NAVAL CADETS.

OF THE 43 SUCCESSFUL CANDIDATES at R. N. College, 12th June, TEN were prepared at NORTH GROVE HOUSE, SOUTHSEA, viz., Messrs. Stewart, Galbett, V. Orlebar, Henderson, Master, Fellowes, Sidney Smith, Blackett, Millett, Knollys. Mr. Mounsteven, who passed first at the Competitive Examination for Marine Cadetships, was also prepared at North Grove House.

W. BELL, Chaplain, R.N.;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

ROYAL NAVAL ACADEMY.—Of the many pupils prepared at the Academy conducted by MR. C. F. COOPER, R.N., not one has failed to pass, and eight have taken 1st, 2nd, and 3rd places at the Royal Naval College.—Address, Beresford Place Southsea.

NAVAL AND MARINE CADETS ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives PUPILS for the Royal Navy, Army, Woolwich, and Addiscombe. NINE out of ELEVEN of Mr. Knight's Pupils PASSED at the Royal Naval College, 12th June, 1860, taking 1st, 2nd, 3rd, 6th, 7th, 11th, 11th, 17th ,19th places in the respective divisions of 99 candidates, of whom 62 passed and 37 failed.—St. Mary's Hall, Southsea, Hants.

ROYAL NAVAL AND MILITARY ACADEMY, GOSPORT.

PATRONS.
Her Most Gracious Majesty the QUEEN.
His Royal Highness the PRINCE CONSORT.

ELEVEN PUPILS of this Establishment PASSED at the recent Examination for Naval Cadetships. A Special Class has been formed for the Examination in December. Pupils joining it will have all the advantages of the school. Applications to be addressed to the Rev. E. BURNEY, M.A.

NAVAL CADETS, MARINE CADETS, &c.—At the Examination of Pupils which terminated yesterday at the Royal Naval College, the first place of all candidates was taken by a pupil at

EASTMAN'S ROYAL NAVAL ESTABLISHMENT,

Eastern Parade, Southsea; and other Pupils at this Establishment, in their different classes, took 2nd, 3rd, 4th, 5th, and 6th places. This Establishment is conducted by the HEAD MASTER, MR. SPICKERNELL, and the other Masters, so many years with the late Mr. Thomas Eastman, R.N. In addition to special instruction for Naval Examinations, Pupils receive a Classical and sound General Education, in preparation for the Army and other Professions. 354 Gentlemen have passed from this Establishment as Naval Cadets, and more than 200 as Marine Cadets, previous to this last examination.—Applications to be addressed to Mr. Spickernell, the Head Master. Prospectuses and other information may be obtained at Messrs. Booth's Library, 307, Regent Street, W.

STAFF EXAMINATIONS. — Twenty-four Officers have already joined the Military College of Sunbury this year, to read either for the Staff College, or for direct appointment on the Staff. Apply to Captain LENDY, Sunbury, S.W.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

ARMY EXAMINATIONS.—Candidates for the Artillery, Line, and Cavalry, are rapidly and efficiently prepared at an establishment, the pupils of which have, within the last two years, come out eight times first, five times second, and three times third on the list. Apply to Captain LENDY, Sunbury, S.W.

SPECIAL MILITARY TUITION, including Geometrical and Military Drawing, Hindustani, Fortification, Military Surveying and Reconnoitering. By Lieut.-Colonel MORLAND, who also continues the preparation of candidates for Addiscombe and the Military Competitive Examinations.—At 20, Norland Square, Notting Hill.

ARTILLERY EXAMINATIONS.—Candidates for the Competitive Examinations are individually prepared at an establishment which receives six pupils only for that branch of the Service. Four resident professors. Apply to X., care of Messrs. PARKER, 445, Strand, W.C.

EDUCATION IN FRANCE.—TWO GENTLEMEN, one an English and the other a French Protestant, with the assistance of five highly-qualified Masters, PREPARE 14 YOUNG GENTLEMEN for the Competitive Examinations for Woolwich, Sandhurst, Addiscombe, the Indian Civil Service, and direct appointments in the Army. Terms, 50 to 60 guineas. Address, B.A., Post-Office, St, Pierre, Lés Calais.

BARON KOLLER, assisted by a Graduate in Mathematical honours of high repute, and by the most distinguished Professors, continues to READ with Officers for the Staff College, and PREPARES Gentlemen entering the Army for Examinations, at his residence, Dawson Villa, 6, Dawson Place, Bayswater, W.

FELSTED GRAMMAR SCHOOL,
Near Chelmsford, Essex.
(Founded by Lord Rich, in 1564).

VISITOR—The Lord Bishop of Rochester.

TRUSTEES.

The Venerable Archdeacon Burney, D.D.	T. B. Western, Esq.
T. W. Bramston, Esq., M.P.	Onley Savill Onley, Esq.
J. J. Tufnell, Jun., Esq.	Rev. W. B. Ady.
Rev. John Bramston, M.A.	And other Gentlemen of the County.

HEAD MASTER—Rev. W. S. Grignon, M.A.
SECOND MASTER—Rev. J. H. Backhouse, M.A.
ASSISTANT MASTERS.
Rev. C. P. Marriott, M.A.; Mr. E. T. Constable, B.A.; Rev. C. P. Wardale, B.A.

The regular course of instruction includes English, Greek, Latin, French, and German, Ancient and Modern History and Geography, Arithmetic, and Mathematics.

Drawing, Music, and Drilling are taught by occasional Masters.

Terms:—Board (including washing), £28 per ann.; Tuition (including stationery), £8 per ann.

Under the scheme by which the School was reconstituted in 1851, the whole amount received on account of board is expended for that purpose, and no augmentation of the trust funds, or of the income of the masters, is allowed to accrue from this source.

The number of boarders has been limited hitherto to 74; by the erection of new buildings accommodation is now provided for an increased number.

For further information application may be made to the Head Master, at Felsted; or to Mr. ANDREW MEGGY, Solicitor, Chelmsford, the Clerk to the Trustees.

Avoid counterfeits and base imitations.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of
GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.
Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.
Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.

Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading, or otherwise, is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60*s.* per 1000; blank, 33*s.* per 1000.

[COPY.]
"Ordnance Select Committee, Royal Arsenal, Woolwich, April 17th, 1860.

"Sir,—Since I last addressed you on the subject of your Waterproof Cartridges, I have to inform you that 60 of them have been exposed in an atmosphere saturated with moisture, at a temperature of 90 degrees, for a fortnight. The result has been favourable, as far as this test is concerned, to their Waterproof qualities.

"I have, therefore, to request you will be good enough to state, for the information of the Committee, the nature of the lubrication you employ; whether it is in any way connected with the Waterproof properties of the Cartridge, and whether, in the event of their being adopted, the Service lubrication, which is wax, might not be employed.

"I have the honour to be, Sir,
"Your obedient Servant,
"J. H. LEFROY, Colonel, R.A.

"Mr. Thos. H. Anthony,
"37, Broad Street, Birmingham."

Waterproof Cartridges for Westley Richards', Wilson's, Calisher & Terry's, Leetch's, and other breech-loading Rifles, for foreign service.
Manufactured by THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

ELEY'S AMMUNITION, comprising WIRE CARTRIDGES for killing game at long distances, WATERPROOF PERCUSSION CAPS, GUN-WADDINGS, BREECH-LOADING CARTRIDGES, and every description of Sporting and Military Ammunition.—ELEY BROTHERS, Sole Contractors to the War Department for Jacob's Rifle Shell Tubes, Cartridges and Caps for Colt's, Adams', and other Revolvers; Enfield Ammunition, &c.; Gray's Inn Road, London, W.C. Wholesale only.

TO VOLUNTEER CORPS.

PRIZE MEDAL FOR RIFLE VOLUNTEERS.—T. R. PINCHES & CO. have always the above ready for delivery. Gold, 10*l.* 10*s.* Silver, 2*l.* 2*s.* Bronze, 1*l.* 1*s.*—27, Oxendon Street, London, S.W.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

WOOLF & SON'S PORTABLE FURNITURE.—ALLEN'S PATENT NEW PORTABLE BEDSTEAD, the greatest improvement ever effected in strength and lightness, invaluable for either barracks or campaigning, and approved of by the highest military authorities. Particulars and price forwarded post free; also their Illustrated Priced Catalogue of Portable Furniture of the newest description, Desk, Dressing Cases, &c. Estimates for Uniform for any branch of Her Majesty's Service, post free from Messrs. WOOLF & SON, Army Contractors and Portable Furniture Manufacturers, 59, Piccadilly, W., opposite St. James's Street, and 45, Old Bond Street, W., one door from Piccadilly.

THE INCOMPARABLE BEDS, FOR AIR OR HOT OR COLD WATER (ACKROYD'S PATENT).—These Beds may be filled with air or hot or cold water, they require no tossing about (or making as it is termed), are easily washed, are light and portable, may be packed in a carpet bag, and therefore invaluable to EMIGRANTS, YACHTSMEN, NAVAL AND MILITARY OFFICERS AND TRAVELLERS. They form in an instant Six or more Swimming Beds, and will stand any climate. No Emigrant should leave this country without one or more of these Beds.

Beds, 6 feet long by 3 feet wide, price 3*l.*, and 7*l.* 6*d.* Beds, 6 feet long by 3 feet wide, price 3*l.*, and 7*l.* 6*d.* extra for every 6 inches additional width. Pillows, 5*s.* Inflating Apparatus, 2*s.* 6*d.* Will be forwarded on receipt of Money Order by BENJAMIN GEORGE, corner of New Street, near the Canal Bridge, Kingsland Road, N.E.

OFFICERS IN THE ARMY will find the best assortment of PORTABLE MILITARY FURNITURE, and Articles for Barrack and Camp service generally, at HILL & MILLARD'S Portable Military Furniture and Outfitting Warehouse, 7, Duncannon Street, Trafalgar Square, W.C. Illustrated catalogues on application. Manufacturers and Patentees of the Army Chair, Square-mouth Travelling Bag, Despatch Box, & Writing Dressing Case, &c., &c.

EBONITE RIFLE PROTECTOR, price 1*s.*, prevents injury to muzzle in loading, cleaning, and during platoon exercise. To be had of all Gunmakers, at the Crystal Palace, and of the Sole Manufacturers, S. W. SILVER & Co., 66 & 67, Cornhill, E.C., and 3 & 4, Bishopsgate Within, E.C.
Works, Silvertown, Essex.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street, Strand, in the county Middlesex.—SATURDAY, September 15, 1860.

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

THE letter of "Landsman," which we published last week, and the letters of other correspondents, on certain defects in the Naval Discipline Act, 23 & 24 Vict. c. 123—the new Articles of War—force us to return to this subject, though, as the Act has now passed, these defects cannot be remedied till Parliament again meets. We did what we could, when the Bill was introduced, and while it was passing through both Houses, to have its errors corrected—and several amendments were introduced into it in consequence of objections we pointed out—but, when it passed, we said nothing more, although perfectly aware of the imperfections that remained, it being then too late to do any good, and because we have no wish to be pertinacious in obtruding the views we have formerly advocated, when they appear to have been considered and set aside. As we said in the GAZETTE of 11th August, we dislike being merely critical; and we did our best both to make the Bill perfect, and to defend it from alleged imperfections of which it was free. When it was stated that the new Articles of War were cruelly Draconian, and awarded "DEATH" for no less than sixteen offences, including desertion, we showed that only three offences were absolutely made capital, and only if "traitorously" committed. As Lord Clarence Paget repeated the same thing in the House of Commons, we thought it unnecessary to iterate the fact, although we observed with surprise and regret a subsequent *réchauffé* of the misrepresentation in a weekly contemporary. Considering the great mischief that must result to England's right arm by any disaffection towards the Queen's Service, we always write on these subjects with a deep sense of responsibility; and —to say nothing merely of the obligation of every journal to observe the truth and strictest accuracy —we are amazed that such subjects as the Articles of War, whether through wilful ignorance or unconcern, can be distorted.

We rather think a "Landsman" had not read the Naval Discipline Bill itself, or the Act, before writing his letter, and probably he may not have seen the articles in this journal of 14th and 21st July, and 11th August, in additon to that of 18th August, to which he refers. The headings of the Bill have been retained in the Act, and must certainly affect its working, as they will doubtless be used in construing or interpreting its meaning when persons come to be first tried under it. This will cause great inconvenience, for reasons pointed out by "Landsman" and others already noticed in our columns, such, for instance, as the 16th clause, relating to *striking a superior (including petty) officer, whether in the execution of his office or not,* still standing under "mutiny!" But the Act certainly does provide (section 41), as Lord Clarence Paget pointed out, against a repetition of cases like that of the unfortunate Admiral Byng; and "Landsman" may probably not be aware that in the old Articles of War "mutiny" was not defined, any more than in the recent Act.

It was doubtless the omission in the old Acts of Parliament of any definition of "mutiny," that induced the framers of the late Bill to strike out such a definition, after they had very properly introduced it, upon the first hint that there seemed to be some confusion as to what was intended by "mutiny" in other clauses of the Bill. What they ought to have done was to amend the definition; for, as we shall show, a definition cannot be dispensed with now, though it may not have been required under the old regulations, and when the captain of a ship could deal summarily with every offence. As the Act does not come into operation till the 1st of April, there will be time for the introduction of a short declaratory Act before then; and, if we are not greatly mistaken, either this or an amended Act will be absolutely necessary.

In the original Bill the "definition of mutiny" was as follows:—"If any two or more persons, subject to this Act, combine to resist the authority of their superior officer, and refuse on the first summons to obey his orders, they shall be deemed to be in a state of mutiny." This, we said, was somewhat "stiff" in allusion to the words "on the first summons." As we informed our correspondent "Steel-pen," we might well hesitate to define "mutiny," which, he said, "the Legislature had been unable to define, even when assisted by the best legal advice in the land;" but, being convinced that this great difficulty must be got over, for a more obvious and even stronger reason than any of those pointed out by "Landsman,"—who probably ought to have dated from Lincoln's Inn,—we are actually going to try what we can do towards solving this legal puzzle; and, in the first place we venture to say the above definition will be vastly improved if merely the "stiff" words are expunged. Indeed, perhaps if one other slight alteration be made, the definition then would serve most practical purposes under the Act. We venture to suggest that, if "superior officer" is changed to "commanding-officer," or "captain," the definition might do. It would then stand: "If any two or more persons, subject to this Act, combine to resist the authority of their commanding-officer, and refuse to obey his orders, they shall be deemed to be in a state of mutiny." That, we apprehend, is really a true definition of what mutiny is, as distinguished from mere "insubordination." The legal authorities who drew the Bill were not very far out; and we venture to say we have given the true explanation why the definition was omitted, instead of being made perfect. We doubt very much indeed whether "the best legal advice in the land" spent five minutes over the matter,—except as to its omission altogether.

Having regard, however, to the "Naval Discipline Act of 1860" as a whole, and as an Act of Parliament is really under no metaphysical disabilities in respect of its definitions, we would respectfully suggest that a definition of "open mutiny" as well as "mutiny," must be given in a declaratory Act, before the new Articles of War can be at all carried out on board Her Majesty's ships. By the new Act all offences, *except "open mutiny,"* are to be inquired into by a court of officers appointed by the captain, before any man is sentenced to corporal punishment; and petty officers and non-commissioned officers are now only subject to corporal punishment "*in case of mutiny;*" and, therefore, it will be seen, that it is simply absolutely necessary that a clear and distinct, and known definition of "open mutiny" and of "mutiny" must be promulgated, or the discipline of the Navy after 31st March next will be in the greatest jeopardy.

We venture, therefore, to say that early next session a short bill, something to this effect, must be introduced into Parliament:—"Whereas, by an Act passed in the last session of Parliament, intituled 'The Naval Discipline Act, 1860,' it is enacted that 'no petty or non-commissioned officer shall be subject to corporal punishment except in case of mutiny;' and also that, 'except in cases of open mutiny, no man shall be sentenced by the commanding-officer to corporal punishment until his offence shall have been inquired into by one or more officers appointed by such commanding-officer,' it is now hereby declared, and be it enacted by the Queen's Most Excellent Majesty, &c., &c., as follows:—

"That if any two or more persons subject to the said Naval Discipline Act combine to resist the authority of their superior officer or officers, they shall be deemed to be in a state of mutiny; and further, that if any person or persons, subject to the said Act, shall refuse to obey the orders of his or their commanding officer, he or they so refusing shall be deemed to be in a state of open mutiny, and every such person so offending shall be liable to such punishment or punishments as are provided in the said Naval Discipline Act," &c. A moment's consideration will show that a clear definition of "open mutiny" is necessary, as a commanding officer's hands are now tied in a way that might subvert all discipline whatever. We think that even a single individual should be regarded as guilty of "open mutiny," if he refuses to obey the officer in command, although we of course admit that something like combination or conspiracy enters into the idea of "mutiny." We think, as we have said, an Act may make its own definitions, irrespective of etymological or metaphysical accuracy; but if "the best legal advice" says otherwise, then we maintain that "insubordination in the highest degree," must be substituted for "open mutiny," and defined as we have defined the latter; and that such open insubordination must be made punishable summarily by the captain's own orders, without any previous inquiry, which in such overt cases would be superfluous and fatal to discipline.

We have been accustomed to dwell so much upon the fortifications, arsenals, docks, and breakwater of Cherbourg, that we have permitted our attention to be distracted from what has been going on for some years past at Toulon, a place once well-known to that generation of naval officers which is fast passing away from among us. Toulon is all important to France. The Emperor of the French, in a late speech, compared the city of Marseilles to the olive branch, and Toulon as a sword at its side, ready to avenge any insult that might be offered to it coming from what quarter it would. We can take many a lesson from what is going on in this Mediterranean port; and while not neglecting the instruction offered to us at Cherbourg, we should be equally alive to that which is offered to us in other quarters. We will allow the correspondent of the *Moniteur de la Flotte* to give the information which he has imparted to our French contemporary on the occasion of his visit during the late Imperial tour. He says that Toulon costs the Government as much as Lorient, Cherbourg, and Rochefort together, and as much as Brest, with anyone of these ports added to it. It consumed in 1859, 66,000 tons of coals. During the Italian war it received into its hospital of Saint Maudrier 5000 wounded French soldiers, and 500 Austrian prisoners. In less than six months 57 transports were loaded at this port with 35,000 tons of provisions, coals, and stores of all descriptions for the China expedition alone. Colbert, 200 years ago, bore testimony to the value of Toulon as a military station, by saying that in no port of France was so much dispatch and intelligence exhibited as there in the fitting out of warlike expeditions; and it still maintains its ancient reputation. All this may be well known to our own Government, but we are quite sure it is new to the general public.

The correspondent of the *Moniteur de la Flotte* at Toulon states that the Emperor Napoleon, accompanied by the Empress, paid a lengthened visit to the iron-clad frigate La Gloire, and adds that His Imperial Majesty perfectly delighted and astonished those on board by the knowledge he displayed in reference to the particular armament of this trial ship.

Her Majesty the Queen and the Prince Consort will embark this day at Gravesend on board the Victoria and Albert, and proceed to Antwerp. The Royal squadron will be composed of the St. George, Emerald, Firebrand, Osborne, Vivid, and Black Eagle. The large ships will not accompany the Royal yacht the whole of the distance, but are to be considered as in attendance.

THE ARMY.

2nd Dragoon Guards. Lieut.-Colonel Hutchinson is on leave to Simla from July 3 to October 15. Captain Grant is employed at Calcutta on a special committee. He has been appointed interpreter to the regiment.

3rd Dragoon Guards. This regiment is ordered from Mhow Division, but its station is not yet fixed. The probability is it will be transferred to the Bengal Presidency, relieving the Carabineers, about to return home.

4th Dragoon Guards. The regiment has moved from Aldershot to Birmingham to be stationed, replacing the 11th Hussars gone to Manchester. One squadron will be detached to Weedon and one to Coventry. Colonel Bentinck is on leave to the 14th of October, to purchase remounts, and on private affairs.

7th Dragoon Guards. Captain Cleland has leave from July 10 to Jan. 10, 1861, and has arrived in England.

6th Dragoons. We regret to have to record the death, at Kirkee, on the 19th of August, of Quartermaster John Kirkby Mountain, after a few days' illness, of dysentery. The remains of the deceased officer were interred at Kirkee with military honours on the following evening, and were followed to the grave by the Commander-in-Chief, the Major-General commanding the division, and a large concourse of officers (many of whom came over from Poonah), and the men of the regiment to which he belonged. Mr. Mountain served throughout the eastern campaign of 1854-55, including the battles of Balaklava, Inkermann and Tchernaya, and the siege and fall of Sebastopol, for which he received a medal and clasps.

8th Hussars. This regiment is ordered from Nusseerabad to Mhow to relieve 3rd Dragoon Guards, detaching one squadron to Nusseerabad, and one squadron to Neemuch.

9th Lancers. A squadron of the 9th Lancers left Exeter on Wednesday for Aldershot, under the command of Captain Marshall. A troop followed on Thursday, and the remainder, with head-quarters, yesterday. The regiment has been in Exeter since their return from India, where they served so long and gallantly, and bore the brunt of the Indian mutiny. They have left Exeter universally regretted by the inhabitants of that ancient city.

10th Hussars. A troop marched from Aldershot for Ipswich on Tuesday, another also for Ipswich on Wednesday. A third troop left for Northampton on Tuesday, a fourth for Norwich on Wednesday, and the remainder, with head-quarters, on Thursday.

16th Lancers moved from Aldershot yesterday, as follows: head-quarters and three troops to Hounslow; a squadron to Hampton Court, a troop to Kensington Gate, and a squadron to Woolwich.

Royal Artillery. The following officers, having reported their arrival at Calcutta, are at the recommendation of Colonel Sir G. Barker, posted to batteries as follows, and directed to join accordingly:—Brevet-Major Curtis to take over command of No. 3 battery, 14th brigade, at Decca, from Lieut.-Colonel Maude, C.B., who, on being relieved, will proceed to England; Captain Seale, to Futtyghur, to join No. 6 battery, 11th brigade; Captain Holsworth to Dum Dum, to take over command of No. 5 battery, 14th brigade, from Major Johnson who, on being relieved, will proceed to Madras, to join H battery horse brigade; Lieutenant Stirke to Raj Ghat, Benares, to join No. 2 battery 14th brigade. Major Johnson, royal horse artillery, remains for the present at Calcutta for employ upon a special committee. 2nd Captain Law is transferred from No. 7 battery, 13th brigade, to No. 4 battery of the same brigade, and has proceeded to join his battery in China. Captain Warren, deputy-assistant-quartermaster-general, is posted to No. 3 battery, 14th brigade. The leave to Europe for 12 months granted to Brevet-Major Bredin is cancelled at his own request. No. 7 battery is ordered from Poona to Nusseerabad.

Military Train. Captain Fletcher, 7th battalion, has leave from Aldershot from the 28th September to October the 12th.

Scots Fusilier Guards. On Thursday, the anniversary of the battle of the Alma was celebrated by the sergeants of the 1st battalion Scots Fusilier Guards, by a sumptuous dinner, to which a number of former sergeants of the regiment were invited. The chair was filled by Sergeant-Major George Sharp.

1st Royals, 1st battalion, Captain Versturme, has leave to England on medical certificate.

3rd Buffs. Lieutenant Joseph Haydock, while on a shooting excursion at Lord Clarina's, Elm Park, near Limerick, on Monday, shattered one of his fingers, which had to be subsequently amputated.

4th Regiment. Head-quarters wing is ordered to move from Ahmedabad to Ahmednuggur, detaching one company to Assurghur to relieve the company of the 28th, which will join its own head-quarters.

7th Fusiliers. Lieutenant Gardner, 1st battalion, is about to retire from the service, Ensign Keyser purchasing the step.

11th Regiment. A general court-martial has been assembled to try Quartermaster Napier, of the 1st battalion of the 11th Regiment, on a series of charges preferred by Lieut.-Colonel Jenner. Colonel Dunlop, of the Royal Artillery, is the president, and Major Peebles, of the 1st battalion of the 11th Regiment, officiates as the Deputy-Judge-Advocate.

15th Regiment, 2nd battalion. Captain Fitz Roy has leave from Malta to England, from September 1 to December 31.

22nd Regiment, 2nd battalion. Lieutenant Pocock is on leave to October 14. Ensigns Parke and Leader are on leave to Naples from the head-quarters at Malta.

43rd Light Infantry. By the death of Brevet-Major Disbrowe, Lieutenant Sargent and Ensign Garland, obtain promotion. Lieutenant Talbot and Assistant-Surgeon Madden, M.D., have arrived home with detachments from India.

45th Regiment has moved to the North Camp, Aldershot, replacing the 86th, and is attached to the 3rd brigade.

51st Light Infantry. The depôt companies arrived at Chatham garrison from Chichester on Monday evening, under the command of Captain C. Acton, and went into the quarters at the Hut Barracks vacated that day by the depôt of the 1st battalion of the 8th Foot, removed to Templemore.

52nd Light Infantry. Lieutenant C. O'L. L. Prendergast is attached to Kurrachee depôt, awaiting the arrival of regimental drafts expected from England, when his services will be availed of in conducting them to the head-quarters of their regiment.

56th Regiment is ordered from Poona and Ahmednuggur, head-quarters and four companies, to Bombay; three companies Ahmedabad, and three companies Sattara. The death of Captain J. F. Baxter, of Her Majesty's 56th Regiment, occurred rather suddenly at Ahmednuggur on the 20th of August.

60th Rifles. George Pigott, 3rd battalion, has sick leave to England.

61st Regiment. The hired troopship Donald M'Kay, arrived at Spithead on Saturday morning from the Mauritius with the 61st Regiment, commanded by Lieut.-Colonel Rainey. The 61st Regiment comprised, Lieut.-Colonel Rainey, in command; Major Redmond; Brevet-Majors Gordon and Burnside; Captains M'Donough, Thurston, and Sloman; Lieutenants Hutton, Griffiths, Boileau, Murphy, Casement, Rumsey, Sewell, Fane, Hamilton, and Ness; Ensigns Nugent, Atkinson, Cockle, Borton, and Fraser: Paymaster W. Dowler; Quartermaster J. Dowler; Assistant-Surgeons Hoyte and Mackinnon; Mrs. Burnside and two children, Mrs. Sloman and one child, Mrs. Thurston, Mrs. W. Dowler, Mrs. J. Dowler, Mrs. M'Donough, and Mrs. Fraser and two children. Non-commissioned officers, 77; privates and drummers, 510; women, 29; and children, 34. The Donald M'Kay sailed from the Mauritius on the 20th of June, and from St. Helena on the 30th of July. The 61st Regiment on landing proceeded by railway to Plymouth.

64th Regiment. The order for the removal Her Majesty's 64th Foot from Kurrachee to Hyderabad has been countermanded, as the authorities at head-quarters considered it would be inflicting a hardship upon the men again to send them up country. This regiment has been twelve years in India, six of which have been spent in Scinde, and three in the field. It appears that this corps is to go to Poona or Belgaum in the approaching winter, and will be relieved by Her Majesty's 51st from Mean Meer, or the 57th from Bombay.

70th Regiment. Lieutenant Crozier has resigned his commission. Lieutenant Duff is about to retire from the Service.

74th Regiment. Lieutenant Magrath is about to retire from the service.

83rd Regiment. A wing is ordered from Kolapoor to Belgaum, to join head-quarters.

86th Regiment arrived at Portsmouth on Tuesday from Aldershot, and embarking on board the hired steamers Foyle and Zephyr, sailed for Warrenpoint, for Newry, Ireland.

95th Regiment is ordered to move from Neemuch, but its destination is not yet fixed.

96th Regiment. The depôt arrived at Chichester from Parkhurst, Isle of Wight, on Monday evening, under the command of Captain Grant and the following officers:—Captain E. Cookson, Lieutenant E. Johnston, Lieutenant E. Hogg, Ensign A. Harcourt, and went into the quarters vacated that day by the depot of the 51st (King's Own) Light Infantry, removed to Chatham.

Rifle Brigade. Under instructions from the Horse Guards, Captain Windham, 3rd battalion, is ordered home from India without delay, for the purpose of joining the staff college. Lieutenant Chamberlain is appointed to act as instructor of musketry to the 3rd battalion, vice Captain Windham.

The first annual report of the "Soldiers' Home" at Gibraltar is satisfactory in every respect save one—the want of money to pay off a debt of about 1000*l.* which was incurred in its foundation, and we trust this will soon be supplied by those interested in the soldier's welfare. The institution pays its current expenses, is gratefully appreciated by the men, of whom 2300 are subscribers, and has brought about greatly increased comfort among those quartered in a place where some rational relaxation from the irksomeness of barrack life is especially required to induce the men to abstain from harm, and amuse and improve themselves.

A series of experiments for the satisfaction of the Ordnance Select Committee has been made during the past week in Woolwich Arsenal Marsh, with the important object of verifying the advantages of a new electric target invented by Lieut. Chevalier, 1st West India Regiment. The target, instead of being made in one solid piece according to the usual method of targets, is divided into a number of parts, thus—bull's eye, centre, and two outers. The ranges of firing varied from 400 to 700 yards, and the instant the target was struck a needle on the face of the dial indicated with perfect accuracy which part of the target was hit. The spot struck was clearly visible from a distance by the indication of the needle, and obviated the necessity of approaching the target, a circumstance which has been attended in many instances with accidents and loss of life. The result of the experiments was so successful, and exhibited advantages of such important character, that the Select Committee immediately ordered a number of the electric targets to be erected at Hythe and Aldershot, and, in a report to the Secretary of State for War, they have strongly recommended their immediate adoption for all the purposes of rifle practice.

We learn from the Madras *Times and Spectator* that Captain J. T. Clarke, of the 34th Calcutta Light Infantry, has been found guilty by general court-martial of having been in an unfit state, from the effects of intoxication, to appear before a Court of Inquiry on the 23rd of June last, which had been assembled to investigate certain complaints preferred against him by his commanding officer. The court sentenced him to suspension from rank, pay, and allowances for four months, and the sentence has been confirmed by the Commander-in-Chief.

THE HARVEST AND THE ARMY.—The annexed Circular Memorandum has been addressed to the Army at home:—"Horse Guards, S. W., Sept. 15, 1860.—There will be no objection on the part of His Royal Highness the General Commanding-in-Chief, to officers permitting a certain number of men to assist in the harvest on being applied to for such assistance.—By command, James Yorke Scarlett, Adjutant-General."

HER MAJESTY'S 60TH RIFLES.—The Indian medals were distributed to the officers and men stationed at Dover on Thursday last. Less fortunate than the Brigade in obtaining the decorations which were won so gloriously in the Russian war, the 60th displayed the highest qualities as soldiers when "hanging on to the noses" of the rebels at Delhi, and in subsequent operations, and their Indian medals and clasps were hardly earned in an ungrateful service in a dreadful climate. The officers entertained some guests after the ceremony.

SHORNCLIFFE CAMP.

Thursday, the 20th, the Anniversary of the Battle of the Alma, was celebrated at the Camp on this day by a review of the whole of the troops on camp, and a series of field-operations, representing a descent on the coast by an enemy met by the whole of the troops in garrison. The grand redoubt at Dimchurch, Forts Twiss and Sutherland, and the Martello towers to Sandgate, were manned by the Royal Artillery, who came from Dover for the occasion, and who commenced the sham-fight by firing ten rounds per gun from each of the above batteries. The 76th Regiment, under the command of Colonel Peacocke, was advanced in skirmishing order to repel the attack, the 17th Regiment being held in reserve to support; the troops then retired, covered by two guns at Hythe, and a squadron of the 5th Dragoon Guards, and two troops Military Train, who were mounted as light cavalry with their carbines slung at their backs. During this movement a barrel-pier bridge had been constructed across the royal military canal by the 34th company of the Royal Engineers, under the command of Captain Gordon; this was constructed of barrels floated from the land-side of the canal, fastened to baulks by ropes with planks laid transversely, the bridge being about seventy-five feet long, by about twelve feet wide; across this bridge the advanced skirmishers retired, covered on each flank by the supports. The cavalry and artillery then fell back along the turnpike road from Hythe to Sandgate, covered by skirmishers from the 16th and 17th Regiments, who manœuvred on the high ground flanking the Military Canal. The demolition of the temporary bridge across the canal then took place, which occupied about six and a-half minutes, in which time the whole were loaded on the waggons of the Military Train, which were in attendance for that purpose. Meanwhile the infantry had retired to the high ground fronting Shorncliffe, on the south-west, when the guns in position at that point opened fire, to cover their retreat. The troops then opened out in skirmishing order, lining the summit of the rising ground on the south-west part of Shorncliffe Cliff, a tremendous cannonade being kept up from the batteries lately erected at this portion of the camp, as well as from the Martello towers. The different regiments were then formed up on the plateau of Shorncliffe, and marched across it to the eastern extremity, where they were put through the evolutions of repelling the imaginary enemy, who had again attacked the camp from that quarter. General Mansel then proceeded to the saluting point, and the whole of the troops engaged marched past in quick time in the following order:—First, a squadron of the 5th Dragoon Guards, next two troops of the Military Train, followed by the Royal Artillery. *The Folkestone corps of* Artillery Volunteers next marched past, and then in succession the 16th, 17th, and 18th Regiments of the Line.

This terminated the day's proceeding. The weather, at the early part of the review, was very unfavourable, but, in spite of which, a numerous and fashionable assemblage were in attendance.

The Army Gazette.

WAR OFFICE, PALL MALL, SEPTEMBER 18.

Royal Regiment of Horse Guards—Assistant-Surgeon John Crown Agnis, from the 3d Light Dragoons, to be Assistant-Surgeon, vice Kerin, promoted in the 2d Life Guards.

89th Foot—Luke Henry Jones, Gent., to be Ensign, by purchase, vice Atthill, promoted.

94th Foot—Lieutenant Josiah Robert Rolls to be Captain, by purchase, vice Gardiner, promoted, by purchase, to an Unattached Majority.

96th Foot—James King, Gent., to be Ensign, by purchase, vice Henniker, promoted.

97th Foot—Anthony Lynch, Gent., to be Ensign, by purchase, vice Gray, promoted.

98th Foot—Lieutenant Sidney Henry Heywood to be Captain, by purchase, vice Rhodes, who retires; Ensign Charles Graham Heathcote to be Lieutenant, by purchase, vice Heywood.

99th Foot—Marcus William Kelly, Gent., to be Ensign, by purchase, vice Eyre, appointed to the 73rd Foot.

100th Foot—Cecil Edward Leny Lyon, Gent, to be Ensign, by purchase, vice Ridout, promoted; Jeremiah Bingham Kersteman, Gent., to be Ensign, by purchase, vice Davidson, promoted.

Rifle Brigade—Lieutenant Frederick Edward Sotheby to be Captain, by purchase, vice George Robert Saunders who retires; Ensign Lord Edward Cavendish to be Lieutenant, by purchase, vice Sotheby; William Duberly, Gent., to be Ensign by purchase, vice Lord E. Cavendish.

1st West India Regiment—Assistant-Surgeon King John Parr, from the Staff, to be Assistant-Surgeon, vice Kelly, appointed to the Staff.

2nd West India Regiment—James F. Hopkins, Gent., to be Ensign, without purchase, vice Studdert, promoted.

3rd West India Regiment—Ensign George Francis O'Grady to be Lieutenant, by purchase, vice Duncan, who has retired.

Cape Mounted Riflemen—Captain Samuel Henry Harford, from the 12th Foot, to be Captain, vice Arnold More Knight, who exchanges.

Royal Canadian Rifle Regiment—Ensign and Adjutant David Miller to have the rank of Lieutenant; Ensign Ernest C. Wilford to be Lieutenant by purchase, vice Suckling, who retires.

St. Helena Regiment—Ensign Anthony Edmond Donelan to be Lieutenant, without purchase, vice Furnell, deceased; Thomas Storrar Smith, Gent., to be Ensign, without purchase, vice Donelan.

Royal Newfoundland Companies—Assistant-Surgeon Leslie Ogilvy Patterson, from the Staff, to be Assistant-Surgeon, vice Skues, appointed to the Staff.

DEPOT BATTALION.

Captain James Graham from 9th Foot to be Adjutant, vice Captain J. Martley, appointed to the 9th Foot.

CAVALRY DEPOT.

Quartermastor-Sergeant William Lowe to be Quartermaster, vice Jopn Thompson, who retires upon half-pay.

ROYAL MILITARY COLLEGE.

Captain and Brevet-Major William Roberts Farmar, from 82nd Foot to be Captain of a Company of Gentlemen Cadets, vice Brevet-Major Garnet Man, who has retired upon full-pay.

Assistant-Surgeon F. Collins, M.D., from the Staff, to be Assistant-Surgeon, vice Surgeon Melville Neale, M.D., appointed to the 18th Light Dragoons.

UNATTACHED.

Major and Brevet-Lieutenant-Colonel Henry Bird, from the Gold Coast Artillery Corps, to be Lieutenant-Colonel, without purchase.

Captain Thomas George Gardiner, from 94th Foot, to be Major by purchase.

STAFF.

Captain and Brevet-Colonel Evelyn Henry Frederick Pocklington, half-pay, Unattached, to be Assistant-Quartermaster-General at Head-Quarters, vice Brevet-Colonel Terence O'Brien, Lieutenant-Colonel, on half-pay, Unattached, appointed to the command of the troops in Ceylon.

MEDICAL DEPARTMENT.

Staff-Surgeon-Major Gideon Dolmage, retired upon half-pay, to have the honorary rank of Deputy Inspector-General of Hospitals.

Staff-Surgeon-Major Robert Smith, retired upon half-pay, to have the honorary rank of Deputy-Inspector-General of Hospitals.

Surgeon-Major William Alston Dassauville, M.D., from the Royal Artillery, to be Staff-Surgeon-Major, vice Stone, placed upon half-pay.

Staff-Surgeon John Ramsay Brush, M.D., from half-pay, to be Staff-Surgeon, vice Hardie, appointed to the 73rd Foot.

Assistant-Surgeon William Mackenzie Skues, M.B., from the Royal Newfoundland Companies, to be Staff-Assistant-Surgeon, vice Henry Walker, placed upon half-pay.

Assistant-Surgeon James Kelly, from the 1st West India Regiment, to be Staff-Assistant-Surgeon, vice Patterson, appointed to the Royal Newfoundland Companies.

Dispenser of Medicines Frederick Philpot to be Apothecary to the Forces, vice Schembri, placed upon half-pay.

BREVET.

Lieutenant-Colonel and Brevet-Colonel Charles Edward Michel, retired upon full-pay, 54th Foot, to have the honorary rank of Major-General.

Lieutenant-Colonel Edward Thornbrough Parker Shewen, retired full-pay, Royal Marines, to have the honorary rank of Colonel, under Her Majesty's order in Council of 13th November, 1858.

Captain and Brevet-Major William Follows, retired upon full-pay, late half-pay 18th Light Dragoons and Staff Officer of Pensioners, to be Lieutenant-Colonel in the Army, the rank being honorary only.

To be Majors in the Army.

Captain Charles Edward Stewart Gleig, 14th Foot.
Captain Henry Augustus Adams, 13th Bombay Native Infantry.
Captain Christopher Buckle, 3rd Bombay Light Cavalry.
Captain Robert Haydon Shebbeare, 60th Bombay Native Infantry.
Captain Frederick Roome, 10th Bengal Native Infantry.

Paymaster Henry Hollis Howett, 17th Foot, to have the honorary rank of Captain, under the Royal Warrant of January 27th, 1860.

Paymaster James Murphy, 10th Foot, to have the honorary rank of Captain, under the Royal Warrant of January 27th, 1860.

Quartermaster John Thompson, half-pay Cavalry Depot, to have the honorary rank of Captain.

The Brevet Commissions of the undermentioned Officers to be antedated, and the following promotions to take place consequent on the promotion of Colonel Montgomery Williams, of the Royal Engineers, to be Major-General, in succession to General Gustavus Nicolls, of the Royal Engineers, who died August 1st, 1860:—

To be antedated to 2nd August, 1860:

Brevet-Colonel H. F. Ponsonby, Grenadier Guards.
Brevet-Lieutenant-Colonel J. Nugent, 36th Foot.
Brevet-Major J. C. Childs, Royal Artillery.
Lieutenant-Colonel Oliver Paget Bourke, half-pay, 17th Foot, to be Colonel.
Major John Porter, 67th Foot, to be Lieutenant-Colonel.
Captain G. Vanderheyden Johnson, Royal Artillery, to be Major.

The undermentioned promotions to take place consequent on the death of Lieutenant-General Horatio George Broke, Colonel 88th Foot, on 30th August, 1860:

Major-General Michael White, C.B., Colonel 7th Dragoon Guards, to be Lieutenant-General.

Brevet-Colonel Charles William Morley Balders, C.B., from 17th Light Dragoons, Commandant of the Cavalry Depôt at Maidstone, to be Major-General.

Lieutenant-Colonel Charles Sillery, half-pay Depôt Battalion, Deputy Quartermaster-General in New Zealand, to be Colonel.

Brevet-Major Henry Downe Griffith, 45th Foot, to be Lieutenant-Colonel.

Captain Adolphus Frederick Connell, Royal Artillery, to be Major.

The undermentioned promotions to take place consequent on the death of Major General Henry Frederick Lockyer, C.B., on 30th August, 1860:—

Brevet-Colonel Frederick W. Hamilton, C.B., from the Grenadier Guards, to be Major-General.

Lieutenant-Colonel Bertie Edward Murray Gordon, 91st Foot, to be Colonel.

Major Francis Gilbert Hamley, 50th Foot, to be Lieutenant-Colonel.

Captain Sydney Darling, 9th Foot, to be Major.

For the notification in the *Gazette* of 18th inst, relative to Captains Caulfield and Trench, *read* Captain John Palmer Caulfield, 4th Bengal European Regiment *to be Major in the Army*; Captain Henry Le Poer Trench, 35th Bengal Native Infantry, *to be Major in the Army*.

Memoranda—Major and Brevet-Lieutenant-Colonel Charles Murray, upon half-pay Unattached, has been permitted to retire from the Service by the sale of his Commission, he being about to become a Settler in Canada.

The Christian names of Major-General Smyly, retired full-pay 99th Foot, are *Philip Austin*, and not *Philip* only, as hitherto stated.

THE NAVY.

ADMIRALTY, SEPTEMBER 22.

PROMOTIONS.

Master—Second-Masters Thomas Leetham and Roger M. Curry.

APPOINTMENTS.

Lieutenants—Osmond de B. Brook to Indus; Wm. D. M. Dolben to Curlew; Arthur Bayley to Edinburgh, for service in Coast-Guard; the Hon. Victor A. Montagu to Foxhound.

Mates.—Wm. G. Scott to Tartar; Henry M. Ommaney to Royal Albert.

Midshipmen.—C. H. Hawkins to Royal Albert; Gerald C. Hunt to Edgar; Thomas V. Williams and Philip A. Davies to Tartar; Frederick Walter to Diadem.

Masters' Assistants.—W. H. Purves to the Spiteful; John E. Petley (supernumerary) to the Fisgard.

Clerks—A. Hunter (supernumerary) to the Fisgard; R. R. Hopkins, S. H. Scroggs, W. J. Mayne, G. A. F. C. Seebles, W. B. Inman, and R. J. M. Macleod to the Marlborough, as supernumeraries; T. A. Miller and J. J. Gormally to the Impregnable.

First-Class Assistant-Engineer—Richard Holman (supernumerary) to the Indus.

Second-Class Assistant-Engineers—George L. D. P. Keeling to the Indus, for service in the Lark; Thomas W. Saunders (acting) to the Asia, for service in the Harrier; David Longland to the Roebuck.

Third-Class Assistant-Engineer — William J. Hancock (acting) to the Rhadamanthus, as supernumerary.

Anson, 91, screw liner, launched on Saturday at Woolwich, has been towed down the river to be completed at Sheerness Dockyard. Her engines and machinery will be fixed by workmen in the employ of the contractors, Messrs. Maudslay and Co.

Argus, 6, paddle steam sloop, Commander F. W. Ingram, was, on the 14th inst., hourly expected at Malta from the coast of Sicily, and would, after coaling, proceed to make a survey of that extraordinary shoal which, at its first appearance was denominated Graham's Island, after Sir James Graham, who was First Lord of the Admiralty at the period of its discovery.

Ariel, 9, screw-sloop, Commander Alexander, is fast progressing towards completion in her outfit at Portsmouth, and is coaling alongside the dockyard. She has shipped an excellent crew, and is only seven hands short of her assigned complement. She appears to be more fortunate than the vessels recently commissioned at the eastward, as great complaints are being made as to the scarcity of efficient seamen.

Avon, 3, paddle-steamer, sailed from Portsmouth on Sunday last for Devonport.

Black Eagle, paddle-yacht, Master-Commander Petley, arrived at Portsmouth on Monday with the Royal standard flying at the main, having on board His Royal Highness the Duke of Cambridge, who received the customary salute from Her Majesty's ship St. George, lying at Spithead, on passing through that anchorage, and also from the garrison saluting battery and Her Majesty's ship Victory on entering the harbour. Shortly after the yacht had made fast, His Royal Highness landed at the dockyard, and proceeded, in the private carriage of Vice-Admiral H. W. Bruce, to the Government House, where, during his stay in the garrison, he will become the guest of the Lieut.-Governor, Major-General Lord W. Paulet, C.B. The Black Eagle sailed from Portland on Saturday for the Channel Islands, as announced in this journal last week, but the weather proved so boisterous in the Channel that she was compelled to anchor inside the Isle of Wight for shelter. The weather continued so unsettled that the Black Eagle received orders to return to the Thames.

Boxer, 1, screw gun-boat, tender to the flag-ship, Marlborough, was in Malta Harbour on the 14th inst. This gun-boat, which was about shortly to leave for England, will probably be dispatched to Marsala to protect British property thereat during the vintage, when the necessity for having large funds in hand attracts to the vicinity lawless bands from the interior, who have of late been carrying away parties known to have good means, for the purpose of exacting a ransom for their liberation.

Brunswick, 80, screw liner, which has been undergoing a thorough repair, has been removed from Keyham Basin, Devonport.

Cæsar, 90, screw liner, Captain Thomas H. Mason, was in Malta harbour on the 14th inst., but was under orders for the Coast of Syria, to which station she was expected to proceed in the course of a few days.

Caradoc, 2, paddle steam-vessel, Lieut.-Commander John B. Scott, was in Malta Harbour on the 14th inst.

Donegal, 101, screw liner, Captain Henry Broadhead, from the Channel fleet, arrived at Plymouth under steam on Saturday, with her steering apparatus damaged, and has gone up Hamoaze to repair.

Emerald, 51, screw frigate, Captain Arthur Cumming, has left Portsmouth for the eastward, to join the squadron forming the royal escort.

Espoir, 5, screw sloop, Commander Sholto Douglas, which left Plymouth Sound on Wednesday week for the west coast of Africa, returned on Sunday, having been compelled to put back in consequence of having experienced heavy weather off Ushant, where she sustained some damage. The Espoir is well manned with a smart crew, and will doubtless put off again with very little delay. She has since been towed from the Sound into Hamoaze to make good her damages.

Firebrand, 6, paddle steam-sloop, Commander J. M. Bruce, will form one of the squadron appointed to attend on Her Majesty from Gravesend to Antwerp.

Hibernia, sailing three-decker, Commander the Hon. A. C. Hobart, flag-ship of Admiral-Superintendent Codrington, C.B., was in Malta harbour on the 14th inst.

Himalaya, 6, iron screw troop ship, Captain John Seccombe, arrived at Malta from Corfu on the 14th inst.

James Watt, 91, screw liner, Captain Edward Codd, was in Malta harbour on the 14th inst.

Landrail, 5, screw steam gun-vessel, Commander Thomas H. M. Martin, (1859), fitting out at Woolwich, has

Digitized by Google

entered a portion of her crew, but still requires petty officers and able seamen to make up her complement.

Liffey, 51, screw frigate, Captain George Preedy, C.B., was at Alexandria on the 10th inst., but under orders to return immediately to the coast of Syria.

Mars, 80, screw liner, Captain J. N. Strange, from the Channel Fleet, arrived in Plymouth Sound on Friday evening the 14th inst., and on Saturday morning saluted the flag of the Commander-in-Chief, Admiral Sir A. Fanshawe, K.C.B., which was acknowledged by the Impregnable. The defects of the Mars are to be made good, and she is to be provisioned and stored, it is reported, at Devonport for foreign service in the Mediterranean.

Megæra, 6, screw troopship, Commander Henderson, refitting at Portsmouth, is having her bottom cleaned and coated with patent composition, her decks caulked, and sundry slight defects in her engine department made good preparatory to further service.

Orion, 91, screw liner, Captain J. B. E. Frere, was in Malta harbour on the 14th inst.

Osborne, steam-vessel, Master-Commander G. H. K. Bower, left Portsmouth harbour on Tuesday last for Gravesend.

Redpole, 1, paddlewheel steam-vessel (tender to Hibernia), Captain Frederick Warden, C.B., was at Gibraltar on the 14th inst.

Scourge, 6, paddle steam-sloop, Commander William G. Jones, was in Gibraltar bay on the 14th inst.

Snail, 1, screw gun-boat, Lieut.-Commander Noel Osborne, was in Gibraltar bay, on the 14th inst.

St. George, 90, screw liner, Captain Hon. Francis Egerton, arrived at Spithead on Sunday last from the westward, and exchanged salutes with the Victory, flag-ship of the Commander-in-Chief. She saluted as Her Majesty the Queen passed through Spithead on Tuesday morning. She sailed on Wednesday for the Downs, to form a part of the Royal Squadron.

St. Jean d'Acre, 101, screw liner, was cruizing off Malta on the 14th inst. Captain Thompson has been compelled to invalid, owing to ill health, and the ship is under the temporary command of Commander John D. McCrea.

Tartar, 20, screw corvette, of 250-horse power, and 1296 tons, Captain John Montagu Hayes, at Sheerness, having completed her complement of 250 officers and men, is shortly expected to sail for China. The following officers have also been appointed:—Lieutenants—William A. De V. Brownlow, Cottrell, B. Powell, Blair, S. Hamilton; Master—John E. Chapple; Surgeon—George Mason, M.D.; Paymaster—Thomas W. Haverfield; Clerk—F. Sueter; Assistant Surgeon—William E. Dillon; Master's Assistant—T. J. Burghess; Chief Engineer—John T. O'Bree; Acting Second-class Assistant Engineer—N. Lilt; Third-class Assistant Engineer—George Paul; Acting Third-class Assistant Engineer—Thomas Russell.

Trinculo, screw gun-boat, built under contract by Mr. J. Banks, at Queen Anne's Yard, Plymouth, was launched on Saturday last. Her construction was superintended by Mr. Godfrey, of the Devonport Royal Dockyard. Dimensions: Length between perpendiculars, 120 feet; ditto over all, 126 feet; ditto, keel for tonnage, 105 feet; breadth for ditto, 21 feet 10 inches; ditto, extreme, 22 feet; depth, 9 feet 6 inches; 268 tons; 60-horse power; draught of water, 7 feet 9 inches.

Trusty, 14, iron-plated floating battery is still in dock at Chatham, undergoing examination by the officers connected with the dockyard. The result of the survey up to the present time has been to discover that her timbers are in an exceedingly rotten state, and her bottom greatly damaged by the ravages of the marine insect. It has also been discovered that the interior has been very much injured by the great shaking she underwent from the concussion of the shot fired from the Armstrong guns during the recent experiments made upon her. It is not yet decided what will be done to her in the way of alterations and repairs until the decision of the Lords of the Admiralty arrived at during their late inspection of the Yard be made known.

Victoria and Albert, 2, steam-yacht, Captain the Hon. J. Denman, left Portsmouth harbour on Wednesday last for Gravesend.

Vivid, 2, paddle steam-vessel, Master-Commander H. W. Allen, will accompany the royal yacht to Antwerp.

Wellington, 72, guard-ship of steam ordinary, at Devonport, Captain Astley C. Key, C.B., has been shifted from her old moorings in order to make room for the Indus, which took hese up on Thursday last.

A Gunboat Voyage to China.—The following are extracts of a letter from an officer in command of one of Her Majesty's gunboats in the present expedition, dated Ta-lien-whan Bay, July 6:—". . . All the ships are up here now and everything ready. I should like very well to go home a commander at last after this affair is over, and get a better ship, for a gunboat is not a comfortable command at all, and the Admiral expects a good deal from them. You see, when they were built they were intended for gunboats only, to be convoyed and supplied by larger vessels; but our Admiral makes them quite independent commands, which is better than their being tenders to larger ships; yet they have not sufficient room for stowage as independent commands. However, I shall stick to her till I am promoted, which I hope will not be long first. Now I come to look back to our voyage out, it seems to me only wonderful that the gunboats—both these and the others that came out formerly—all arrived safe, for a very little would have sent them to the bottom, and at once, not like a large ship that takes a long time to fill. In a heavy gale the danger is that the sea, having once got the upper hand, by the boat broaching to or not being able to lay to might turn her right over bottom up in a moment; and from what I saw myself during a westerly gale we had for three days between the Cape and St. Paul's, 40° S., I should not like to bring another gunboat out. Not that I should be afraid; but when you have 39 people under your command, who look to you for the safety of themselves and for you to give the necessary orders, it makes one feel very anxious. . . . In the gale I was up day and night, and indeed, during the whole passage out I had not many nights between the blankets, as I found it better to turn in on the top of my bed with my clothes on, ready for a jump on deck in case of anything. One night I had gone below at 12, it being my custom to remain on deck till that hour, but about 2 a.m. I heard the officer in charge shortening sail, though apparently there was not too much wind; but a moment afterwards I turned out, for, hearing him give his orders in a quick and anxious manner, I supposed something was not quite right. I was instantly on deck, and found the boat struck with a very heavy squall—very fortunate it came up astern. She was being pressed into the sea forwards, so that the water was pouring over her bows, and she going through the waves at a tremendous pace. The hands were on deck in a moment, but it was difficult to shorten sail on account of the volume of wind; so when I saw what was the matter I put her dead before the wind, which by daylight was blowing a gale, and got all snug. At first, when I got on deck, I had such a sea right over me that I was myself nearly washed overboard. . . . . Well, this was our first gale. . . . . Our second was from the west, and as we were going east it helped us along. But it was an anxious time—very different when I was a lieutenant, keeping watch on other ships. I used then to go and turn in and forget all about the ship and her danger, if she was in any, as I had then given up charge of the deck to another. But here there is no giving up charge, unless I were sick and went on to the list; but who would do that as long as he could move about?"

The Duke of Somerset held a levée at the Admiralty House, in Portsmouth dockyard, on Saturday last. The Lords of the Admiralty afterwards returned to London. The men in the dockyard were granted on Saturday the usual half-holiday allowed on the occasions of their Lordships' annual inspection.

The Runnymede, hired transport, arrived at Spithead on Sunday last from Hong Kong and St. Helena, sailing from the last-named port the same day as the Donald M'Kay, which arrived at Spithead on the previous day. The Runnymede has 141 naval invalids on board (no military), who were landed from the ship and transferred to the Victory flagship; those cases which may require such treatment were sent to the Royal Naval Hospital at Haslar. The following officers arrived in the ship:—Mr. Bowen, Master, R.N., Admiralty Agent, Dr. Carr, R.N., and Assistant-Surgeon Bartlett, R.N., in charge of invalids; Lieutenants Smith, Gilbert, and Kellett, R.N., and two warrant officers.

The launch of Her Majesty's screw steam sloop Nimble was successfully effected from Pembroke dockyard on Saturday last at about 5 o'clock. The ceremony of naming the vessel was performed by Miss Cradock, daughter of the master shipwright. The Nimble has been built with extraordinary rapidity, having only been laid down on the 31st of October, 1859. She was designed by Rear-Admiral Sir Baldwin Walker, K.C.B., the Comptroller of the Navy, and is sister vessel to the Espoir, recently launched from Pembroke dockyard. Her principal dimensions are as follows:—Length between perpendiculars, 145ft.; length of keel for tonnage, 127ft. 10½in.; breadth extreme, 25ft. 4in.; ditto moulded, 24ft. 6in.; ditto for tonnage, 25ft.; depth in hold, 13ft.; burden in tons, 425 14-94ths in.; horse-power, 80. Her armament is as follows:—One 68-pounder pivot gun, 95cwt., 10ft. long; and 4-5 24-pounder howitzers.

Corps of Royal Marines—Erratum in *Gazette* of 24th of August, 1860: Promotion of First Lieutenant Owen Thomas Jones should be dated 22nd instant.

LIGHTHOUSES IN THE RED SEA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—My attention has just been called to a paragraph in your paper of the 15th, relative to the lighthouses now in course of construction for the Red Sea.

It is there stated that Commander Mansell, of H.M.S. Firefly, is the officer deputed by the Admiralty to superintend the erection of the buildings, with the assistance of Captain Baker, of the Peninsular and Oriental Company.

This is incorrect.

Neither the Admiralty, nor Captain Washington, nor Commander Mansell, has anything whatever to do with those lighthouses.

The whole undertaking is being carried out by the Marine department of the Board of Trade, under authority of the Viceroy of Egypt,—so far as concerns the buildings; and of Her Majesty's Treasury, so far as regards the lanterns and apparatus.

The sites and designs have been adopted by the Board of Trade, in concurrence with the managing directors of the Peninsular and Oriental Company, and in accordance with the recommendations I had the honour to make after visiting the spots in February last; and the operations are being carried out entirely under my directions, as engineer, on the part of the Board of Trade. Captain Baker is the commander of the steamer which is provided by the Peninsular and Oriental Company to carry out the materials from Suez, and furnish quarters for the workmen, and he will of course have nautical command of the expedition. Mr. Chapman, C.E., has the engineering superintendence on the spot, and Commander Mansell only avails himself of the opportunity of a steamer, which can furnish him and his officers with quarters in those otherwise inhospitable regions, to make an improved chart of the localities. This is his sole connection with the expedition.

Captain Washington's visit to Egypt has not, so far as I am aware, anything whatever to do with the lighthouses, although his opinion upon the sites and designs has been asked, and his assistance in some matters of detail given with that courtesy and readiness which are never wanting with the gallant officer.

It may be interesting to such of your readers as are acquainted with the Red Sea to know that the lighthouses in question are to be placed, one upon the Dædalus Coral Reef near the centre of the sea, in latitude 24° 50′; one upon the Ushruffee Reef in the Straits of Jubal, which will allow those Straits to be passed by night, as is not the case at present; and one on Zafarana Point, 50 miles below Suez. The two former lighthouses are of wrought iron, and are now to be seen, nearly completed, in Messrs. Forrester & Co.'s yard at Liverpool. The third is being constructed on the spot, under the Engineers of the Egyptian Government. The lights lanterns, and apparatus, for the three, are being made by Messrs. Wilkins & Co.; and it is hoped that the whole will be shipped in the course of next month, and the lights exhibited early in the ensuing year.

This most useful and interesting undertaking is therefore being carried out by the co-operation of the Board of Trade, the Egyptain Government, and the Penisular and Oriental Company; and the officers of the Admiralty, though giving individually their hearty co-operation, have no official connection with the matter.—I am, &c.,

William Parkes.

THE OFFICIAL TOUR OF THE LORDS OF THE ADMIRALTY.

On Wednesday morning, at eleven o'clock, the Lords Commissioners of the Admiralty, comprising his Grace the Duke of Somerset (First Lord), Admiral Lord Clarence Paget (secretary), Vice Admiral Sir Richard Saunders Dundas, Admiral Pelham, and Mr. Whitbread, accompanied by Sir Baldwin Walker, surveyor of the navy, and Colonel Greene, director general of works, arrived at Woolwich, for the purpose of conducting the annual inspection of the several government departments under their control. Their lordships were received at the dockyard by a guard of honour, consisting of a detachment of the Royal Marine Light Infantry, and immediately proceeded to the east end of the establishment, accompanied by Commodore Superintendent the Hon. J. R. Drummond, and other officers. Having occupied about three hours at the dockyard and factory, their lordships, after partaking of refreshment at the residence of the commodore superintendent, proceeded to the Royal Marine Barracks, where the whole of the Woolwich division of Royal Marine Light Infantry, amounting to 1100 officers and men, were drawn up on the parade ground in review order, under the command of the commandant, Colonel Stransham. The division marched past at slow and quick time, and performed other evolutions, the band and colours of the corps being on the ground. At the termination of the review their lordships witnessed drill exercise with the field-pieces at the Marine Gun-drill Battery, and inspected the several departments of the barracks, as also the splendid new hospital, now approaching completion. Their lordships, on leaving, expressed to the commandant, Colonel Stransham, their utmost satisfaction with the discipline and appearance of the corps, and the present condition of the barracks, in which several important improvements of a sanitary nature have recently been effected. Their lordships then revisited the dockyard for the purpose of witnessing a series of experiments with a new description of pump, invented by Mr. Roberts from the firm of Brown and Lenox, anchor makers to the Admiralty. A pair of these pumps had been fitted to the steam-tug vessel Lucy, belonging to the East and West India Dock Company, and their lordships having boarded this vessel, the pumps were worked as fire engines by the brigade in the employ of Messrs. Lenox, throwing water at about five tons per minute, at a pressure of 95lb. per inch. Their lordships then took leave of the commodore superintendent, and proceeded to the Royal Arsenal, where they visited the Armstrong gun factories, the Royal laboratories, the storekeeper's department, and the Royal carriage department, the several objects of interest being pointed out by the superintendents. After at least seven hours' unceasing occupation, their lordships returned to town at six o'clock.

They also examined several smaller vessels which are in course of construction, as well as those ships fitting alongside the dockyard for the steam-reserve. Their lordships, after visiting the site of some new proposed docks, the iron gunboats, the various factories, and closely examining an improved diving apparatus, recently introduced by Mr. Heinke, proceeded to the Marine Barracks, where, under command of Colonel E. Rea, the annual inspection of the division took place.

On Thursday His Grace the Duke of Somerset, Vice-Admiral the Hon. Sir R. S. Dundas, K.C.B., Captain C. Frederick, Mr. S. Whitbread, M.P., Rear-Admiral Lord Clarence E. Paget, C.B., M.P., Rear-Admiral Sir Baldwin W. Walker, Bart., K.C.B., Colonel G. T. Greene, and Captain J. Moore, C.B., arrived at Chatham Dockyard about about 12 o'clock. A guard of honour of the Royal Marine Light Infantry, with the divisional band and colours, under the command of Captain A. Butcher and Lieutenants Creighton and Mascall, was drawn up, and received their lordships with the customary honours. Their lordships were received by Captain G. Goldsmith, C.B., the Superintendent; Colonel E. Rea, Commandant of the Royal Marines; Commander Pope, Master-Attendant; Mr. O. W. Lang, Master-Shipwright; Mr. R. Laws, storekeeper; Mr. Clatworthy, accountant, and other leading officials of the establishment.

Passing along the various ships their lordships proceeded on board the iron-cased steam floating-battery Trusty, 14, 200-horse power, which is in dock for the purpose of being surveyed and repaired. Some time was spent by their lordships in examining the effects of the shot and shell upon her during the recent experiments at Shoeburyness with the elongated shot from the Armstrong guns. Mr. Lavie, the master-shipwright, pointed out to their lordships the ravages which the rot has made in the timbers of this powerful battery, several of which are so far gone that they will have to be entirely removed. Their lordships gave directions for the necessary repairs to be proceeded with. Their lordships then inspected the works in progress for lengthening and making a new entrance to No. 1 Dock. The alterations when completed will enable a line-of-battle ship to be docked with ease.

Their lordships inspected the Undaunted, the Belvidera, Bulwark, and Royal Oak, all in various stages of building.

Their lordships slept at Chatham on Thursday night, and proceeded early yesterday morning to Sheerness, where they made a minute inspection of the dockyard, and of the different works in progress, and returned to town last night.

A draught, consisting of 275 men, infantry and artillery, have left the Indian Army depôt at Warley, near Brentwood, for embarkation to Madras.

LAUNCH OF THE ANSON, 91.

On Saturday last, a little after one o'clock, the flood-tide being at its height, the splendid two-decker, Anson, was successfully launched from a building-shed in Woolwich dockyard. As usual on such occasions, a vast concourse of persons poured into the yard from the metropolis and the surrounding districts. A number of visitors were accommodated with seats, which were reserved for their use, and about six hundred were permitted to go on board the ship, and were launched in her. The rest of the spectators, amounting to many thousands, took up the best positions which the nature of the ground allowed them, and evinced as much delight in the scene passing before them, as if they were comfortably placed in the cloth-lined benches appropriated to those whose official position or interest obtained for them the privilege of witnessing the amusement provided for them with the same amount of ease as if they were in a drawing-room, with the advantage of having a gay *parterre* of flowery bonnets spread beneath them. Nothing occurred to mar the pleasure of the day, excepting the absence of Her Royal Highness the Princess Mary of Cambridge, who, in consequence of the death of the Grand Duke of Mecklenburgh Streitz, was precluded from being present. The ceremony of christening was performed by Lady Sydney with great spirit and *éclat*; the bottle of champagne which her ladyship dashed against the Anson's bows was propelled with sufficient force to cause the sparkling fluid to splutter around them; and amidst the clang of music and the huzzas of the multitude, the noble ship took the water with graceful dignity; slowly but surely did she glide down the well-prepared "ways," with just that degree of impetus required to take her into the middle of the stream. A party of riggers were on board, and no time was lost in running out hawsers to the steam-tugs Monkey, Bustler, and Widgeon, which immediately towed her alongside the Hebe hulk, to which she was secured until Monday, when she was taken to Sheerness by Mr. Hall, master, Royal Navy.

In addition to the crowd of persons in the yard, a great number of sight-seers were received on board the Fisgard, Vivid, and Princess Alice. Several river steamers were also filled with passengers; and our advice of last week in reference to the Essex shore, was not apparently thrown away, for the banks of the northern side of the river supplied to many a capital view of all that was going on both in the yard and on the river.

THE MILITIA.

The Carnarvon wing, Royal Carnarvon and Anglesey Rifles, assembled for 27 days' training at Carnarvon on the 10th inst. About 385 men, exclusive of officers and non-commissioned officers, or nearly the whole strength of the wing, were present. A portion of the men are undergoing a course of preliminary musketry instruction daily, under the superintendence of the adjutant. The quota of men of the Carnarvon wing is quite complete, and almost every man enrolled is actually present at this training.

The Pembrokeshire Regiment of Artillery Militia has been ordered to assemble at Haverfordwest on the 3rd of next month, for 28 days' training.

The Royal Flint Rifle Militia will assemble for 27 days' training at Mold on Monday, the 15th of October.

Wexford Militia. The following appointments have been made:—Ensign George Gledstanes Richards to be Lieutenant, vice Devereux, promoted; Ensign Robert Roche to be Lieutenant, vice Huson promoted; Ensign Robert Neilson Goodall to be Lieutenant, vice Colclough, promoted; Clement James Woolseley, Gent., to be Lieutenant, vice Beatty promoted.

The Royal Cardigan Regiment of Militia has received an intimation from the Lord-Lieutenant of the county, that the annual assembly will be postponed until the 1st of October, in consequence of the lateness of the harvest. The muster will take place on that day at Aberystwith.

The Royal Carmarthenshire Militia will assemble for 20 days' drill, on Monday the 1st of October.

The Hampshire Artillery Militia has received orders to proceed to Portsmouth, there to be disembodied, prior to the 15th of October.

Hants Artillery. This fine regiment about 400 strong, now garrisoning Pembroke, will move to Gosport by the 15th of October to be disembodied.

The Militia Gazette.

WAR OFFICE, PALL MALL, SEPTEMBER 18.

North York Rifle Regiment of Militia—Lieutenant Edward Kemp to be Captain, vice Woodall, resigned.

5th Regiment of Royal Lancashire Militia—Ensign Andrew Dillon Browne to be Lieutenant, vice Edward Middleton, resigned; Ensign John Joseph Mills to be Lieutenant, vice Abraham Alfred Tweedale, promoted; Ensign John Witham Sutcliffe Witham to be Lieutenant, vice Henry Drury, superseded.

Leicestershire Regiment of Militia—Harby Barber, gent., to be Lieutenant.

WAR OFFICE, PALL MALL, SEPTEMBER, 21.

Memorandum—2nd or Edmonton Royal Rifle Regiment of Middlesex Militia—The Queen has been graciously pleased to accept the resignation of the Commission held in this regiment by Lieutenant Walter Stirling.

Northumberland Regiment of Militia Artillery—Alterations in dates of Commissions: Captain Robert Cairns Bruce to be Major, vice Reed, resigned, dated 14th July, 1860, instead of 4th August, 1860, as formerly gazetted; Second Lieutenant William St. Lawrence Gethin to be First Lieutenant, dated 1st April, 1860, instead of 7th August, 1860, as formerly gazetted.

On Tuesday last a grand display took place on Southsea Common before His Royal Highness the Duke of Cambridge. The troops assembled on that occasion consisted of the 10th Brigade of the Royal Artillery, a company of Sappers, the 1st and 2nd battalion of the 11th Regiment, the 2nd battalion of the 19th, and the Bedford Militia. A variety of manœuvres were performed, exhibiting upon a small scale what our neighbours call *la petite guerre*. It was, however, the subject of remark that the 5th Hants Volunteers did not show, and much disappointment was loudly expressed by many members of the corps who were upon the common as spectators.

VOLUNTEERS.

METROPOLITAN.

LONDON RIFLE BRIGADE.—On Saturday afternoon Colonel M'Murdo, C.B., Inspector-General of Volunteers, reviewed the London Rifle Brigade in Hyde Park, in the presence of some thousands of people. The regiment, to the number of upwards of 700, mustered at 3 o'clock in the quadrangle of Christ's Hospital, under the command of Lieut.-Colonel Hicks, and thence marched to the ground. The inspection took place on the northern side of the park in the open plateau fronting Park Lane, where the Queen on a recent occasion reviewed the Volunteer Corps. The ground was kept by the Queen's Westminster Volunteers. The review passed off admirably. Colonel M'Murdo, before taking his departure, spoke some spirited words of compliment and encouragement to the colonel in command of the brigade. The ceremony was alone marred by accidents to two members of the brigade, one of whom, Private Wilkins, of the F company, sustained an injury in the right cheek, though not serious, we believe, by the accidental explosion of his rifle; and Private Sampson, of the I company, had the forefinger of his right hand badly wounded from a similar casualty.

9TH (WEST) MIDDLESEX RIFLES.—A new company of upwards of sixty members has been formed, to be called the Primrose Hill Company; and Messrs. Marshall and Snellgrove's assistants have resolved to form a company to join the West Middlesex Rifles, and 64 members were enrolled. Messrs. Marshall and Snellgrove have determined on presenting 100*l.* towards expenses, and to grant leave of absence to those who had joined on Saturday afternoons at 2 p.m. This corps is to be inspected by Colonel M'Murdo on Saturday, the 27th October.

11TH (ST. GEORGE'S) MIDDLESEX RIFLES.—A member of this corps has given a beautiful statuette, value 100 guineas, to be shot for by the members of the St. George's, Victoria, and Queen's Westminster Corps. The subject of the design is in solid silver, and represents Her Majesty standing, and equipped in her cornation robes. The statuette is 10½ inches in height. It is Mr. Turner's intention that this silver statuette should assume the position of a *Challenge Plate*, to be shot for annually by between five and ten members, from each of the three corps, who will be selected by their Commanding Officers. The qualification to be confined to first-class men. The ranges to be 500, 600, and 700 yards; with five shots a man at each range.

22ND (QUEEN'S WESTMINSTERS) MIDDLESEX RIFLES.—On Saturday this corps assembled at Carlton Ride, and, headed by its splendid band, marched to Hyde Park for the purpose of keeping the ground during the inspection of the London Rifle Brigade. The cadet corps is progressing satisfactorily, and the attendance at drill has been very good during the week.

28TH (LONDON IRISH) MIDDLESEX RIFLES.—This regiment mustered on Saturday afternoon at Burlington House, Piccadilly, to the strength of about 250 rank and file, under the command of Major Verner. Preceded by its band the regiment marched to Hyde Park, and again practised blank firing, consisting of file firing from right to left, and, *per contra*, company firing, concluding with a volley. Owing to the shortening of the days the corps will muster at Burlington House on Saturday (this) afternoon at four o'clock to march out.

29TH (NORTH) MIDDLESEX RIFLES.—It has been arranged that this corps shall march to the church of St. Paul, situate in Camden Square, on Sunday afternoon next, the Rev. A. R. G. Thomas, the incumbent, having kindly appointed a special service for the occasion. At a meeting of the council held on Monday evening it was resolved, in order to bring the operations of this corps within the reach of all classes, that the subscriptions for effectives for the remainder of the current year should be reduced, from and after the 29th of September, to 5*s.* 3*d.*, and for cadets to 2*s.* 6*d.*, without entrance fee. The corps has now nearly reached its present maximum strength of 600, and as there is a probability of the *employés* of two very large firms at once joining, an immediate application is about to be made to the Lord-Lieutenant for a further extension of members to 1000 men.

THE 19TH (LAMBETH) SURREY RIFLES. — This corps, having mustered strongly on Saturday evening, marched out under the command of Major Roupell, the districts of Camberwell, Peckham, New Cross, and the two Kent Roads being selected, returning home by the Elephant and Castle to Kennington. An arrangement has been made with the Peckham and Streatham corps to co-operate with them in the use of their rifle butts on Streatham Common, whereby the 19th Surrey may shortly be expected to commence ball practice. The immense piece of ground belonging to the battalion will in three weeks' time be entirely covered in and well lighted with gas, thus enabling the drill to take place independent of the inclement state of the weather that may be expected during the winter.

WORKMEN'S VOLUNTEER BRIGADE.—A parade and drill of this corps, now numbering close upon 500 men, took place on Saturday evening, from six to eight o'clock, in the Guildhall, kindly accorded by the Lord Mayor. It was expected that General Beatson, the colonel-commandant, would have inspected the battalion, but important affairs required his presence in the country, and he wrote to express his regret at not being able to attend, which, however, he purposes to do to-day (Saturday). Upwards of 400 men belonging to the corps, including the band, were present, and some gentlemen present remarked that they had never seen the London Rifle Brigade muster in such numbers at drill in the Guildhall. The battalion then marched, headed by the band, playing, from the Guildhall to the headquarters in Great Tower Street, in perfect order, where they were dismissed from parade. The first regiment of the brigade will soon be complete.

ROYAL NATIONAL RIFLES.—The members of the first battalion of this corps of artisans and others are making rapid progress in their drill, which takes takes place every morning and evening at the Wellington Barracks, the hours being for the present 6 till half-past 7 a.m., and 6 till 8 p.m. We are informed that for the winter evening drills the authorities will allow them a part of Westminster Hall. The drills are under the superintendence of the acting-adjutant and others of the officers elect, and are conducted by Drill-Sergeant Reynolds and Sergeant Herod of the Coldstream Guards.

LONDON VOLUNTEER CAVALRY.—On Thursday a meeting was held at the Thatched-house Tavern, St. James's Street, for the purpose of forming a Light Horse Volunteer Corps for London and its vicinity, Major J. F. Richardson, C.B., 8th Bengal Irregular Cavalry, in the chair. The chairman said that he had been asked as an Indian officer to aid in the formation of a Light Horse Volunteer Corps, and he should be very glad to afford any assistance towards that end which was in his power. He would recommend, however, the formation of a regiment of good irregulars with common hunting saddles, in preference to a Dragoon Regiment, which, he thought, without the regular training which the latter underwent, would turn out a failure. With regard to the weapons, he recommended lances and swords, which were essentially the arms of the cavalry soldier, in preference to the carbine, which he considered objectionable, except as regarded about 10 men per troop, who would be available as skirmishers, sentries, or escorts. Mr. J. Bowen May said he had put himself in communication with the Lord-Lieutenant, who had expressed himself favourable to the formation of the corps, and about 100 gentlemen had agreed to join it, among whom were the Earl of Bessborough, Lord Schomberg Kerr, the Count de Gendre, Lord Seymour, and Lord Powerscourt, the latter of whom had consented to take the command. A committee was formed, and several gentlemen having enrolled themselves as members of the corps, the business concluded with a vote of thanks to the chairman.

BERKSHIRE.

READING RIFLE CORPS.—On Monday the first prize meeting of the members of the Reading Volunteer Corps took place on the practice-ground at Coley. Musketry Instructor Turner won the rifle; Corporal Soper was the second best shot, and won the mayor's cup; and Private Stevens won the cup given by Lady Hunter. There was a large number of visitors on the ground.

BUCKINGHAMSHIRE.

ETON SCHOOL RIFLE CORPS.—There has been fitted up during the vacation at Eton, under the direction of Mr. Harrison, architect, a commodious apartment as an armoury for the accoutrements of nearly 400 boys belonging to the rifle corps, which is under the command of Colonel Chapman; and John Long, one of the college officials, has been appointed armourer.

CORNWALL.

2ND CORNWALL ARTILLERY.—On Monday last this corps was inspected at Looe by Lieut-Colonel Gilbert. The men having acquitted themselves with great credit on their parade ground in their company and battalion drills, were then marched to the battery on the hill, where they were exercised with the 24-pounders sent for their accommodation. At the conclusion the gallant inspector briefly assured them that the ability which they had that day displayed had far surpassed his expectations.

ESSEX.

6TH (COLCHESTER) ESSEX RIFLES.—A marksman's badge of cross muskets, to be worn on the left sleeve, has been presented to three privates in this corps. Mr. Tayler (who recently won a prize at Wyvenhoe Park), Mr. Cole, and Mr. Fenning, all three gentlemen having made the requisite number of points in the regulation practice to entitle them to the rank of marksmen. An effort is being made to form another company of Volunteers in Colchester, and about 100*l.* has been subscribed for the purpose.

GLAMORGANSHIRE.

4TH GLAMORGAN RIFLES.—On Friday afternoon the captain and members of this corps were entertained, by special invitation of the subaltern officers, Lieutenants Iltid, Thomas, and Hermann, and Ensigns Strick and C. Bath, to a cold collation at Cefn Garth Farm. About 200 members mustered.

HAMPSHIRE.

2ND HANTS (PORTSMOUTH) ARTILLERY.—At the termination of the review on Southsea Common on Tuesday last, his Royal Highness the Commander-in-Chief inspected this corps at their guns in the Spur redoubt on Portsmouth lines. The men were drawn up at the five 32-pounders placed at their service under their Commandant Major Hall and Captain Rogan. On His Royal Highness entering the redoubt the firing commenced, when His Royal Highness expressed his gratification at the manner the men handled their guns. After the departure of the duke Major Hall addressed the corps, and said he felt great satisfaction at the manner they had performed their drill in the presence of His Royal Highness and Staff. He further stated that the 2nd Hants was the first Volunteer Artillery Corps inspected by the Duke of Cambridge at their guns. Three ringing cheers were then given for the Cammandant and Captain Rogan, and another for the ladies. The brass band of the corps was in attendance, and previous to the arrival of the duke and during his stay played a selection of favourite military airs.

PORTSMOUTH CIVIL SERVICE ARTILLERY. — This corps held its first drill in uniform on Saturday last, when about 120 men attended. More would have fallen in, but the clothing had not arrived. A further supply has been received this week. It is expected that the corps will attend the inspection at Winchester of the Volunteer force of the county by the Major-General commanding the South-west district, which will take place early next month. The following appointment has been confirmed by the Lord-Lieutenant under Her Majesty's approbation, namely, W. H. Brain, Esq., to be Captain, vice Sturdee, promoted to be Major.

KENT.

1ST KENT (GRAVESEND) ARTILLERY.—About 90 members of this corps, with several of their officers and band, in command of Capt. Commandant Rosher, visited Sheerness on Thursday for the purpose of practice at heavy gun drill, this being the first time that they have had the opportunity of firing with shot and shell. The target was stationed at a range of 1500 yards from the centre garrison battery. During the practice the flag-staff was taken from the target three times, and the whole of the firing reflects great credit upon both the officers and the men of the corps, as well as

Digitized by Google

upon their drill instructor, Master Gunner Alexander, R.A.

11TH (SANDGATE) KENT ARTILLERY.—This corps, under the command of Captain Taylor, has had great gun exercise from Sandgate Castle with marked success, the twentieth shot fired having completely destroyed the target (a small soda-barrel) which was obtained for the occasion.

FOLKESTONE RIFLES.—This corps commenced firing with ball-cartridge on Thursday morning last. Mr. W. Wightwick, a solicitor residing at Folkestone, a member of the corps, obtained the almost unprecedented number of nineteen points in ten rounds of firing. This at once removed that gentleman from the second to the first class.

LANCASHIRE.

66TH LANCASHIRE RIFLES. — The Liverpool Borough Guard, or 66th Lancashire Rifle Volunteers, on Saturday afternoon last, embarked on board the Rock Ferry steamer, and on arriving at the other side of the Mersey marched, with their new brass band at their head, to the residence of their Commander, Captain Mayer, whence they marched into a field adjoining the Bebington Railway Station, where two large tents had been erected for their accommodation. Tables were laid for the accommodation of 120 persons, and were well loaded with good substantial English dishes.

NOTTINGHAMSIHRE.

THE ROBIN HOOD RIFLES.—The ladies of Nottingham, with a spirit of liberality and patriotism which is beyond all praise, have determined upon testifying their approval of the gallant "Robin Hoods" by presenting them with colours, a silver bugle, and charger for the use of the Adjutant. The presentation will take place on Wednesday, Oct. 3rd, at the Cricket Ground, Nottingham, and will doubtless be the means of drawing together from the neighbouring counties, a large concourse of those who feel interested in the movement. The procceds arising from the sale of tickets for admission, will, we understand, be applied in aid of a fund for the erection of an armoury and drill-room for the use of the corps in the Castle Grounds near that town. Members of the Regular and Volunteer forces will be admitted free.

YORKSHIRE.

SALFORD RIFLES.—On Saturday afternoon the four companies at present composing the Salford Rifle Regiment assembled at Peel Park, for the purpose of being presented by the ladies of the borough with silver bugles, as a token of admiration for the Volunteer movement. The Volunteers formed an aggregate of not less than 500 strong. Mrs. Pochin presented the bugle to the 1st company, Miss Heelis to the 2nd, Mrs. P. C. Nicholson to the 3rd, and Miss Ross to the 4th, each lady reading an address as an accompaniment.

4TH (WEST) YORK RIFLES.—The first annual shooting match of the Halifax Rifle corps commenced on Monday. The list of prizes, consisting of silver and bronze medals, silver cups, Westley Richards's rifles, silver snuff-boxes, timepieces, &c., is a long one; and among those who offer prizes are the Right Hon. Sir Charles Wood, Mr. James Stansfield, M.P., Mr. F. Crossley, M.P., the Mayor of Halifax, Major Akroyd, Mr. M. Stocks, and others.

1ST WEST RIDING ARTILLERY.—On Saturday afternoon there was a good muster in the yard of the White Cloth Hall, Leeds, of this corps of Volunteer Artillery. The members were in full dress, including their busbies, which they wore for the first time, and presented both a soldierlike and formidable appearance. Sir John W. Ramsden, Bart., M.P., the captain-commandant of the corps, was introduced to the members by Captain Chamberlain, the acting-captain. Sir John thanked the corps for the honour they had conferred upon him by offering him the post of captain-commandant. His parliamentary duties would prevent his taking an active part in the management of the corps; but he trusted that, under an officer of military experience like Captain Chamberlain, it will grow in numbers day by day, and increase in efficiency, and occupy that position in the Volunteer army of the West Riding, which the artillery arm of the service ought to do.

WORCESTERSHIRE.

1ST KIDDERMINSTER RIFLES.—On Saturday the ceremony of presenting a silver bugle to the 1st Kidderminster (3rd Worcester) Rifle Corps took place at Greenhill, the residence of the captain, A. Talbot, Esq. Lord Lyttelton, the Lord-Lieutenant of the county was present on the occasion, and the presentation was made by the Hon. Miss Lyttelton. Lord Lyttelton warmly congratulated the corps on their appearance and proficiency in the evolutions they had gone through. He said he had received a communication from the National Rifle Association—an association deserving the confidence and support of the country—suggesting there should be county associations formed subsidiary to the general association. It was a subject which he hoped to mention next week at Gloucester, and he should bring it before the corps of his own county. It would be well that there should be legal societies in connection with the general body, and he did not doubt, with regard to rifle practice, that it was a desirable and proper course to adopt. He urged upon the corps the importance of making permanent the Volunteer system, if it really was to be of use to the country. He desired to see the movement advance without excitement, and so become a permanent part of the institutions of the country.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, SEPTEMBER 18.

3d West Riding of Yorkshire Rifle Volunteers (Bradford)—William Henry Ramsden, Gent., to be Ensign.

12th West Riding of Yorkshire Rifle Volunteers (Skipton)—Lieutenant George Robinson to be Captain, vice Wilson, resigned.

2nd Battalion of Lincolnshire Rifle Volunteers—John Mitchell Heward, Gent., to be Assistant-Surgeon.

5th Devon Mounted Rifle Volunteers—Henry Carew Hunt to be Lieutenant; Henry Shaw, M.D., to be Honorary Assistant-Surgeon.

RIFLE RANGES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Allow me to suggest for ranges a contrivance which has been found useful. A looking-glass, fitted like those placed outside of windows for observing the street, hung on a pole with a foot to it, and fixed by a screw, will enable the marker to see what is going on at the firing station. Instead of being obliged to make it his duty to stare continually at the target, he will be able to see when the shot is really about to be delivered, and will then look at the target; and when he hoists his red flag he will see at once whether it is answered. This appliance has been found to be a great relief to the marker, and a saving of time to all parties, at a range at which I have made the experiment.—I am, &c.,

F. J. J.

GLOUCESTERSHIRE.—On Tuesday a grand review of upwards of 6000 Rifle Volunteers took place on the Maisemore Ham, at Gloucester, by General Hutchinson, commanding officer of the western district, in the presence of an immense concourse of spectators from the adjoining counties, and many of the nobility and gentry. A spacious gallery capable of holding 2000 persons was filled to overflowing, and every available spot whence a view could be obtained covered with human beings. Among the nobility on the ground were Earl Ducie, Lord Lieutenant of Gloucestershire; Lord Lyttleton, the Lord-Lieutenant of Brecknockshire; Colonel Watkin, Lord-Lieutenant of Glamorganshire; Lord Dynevor, Mr. and Lady Charlotte Screiber, Mr. Talbot, &c. The Volunteers began to march on to the Maisemore early in the morning, and took up their respective positions, 450 Cavalry, under Lieut.-Colonel Milne, and 380 Artillery, commanded by Major Saville, being placedon either wing. The Rifle Corps were formed into brigades. The first, under the command of Colonel Peverell, consisting of the Bristol, Gloucestershire, and Worcester battalions, numbered 2155 rank and file. The second, under Lieutenant-Colonel the Hon. C. Scott, composed of Welsh and Warwickshire Volunteers, mustered 1240; and the third, commanded by Lieut.-Colonel G. Vouse, formed of corps from Stafford, Somerset, Monmouth, Hereford, Pembroke, Carmarthen, and Radnorshire, was 1768 strong—giving a total strength in the field, including officers of 6300. As General Hutchinson, attended by his Staff, rode on to the Maisemore, the Volunteers formed line, officers in front, and bands in rear, and gave a general salute. General Hutchinson rode slowly through the ranks, minutely inspecting the uniform, arms, and accoutrements of each corps, and having returned to the front, and taken up his position at the flag-staff, the brigades formed columns of companies, and, headed by their bands, deployed past at the slow and double-quick. This display was followed by all the evolutions of a sham fight, skirmishing, retreating, reforming, charging, forming a space to receive cavalry, &c., each arm of the entire force performing the particular duty allotted with extraordinary steadiness, rapidity, and precision, the review concluding with the entire force again forming line and giving the general salute, the bands jointly playing the national anthem. General Hutchinson, having ordered the commanding officers to the front, expressed his high gratification at all he had witnessed, and complimented both officers and men on the soldier-like manner in which the different manœuvres had been performed. After the review the great bulk of the Volunteers marched into Gloucester, and partook of abundant refreshments provided for them at the different hotels. The greatest excitement seemed to pervade all classes, and it is long since the town of Gloucester witnessed such a display.

NORFOLK.—A competition for a silver cup, valued at 50 guineas, given by the High Sheriff of Norfolk (Mr. H. Birkbeck), and three prizes of 25*l*., 15*l*., and 10*l*., offered by Mr. J. Middleton, a gentleman living at Haynford, near Norwich, took place on Monday afternoon on Mousepold-heath. The competitors were 36 in number, and were selected from the Volunteers formed in Norwich, Yarmouth, Harleston, Holkham, Lynn, Aylsham, Diss, Loddon, Fakenham, Eynesford, Stalham, and East Dereham. The

Digitized by Google

highest score was obtained by private Read, who made 13 points; Private Bussey came next, with 11 points; Private Burrell, of Fakenham, made 10 points; and Captain Middleton, Private Gunn, Sergeant Fox, and Sergeant Burton made nine points each. These four ties were afterwards shot off, the result being that Private Gunn made a centre, while his competitors added nothing to their scores. The cup was, therefore, awarded to Private Read; the 25*l.* prize to Private Bussey, the 15*l.* prize to Private Burrell, and the 10*l.* prize to Private Gunn. On Tuesday afternoon a review of the Norfolk Volunteers took place on the heath, Major-General Wood, commander of the camp at Colchester, attending as inspecting officer. From 1100 to 1200 Volunteers were collected on the occasion.

NORTHUMBERLAND.—The following circular has been sent by Sir John Fife, Lieut.-Colonel of the 1st Newcastle Rifle Volunteers, to the commanders of all the northern corps:—"Having received intimation that, in the opinion of the staff officers appointed to give efficiency to the Volunteer movement, great advantage has been gained by district reviews, and that a district review of the Volunteers of Northumberland, Cumberland, Durham, Westmoreland, and Newcastle-upon-Tyne might be held with much benefit to the cause upon the Town-moor of Newcastle-upon-Tyne towards the end of October, I beg to know your opinion upon the subject, and, if favourable to the project, to request you may state whether your corps can be present, and with what number of officers, non-commissioned officers, and privates." The feeling, both among Volunteers and others in the north of England, is highly in favour of the proposed review, and it is fully expected that it will take place at the time appointed.

YORKSHIRE.—Mr. M. Stocks, of Catherine House, near Halifax, has taken steps for establishing a corps of Rifle Volunteers in the district of Queenshead, West Riding of Yorkshire, to be called the Shibdendale Rifles. The corps, 100 strong, is now completely formed, and has been fully equipped at the charge of Mr. Stocks.

OXFORD.—On Thursday evening a grand entertainment was given by Sir J. Morrell, Deputy-Lieutenant of the County of Oxford, to Colonel North, M.P., and the Oxford City Volunteers. The dinner, which was served on a scale of great magnificence, was attended by the Bishop of Oxford, the Lord-Lieutenant, the Duke of Marlborough, the Earl of Abingdon, Lord Norreys, the Hon. Mr. Fiennes, Mr. Hanley, M.P., Mr. Harcourt, M.P., Mr. J. H. Langston, M.P., Mr. J. T. Norreys, M.P., the high sheriffs of Oxford and Berks, the vice-chancellor of the University, several of the heads of colleges now resident in Oxford, a large number of deputy-lieutenants and magistrates, and most of the principal gentry of the counties of Oxford and Berks.

The 4th battalion of Kent Volunteer Rifles, comprising the companies formed at Canterbury, Ashford, Sittingbourne, Ash, and Wingham, were inspected on Thursday in the St. Lawrance Cricket-ground at Canterbury, by Viscount Sydney, the Lord-Lieutenant of the county of Kent. The various companies having assembled in the Cathedral precincts, marched thence to the ground. At the time appointed the inspecting-officer arrived, accompanied by Colonel Luard, the Assistant-Inspector of Volunteers, and the commandant of the 4th battalion, Colonel Dixon Dyke (who took the command), and a numerous staff. The ground was kept by a detachment from the Royal East Kent Mounted Rifles. The battalion having been formed in line, and inspected in the ranks by the Lord-Lieutenant, they were put through various evolutions, and the precision with which each was executed, particularly the marching past, elicited marks of approbation from most of the spectators. At the close of the review the battalion advanced in line and formed in close columns, and was then addressed by the inspecting officer, who highly complimented them on their efficiency.

The members of the Winchester Volunteer Corps, in number about 140, assembled on Monday last, despite a violent wind and occasional rain, at Teg down, for the purpose of competing for the various cups, rifles, &c., provided by private persons and public subscription. The first range fired was 10 rounds at 300 yards, the result being as follows:—Private Fernie, 12 points; Private P. Cross, 12 points; Sergeant T. S. Morris, 11 points; Corporal J. S. Parmiter, 11 points; Private Bunce, 11 points. The ties being shot off the result was as follows:—1st Prize, Mrs. Simonds's Cup—Private Fernie; 2nd Prize—Private Cross; 3rd Prize—Corporal Parmiter; 4th Prize—Sergeant Morris; 5th Prize—Private Bunce. At 400 yards, five rounds, the winners and their scores were as under:—1st Prize, Mr. J. B. Carter's, M.P., Cup—Ensign Godwin, 8 points; 2d Prize, Sir J. B. East's Lancaster rifle—Private Pigott, 7 points; 3d Prize, A field-glass given by the College Corps—Private Bunce, 6 points. At the chief range, 600 yards, 10 rounds, the winners were as under:—Lieutenant Simonds's Cup—Private F. Fielder, 10 points; The Ladies' Cup—Private Munday, 9 points; A Lancaster Rifle—Sergeant Morris, 8 points; An Enfield Rifle—Corporal White, 7 points.

A MAN'S HEAD BLOWN OFF AT STOURPORT.—On Tuesday morning, about half-past six o'clock, as the Stourport Volunteers were starting off to the Gloucester review, a frightful accident occurred, and one which induced several of them to abandon the journey. This corps went to Worcester by water, and thence proceeded to Gloucester by rail. The barge which conveyed them to Worcester was mounted with a small cannon. This was fired twice as they were about to start, and at the second time of firing the accident occurred. In the starting, of course the vessel rocked a little, and just as the cannon was fired the second time, the motion of the vessel raised the mouth of the cannon in such a way that instead of the material with which the gun was rammed being stopped by the bank of the river, it unfortunately went above, where a great number of persons were assembled. The charge caught a man named Felton, and took off all the upper part of his head, bespattering his blood and brains over the horrified spectators of this lamentable affair. The vessel containing the Volunteers was stopped when the cry was raised that a man was killed, and the utmost gloom was cast over the whole party by the sad accident. Felton was an engineer, and his master was amongst the Volunteers who were in the vessel.

REVIEW IN PEEL PARK, BRADFORD.—On Saturday last a grand review of Volunteers took place in Peel Park, Bradford. About 1400 mustered on the occasion. The ground selected for the review was at the south entrance of the park—the summit of a hill. The review ground was kept by a detachment of the 12th Royal Lancers (who came over from Leeds by the kind permission of Lieut.-Colonel Oakes), under the command of Lieutenant Morant. On the extreme left of the platform were the 2nd Royal Cheshire Militia, 200 strong, under the command of Captain Stephens and Adjutant Kelsall; attached to them was the band of the 2nd West Yorkshire Yeomanry. Proceeding to the right there were first the Bradford Regiment of Volunteers, with the Eccleshill company attached, 311 strong, under the command of Major Lester; second, the Dewsbury and Wakefield Volunteers, 185 strong, the former under the command of Captain T. H. Cooke, the latter, Major Holdsworth; third, the Huddersfield and Holmfirth Volunteers, 304 strong, the former under the command of Major Beaumont and Adjutant Captain Greer, the latter, Captain Morehouse; fourth, the Leeds Volunteers, 300 strong, under the command of Captain Horsfall and Adjutant Hunt. The Dewsbury and Wakefield Volunteers each brought a band; the other divisions had one band attached. In the unavoidable absence of Major Harman, District Inspector of Volunteer Rifle Regiments, Captain and Adjutant F. Lepper undertook the duties of Acting-Brigadier. The movements, which were exactly similar to those which will be gone through at the coming York review, were well executed.

REVIEW OF THE KENTISH VOLUNTEERS.—An imposing spectacle took place on the fine open surface of Chatham Lines on Wednesday afternoon, on the occasion of the review of the Kentish Volunteer Rifle Corps, by Viscount Sydney, the Lord-Lieutenant of Kent, as well as the principal officers of Chatham garrison and some thousands of spectators. The corps included the 1st (Maidstone) company, the 9th (Chatham), 19th (City of Rochester), 20th (Northfleet), 22nd (Sheerness), and 31st (Leeds Castle), all of which are formed into the third battalion. At the close of the review Viscount Sydney highly complimented the officers and Volunteers on the excellent manner in which they had acquitted themselves. In the evening Viscount Sydney was entertained at a splendid banquet by the officers of the battalion.

THE VOLUNTEERS—GENERAL ORDERS.

The Government is paying much attention to the Volunteer movement, and, with a view to advance the various corps in efficiency, an order has recently been issued, not only for holding county and district reviews, under the direction of field officers of rank, but various corps, where they are not a battalion of themselves, have been directed to be formed into administrative battalions. This latter order has, however, admitted of so many interpretations that the War-Office authorities have felt it necessary to issue explanatory orders, which were received by the various commanding officers of the metropolitan corps on Saturday.

ON THE FORMATION OF BATTALIONS.

The document, which is of a very important character, is subjoined:—

"War-Office, Sept. 14, 1860.

"Sir,—I am directed by Mr. Secretary Herbert to forward you the accompanying enclosure.—I am, sir, your obedient servant, DE GREY AND RIPON.

"The officer commanding ——— Volunteers."

"MEMORANDUM.

"The object of the formation of an administrative battalion is to unite the different corps composing it under one common head, to secure uniformity of drill among them, and to afford them the advantage of the instruction and assistance of an adjutant; but it is not intended to interfere with the financial arrangements of the separate corps, or with the operation of their respective rules, or to compel them to meet together for battalion drill in ordinary times, except with their own consent.

"In order to secure this amount of independence to the various corps composing an administrative battalion, it is necessary that each should remain a distinct corps in the meaning of the Volunteer Acts; for if this were not the case, the funds of all the corps would at once become vested in the field-officer commanding the battalion, under the 44th Geo. III., cap. 54, sec. 50; and the powers specially conferred by those Acts on commanding officers will therefore remain vested in the officer commanding each separate corps.

"The chief of these powers are as follow:—

"1. Commanding officers may grant leave of absence to Volunteers.

"2. They are required to grant certificates to effective Volunteers resident, or liable to be balloted for the militia, in any other county.

"3. They may discharge Volunteers for disobedience of orders, or any other sufficient cause, when not on actual service; and in case of misconduct not provided for by the rules of the corps, may disallow the day, as a day of attendance, or direct the forfeiture of a day's pay if otherwise due.

"4. They may order Volunteers disobeying orders during exercise into custody.

"5. They may appoint places for depositing arms and accoutrements, and persons to take care of them.

"6. All monies subscribed for the use of any corps, and all articles not being the property of Her Majesty's Government, or of any particular individual, belonging to, or used by, the corps, are vested in the commanding officer.

"As the rules of each corps must also, in accordance with the Acts of Parliament, remain in full force, any powers which those rules may confer on the commanding officer of the particular corps will continue to be possessed by him after his corps has become part of an administrative battalion as much as before. These rules can of course be at any time modified as the corps may wish, provided the alterations obtain the sanction of the Lord-Lieutenant and the approval of Her Majesty, in the usual way; but until so modified, they will remain in full force and legal operation. An administrative battalion cannot have rules having legal force under the Act 44 Geo. III., cap. 54, distinct from those of the separate corps of which it is composed; and no authority except that of Her Majesty can override the rules of any corps until they have been altered in the manner above alluded to.

"FIELD-OFFICER COMMANDING.

"The position of the field-officer commanding an administrative battalion is under these circumstances very similar to that of the colonel of a brigade of Royal Artillery. Subject to the limitations imposed by the law as above indicated, he will have the general charge of the drill and discipline of the several corps composing his battalion; he will inspect them from time to time, and will be responsible that the provisions of the law are obeyed, and the orders of the Secretary of State for War relating to the use of the arms, the regulations about clothing, distinctive marks of rank, &c., are adhered to, and that uniformity in drill, and as far as can be attained consistently with the rules of the separate corps, in interior economy, also is preserved. When present at the drill or parade of any corps he will invariably take the command. If two or more corps in the battalion should wish to meet together for united drill, or if any corps should desire to attend the field-day of another battalion, or of any corps out of its own battalion, the permission of the field officer commanding must first be obtained, and the drill, movements, &c., as far as corps under his command are concerned, will be arranged by him.

"The field-officer commanding the battalion will also be the channel of communication between the officers commanding corps and the Secretary of State for War or Lord-Lieutenant.

"When there are two field-officers to an administrative battalion the junior will discharge such portion of the above duties as the field-officer commanding the battalion may from time to time assign to him, and, in the absence of the commanding officer, he will take the command of the battalion.

"ADJUTANT.

"The adjutant is under the orders of the field-officer commanding the battalion; but he is bound to conform to all instructions which he may receive from the War-Office, through the Inspector of Volunteers; such instructions will be transmitted to him through his commanding-officer. He will also comply with the requisitions of the assistant-inspector of his district, and will attend him on his inspections if required. Besides the ordinary duties of an adjutant, with which it is ascertainned by examination that every officer appointed to that post in a Volunteer battalion is acquainted, it will be his duty to visit the different corps composing his battalion as often as may be practicable consistently with their local distribution, and in accordance with the orders of his commanding-officer. He should have a copy of the muster-roll of each corps, and should keep them correctly filled up to the end of each month, with all the alterations entered from the originals in the possession of the commanding-officers of corps. He will conduct the correspondence of the battalion under the direction of the field-officer commanding, and he will be required to keep a diary according to a form to be issued shortly, open at all times to examination by the Inspector or Assistant-Inspector of Volunteers. He will prepare and furnish all such returns as may from time to time be called for by the Secretary of State for War.

"CORRESPONDENCE AND RETURNS.

"The commanding officers of corps forming part of an administrative battalion will correspond with the War Office or with the Lord-Lieutenant through the field officer commanding their battalion, and all letters addressed to them from the War Office or Lord-Lieutenant should be transmitted through the same channel. All returns required by Act of Parliament to be furnished by the commanding officers of Volunteer corps should be sent in in a similar manner, except that ordered by the 44th Geo. III., cap. 54, sec. 11, to be delivered to the district surveyor of taxes, which should be sent direct to him by the commanding officer of each corps. The responsibility imposed by section 15 of the same Act rests with the commanding officer of each corps, and not with the field officer commanding the battalion. All returns other than those required by law, which may be ordered by the Secretary of State, will be furnished, as above directed, by the adjutant.

"ARMS AND STORES.

"The commanding officer of each separate corps will be held responsible for all arms and other stores issued by the Government for the use of his corps, and for all payments which may become due on account of such stores, but the correspondence relating to these matters will, like all other correspondence, be transmitted through the field officer commanding the battalion.

"Sept. 4, 1860." "DE GREY AND RIPON."

RIGHT OF SALUTES.

The following was also received at the same time upon the subject of regulations to be observed by Volunteers when engaged in rifle-shooting, and from the Horse Guards as to the honour due to Volunteer officers and Volunteer regiments under arms for officers and soldiers of her Majesty's Guards, the Line, and Militia:—

"War-Office, 27th August, 1860.

"MEMORANDUM.

"As instances may arise where Volunteers belonging to separate corps may find themselves accidentally brought together under arms at rifle shooting matches, or for other purposes, it is desirable that it should be generally and clearly understood that the senior officer present is to be considered as in command of all the Volunteers on the ground; and that, although his position in this respect does not involve any authority for his interference in the arrangement of the meeting, yet he will be held responsible for the due maintenance of order and discipline among the Volunteers under arms. "DE GREY AND RIPON.

"Officers Commanding Volunteer Corps."

"CIRCULAR MEMORANDUM.

"Addressed to the Army at Home and Abroad.

"Horse Guards, S.W., Aug. 16, 1860.

"All officers of Volunteers holding commissions are entitled, when in uniform, to the same salute as officers of Her Majesty's Guards and Line and Militia, according to their rank.

"All guards are to pay the same honours to Volunteers, under arms, as are laid down in paragraph 24, page 33, of Her Majesty's regulations.—By command,

"JAMES YORKE SCARLETT, Adjutant-General."

ROYAL HUMANE SOCIETY.

At the usual monthly meeting of the committee of this Institution, held on Wednesday last, Thomas E. Baker, Esq., Treasurer, in the chair, the following cases were brought under notice, and rewarded by them to the various persons who at the risk of their own lives have rescued others from drowning, viz.:—Mr. A. Cooper, second officer, ship Agincourt, saved W. S. Gardner at Hobson's Bay, South Australia, on the 26th of March, 1860; referred to the General Court with the recommendation for the silver medal. Anastacio Romualdo, seaman, saved J. Brown, a seaman, in the river at Para, Brazils, in June, 1860; referred to the General Court, with recommendation for silver medal. Private F. Madge, R.M., saved Corporal Hughes, R.E., in Simon's Bay, Cape of Good Hope, on the 21st of June, 1860; a bronze medal awarded. Thomas Davis, gunner's mate, H.M.S. London, saved a French seaman at Castelamare, Naples, on the 24th June, 1860; bronze medal awarded. Mr. J. Francis, boatswain, H.M.S. Indus, saved James Crabb in the harbour at Devonport, on the 25th August, 1860; bronze medal awarded. Michael Roberts, boatman, saved a female at Penzance, Cornwall, on the 24th June, 1860; thanks of the Society on vellum awarded. Henry Gornall, saved Samuel Lynn in the river Tyne, Elswick, on the 5th July, 1860; a bronze medal awarded. Petro Bonafacio, saved William Wilson in the London Docks, on the 11th July, 1860; a pecuniary reward of 1*l.* Robert Nash, saved a female in the Regent's Canal, Kingsland, on 24th August, 1860; a pecuniary reward of 10*s.* William Hall, saved a female in the River Thames, Lambeth, on the 17th of August, 1860; a pecuniary reward of 10*s.* Robert Lewis, waterman, saved a female who attempted suicide in the River Thames, Blackfriars, on the 18th of August, 1860; a pecuniary reward of 1*l.* James Allcorn, saved a boy in the Ornamental Water, Regent's Park, on the 1st of September, 1860, a pecuniary reward of 10*s.* Charles Hall, saved William Nash in the Regent's Canal, Hackney, on the 2nd of September, 1860; a pecuniary reward of 10*s.* Frank Kennedy, saved James Diver in the River Arndras, Glenties, County Donegal, on the 3rd of August, 1860; thanks of the Society on parchment. Hugh McCleary saved Mrs. and Miss Ellis, who were carried by the sea beyond their depth, while bathing at Portstewart on the 2nd August, 1860; a bronze medal awarded. Mr. Ryder Twy, saved a child at Nothesk, County Cork, on the 31st August, 1860; bronze medal awarded. Edward Brown, seaman, saved J. Stables at Whitehaven, on the 5th August, 1860; a bronze medal awarded. Henry Cole, waterman, saved M. A. Ward in the River Thames, Battersea, on the 24th August, 1860; a pecuniary reward of 1*l.* C. Hayward, landlord, received J. Horniblow, who attempted suicide in the Regent's Canal, Camberwell, on the 21st August, 1860; a pecuniary reward of 1*l.* Private William Lye, R.M., saved George Wright, boatswain, H.M.S. Roebuck, at Chusan, China, on the 31st May, 1860; a bronze medal awarded. The secretary also reported that the following legacies had been received since the last committee meeting, viz., from the late Benjamin Hawes, Esq., treasurer, 50 guineas; from the late Rev. J. Hinman, 19*l.* 19*s.*; form the late Miss H. Oliver, 2*l.*; from the late H. Goring, Esq., 1700*l.* After the dispatch of various other business the meeting then adjourned.

Mr. William Scamp, the Deputy Director of Engineering Works to the Admiralty, has been dispatched to Malta, in order to report upon the proposed scheme to extend the harbour accommodation at that island.

Captain Thomas P. Thompson, of Her Majesty's ship St. Jean D'Acre, on the Mediterranean station, is among the passengers on board the Peninsular and Oriental Steam Company's ship Ellora, which left Malta on the 14th inst., for Southampton, and is expected there in the course of to-morrow or Monday.

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription is 7*s.* 7*d.* per quarter, or 30*s.* 4*d.* per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. Russell, Esq., and business letters and advertisements to Mr. Archibald Graham, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.
Office, 16, Wellington Street, Strand, London, W.C.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1740.

ELSTOB'S RIDING BELTS,
Hunting Drawers, Breeches, Knickerbockers, Elastic-seated Riding Trousers, 32*s.*; Bedford Cords, best quality, 42*s.*; Belts and Drawers, 21*s.* each.—
12, AVERY ROW, BROOK STREET, NEW BOND STREET, W.,
(Exactly opposite Ford's Hotel in Brook Street).

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

RIFLE & ARTILLERY DUTY-BUGLES, TRUMPETS, &c.
—Volunteer Corps are respectfully informed that the patterns approved by Her Majesty's War Department can now be had of the Makers, Messrs. RUDALL, ROSE, CARTE, & CO. Price, with Lines and Tassels complete, Two Guineas.
SILVER BUGLES, for Presentation, from Twenty Guineas.
ELECTRO-PLATED BUGLES, in Case, Four Guineas.
BUGLE and TRUMPET-MAJOR DUTY-BOOKS, 3*s.* each, giving instructions, and all the regulation sounds.
DRUM MAJOR DUTY-BOOK, 4*s.* FIFE-MAJOR DUTY-BOOK, 3*s.*
PERCIVAL HUNTING-HORNS in Copper and Sterling Silver.
RUDALL & CO.'S PRICE LIST, with Guide for the Formation of Bands, and Corps of Flutes and Drums, and Estimates of Cost, sent free per post.
Military Musical Instrument Manufactory, 20, Charing Cross, London, S.W.

RIFLE CORPS PRESENTATION SILVER BUGLES.—BOOSEY & SONS have taken out a Plate Licence for the Manufacture of the above Bugles in sterling silver, which they can furnish at Twenty Guineas very best make. Persons manufacturing these Instruments without a licence are liable to a penalty of Twenty Pounds. COPPER BUGLES, the same as supplied by Boosey & Sons to the War Office, Two Guineas. Ditto, strongly electro-plated and burnished, Three Guineas. Cord and Tassel, 3*s.* 6*d.* Ditto in green silk, 8*s.* Enamelled leather case, 12*s.*
Boosey & Sons, Military Instrument Manufacturers, 24, Holles Street, London, W.

RIFLE VOLUNTEER BANDS.—Officers in command are invited to apply to BOOSEY & SONS for a LIST OF THEIR MILITARY MUSICAL INSTRUMENTS, forwarded free.—Boosey & Sons, 24, Holles Street, W

NOTICES TO CORRESPONDENTS.

Inquirer.—The Elthorne Militia has been disembodied for some months.

A Correspondent calls our attention in the hope that he may attract a larger and more influential glance to the condition of the canteens at Aldershot, and to the nature of the appointments made by the authorities. There are eighteen canteens at Aldershot, and of these only six are in the hands of persons who live in the canteens. He suggests that the canteens would be much improved if they were given to persons whose interests would be more bound up with and dependent on the success of the business department, in other words, to poorer and more hard-working men than those who now conduct them, and who are, our Correspondent thinks, too respectable for their post.

It should be remembered that brevity in correspondence can alwa s be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, SEPTEMBER 22, 1860.

We know not what further evidence the late Committee on Transport Service can have wished for, before making up their minds to a report on the subject submitted to their consideration. The Blue Book they have already published is surely large enough, consisting of no less than 234 pages of oral evidence, and 237 pages of perhaps better matter still, in the shape of statistical and other papers bearing on the subject. It is, however, satisfactory to find this symptom of hesitancy on the part of the Committee, contrasting as it does very strikingly with the confidence in their own opinions exhibited by several of the witnesses; unless, to be sure, it may rather indicate a little of the "nothing like leather" bias, on the part of the members of the Committee themselves.

We have already alluded to the high opinion entertained by Mr. Alexander Wood and Mr. Murdoch of their own mode of doing business as Emigration Commissioners; and indeed it is quite amusing to read afterwards, with what perfect horror their system of management is regarded by the London shipowners. Mr. Phillips (of the firm of Phillipps, Shaw and Lowther) says they have not had a ship from him for the last seven years, and never shall have again; and although Mr. Mackay, a Liverpool shipowner, gives evidence which may be regarded as neutralising Mr. Phillipps's extreme condemnation; still it really appears to be a fact, that the service of ships for the Emigration Commissioners has been driven from London altogether to Liverpool.

Mr. Phillipps is as much in favour of the India House as he is against the Emigration Board, and gives also a favourable enough character of the system of the Admiralty. Mr. Mackay, however, complains of the Admiralty system of discouraging personal interviews between his clerks and those of the Transport Department, and speaks of some minor delays; but he afterwards writes to qualify his strictures as regards the present management under Mr. Richards. The Duke of Somerset explains why a public department, subject to be overhauled by such Committees as that he was before, must have some record to show when charges are made against it, and cannot always do business off-hand through the medium of clerks; while the heads cannot of course always, during the pressure of a war, find time to see every shipowner's clerk who calls. The shipowners themselves, it is in evidence, were never refused an interview.

As to the gradations of Mr. Phillipps's opinions of the three Departments of Government who now hire vessels, we have also a very simple explanation. The Indian Department are "most liberal," and best liked by the shipowners in consequence,—which is very natural. They engage their vessels at rates including the rations of the troops, who are allowed a very liberal scale of victualling, and all that is not consumed becomes clear additional profit to the shipowner. The Admiralty generally hire their vessels, excluding rations, and put victuals for the troops on board, and thus save all that are not consumed on the voyage. The Emigration Commissioners have a smaller scale of victualling, out of which it does not appear that anything can be saved; but their great offence in Mr. Phillipps's eyes is the way they feed the emigrants as it were upon air, by cutting outrageous holes in the decks for ventilation! But, as the Liverpool shipowners don't mind that, and even sometimes allow the holes to remain when their contract with the Commissioners is over; and as the emigrants seem to flourish under the system—judging from the small rate of mortality among them—we may consider that the Emigration Commissioners are not quite so bad as Mr. Phillipps has painted them. But we must guard ourselves from being supposed to mean that they turn out such a corpulent crew at the end of their voyages as the soldiers who go to India in his ships. They are "happy as birds," and their difficulty when they land, it seems, is how to get into their clothes,—the "liberal scale" of the India House serves to turn out so fat a lot, while the shipowner flourishes upon it also!

It seems not unreasonable to conclude, after weighing the pros and cons, that in this respect the Admiralty have hit upon the *juste milieu;* and as their management otherwise is not condemned in the City, and passes muster even at Liverpool, the Committee might have obtained some idea from the evidence what may be best for the public service.

In considering this subject as a whole, we are obliged to give prominence to the question, how the several Departments do their work; because if a general Transport Department under the naval authorities was not likely to work, it at once strikes at the root of the grand proposal for doing the transport service of the country in by far the most efficient and economical manner, by means of an increased number of Government vessels of the class of the Himalaya.

We have already seen—in our last number—that the Quartermaster-General's Department under the Secretary for War, repudiate the honour of conducting troops and stores across the ocean, which Mr. Wood wished to thrust upon them. They are perfectly satisfied with the Admiralty management. "They have nothing to complain of." And "they could not get on" (if Mr. Wood will allow them to judge, after some experience at Balaklava and China), "without the naval authorities." On the other side of the question, however, we have the evidence of the Duke of Newcastle, who was Secretary for War at the commencement of the Russian War. *We shall not analyse* his evidence; because, as the Duke of Somerset explains (in this case we have Duke against Duke!), His Grace of Newcastle must be thinking how things were before proper arrangements were made, and probably forgets that the Crimean difficulties arose, not from a deficient transport across the sea, but in the famous seven miles of slush between Balaklava and the front.

The balance of evidence—by that of one of our best administrators, too—is thus turned in favour of the Transport Service continuing under the Admiralty; but as the point is important, we may state that this is not all. We have balanced men; now we shall balance reasons. The Duke of Newcastle's view was, that the Transport Department must be in the closest communication with the Minister for War, in order to carry out the requirements of the Army with due efficiency. In this he is no doubt right; but that the service *was* so carried out we have had ample testimony, not from the Naval authorities, but by the Army officers. *How* this was accomplished Admiral Craigie tells us. He was chairman of the late Transport Board; and he actually "daily put himself in personal communication with Lord Panmure, the Minister for War, and took his orders direct from him," and commenced preparations after such *vivâ voce* communications, before even the necessary written orders had time to pass through the Departments. He called at Whitehall on his way to Somerset House, to let the Lords of the Admiralty know what was doing; and there never was any obstruction there, or practically any divided authority whatever. The result of this common-sense arrangement was, that not only the Transport Department was under the War Department, to fulfil its wishes, but all the influence of the Admiralty also, and of all the officers under it, was enlisted in the service of the War Department at home and abroad. At the same time, as the Duke of Somerset well points out, the necessary supplies of Naval stores and provisions for the fleet, required in all parts of the globe, were not neglected. It must, indeed, be very evident to all who read the Blue Book on transport service, that there are no departmental difficulties whatever, to interfere with improved arrangements for multiplying the advantages which will accrue to the country, from the

Digitized by Google

possession of a special fleet of transports, of the best construction and of great speed, for carrying troops and stores between England, India, and the colonies.

The recent operations in the Papal States will not fail to attract the attention of our military readers.

It is estimated that General Lamoricière had some 20,000 men, for the most part in different troops, under his orders. With these small resources he had to defend the Papal country from Velletri to Pesaro, and from Orvieto to Ascoli. He appears to have weakened the force disposable for operations in the field by placing garrisons in several towns where disaffection was known to exist, and by locking up some 8000 (an over-estimate) in Ancona. With the rest, said to be about 10,000 men, he took post at Spoleto, a central garrison. The Piedmontese Government sent against him two columns, each consisting of 25,000 good troops. General Cialdini crossed the frontier of Urbino, and moved down the coast road as far as Sinigaglia, taking prisoners at Pesaro and Fano. His object was Ancona. General Fanti, moving out of Tuscany, entered the valley of the Tiber at Cita di Castello, and speedily captured Perugia, where a detachment of the Irish brigade made a stout fight in the streets, but were of course overwhelmed.

General Cialdini, after occupying Sinigaglia, had posted his troops about Ancona, on an extended line stretching from Jesi on the Esino, to Castel Fidardo on the road from Ancona to Loretto. Lamoricière seems to have thought that he could surprise Cialdini by suddenly appearing on his right at Castel Fidardo. He therefore left a garrison in Spoleto, and marched rapidly on Macerata, whence he threw himself on the Piedmontese. But Cialdini was too quick for him; he was prepared to give battle; he fought and defeated the Papal troops, capturing many prisoners, Pimodan, the second in command, and six guns. At the same time he drove back the Ancona garrison. Following up the blow, he moved towards Tolentino, and then the Papal army capitulated. General Lamoricière during the engagement on Tuesday managed to round the Piedmontese left flank, and passing through the ravines of Mount Conero, entered Ancona by the coast. But he had with him only a few horsemen.

Shortly after Lamoricière quitted Spoleto it was taken by Fanti, who had continued his march down the valley of the Tiber unopposed. Practically the war is at an end, for the troops in Ancona are surrounded on the land side, and blockaded by sea, for the Neapolitan fleet is there. The place is defensible, but a defence would be a waste of life, as help from any quarter cannot be obtained. Had Lamoricière succeeded in surprising and defeating Cialdini by cutting up his divisions in detail, he might have prolonged a campaign in which, from the outset, he was overmatched.

The medical officers of the Army, after a long struggle, which indeed might have been unsuccessful but that the Army wanted surgeons, obtained the recognition of their demands. The surgeons in the Navy have been equally fortunate in obtaining parliamentary declarations of their rights—in practice there is a long interval, we are told, between the platform on which they are supposed to stand and the planks they actually occupy. Our strange island spirit is never so strongly displayed as in reference to the civil departments of the Services. If the civil departments require too much, assuredly there are other departments which would give them too little. The English Army was about the last force of European states to which either surgeons, commissaries, or civil departments were regularly attached; and as late as 1808 we find Sir Arthur Wellesley in great perplexity, because there was an indisposition to give the commissariat officers he required in Spain from the Irish establishment either commissions or half-pay. There are old officers still alive who would prefer the hospital assistants of the last century to the highly educated military surgeons of the present day; but on the whole there has been a fair spirit exhibited very recently in the case of military surgeons, which is in contrast to the disposition entertained in high quarters towards their brethren in the sister Service, and we think that substantially they occupy a position to which they are entitled, and which is not below their merits. That some small reforms may be needed we do not deny, and we shall therefore point out a little matter which may easily be redressed, as it ought to be.

The new Warrant (of 1858) says, that no surgeon or surgeon-major of infantry shall in future be subjected to any stoppage for horses kept by him for the public service. No mention was made of the cavalry; and it seemed that in drawing up the Warrant they forgot all about that branch of the Service, the consequence of which is, that the surgeons and assistant-surgeons of cavalry have up to this time paid 8½*d.* a-day for each horse kept by them. Now, as their pay is exactly the same as in infantry, while the expenses are much more, it falls very heavily on them. Mr. Deedes put a question on the subject to the Secretary for War last Session, but did not obtain any satisfactory answer, and he was referred by Mr. Herbert to a Correspondence between the Treasury and War Office, in which the former refused to allow cavalry officers forage free of charge, because it would make the commissions more valuable, and cause a higher price to be asked. The prices of commissions now in cavalry and infantry are the same, while the pay in the cavalry of all officers, except the medical officers, is higher, to enable them to meet the expenses of the stoppage for forage. It is, therefore, unjust that they should be the only medical officers who do not share in the full benefit of the Warrant.

We regret to have to state that cholera, of a somewhat malignant character, has appeared amongst the troops at Gibraltar. This dreadful disease has for some time existed amongst the civil population in Spain, and gradually extended first to Algesiras, from thence to the Spanish lines, and subsequently to Gibraltar. On the 16th of August, about four days after the first appearance of the disease amongst the civil population, a soldier of the 2nd battalion, 8th Regiment, was attacked; and since that time up to the 12th of September twenty-five cases have occurred, fourteen of which proved fatal. The wife of a Sapper has also died, and two children of the 8th Foot. Every precaution that sanitary science could suggest to prevent the further spread of the epidemic has been adopted by Sir William Codrington, on the advice of the principal medical officer, Dr. Paynter.

By the death of Major-General Sir Michael Creagh the following promotions will take place:—Colonel Hastings Doyle, Inspector-General of Militia in Ireland, to be Major-General; Lieut.-Colonel Pattle, King's Dragoon Guards, commanding the cavalry, attached to China Expedition, to be Colonel; and Major John Henderson, 16th Regiment, to be Lieut.-Colonel in the Army.

The Command of the Cavalry Depôt at Maidstone, shortly to become vacant by the promotion of Colonel Balders, will be filled, as we intimated some time since, by the transfer of Colonel Hope Gibsone from Canterbury. Colonel Gibsone will be succeeded in the Command of the Cavalry Depôt at Canterbuy by Colonel Charles Hagart, C.B., late of the 7th Hussars.

The Colonelcy of the 73rd Regiment, to which Sir Michael Creagh was appointed but a few months since, is again vacant by the death of that gallant officer. No step has yet been taken for filling it; but, from his position on the list, as well as his very distinguished services, we are inclined to anticipate that Major-General Orlando Jones will have the appointment.

We fear that the state of affairs in New Zealand will render it necessary to dispatch another regiment to that colony. The 2nd battalion of the 14th, which sailed about a fortnight since, had been under orders before intelligence of the disturbances reached this country, being intended to relieve the 65th Regiment, whose period of Colonial service had more than expired. Although the battalion might do very well for ordinary service, yet it is only about two years in existence, and we fear that a regiment so young is not very well calculated to contend with enemies so formidable as the rebels have unfortunately proved themselves to be, and a seasoned regiment from India or from home would be invaluable to the interests of the colony which would be most seriously affected by anything like a prolonged contest.

It was stated by a contemporary some weeks ago that the Ordnance Select Committee had reported unfavourably of Mr. Whitworth's guns, and we at the time promptly contradicted the statement, which was not founded in fact. The result of the experiments which have taken place as yet, has been so far favourable that the Government have ordered two 80-pounders and two 12-pounders for further experiments. From the great facility of loading, and other advantages possessed by Mr. Whitworth's guns, it does not at present appear likely that the ultimate decision will be otherwise than favourable.

The death of Sir Harry Smith was announced, we are glad to say erroneously, in one of our professional contemporaries last week. We regret, however, that the gallant general still continues in a state that gives cause for anxiety to his many friends throughout the Service.

We have already stated the determination come to by the Commission appointed to settle the question of the Indian prize money, with respect to the distribution of the funds. In round numbers (besides the Kirwee and Banda prize money, which should be by far the largest of all) the sums available for the respective forces will be, for Delhi, 355,000*l.*, Lucknow, 148,000*l.*, Greathed's column, 500*l.*, Malcolm's, 1400*l.*, Major Evans's, 10,000*l.*, General Roberts's, 17,000*l.*, Sir Hugh Rose's, 77,000*l.*, for Dhar, and 60,000*l.*, for Jhansi.

MANŒUVRES AT SHORNCLIFFE.

Notwithstanding the great improvements which have been introduced into the working of our military system by the establishment of camps, we are now and then inclined to doubt that there are not serious drawbacks incidental to their present constitution, when our ears are assailed by the chorus of lamentations, groans, and abjurgations and complaints, which rise from Aldershot, the Curragh, and other dreary military settlements. But then comes the reflection that it is the nature of the Briton in arms to comfort himself by grumbling, and to content himself with the happy reflection that he is the most ill-used of mankind. And so, indeed, he has been more than once in historical times not very remote. It must be admitted the aspect of a British camp is not enlivening; the gaunt rows of hideous black huts, the dull waste of stony, muddy, gritty, sandy, sewer-scarred parade grounds; the mean, dumpy little public edifices, such as churches, bake-houses, and head-quarters; the ineffably melancholy air of the lines of iron chimney-pots, placed generally on some hopeless agricultural inferno, where not even geese could find a fattening fibre; all this is not calculated to cheer the morose subaltern, who is suddenly removed from the joys of a delightful garrison town, and sent off for months to listen to the howling of the wind down his chimney-pot, the pleasant practice of the infant musicians of second battalions, the regimental calls, and the regimental conversation of his mess-room friends, and who has only one topic of consolation left—that is, his leave-time is coming. From a longer point of view it must be confessed that the continental officers have a much better chance of learning their business in their camps than our officers can hope to obtain; one end of camps surely is the instruction of officers in handling masses of troops, and in teaching them to combine the movement of each arm, as well as to regulate the lines of evolutions. But the very small force at most of our camps does not permit the generals to do that which is really most instructive to themselves, as well as to their officers and men. They cannot divide their force into two respectable bodies, each complete in itself, with guns, cavalry, and infantry, which shall manœuvre against each other in the open country. As a general rule our field days are restricted to the movements of one corps, which acts against an invisible enemy, or a force represented by a few sappers who are the exponents of larger but impalpable bodies. To some of our officers it is said the difficulty of doing things on a grander scale is not ungrateful. For instance, one general is said to move infantry very well, but to entertain imperfect views as to the organisation and movements of cavalry. Another is very happy with his horse, but is quite heretical in his notions as to the uses of guns and of human legs, and so on. Certainly General Mansell is not one of these, for he made the most out of his small force on last Thursday, when a very useful and exceedingly pretty display was made by the Shorncliffe division, of which an account will be found in another part of our journal. Shorncliffe is now more than it was in the days of Moore and Abercrombie a proper site for a military camp, supposing that at any time an enemy should desire to land upon our shores. It has commanding positions over a line of beach which is accessible in moderate weather. The roads adjacent to it—some of them travelled by the iron horse—are important in their strategical directions and conditions. From the shore, of a clear day, the Boulogne monument can be seen like an arrow shaft standing against the hill side of France. The chain of Martello towers has short links here. They lie close together, supported by larger works, cast up by our forefathers, to which the labours of the present generation of the dwellers in camps have considerably added. Here stagnates the "military canal," still useful; and from Dimchurch to Sandgate the dull, black eyes of the old 24-pounders jealously peer out on the flat shingle. Of the Martello towers on which these guns were mounted we must speak with every respect, since their brother bore him so stiffly under the cruel inflictions of the Armstrong gun. Honour to the honest, conscientious Englishman who built them; who put good sound work into them, and did not vamp or sapwood them for the sake of greed, or out of pure carlessness and haste. Attacked on his weakest side, deprived of any power of reply, or disturbing ingredient in the action of artillery, he stood against 170 rounds of a new sort of enemy, and really

Digitized by Google

does not show so badly in a photograph as might have been expected. Perhaps he would not have fared so well after 170 rounds of our honest old 68-pounders. We shall see very soon. At any rate, give the Martellos long 65 cwt. 32-pounders, and they will bite sharply and terribly ere they give in

Repeating with some modifications the demonstration which took place last year, General Mansel turned out his division to resist a descent upon the coast and the operations of an enemy, who, having landed, and taken us somewhat by surprise, were supposed to be advancing against the heights on which the camp is placed, and thus gain possession of the Dover Roads. There was no enemy, but some targets were moved at sea for the guns of the coast defences to fire upon, and at 10·30 in the morning the heavy reports of their guns rolled along the shore from Dimchurch, as the head of the column reached the low ground on which the enemy were landing. About 80 of the 5th Dragoon Guards and 60 of the Military Train formed a little cavalry force under the command of Major Forster, Aide-de-Camp, and executed several very pretty charges against the invading force. Not that we should have been much concerned at the attempts of the gallant heavy Dragoons, and their lighter, but not less soldierly-looking comrades of the Train, had we been an enemy backed by the fire of the shipping which must infallibly have swept away the horsemen with a few capfulls of grape. With the cavalry, however, were well-served artillery, and the 2nd battalion, 17th Regiment, 742 strong, which advanced towards the front, threw out skirmishers, seized the line of the coast and road, and lined the best positions in which to resist the advancing enemy. As he came on, the smart report of the field-guns mingled with the measured beat of the advance in the forts, and speedily the light spray of musketry beat along the coast line, and rolled over the black shingle where the undisguisable shako of the British soldier revealed its ugly presence. Two Armstrong batteries, and two batteries of ordinary field guns, were pounding away busily; and if the division was badly off in cavalry, it certainly had a good supply of artillery, as 48 guns splendidly equipped well testified. The 1st battalion, 16th Regiment (Colonel Peacocke), 680 strong, a particularly clean and fine-looking set of fellows, were thrown out beyond Sandgate, along the Military Canal, in support of the 17th. The head-quarters and the portion of the 2nd battalion of the 18th, under Colonel Carey, took post on the slope under No. 9 tower, on the junction of the Military Road with the Folkestone Road, and were backed by an Armstrong battery. Altogether 2547 men of all ranks were under arms. Although no publicity was given to the fact of the manœuvres, it became pretty well known that they would take place, and the visitors and residents at Dover, Folkestone, Sandgate, and the neighbourhood of the old chalk bulwarks of Kent, were attracted to the scene of action by the intense desire the members of the "Nation Boutiquier" have to witness military sights. Catch a Frenchman or woman who can help it going to Chalons! The Parisians, of course, like a review and a display, but Jean Jacques Agricole, and Madame Jeanne, do not care a pinch of snuff about your field-days.

There, venerable in knowledge, in the glorious sunset of his great career—in the years which have been passed in honour, "with all that should accompany old age," might be seen Lord Lyndhurst, happy in the thought that his exhortations have done much to render the actuality of the scene, of which he was regarding with such keen interest the harmless semblance, less than likely. Lord Hardinge was also on the ground; and the ladies of Kent, and stout squires and yeomen, looked upon the mimic fight with interest of a peculiar kind, which led them to brave the promise of a gloomy day made by the morning ratified to the letter by a soaking rain at noon.

Alas, what alarm, grief, and rage would there be if the movements which you were gazing upon took place in front of a foe—if those gallant regiments were driven back under a hail of shot and shell—if fort and Martello tower one after the other fell into the hands of the enemy, even though guns were spiked—if the clever little pontoon bridge surged to the feet of a retreating column of British soldiers on British ground—if squire and lady were flying over the hills through the deep chalk lanes, before the foe's advancing lines of horse and tirailleur!

If the foe were wise, indeed, he would scarce care to pursue the march of our columns upon its camp and on the strong position it has chosen; but he would quietly establish himself on the heights which command those of the camp, and keeping his communications open, operate along them as he pleased. In the midst of all the tumult of the cannon and musketry there are some there who remember a scene of dreadful reality. "Let us," says one of them, "let us drink to the memory of this very hour, this very day, just six years ago!" It was indeed just at 12·30 on the 20th September, 1854, that the whole line of that matchless British Infantry advanced to carry the heights of the Alma. Some old faces gleamed out on one through the smoke of this bloodless fight. There was the ex-colonel of the gallant 79th—Taylor—now Adjutant-General of the Division; Foster, scarred in Indian battles, and the gallant owners of well-won medals in the Crimea and in Hindostan. And as one thought of the chances why the scene should not be realised, and tried to make himself feel as he would feel supposing he read in the *Times* on a fine Friday morning—"A strong division of the enemy effected a landing this morning at Dimchurch, supported by a powerful fleet. General Mansel marched to attack them, but the enemy, under the fire of the guns, made good their disembarkation, and drove our troops into their intrenchments, which they are now defending. Our loss is heavy,"—it was comforting to know that the day would be brought to a close with a march past before the gallant General, and with the entertainment which his hospitality had provided for many guests.

ON STANDING CAMPS.

(*From the Oesterreichische Militärische Zeitschrift.* By A Prussian Officer.)

For some years France has been in the habit of yearly concentrating large bodies of troops, 20,000 to 30,000 strong, in standing camps, chiefly in the neighbourhood of Boulogne and Châlons. Although the French enjoy the advantage of continually being able to employ a portion of their army on the battlefield in Africa, the government, nevertheless, takes great pains to give to the troops that remain in France every opportunity of improving their knowledge of welfare, with a view not only to accustom the men to the usages of war, but especially to make efficient officers. Even during the Italian campaign 23,000 men were exercised at Châlons. The cost is disregarded, because the advantages to be derived therefrom in case of a war fully counterbalance it. That these camps really exercise a decided advantageous influence upon the troops, was clearly proved in the Crimean campaign; for whilst the English had to contend against the greatest difficulties, the French made themselves comfortable under the difficult circumstances which the siege of Sebastopol occasioned in the winter. Nearly half the year in France is the rule; 4 to 5 months in the summer the soldier lives in these camps, and is thus kept away from the baneful influences of long quarters in a garrison which are so detrimental to the developement of his qualities as a soldier. In large garrisons these disadvantages are especially evident. Inspections, parades, sentry duty, all occupy a great portion of the soldier's time. And what is the result?

The education for war falls into the back-ground, and instead of being the great point aimed at, is gradually lost sight of. Inspections especially absorb much valuable time, and only half fulfil their object. The inspector can only form a very superficial idea of the efficiency and capabilities of the men, and forms his opinion rather upon the external appearance of the troops than on their real intrinsic merits. In camp these inspections are superfluous; the commanding officer has always the opportunity of knowing how to appreciate his men in every respect, and of forming an opinion what he has to expect from them in war.

Again, as war, with its numerous conditions, is continually brought before the soldier's eyes, he learns more to understand that this is his calling, and that he must consider his value to consist in his military efficiency. In a word, he feels himself a soldier. Deprived of the resources of a garrison, he is in many respects left to his own, and must look after himself; he thus acquires more confidence, more independence, which is certainly very necessary in war.

The so-called citizenising of troops, who, year after year are quartered in the same garrison, is thus put an end to, as it is not only during the stay in camp that they are taken away from a garrison life, because, when the manœuvres are over, it is very easy to employ the men making changes in the camp, in the dislodging of the troops, which would otherwise have to be neglected on account of the expense. If a good understanding with the citizens of a garrison town is very desirable, nevertheless nothing works so detrimentally on the military spirit as this same garrison life.

By living for a long time together the different branches of the service, which in time of peace are more or less separated from each other in distant quarters, become better acquainted with each other, and form a sort of comradeship; they begin to know each other, and find out that no individual branch of the service can stand alone, but that each of them participates in a victory which can only be gained when every individual does his duty, and all hold fraternally together.

The history of every army offers examples that divisions of different branches of the Service who during a campaign have fought side by side and encamped together, have formed a sort of companionship-in-arms which became of the strongest bonds, and bound them for life and death. One of the most brilliant examples of this brothership-in-arms is that which sprung up between the Prussian body-guard regiment of the line and the regiment of Brandenburg Hussars, the so-called "Heurichs," a name familiar to every one at the time of the War of Independence, and which has an immortal page in the annals of Prussian warfare.

Officers and men who in garrison only come in contact when on duty, become better acquainted with each other; they learn mutually to respect and esteem each other, and acquire that mutual confidence which in war can alone lead to and assure success.

A camp life is also beneficial to the health of the troops, for it will be admitted that if the locality is not unhealthy, a continual residence in fresh air must have the best results.

As far as the manœuvres, the special object of these camps, are concerned, they can in every respect be carried out on a scale much more near reality as soon as large bodies of troops are concentrated, and the one great object is kept in view, to prepare them for actual war. The manœuvres on a small scale, which take place annually in nearly every army, do not half fulfil their object, as, generally speaking, they are of short duration, and give but a weak picture of what actual warfare would be. What excellent opportunities does not a large camp offer to combine operations on a grand scale, to accustom men and horses, by keeping them always in activity, as if actually in the field, to all the fatigues of a campaign; and a body of troops thus hardened to fatigue and hardship, can always count upon success. Napoleon I. said, "La première qualité du soldat est la constance a supporter la fatigue; la valeur n'est que la seconde."

Namely, that most important duty in actual warfare, outpost duty, may be practised fundamentally and extensively, which would prove of the greatest service in actual warfare.

Another point which also comes into consideration here, is the care of the troops, which is of so much importance in war, that the success of operations in a great measure depends upon it. In time of peace, the commissariat has only opportunity of exercising its energies theoretically in its respective branches, and when war breaks out it is generally practically behind-hand. On the other hand, in many States the whole system has been organised in time of peace without any investigation as to how it would answer in time of war. Now, as at these standing camps large bodies of troops are concentrated with a view to make them efficient in war, the care bestowed on them and the supply for their wants must be on a war scale.

This enables the officials of the different branches to collect experience respecting the wants and necessities of large bodies of men, and it enables them to test the regulations and arrangements, and to remedy them where they are at fault.

Finally, these camps offer an excellent opportunity for making all sorts of experiments, whether as regards uniform, or the introduction of new weapons, trial of new carriages, &c.; and certainly there is no better means of ascertaining whether this or that is best suited for use in time of war.

Marshal Marmont, who in the second part of his memoirs gives a very interesting description of the camp at Utrecht in 1804, speaks in high terms of the advantages of a camp life. Amongst other things he says:—"The troops soon acquired a degree of perfection, which can scarcely be imagined, and what I had never seen attained by French soldiers. The regiments which had been schooled under my guidance always showed, even after many years and wars, traces of their residence in camp; they always distinguished themselves by excellent behaviour and willing performance of their duties."

If this declaration of the Marshal does contain a little self-praise, it may nevertheless be admitted, as Napoleon himself expressed his high appreciation of the Marshal's endeavours and of the efficiency of *his troops, that a camp* life with its manœuvres and exercise, had exercised a very beneficial influence on their development and efficiency as soldiers.

CHESHIRE.—A grand rifle prize meeting, held at Leasowe Common, near Birkenhead, commenced on Wednesday. Amongst those present at the shooting at Leasowe we noticed Colonel Wilbraham, C.R., Major-General the Hon. Sir Edward Cust and party, John Laird, Esq., Wm. Jackson, Esq., M.P., the Rev. R. M. Feilden, Cornwall Legh, Esq., M.P.; Captain W. Chambers, 3d C.R.V.; Captain Edwards, 11th C.R.V.; Captain H. A. Grey, 4th C.R.V.; Captain W. Hope Jones, 14th C.R.V.; Captain V. A. King, 2nd C.R.V.; H. H. Laird, Esq., S. Ledward, Esq., Captain W. Laird, 5th C.A.V.; Captain Nicholson, 30th C.R.V.; John Ravenscroft, Esq., Captain Reynolds, 3rd C.A.V.; and William Hadfield, Esq. The shooting commenced at eleven o'clock, and in the first contest at three hundred yards, Mr. Watson, of the 1st or Birkenhead Company, and Mr. Beresford, of the 5th or Congleton Company, tied for seven each. They shot off, and Mr. Watson made a bull's eye, his opponent making an outer only. Mr. Watson was declared the winner. At 500 yards there was a tie between Sergeant Farrer and Private Frost. The tie was shot off; Farrer missed the target, and Frost scoring an outer, was proclaimed the winner. There was some exciting shooting in the 600 yards contest. Sergeant Geregory, of the 11th company, and Lieutenant Horner, of the 2nd or Oxton company, tied. The tie was shot off, two shots each, when Gregory scored an outer, and won the third rifle. The other prizes were for the largest aggregate, or total number of points made at the three ranges whilst competing for the three rifles given by Mr. Laird. Captain V. A. King's prize of 25*l.* was awarded to the best shot, Mr. Frost, who had scored 17 points for 13 hits out of 15 rounds. The steady shooting of Mr. Frost was admired by everybody. Sergeant Worthington, Lieutenant Horner, and Sergeant Farrer, having tied for 15 points each, shot off for the second or Wallasey prize of 20*l.*, which was won by Worthington. Lieutenant Horner won the 15*l.* prize, and Farrer the prize of 10*l.* The aggregate score at 15 rounds shooting—five rounds at each of the three ranges, A, B, and C—gives one man who scored seventeen, three fifteens, one fourteen, five thirteens, three twelves, and five elevens. Some ties, in which Mr. R. Webb, Mr. Ashworth, and Mr. Golborne were successful, and Mr. Gibbons and Mr. Shawcross were unsuccessful, concluded the labours of the Volunteers for the day; and they are to be congratulated on their very creditable appearance in public at Leasowe. The arrangements for the contest had been judiciously accomplished by a large and influential committee; and that they gave satisfaction may be inferred from the fact that, although about 1200 persons were present, the best possible spirit was manifested; there was universal good humour, and no complaints. The band of the 5th Cheshire (Captain William Laird's) Artillery Volunteers came upon the ground in the afternoon, and at intervals between the matches "discoursed sweet music."

THE CAMPAIGN OF SIR HUGH ROSE IN CENTRAL INDIA.*

Among the campaigns undertaken during the great Indian rebellion, that of Sir Hugh Rose in Central India will always occupy a prominent place. It is remarkable for the completeness of the work effected with small means, for the length of the course over which the race of battle was run, and for the endurance of the general and his men on the march, as well as in the more exciting duties of the trenches and the field. Moreover, it exercised a most important influence on the collective combat in which our troops were engaged. It is therefore a theme worthy the pen of an historian; a story worth telling. Mr. Lowe, the medical officer of the Madras Sappers, has, at the request of friends, published this "Narrative of Operations;" but alas! it is not the narrative of the campaign in the proper sense of the word; it is Mr. Lowe's diary, describing what he saw and what he learnt; and while, therefore, it is valuable material for a history, it is far from being the history itself. Nevertheless, for those who are not tired of Indian narratives, this is a book well worth reading, for it is written with much life, and it does contain a great deal of information.

Practically the exploits narrated divide themselves into two campaigns; the first under Brigadier Stewart, the second under Sir Hugh Rose. The first was the necessary preliminary to the second, and the second must be always considered in connection with operations elsewhere. Mr. Lowe may be perfectly aware of the mutual dependence of the several campaigns one upon the other, but he does not let his readers share in the knowledge. It is this which we have to regret. Having the advantage of Sir Hugh Rose's supervision, and having plenty of information from other sources at command, it is a pity Mr. Lowe published his diary as it is, and missed an opportunity for writing a work of greater value. Yet we must not be too critical. Mr. Lowe's volume is the best narrative we have of really remarkable military achievements.

We have said that the campaign of the Malwa field force, under Brigadier Stewart, was a necessary preliminary to the larger work, which fell to the lot of Sir Hugh Rose.

In July, when Havelock and Neil were fighting their way to Cawnpore, the vast territories between the Jumna and Nerbudda were pretty well swept clear of British authority. Here and there small independent states were friendly; Saugor, Mhow, Neemuch, stood out like rocks in the midst of the Southern Pacific; the rest of the country was practically in rebellion. It was the business of such forces as Bombay and Madras could spare to re-establish British authority through this vast territory, restore direct communication between Bombay and Allahabad, and succour faithful princes like Holkar and Scindiah. The first object was to secure possession of Mhow as a base of operations, and as a vigilant watch-dog over the soldiery at Indore. The troops marched from Aurungabad on the 12th July, 1857, and crossing the Taptee and Nerbudda, reached and relieved Mhow on the 2nd of August. So far all was well. At this time Wilson was before Delhi, Havelock was fighting on the Ganges, Inglis was shut up in Lucknow. The line of communication between Calcutta and Delhi was by Bombay and Lahore. In the south the force at Mhow, and a weaker body near Jubbulpore, were the foremost points of the British power. One object of the campaign which Sir Hugh Rose was to accomplish was the relief of Saugor, and the destruction or submission of everything in rebellion between that place and Calpee. But before this could be attempted with success, it was necessary to clear the country to the north-west of Mhow, as far as Neemuch, so that rebellion gathering strength on that side might not overwhelm the garrison shut up at Neemuch, and attempt to break into the Deccan. By the time Delhi had fallen the force collected at Mhow were able to undertake this important task, and what is more, the weather, hitherto an impediment, now permitted operations. As soon as the force moved out, the bands who had been pillaging the country, took shelter in a fort at Dhar, and armed the place. Dhar was then the first obstacle. The little army arrived before it on the 22nd, and the siege guns came up on the 24th. Then followed a siege, of which Mr. Lowe has given a spirited account. It lasted a week, and ended, like so many other Indian sieges, in the escape of the enemy. The runaways made the best of their way to Mundasore, where they went to swell the number of the rebels who blockaded the Neemuch people. Brigadier Stuart, therefore, moved upon Mundasore, but not until the 8th of November. The enemy, although in force, and with the Chumbul in their front, did little to resist the advance of the troops. Brigadier Stuart carried his troops across the Chumbul, and turning Mundasore, interposed between the rebels at Neemuch and those in the town; then marching on towards Neemuch he encountered the enemy, and beat them in a downright battle, engaging at the same time the fellows who tried to fall upon the rear. The defeat was so complete that Neemuch was relieved as a matter of course, and Mundasore saved. This action, to use an expression of Mr. Lowe, "quieted" Malwa. The force returned towards Mhow, by Seeta Mhow and Oujein; entered Indore on the 15th of December, and disarmed the contingent. The force had been occupied in this work nearly two months. The regiments engaged were Her Majesty's 86th, the 25th Bombay Native Infantry, the Madras Sappers, the 14th Light Dragoons, a regiment of the Hyderabad cavalry, and Bombay and Hyderabad artillery. The work was very well done, and the native troops behaved splendidly. On the very next day after the completion of this Malwa campaign (the 16th of December), Sir Hugh Rose arrived at Indore, and took the command.

During this period of two months, Sir James Outram and Havelock had thrown themselves into Lucknow, and the garrison which they strengthened, as well as the women and the children, had been relieved by Sir Colin Campbell. The Gwalior contingent had fallen upon General Windham at Cawnpore, and the Commander-in-Chief, coming out of Oude, had arrived just in time to save Windham and rout the contingent, a great part of whom returned to Calpee. Greathed, coming down the Doab, was just in time to intercept a body of mutineers at Agra, and, though surprised in the first instance, he was victorious as soon as his men had seized their arms. Continuing his course down the Doab, he affected a junction with Sir Colin Campbell, and thus the line of communication between Delhi and Calcutta was re-opened. The enemy held Rohilcund, Oude, and the country to the east, but were kept in check there by Colonel Rowcroft and Captain Sotheby. Our possessions were the great line of communication as far as Lahore, but on the south of the Jumna there were few places in which British authority held its own. In the north, Lucknow had become what Delhi had been, a rallying point, but with this difference, that Oude swarmed with rebels, both on the south and north of the Goomtee. It was the task of Sir Hugh Rose to fight his way to the Doab, and communicate with Sir Colin Campbell through Cawnpore. While the rebels held Calpee and Jhansi in such force, they formed a standing menace to the communications of the Commander-in-Chief, as well as a defiance of our authority.

Sir Hugh Rose began his work early in January, 1858. He divided his force, now called the Central India Field Force, into two brigades, the second led by himself, the first by Brigadier Stewart, of the Bombay Army. These two bodies had two different but connected lines of operation. The general had to relieve Saugor, a work General Whitelock had vainly attempted from Jubbulpore. The second brigade, therefore, marched by Sehore on Bhopal, a friendly state, and thence to Ratghur, the first point where serious resistance was to be looked for. The first brigade was directed upon the left flank of the second, diverging from the common base at Indore, and marching upon Chandairee, a fortress belonging to Scindiah, but captured from his recreant troops by the rebels. As he went along, Sir Hugh did stern but strict justice upon such rebels and mutineers as fell into his hands. The worst obstacle to rapid movement was the difficult country through which the troops marched. On the 24th of January, while Sir Colin Campbell was impatiently waiting at Cawnpore for the Ghoorkas, Sir Hugh Rose sat down before Ratghur. This hill fort lay close on the flank of the road to Saugor, and it was therefore necessary not only to defeat its garrison, but to take and destroy it. Driving the enemy from the village and the open into the fort, Sir Hugh invested it on all sides. On two of the faces the fortress was inaccessible, on two others it was approachable. Sir Hugh occupied both the latter, and spread out his cavalry and a body of Bhopal troops on the remaining sides. The enemy showed some courage by contesting the advance, but it soon melted away, and the batteries were rapidly constructed and soon in action. On the fourth day of the siege a body of rebels, fellows in red coats and armed with our muskets, assailed the rear, but were speedily driven off. The breach was now declared practicable, preparations were made to storm, but in the morning it was found that the enemy had stolen away, slipping down one of the steep faces of the hill, and gliding through the lines of the Bhopal troops undisturbed. Sir Hugh followed with a compact little force, and the enemy, who stood for once, got well beaten. The road to Saugor was now open, supplies even came in from that place, under an escort of the 31st Native Infantry which had remained faithful. Saugor was reached on the 3rd of February, and the Europeans, who had been pent up in the fort there for eight months, were at length relieved. But before the brigade could set out on its main operation, the march to the Jumna, Sir Hugh, for the sake of securing Saugor, was obliged to take Gurrakotta, a fort south-east of Saugor, on a tributary of the river Beas. Here the enemy, two regiments of sepoys, fought with great courage, twice charging almost up to the muzzles of the guns; but here the same thing occurred as at Ratghur, when the storming column approached the breach, the enemy had fled. Gurrakotta was partially demolished, and the country delivered from a troublesome foe; but the task had taken a week to accomplish. Returning to Saugor, Sir Hugh Rose rested his troops, and prepared for the final move. He had secured his communications with Indore and Mhow, by demolishing Ratghur and Gurrakotta, and he could now move forward. On the 27th of January, the day that Sir Colin's troops were massed on the left bank of the Ganges, Sir Hugh Rose set out from Saugor. He had a long march before him, through a country swarming with rebels; and at the end, if not before, he was certain to encounter the whole of the Gwalior contingent. His course lay nearly north, Jhansi being his first point; the rapidity of his movements depending somewhat on the success of the first brigade, which after taking Chandairee, would rejoin him. Sir Hugh marched forward towards the Malthon Pass, his movement being signalled to the enemy by rockets fired in Saugor, and being answered by beacon fires in the jungle. As usual, the rebels had prepared for a front defence at the Pass of Malthon; but Sir Hugh sending a small body to make a feint here, moved rapidly to his flank with the main body, and carrying the Mudanpore Pass, a less formidable position, won both, though not without some severe fighing. Deposing the rebel Rajah of Shahgurh, the general moved upon Baunpore and Tal Behut, and crossed the Betwa on St. Patrick's day, the 17th of March, at the very time when Brigadier Stewart stormed Chandairee, and thus ensured the junction of the two brigades.

While Sir Hugh was carrying the Mudanpore Pass, Sir Colin Campbell was before Lucknow; Colonel Franks was coming up with his splendid little brigade between the Goomtee and the Ganges, and defeating the rebels in two brilliant actions. Colonel Rowcroft and the sailors were facilitating the passage of the Ghoorkas; and the day after Sir Hugh Rose crossed the Betwa the enemy were cleared out of Lucknow. The chances of the rebel force at Calpee now lay wholly on the south of the Jumna, for on the north the day had gone against their friends.

The heat now became very great—110° in the shade, 130° in the open—and the men suffered severely, but they kept on. By the 21st the second brigade sat down before Jhansi, and by the 24th the first brigade entered the camp. Jhansi was a very strong place, with plenty of guns, men, and munitions. The rebels had cut down all shelter, and the British troops had to fight in the sun. The characteristics of this siege were not the determined resistance and comparative skill shown by the rebels, but the attempt to relieve the place made by Tantia Topee. Aware of his proximity, Sir Hugh Rose had established a telegraph post towards Calpee, and from this he received a warning of the coming foe. Tantia Topee—it was the only real bit of military skill he showed—had taken the wise resolution of bringing down the whole Gwalior contingent to overwhelm the British force between himself and Jhansi. It was a critical moment in the Central Indian campaign. Here was the general, with a small force, engaged in a desperate siege with a numerous garrison, and he was now threatened by a relieving force of artillery, cavalry, and infantry, the bulk of which consisted of the best drilled contingent in India. A general of less resolute temperament would have quailed, perhaps raised the siege. But Sir Hugh did not flinch. With a courage worthy of a Clive, a Lake, or a Wellesley, confident in his science and the pluck of his soldiers, he determined to keep up the fire of his batteries, and to meet the enemy in the field. He led 1200 men, only 500 of whom were British soldiers, against a force estimated at 20,000; but he made skill do the work of numbers. In the night he placed a body of troops on their flank, and when morning dawned the rapid fire of our artillery, the home charges of the handful of cavalry, led by Sir Hugh and Captain Prettyjohn, and the unfaltering rush of the 86th and 25th B.N.I., swept them from the field. Then came the turn of the second line, destined like the first to be assailed on its right flank, and, like the first, to be crushed. Tantia Topee, holding fast his reserve, retired, but "fought his guns well," until the men had crossed the Betwa, leaving the cannon in our hands. It was one of the most brilliant actions in the whole war. Three days afterwards Jhansi fell by storm, one party mounting the breach, a second clearing the walls by escalade, both showing the most splendid courage and resolution. An immense number of the rebels were slain, and, on the whole, the siege and storm of Jhansi is one of the few complete exploits in the war. The enemy stood to fight, and he was fought with and slain for four long days.

This striking achievement broke the back of the enemy's courage. The terrible sun, the paucity of fodder, often the want of water, were more deadly foes than the sepoys. The victory on the Betwa, and the capture of Jhansi, were the turning points of the campaign. The rebels had lost heart. They fought at Koonch on the 6th of May, and at Gowlowlee on the 22nd; they so far impeded the march as to prolong the operations for nearly a month; but the sun, making less a mere handful of hardy warriors every day, was a more deadly foe. In the battle at Koonch Sir Hugh Rose himself was three times stricken down by the sun; yet he would not give in. The fiercest fighting was in front of Calpee; but here again, by the skill of the general, the rebel positions were turned, and their numbers alone made them dangerous. By a flank march Sir Hugh approached the Jumna, communicating at last with Colonel Maxwell and the 88th, who crossed from the Doab, and played a prominent part in the final actions which gave Calpee to soldiers who had endured so much and fought so well. They

* *Central India During the Rebellion of* 1857 *and* 1858: a Narrative of Operations of the British Forces, from the Suppression of the Mutiny in Arungabad, to the Capture of Gwalior, under Major-General Sir Hugh Rose, G.C.B. &c., and Brigadier Sir C. Stuart, K.C.B. By Thomas Lowe, M.R.S.C.E., L.A.C., Medical Officer of the Corps of Madras Sappers and Miners. (London: Longman & Co.)

Digitized by Google

had swept the land from the Nerbudda to the Jumna, and in his farewell address Sir Hugh Rose thanked them in language as eloquent as it was true. They had conquered, because they were led upon the good old Indian principle of warfare—that of fighting your enemy wherever you meet him, no matter what the odds.

By this time Sir Colin Campbell had returned from Lucknow, and before Calpee was captured he was marching on Bareilly. Whitelock had come up into the Allahabad country, but Koer Singh had returned to his old haunts in Shahabad, and there sorely troubled our troops. At this moment the mutineers driven from Calpee performed a most daring exploit—they marched upon and carried the town and fort of Gwalior, sending Scindiah flying to Agra! Not an hour was to be lost. Sir Hugh Rose, ill as he was, did not flinch. By a rapid march he led his exhausted followers upon Gwalior, and after a hot fight of four days he chased the enemy out of a position in which he threatened the whole of central India, and our line of communications in the Doab. The capture of Gwalior forms a romantic and dramatic finale to the splendid campaign of Sir Hugh Rose, who had opportunities enjoyed by few, and whose merit it is that he made the most of them.

GUN AND MORTAR BOATS.

The Select Committee appointed to inquire into the circumstances which have caused the alleged defective state of a considerable number of the gun and mortar boats and vessels of the Royal Navy have agreed to their report, and, as anticipated several weeks since in this Journal,—the Committee have separated without giving the public any additional news to that which it was already in possession of before the members met to take evidence. The pith of the report lies in the following paragraph:—

"The evidence brought before your Committee shows that a considerable number of the gun and mortar boats were found, on examination, more or less defective. In several boats unseasoned and sappy timber had been extensively used, and in a few of them short bolts were driven, and some bolts were unclinched which ought to have been clinched. Nevertheless, highly improper and contrary to the stipulations of the contract as these departures from the specification undoubtedly were, the dockyard authorities have expressed an opinion that none of the vessels examined, except the two mortar boats, Nos. 30 and 32, that were broken up, were actually unseaworthy. The Cherokee, Coquette, Caroline, and Mackerel are reported to be in the worst condition of all those boats examined up to this time. It is stated by the witnesses that these vessels, and all, indeed, against which the most serious complaints have been made, were built in the winter, and in very bad weather, the men frequently working after dark, and that the vessels were planked and covered in while the timbers were wet. Under these circumstances, it is not surprising, to your Committee, that decay should have appeared in many of these boats."

The Committee have been more quiet than was expected on the question of short and unclinched bolts, but they have leaned to mercy's side, and have made allowance for the haste which existed to prepare the vessels at a time when a *grand coup* was contemplated in the Baltic.

A great outcry was raised against the Admiralty for permitting the gun and mortar boats to be hauled up at Haslar. The Committee have settled this point as follows:—

"It certainly has not been proved to your Committee that there is any great difference in the result of the treatment in respect to the vessels hauled up and those kept afloat, with the exception of that portion in which elm timber was used; and your Committee are of opinion that it would be most desirable, whenever practicable, to keep up a ventilation through every part of the vessel, whether hauled up or afloat, especially when constructed under such unfavourable circumstances as existed in respect to the defective gun and mortar boats which have been under our consideration."

On the whole, the nation may congratulate itself upon having a force, against which great pains have been taken to create a strong impression, but which, in the face of all the obloquy aimed at it, is doing, and will do, good service when called into action. We do not, therefore, regret the expense which has been incurred in eliciting from a Committee of the House of Commons the subjoined declaration:—

"Your Committee are also of opinion that when the whole of the defects in the gun and mortar boats shall have been repaired they ought to be carefully watched, to prevent any extensive recurrence of dry rot, and that it may be fairly expected that these vessels will be a valuable addition to the naval force of this country."

The Committee conclude their labours by giving utterance to a recommendation which every Englishman having the best interests of his country at heart will not fail to join in.

"In conclusion, your Committee would observe that, from the experience which late events have afforded, it seems important that the establishment of timber in Her Majesty's dockyards should be increased, and a large supply kept in store to meet sudden and unforeseen emergencies."

THE ORGANISATION AND USE OF CAVALRY.

From the Papers of the late FIELD-MARSHAL RADETZKY, *written* 1837-8.

(*Continued from p.* 638.)

When the war of the Revolution burst upon astonished Europe, Austria possessed a comparatively numerous and, from its war against the Turks, efficient cavalry. We might have turned this to the greatest advantage against a people that, by its revolution, had annihilated the elements of its army, and whom we should not have allowed time to reconstruct and reorganise. With our numerous and excellent cavalry, we might have waged so offensive a war that we might have entered the very heart of France like a thunderbolt.

But things went the old way, hesitation and slowness prevailed, time was lost in sieges, and the noblest element of our army remained unemployed. Split into detachments, it had often to contend against the enemy's cavalry on the most disadvantageous ground, lost many men and horses in battles which were not decisive, and thus destroyed an arm which might have achieved for us the greatest victories, if we had only been careful in properly employing it. The history of that period is replete with brilliant cavalry feats, which, however, had no or very little influence upon the main operations. The cause of this is to be found in the then prevailing spirit of conducting war; the placing of armies required an immense ground; they spread over whole provinces; the consequence was that there was no strength for attack or for defence; if a gap was made in this network, discomfiture resulted. This, naturally, was most detrimental to cavalry, for deprived by this splitting of their whole offensive strength, it never had the chance of striking a decisive blow. Another great and essential fault was the inefficiency of cavalry tactics. The regulations were confined to the management of a regiment, and even here want of conformity was visible. Even when a considerable number of squadrons were collected, no advantage was derived from it, as they were not properly employed. The consequence was that only small detachments were brought into action, which were too weak to produce great results. This game was often repeated; finally, they were contented with small advantages, made a display towards the enemy as if on parade, exposed the cavalry to the enemy's artillery, lost a number of men, and so ended the day.

I am not exaggerating, for during my long career I have often found myself in the precise position, and speak from experience. The necessity was never admitted of collecting large masses of cavalry together to accustom the eye of the commander to them, and the result was that the qualifications of those generals to whom large cavalry divisions were to be entrusted, were not known. Under the expression, "good cavalry officers," those men were meant who were up in the details of their service, and perhaps had made a lucky charge with one regiment at the outside. But no one asked whether they possessed that self reliance and firmness of character which, without waiting for orders, seizes upon the right moment, and turns it to account; that falcon-eye, which in a twinkling discovers a weak point in the enemy, and strikes immediately. In every battle the cavalry has but a few moments' chance of action; if the opportunity is lost, it is irretrievable.

Another fault lay in the want of concerted action between the different branches, and this is especially applicable to the cavalry and artillery. In times of peace they are never brought together, as there is no occasion of working together. The artilleryman was ignorant of the peculiarities and tactics of those troops whose attack he had to prepare and support; the cavalry did not know what task the artillery had to perform. To avoid the risk of losing a battery it was sooner withdrawn from the field, and thus the most powerful means lost for preparing the path of victory to the cavalry.

The appearance of Napoleon on the world's stage gave suddenly an impulse to the art of war, unprecedented; the principles of the old school fell to pieces like a house of cards, and the wisdom of old commanders paled before the genius of a stripling. It has often been maintained that Napoleon owes his victories to numerical superiority: this may be questioned. In his campaigns in Italy and in Egypt he was weaker than his opponents, and only after the year 1805, when he appeared as a conqueror, did he begin to lead those large masses to battle. But he possessed the talent with his ever ready army to anticipate his enemy, and wherever he attacked wished to be the strongest, as he never allowed himself to be deprived of the initiative, and never lost his strength by splitting his forces. No one then need be astonished that the French army, under a teacher like Napoleon, and in a school such as his epoch was, soon acquired a high degree of perfection, which must be sought for perhaps less in its material than in its moral elements.

Although Napoleon had no peculiar predilection or talent for this branch of the service, he nevertheless appreciated its full value, and the advantages to be derived from it in achieving and completing his victories. True to his maxims, he kept his cavalry together in large masses, and hence it happened that the French cavalry on many occasions had the superiority over us; as especially as regards cavalry the less numerous are dispersed by the greater force.

Napoleon had many distinguished cavalry-generals; but I do not consider Murat, who generally commanded the great cavalry reserve, as a great cavalry officer. I think that the personal bravery of this man has often been mistaken for talent as a commander; for I cannot call to mind one single victory of Napoleon, for which he is indebted to the overwhelming strength of his great masses of cavalry. Kellerman deprived us of the all but certain victory at Marengo by a few hundred horsemen, although we might have brought a thousand against him. In this instance, then, it was not numerical superiority, but the talent of the general who keenly siezed upon the decisive moment, and the faulty management of our own cavalry, which we had not at hand at the very moment it was wanted.

It is easy to talk of bringing large masses of cavalry into action, but not so easy to carry it out. Cavalry can only fight on peculiar ground, and that ground must be selected. Battle-fields abound, but there are not battle-fields everywhere which correspond to the material disposition of our armies. The commander must know how to select his own battle-ground, according to the prevailing elements of his army.

It is faulty to throw cavalry upon an unbroken front; seldom have such attacks been attended with success. The attack of the French cuirassiers on our centre at Aspern is an example of this. On the other hand, the success of a cavalry charge is certain, if made at the proper moment, when some point of the enemy's line is in disorder, when it can come down upon the flank of the enemy's infantry, or charge the head of advancing columns.

After the loss of a battle the cavalry has the most difficult and most important task to perform, for this is the moment for it, by repeated and daring attacks, to keep the enemy back, and gain time to save the *matériel* and restore order. If we take the opposite view, and we are victorious, the propitious moment has come for the cavalry to be massed together to harass the enemy's retreat; for the duties of cavalry consist far less in gaining a victory than in making it complete.

This, then, is the real moment when the reserve cavalry ought to be brought into action. The order must rest exclusively with the commander-in-chief; for it only happens too often, and the history of battles offers examples enough, that the commanders of cavalry follow up any advantage they may have gained, not caring one whit about the infantry, gallop on in pursuit, and on their return find the battle lost, or on a retreat leave the battle-ground too soon, and thus leave the tired and worn-out infantry to their fate

Much depends upon a skilful division of cavalry, for we cannot tell beforehand what point of the enemy's line will be broken. *We must therefore always have* cavalry ready at hand to take quick advantage of such an opportunity, for the seed of victory is often to be found in small events.

Hence it follows that considerable precaution must be observed in carrying out the maxim of concentrating large bodies of cavalry; for, if all our cavalry is concentrated on one point, we deprive our line of an element necessary to victory; 10,000 to 12,000 horse are perhaps the maximum of a cavalry corps; they will do as good service as 30,000 horsemen, for where is the battle-field where more could be employed? And of what use are powers that cannot be made use of, and which in case of defeat would only add to the general confusion? To bring 10,000 horse quickly into action requires no ordinary eye; a commander cannot manage or lead a larger number; and even with this number he will stumble upon obstacles which he must leave to the intelligence of his subordinates to overcome; for it is not the crowding together of the mass, but the skilful disposition of the troops and their mutual support, which leads to victory.

If we look upon how cavalry ought to be employed, we find that its use is threefold, namely, for light duty, for the line, and for the reserve, and that we require three sorts of cavalry, for watching over the safety of the Army, for the support of our lines, and for the reserve or chief cavalry corps.

I deem it necessary that these three different divisions should be clearly distinct, as upon this depends the army equipment and manœuvring with larger divisions.

This threefold use of cavalry was pretty generally admitted, but the distinction was in so far disregarded, as whatever cavalry happened to be nearest at hand, was employed without regard to the nature of its equipment. Thus we have seen cuirassiers doing the duty of tirailleurs, whilst hussars were standing in reserve.

The costly materials from which cavalry must be formed, the long time that it requires to respond to its calling, renders it necessary for the commander to spare it as much as possible; the safest way of doing this is not to employ it wrongly, but according to the service it was originally intended for.

The cause of this often false employment of cavalry lies clearly in the confusion of ideas which took place at the transition when fire arms took precedence. The most extraordinary formations were made out of the heavy cavalry of the Middle Ages; armies offered samples of every description; cavalry was formed and equipped without any distinct idea of the duties it had to perform; there were cuirassiers without cuirass; gendarmes half equipped, grenadiers and jägers on horse-

Digitized by Google

back, carabineers, chevaux-légers, dragoons, hussars, uhlans. Most of these troops originated in the system of military parade, for which, during the last century, many a military object was neglected. Many of these different sorts of cavalry gradually quite lost their original calling; thus Dragoons, from being mounted infantry, became heavy cavalry. If at the transition point of the art of war from the Middle Ages to modern days, the simple ideas of classical antiquity had been adhered to, much confusion of ideas would have been avoided, and an army organisation more in keeping with true strategy would have been attained, for the distinction between heavy and light cavalry was completely lost, and even now this idea is by no means firmly established. Light cavalry is called upon to do the duties of heavy cavalry, and *vice versâ*. There is now but one regulation for cavalry, their organisation is the same; the commanders of light cavalry will not and must not be behindhand with the heavy cavalry, and *vice versâ*. Heavy cavalry is sent against light cavalry, light cavalry against heavy cavalry, and both are expected to do equally well. If we were to examine to-day into the difference between light and heavy cavalry, we should find that the whole distinction consists in a German saddle or a Hungarian saddle, a straight or a crooked sword, a German or a Hungarian horse, and perhaps a heavy carabineer. But do these unimportant *nuances* characterise heavy and light cavalry? We shall endeavour to analyse their requirements closer, to ascertain in how far the present organisation of this weapon responds to its calling and to our views.

(To be continued.)

Obituary.

We have to record the death of Major-General Sir Michael Creagh, K.H., who died at Boulogne on Friday week last. The deceased officer entered the Army in 1802, and had seen much active service in India, Africa, and the West Indies. The following is a summary of his military services:—Served in the expedition under Sir David Baird against the Cape of Good Hope; was wounded in the action of the Blue Bourg. In 1810 accompanied the expedition (as brigade-major) which sailed from Madras against the French islands; desperately wounded by a cannon shot, which carried away a part of his left shoulder and killed six of his men, at the attack of the batteries before St. Denis, Isle of Bourbon; was thanked in general orders and favourably mentioned in the despatches. In 1817 and 1818 served, in the command of the 86th flank companies, during the Mahratta and the Pindarree wars in India. In 1818 served in the Kandyan country, interior of Ceylon, during that harassing war, in command of the flank companies of the 86th and other detachments, receiving the repeated thanks of General Sir Robert Brownrigg for his services in the enemy's country. For ten years he was Lieut.-Colonel of the 86th Foot—namely, from February, 1832, to 1842, when he was appointed to the 11th Foot, a command he held up to 1845, in which year he exchanged to half-pay unattached. In 1832 he was made a Knight of the Royal Hanoverian Guelphic Order, and created a Knight Bachelor of William IV. The late General's commissions bore date as follows:—Ensign, May 9, 1802; Lieutenant, February 28, 1804; Captain, November 25, 1809; Major, October 24, 1821; Lieut.-Colonel, December 31, 1830; Colonel, November 9, 1846; and Major-General, June 20, 1854. On the death of Lieut.-General C. G. Falconer, in January last, the gallant deceased was appointed Colonel of the 73rd Regiment, which becomes at the disposal of the Commander-in-Chief by the General's death.

We regret to announce the death of Brevet-Major J. G. C. Disbrowe, of Her Majesty's 43rd Light Infantry, which took place at Suez on the 4th instant, upon his return home from Madras. This gallant officer had been sixteen years in Her Majesty's service, and was present with his regiment during the whole of the late operations in Central India. His death was caused by dysentery, and his loss will be deeply deplored by his brother officers of the 43rd, among whom he was most deservedly popular.

We regret to notice the death of General Frederick Rennell Thackeray, C.B., Colonel-Commandant of the Royal Engineers, which took place on Wednesday, at Windlesham, Surrey, in his 85th year. The gallant General entered the Army in 1793, and commenced his military career as Second Lieutenant in the Royal Engineers. He had seen considerable service, having been present at the capture of Surinam in 1709, and at St. Martin's and St. Bartholomew in 1801. He directed the siege of Scylla Castle in 1806, and that of the fortress of Santa Maura in 1809. He served with the army in Spain in 1812, and was present at the battle of Castella and siege of Tarragona in 1813, and remained with the army until 1814. In recognition of his services the gallant deceased had been made a Companion of the Bath. The gallant General's commissions bore date as follows:—Second Lieutenant, September 18, 1793; First Lieutenant, June 18, 1796; Captain, April 18, 1801; Brevet-Major, May 9, 1810; Lieut.-Colonel, July 21, 1813; Colonel, June 2, 1825; Colonel-Commandant, April 29, 1846; Major-General, January 10, 1837; Lieut.-General, November 9, 1846; and General, June 20, 1854.

On Wednesday afternoon Lord Hatherton, Lord-Lieutenant of the county of Stafford, inspected the two companies of Rifle Volunteers organised at Burton-upon-Trent. The inspection took place on the cricket-ground, about a mile from Burton, and was witnessed by several thousand persons. Capt. Abram Bast commanded, and the number of Volunteers reviewed was about 150. At the close of the review Lord Hatherton delivered a brief address of congratulation and encouragement, and afterwards inspected the rifle butt which has been erected at Burton, where the Volunteers possess the advantage of having a ball practice range of 1050 yards.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

CAMERON—September 12, at Hea House, Christchurch, Hants, the wife of Major Gordon Cameron, 4th King's Own Regiment, of a daughter.

CHAMPION—August 8, at Mhow, the wife of Major J. H. Champion, Assistant-Adjutant-General, Mhow Division Bombay Army, of a son.

CLIPPERTON—September 15, at 29, Stanley Gardens, Kensington Park, the wife of Captain Clipperton, of a daughter.

CRASTER—September 15, at Barrack House, Colchester, the wife of J. T. Craster, Esq., Captain 38th Regiment, of a daughter.

CURRY—September 17, at Chettle Lodge, Blandford, the wife of Captain Douglas Curry, of H.M.S. Aboukir, of a son.

DRYDEN—September 16, at Plymouth, the wife of T. C. J. Dryden, Esq., Paymaster, R.N., of a son.

DUNCOMBE—September 16, at Hillingdon Court, Uxbridge, the Hon. Mrs. Cecil Duncombe, of a daughter.

FOWKE—September 14, at Park House, South Kensington, the wife of Captain Fowke, R.E., of a daughter.

GRANTHAM—September 18, at Frimley Green, Surrey, the wife of Captain F. R. Grantham, 45th Regiment, of a son.

GREY—September 13, at Cheltenham, the wife of Lieut.-Colonel Grey, 85th Light Infantry, of a daughter.

MONK—September 16, at Newport, Isle of Wight, the wife of Captain Arthur Lloyd Monk, 22nd Regiment, of a daughter.

NEED—September 13, at Mansfield Woodhouse, the wife of Walter Need, Esq., Commander, R.N., of a daughter.

ROBERTS—September 6, at Marseilles, the wife of Captain Richd. Boberts, P. and O. Company's ship Massilin, of a son.

ROBERTSON—September 15, at 13, Clevcland Square, Hyde Park, the residence of Charles Maynard, Esq., the wife of Major Robertson, 25th King's Own Borderers, of a daughter.

SIMPSON—September 14, the wife of Commander James Simpson, R.N., of a son.

WILLIAMS—September 13, at "The Holt," Hants, the wife of Laurance Williams, Esq., of the 5th West York Regiment, of a daughter.

MARRIAGES.

BRENCHLEY—VAUGHAN—September 13, at Llangoedmore Church, by the Rev. Rhys Lloyd, assisted by the rector, the Rev. William North, Thomas Harman Brenchley, Esq., to Emily Sarah, only daughter of Lieut.-Colonel Vaughan, of Llangoedmore Place, Cardiganshire.

BURGESS—BALLARD—September 11, at St. Luke's Church, Cork, by the Rev. J. Hamilton Ballard, brother to the bride, Captain B. Burgess, late H.M.'s Indian Army, to Elizabeth Anne, only daughter of John Ballard, Esq., of 10, York Terrace, Cork.

BUTTLER—PENFOLD—September 14, at the parish church of Botolph, by the Rev. J. C. F. Tufnell, rector of Edburton, uncle of the bride, assisted by the Rev. T. Grantham, rector of Bramber, Captain W. H. A. Buttler, of the Madras Army, to Ellen, daughter of the late Hugh Penfold, Esq., of Annington, Sussex.

CAMPBELL—BRUCE—September 13, at All Souls', Langham Place, by the Rev. George Marsh, rector of Sutton Benger, Wilts, Henry Campbell, Esq., second son of Sir James Campbell, of Stacathro, Forfarshire, to Sarah Charlotte, only daughter of the late Major-General Sir Charles Bruce, K.C.B.

CECIL—SCOTT—September 18, at St. George's, Hanover Square, by the Hon. and Very Rev. the Dean of York, Captain Lord Eustace Gascoyne Cecil, Coldstream Guards, third son of the Marquis of Salisbury, to Lady Gertrude Louisa Scott, fourth daughter of the late and sister of the present Earl of Eldon.

CHALDECOTT—HARPUR—September 15, at Frant, by the Rev. Sir Henry Thompson, Bart., Gervas Herbert, only son of the late J. G. Chaldecott, Esq., of Leyton, Essex, to Emily, only child of Major Harpur, late of the 2nd West India Regiment.

COCKBURN—PEARCE—August 28, at Trinity Chapel, Edinburgh, by the Rev. V. Grantham Faithfull, incumbent, Charles La Coste, younger son of the late David Cockburn, Esq., of Westbourne Park Villas, to Caroline Jane, elder daughter of Thomas Pearce, Esq., Military Storekeeper, War Department, Edinburgh Castle.

GILMORE—MORRIS—September 18, at St. Mary's Church, Leyton, by the Hon. and Rev. H. Bertie, LL.D., vicar of Ilford, assisted by the Rev. J. Gilmore, M.A., incumbent of Trinity Church, Ramsgate, brother of the bridegroom, Lieutenant Arthur Hamilton Gilmore, R.N., youngest son of J. Gilmore, Esq., of "The Priory," Walthamstow, to Isabella, third daughter of the late William Morris, Esq., of Woodford Hall, Essex.

JOHNSON—BOYSER—September 18, at Wirksworth, by the Rev. Chas. A. Johnson, rector of Enborne and Hamstead, brother of the bridegroom, Major W. T. Johnson, Commandant of H.M.'s 12th Irregular Cavalry, to Mary Amelia, only daughter of the late Thos. Boyser, Esq., Wirksworth, Derbyshire.

MITCHELL—WILDMAN—September 13, at Trinity Church, Sloane Street, by the Lord Bishop of London, uncle of the bride, Charles Cecil Mitchell, Esq., son of the late John Mitchell, Esq., and late Lieutenant, R.N., to Montague Marion, eldest daughter of Richard Wildman, Esq., of Lowndes Square.

MOLEYNS—WAUCHOPE—September 12, at Niddrie House, by the Rev. Henry Joy Tombe, M.A., brother-in-law of the bridegroom, Lieut.-Colonel the Hon. Darrolles Blakeney de Moleyns, eldest son of the Lord Ventry, of Burnham House, county Kerry, to Harriet Elizabeth Frances, elder daughter of Andrew Wauchope, Esq., of Niddrie Marischal.

SCOTT—LOCKE—August 1, at Madras, R. Reginald Scott, Esq., eldest son of Commander Charles K. Scott, R.N., of Burseldon House, Brighton, to Justa, daughter of the late Major Locke, of Madras.

SLADE—CUTHBERT—September 6, at the Church of St. John Ley's, Northumberland, Alfred Frederick Adolphus Slade, Esq., Captain H.M.'s 100th Foot, eldest son of Sir Frederick Slade, Bart., Q.C., to Mary Constance, second daughter of William Cuthbert, Esq., of Beaufront Castle, Northumberland.

STEELE—BLAKE—September 12, at Swanage, Dorset, by the Rev. Duncan Travers, Captain Frederick Stephen Steele, eldest son of Captain Mathew Fredk. Steele, of Sutton, Surrey, to Martha, eldest daughter of the late Sir Francis Blake, Bart., of Twisel, Northumberland.

WAKEFIELD—SNOOKE—September 18, at the Church of St. Peter's, Chichester, by the Rev. Hargood Snooke, cousin of the bride, assisted by the Rev. Thomas Brown, rector of St. Peter's, Captain Julian Wakefield, of the 83rd Foot, to Florence Elizabeth, elder daughter of Matthew Snooke, Esq., of North Street, Chichester.

WALKER—SLESSOR—September 18, at Sidmouth, by the Rev. G. E. Deacon, assisted by the Rev. George Shaw Munn, rector of Madresfield, Worcestershire, Charles Henry, son of the late Rev. T. Horatio Walker, vicar of Bickleigh, Devon, to Emily Jane, daughter of the late Major-General Slessor.

WILLIS—YOUNG—September 13, at Aston Church, Yorkshire, by the Hon. and Rev. William Howard, rector of Whiston, assisted by the Rev. E. Bucknall Estcourt, rector of Eckington, Lieut.-Colonel Frederic A. Willis, C.B., son of Major-General Willis, R.A., to Augusta Emma, eldest daughter of John G. Young, Esq., of Brighton.

WORTHINGTON—COOPER—September 18, at the Old Church, Scarborough, by the Rev. Dr. Whiteside, J. Yorke Worthington, Esq., of Llancaiach, Glamorganshire, Captain in the Bengal Artillery, to Henrietta Charlotte, widow of the late Rowland E. Cooper, Esq.

DEATHS.

ADVANTAGES OF ASSURING WITH THIS COMPANY.

The premiums are on the lowest scale consistent with security.
The Assured are protected by an ample subscribed capital—an assurance fund of 480,000*l.*, invested on mortgage, and in the Government Stocks—and an income of 85,000*l.* a year.

Premiums to Assure £100.			Whole Term.	
Age.	One Year.	Seven Years.	With Profits.	Without Profits.
20	£0 17 8	£0 19 9	£1 15 10	£1 11 10
30	1 1 3	1 2 7	2 5 5	2 0 7
40	1 5 0	1 6 9	3 0 7	2 14 10
50	1 14 1	1 19 10	4 6 8	4 0 11
60	3 2 4	3 17 0	6 12 9	6 0 10

MUTUAL BRANCH.

Assurers on the Bonus system are entitled, after five years, to participate in nine-tenths, or 90 per cent., of the profits.
The profit assigned to each policy can be added to the sum assured, applied in reduction of the annual premium, or be received in cash.
At the first division a return of 20 per cent. in cash on the premiums paid was declared; this will allow a reversionary increase, varying, according to age, from 66 to 28 per cent. on the premiums, or from 5 to 15 per cent. on the sum assured.
One-half of the "Whole Term" Premium may remain on credit for seven years, or one-third of the premium may remain for life as a debt upon the policy at 5 per cent., or may be paid off at any time without notice.
Claims paid in one month after proofs have been approved.
Loans upon approved security.
No charge for Policy Stamps.
Medical Attendants paid for their reports.
Persons may, in time of peace, proceed to or reside in any part of Europe or British North America without extra charge.
No extra charge for the Militia, Volunteer Rifles, or Artillery Corps on Home Service.
The Medical Officers attend every day, at a quarter before Two o'clock. E. BATES, Resident Director.

OFFICERS PROCEEDING ABROAD can effect Assurances with THE COLONIAL LIFE ASSURANCE COMPANY on favourable terms.

LOANS GRANTED.

LONDON { 81, Lombard Street, E.C.; and at Messrs. PARIS & Co., 10, St. James' Street, S.W.

Office, 64, Cornhill, E.C., August 25, 1860.

VOLUNTEERS' ASSURANCE FRIENDLY SOCIETY.
Patron—His Grace the Duke of WELLINGTON, K.G.

The object of this Society is to raise a fund to be applied to the benefit of Volunteers in sickness or disability, and of their families in the event of death from accident on duty. The Society is under the management of Volunteers, and is protected by the Friendly Societies Acts, 18 & 19 Vict., c. 63. Donations received by the Treasurer, Captain Cameron Geddes, V.R., Volunteer Service Club, and 26, Great Tower Street, City, E.C., and at the Union Bank, Temple Bar, E.C., or at the offices of the Society. Member's contribution, 10*s.* 6*d.* per annum, ensuring the benefits detailed in the prospectus, may be sent by post-office order, payable at Charing Cross, to the Treasurer, or paid to the Bankers. The prospectus free on application to Mr. C. BARLOW, Secretary, Chandos Chambers, 22, Buckingham Street, Adelphi, W.C.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

And Sold by all respectable Chemists throughout the Empire.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, Deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.*; Ointment, per pot, 1*s.* 1½*d.*, and 2*s.* 9*d.*; Essence, per bottle, 11*s.*, or family bottle containing four times that quantity, 33*s.* Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 78, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Just published, gratis, or post free for one stamp, to be had of all Agents, and at 22, Newman St., W., Extracts from Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

NERVO-ARTERIAL ESSENCE, prepared only by Dr. WM. BATCHELOUR, M.R.C.S.E. 1835, and M.L.A.C. 1834. It strengthens the vitality of the whole system without reaction, and speedily removes nervous complaints. In bottles, at 2*s.* 9*d.*, 4*s.* 6*d.*, 11*s.*, and 33*s.*, at Goodyer's, 31, Regent Street, W.; Butler & Crispe's, 4, Cheapside, E.C.; Sutton & Co., Bow Churchyard, E.C.; Barclay & Sons, Farringdon Street, E.C.: 12, Finsbury Place South, City, E.C., and all Chemists.

RUPTURES. — HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Pressure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage 9*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

MEMORIALS OF THOMAS HOOD,

COLLECTED, ARRANGED, AND EDITED BY HIS DAUGHTER,

WITH A PREFACE AND NOTES BY HIS SON.

Illustrated with many copies from his own Sketches, and of a MS. page of "The Song of the Shirt."

"The most elaborate biography could not give a better idea of Thomas Hood than we obtain from the simple Memorials now published. * * * These letters perfectly reflect his character with all its fun, geniality, and tenderness. * * * Much or little, however, all is well done. The work is a complete success."—*Times*, Sept. 7, 1860.

THE HISTORY OF EGYPT,

FROM THE EARLIEST TIMES TO THE CONQUEST BY THE ARABS, A.D. 640.

BY SAMUEL SHARPE.

"Mr. Sharpe's is the only English book in which the student can find a complete consecutive history of Egypt under the Ptolemies and Cæsars. * * * The book has become handsome as well as useful, being enriched with many illustrations, representing buildings, hieroglyphics, and other Egyptian remains. * * * Like King Ptolemy himself, he has set before him a definite and moderate object, and has carried it out in a discreet and rational manner."—*Saturday Review*, Sept. 15, 1860.

MAPPINS' TABLE CUTLERY.—SEASON 1860.

CAUTION.—MAPPIN BROTHERS beg to advise their customers and correspondents that they have only one establishment in London, viz., at London Bridge, and they hope that their friends will be careful to address them in full, either Mappin Brothers, London Bridge, London, E.C.; or Mappin Brothers, Queen's Cutlery Works, Sheffield. Established in Sheffield, A.D. 1810. None are genuine without their corporate mark, the "Sun," granted to their father by the Cutlers' Company of Sheffield, June 26, 1835.

Messrs. MAPPINS' Table Knives still maintain their unrivalled superiority; all their Blades being their own Sheffield Manufacture, are of the very first quality, with secure Ivory Handles, which do not come Loose in Hot Water; and the difference in price is occasioned solely by the superior quality and thickness of the Ivory Handles.	Ordinary Quality.	Medium Quality.	Best Quality.
	£ s. d.	£ s. d.	£ s. d.
Two Dozen full-size Table Knives, Ivory Handles	2 4 0	3 6 0	4 12 0

MANUFACTORY, QUEEN'S CUTLERY WORKS, SHEFFIELD.

DAVIESON'S EVERLASTING TEETH.

THE LATEST DISCOVERY.

MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth. Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 448, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

WANTED, a MESSMAN, for the 84th Regiment, at Salford Barracks, Manchester. None need apply unless they can produce the highest testimonials and give security.

NAVAL CADETS, MARINE CADETS, &c. —At the last Examination of Pupils at the Royal Naval College, the first place of all candidates was taken by a pupil at

EASTMAN'S ROYAL NAVAL ESTABLISHMENT, EASTERN PARADE, SOUTHSEA;

and other Pupils at the above Establishment, in their different classes, took 2nd, 3rd, 4th, 5th, and 6th places. This Establishment is conducted by the HEAD MASTER, MR. SPICKERNELL, for MRS. EASTMAN, and the other Masters, so many years with the late Mr. Thomas Eastman, R.N. In addition to special instruction for Naval Examinations, Pupils receive a Classical and sound General Education, in preparation for the Army and other Professions. 354 Gentlemen have passed from this Establishment as Naval Cadets, and more than 200 as Marine Cadets, previous to this last examination.—Applications to be addressed to Mr. Spickernell, the Head Master. Prospectuses and other information may be obtained at Messrs. Booth's Library, 307, Regent Street, W.

NAVAL CADETS.—Of the 57 who passed at the Royal Naval College the 11th September, 49 were under the new regulations; 12 of these 49 were prepared at NORTH GROVE HOUSE, SOUTHSEA —viz., Messrs. Turner, Boyes, Harding, Congreve, Dickens, Herring, Claremont, Cruttwell, Bromley, Clements, Lowe, King. Mr. Daubeny passed from North Grove House under the old system.—W. BELL, Chaplain; A. BURROW, Chaplain and Naval Instructor; W. JOHNSON, Naval Instructor.

ROYAL NAVAL AND MILITARY ACADEMY, GOSPORT.

PATRONS.

Her Most Gracious Majesty the QUEEN.
His Royal Highness the PRINCE CONSORT.

ELEVEN PUPILS of this Establishment PASSED at the recent Examination for Naval Cadetships. A Special Class has been formed for the Examination in December. Pupils joining it will have all the advantages of the school. Applications to be addressed to the Rev. E. BURNEY, M.A.

NAVAL AND MARINE CADETS ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives PUPILS for the Royal Navy, Army, Woolwich, and Addiscombe. NINE out of ELEVEN of Mr. Knight's Pupils PASSED at the Royal Naval College, 12th June, 1860, taking 1st, 2nd, 3rd, 6th, 7th, 11th, 11th, 17th, 19th places in the respective divisions of 99 candidates, of whom 62 passed and 37 failed.—St. Mary's Hall, Southsea, Hants.

ROYAL NAVAL ACADEMY.—Of the many pupils prepared at the Academy conducted by MR. C. F. COOPER, R.N., not one has failed to pass, and eight have taken 1st, 2nd, and 3rd places at the Royal Naval College.—Address, Beresford Place Southsea.

KING'S COLLEGE, LONDON.— MILITARY DEPARTMENT.

OFFICERS' CLASS.—For the Examination for Staff Appointments, or for Entrance into the Royal Military College, Sandhurst.

STUDENTS' CLASS.—For the Examination for Direct Commissions in the Army, for Entrance into the Royal Military Academy, Woolwich; Royal Military College, Sandhurst; and East Indian Military College, Addiscombe. The Term will commence on Tuesday, 2nd Oct.

Information may be obtained from Major Griffiths, Professor of Military Science; or from J. Cunningham, Esq., Secretary. R. W. JELF, D.D., Principal.

STAFF EXAMINATIONS. — Twenty-four Officers have already joined the Military College of Sunbury this year, to read either for the Staff College, or for direct appointment on the Staff. Apply to Captain LENDY, Sunbury, S.W.

MILITARY EXAMINATIONS.— A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

ARMY EXAMINATIONS.—Candidates for the Artillery, Line, and Cavalry, are rapidly and efficiently prepared at an establishment, the pupils of which have, within the last two years, come out eight times first, five times second, and three times third on the list. Apply to Captain LENDY, Sunbury, S.W.

SPECIAL MILITARY TUITION, including Geometrical and Military Drawing, Hindustani, Fortification, Military Surveying and Reconnoitering. By Lieut.-Colonel MORLAND, who also continues the preparation of candidates for Addiscombe and the Military Competitive Examinations.—At 20, Norland Square, Notting Hill.

ARTILLERY EXAMINATIONS. — Candidates for the Competitive Examinations are individually prepared at an establishment which receives six pupils only for that branch of the Service. Four resident professors. Apply to X., care of Messrs. PARKER, 445, Strand, W.C.

BECKENHAM, NEAR LONDON.—TEN BOYS carefully PREPARED for the PUBLIC SCHOOLS by the Rev. LLOYD PHILLIPS, B.A. (late Secretary to the Editorial Department of the British and Foreign Bible Society). Inclusive Terms: Eighty Guineas and a Hundred Guineas. References: the Rev. W. Marsh, D.D., Beddington Rectory, near Croydon; the Rev. F. Chalmers, B.D., Beckenham Rectory, near London, and the parents of pupils.

BARON KOLLER, assisted by a Graduate in Mathematical honours of high repute, and by the most distinguished Professors, continues to READ with Officers for the Staff College, and PREPARES Gentlemen entering the Army for Examinations, at his residence, Dawson Villa, 6, Dawson Place, Bayswater, W.

EDUCATION IN FRANCE.—TWO GENTLEMEN, one an English and the other a French Protestant, with the assistance of five highly-qualified Masters, PREPARE 14 YOUNG GENTLEMEN for the Competitive Examinations for Woolwich, Sandhurst, Addiscombe, the Indian Civil Service, and direct appointments in the Army. Terms, 50 to 60 guineas. Address, B.A., Post-Office, St. Pierre, Lés Calais.

[COPY.]

"Ordnance Select Committee, Royal Arsenal, Woolwich, April 17th, 1860.

"Sir,—Since I last addressed you on the subject of your Waterproof Cartridges, I have to inform you that 60 of them have been exposed in an atmosphere saturated with moisture, at a temperature of 90 degrees, for a fortnight. The result has been favourable, as far as this test is concerned, to their Waterproof qualities.

"I have, therefore, to request you will be good enough to state, for the information of the Committee, the nature of the lubrication you employ; whether it is in any way connected with the Waterproof properties of the Cartridge, and whether, in the event of their being adopted, the Service lubrication, which is wax, might not be employed.

"I have the honour to be, Sir,
"Your obedient Servant,
"J. H. LEFROY, Colonel, R.A.

"Mr. Thos. H. Anthony,
"37, Broad Street, Birmingham."

Waterproof Cartridges for Westley Richards', Wilson's, Calisher & Terry's, Leetch's, and other breech-loading Rifles, for foreign service.

Manufactured by THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

IT is not to be supposed, because we noticed last week the small rate of mortality in the vessels hired by the Emigration Commissioners, that the troops sent out by the Indian Department and Admiralty Transport Board are less healthy on their voyages. On the contrary, they are rather more so. On the other hand, it would not be fair towards the Emigration Commissioners to point in any such comparison to the unfortunate case of the Accrington, in which the great mortality was exceptional, and which we therefore purposely passed by. Neither do we think the unaccountable loss of their vessel, the Guiding Star, is sufficient to bear out the strong views, as to the unseaworthiness of their vessels arising from their decks being cut up for ventilation, entertained by Mr. Phillipps and Mr. Marshall.

In fact, in order to come to a satisfactory decision as to the constitution or working of any new Transport Department, there is no necessity to dwell upon any imperfection in existing departments at all, except, indeed, to learn from the past how to perfect their management for the future. The general question whether all the sea-transport required by Government should or should not be conducted by one department, ought to be considered on general grounds, and on the assumption that the new department would be equal to its work.

It is somewhat strange that a difference of opinion was expressed, as to the proper constitution of such a department, not merely between gentlemen belonging to different offices under Government, but among the shipowners examined by the Transport Service Committee. The strong views of Mr. Murdoch and Mr. Wood in favour of a predominance of the civilian element, received a degree of support from Mr. Mackay, who now deals largely with the Emigration Commissioners; only he goes beyond them, in the way at least in which he expresses himself. He is doubtful whether either naval or military men could be fit to manage such matters; but "without any doubt a civilian should be at the head;" and his "beau ideal of a person of that kind" is "Mr. Murdoch." Mr. Marshall has also a feeling in favour of civilians instead of naval and military men, though he is by no means, it will be remembered, complimentary in his opinions of the civilian Emigration Board. Mr. Phillipps, on the other hand, is in favour of a naval officer having the entire control; at least he would not have a military man; and though "many civilians are competent, he would prefer a man who had had experience of the sea." So here again we have to weigh and balance evidence or, rather, opinions.

The military think naval management to be absolutely necessary, and that the service should be conducted under the Admiralty. Nobody proposes that the military should have the control (except that Mr. Murdoch and Mr. Wood would associate one military man with civilian commissioners); and besides the various opinions in favour of civilian management, excepting the Commissioners of Emigration, we have actual civilian management at present, both under the Admiralty and Indian Departments, very highly praised by mostly all the witnesses.

Upon the whole, it is not unreasonable to conclude that the sea transport business should certainly be conducted under the Admiralty; that if a Naval officer having good business qualifications can be permanently spared for the office, he might well be appointed Comptroller; but, if not, that it will not be very difficult for any able Civilian to get up such nautical knowledge as may be useful for conducting the office-management of a service, in which he will have constantly a staff of officers for carrying on all its technical details in port and at sea.

We shall not here enter deeply into the question whether the transports still required by the Emigration Commissioners should be provided by the same department as those for troops and stores for the Army and Navy, including what is wanted for India. We rather lean to the Duke of Somerset's opinion, and think that, at least for the present, the Emigration Board had better not be disturbed. They differ materially in their system from the other two departments; their regulations for increased ventilation are not of many years standing; and emigration is less extensive than it was. They had probably better be allowed to complete their experiments. Were we to suggest any change affecting them, it would be—as a second commissioner has recently been again appointed—to hand over to them the management of the transport of convicts also, without exactly meaning to say, "Fiat experimentum in corpore vili."

By thus eliminating from the question both the emigrant and convict elements, we naturally feel that we get upon our own more legitimate ground—the Naval and Military services of the country; and we certainly think that, as a first step, it will be no inconsiderable thing to do, to amalgamate under a single management the whole Transport Service for the Indian and other imperial forces of the nation.

The only objection which requires to be noticed, is that the expenditure for India must be met out of Indian revenue; and it was not unnatural that objection should have been taken by Mr. Mason, as representing the Indian department. The objection, however, amounts to nothing; as it would be easy for the Transport Department to charge to a separate account, either quarterly or at the end of each financial year, the proportion of expense they have incurred for the Indian Department, by whom it would be repaid. But, if more is required, as a guarantee to the Indian auditors that Indian interests shall not be neglected, some gentleman—like Mr. Mason himself—connected with the Indian Office, could be attached to the Transport Department, as one from the Horse Guards probably would be, either as a Member of a Board, or—as Boards are now in disfavour—as an Assistant to a Director or Comptroller of Transports.

We can scarcely doubt that this will be the decision to which the Government must come.

Confidently assuming, then, that we shall have such a Department, we now proceed to consider by what means the Transport Service of the country ought to be performed, in order to insure the greatest efficiency and economy.

As regards the size of vessels best adapted for the conveyance of troops, there are not two opinions among the witnesses, naval and military, examined by the Transport Committee. The Himalaya has been a great success since the day she was purchased by the Admiralty from the Peninsular and Oriental Company. She is nearly double the size of any other of Her Majesty's troop-ships, being of 3453 tonnage, horse-power 700, and her total cost was 130,000*l*. The average tonnage of the other seven Government troop-ships is only 1815, their average horse-power 387, and their average cost was no less than 85,208*l*. This is the fairest way of making the comparison; but it may be observed that the Simoom, of 1980 tons, horse-power 400, cost 106,190*l*. She, however, was built by contract by Mr. Napier and originally intended for a war frigate; but the Urgent which was purchased from Mr. Mare (who has also the honour of being the builder of the Himalaya) cost 89,406*l*., her tonnage being 1981, and her horse-power also 400.

So much for the first cost of the largest and smaller vessels; as regards their annual expense, the contrast is still greater in favour of the Himalaya.

The Simoom, for instance, requires a complement of 200 officers and men, and her annual expenses, for wages, victuals, wear and tear, coals, &c., amount to 35,484*l*.; while the Himalaya does with four men more (complement 204) notwithstanding her great size, and her annual cost is but 54,272*l*. While among these figures we cannot but notice, though we are not now comparing Queen's ships with hired vessels, that 1400 troops were conveyed from England to Malta, in the Himalaya and Perseverance, at a cost (including the victualling of the troops and every other expense) of 19,755*l*.; whereas, if the same number had been carried in hired steamers at the rate actually payed for conveying in the Indiana 350 men who could not be accommodated in Queen's ships, the hire would have been the almost incredible sum of 67,520*l*., that is, three and a half times as much as the service actually did cost in Government troop-ships!

These figures relate to no mere cheese-paring, but exhibit all the difference between an immense economy and flagrant extravagance. Without them the following question might be misunderstood, bearing upon the efficiency of the Himalaya, and therefore we have been anxious to premise that the great economy of having such vessels is no less established. Mr. Longfield asked Colonel the Hon. A. Gordon his opinion as to the prudence, in a military and political point of view, of adding to the present eight Admiralty troop-ships, four, or six, or eight vessels of the quality and burden of the Himalaya, adding to the question, "I do not now speak of economy." The answer is plain enough:

"More vessels of the size of the Himalaya would be a great convenience to the Army; and in a strategic and prudential point of view of very great advantage."

Colonel Brownrigg also says:

"There is no man-of-war steam-transport to be compared with the Himalaya. Six or eight Himalayas, for the colonial reliefs, would be a most desirable thing."

Sir Richard Airey says even more:

"For the conveyance of troops the Himalaya is the finest ship we have. It would be a very great advantage if every vessel were to take, like her, 1000 men, or a full regiment."

In short, as to the advantages, there is no question; and it appears from a very clear estimate worked out by Mr. Willis, the saving would be so great in conveying the ordinary estimated reliefs between England, India, and the colonies, that it would suffice in a very few years to pay the whole original cost of the vessels. It is like buying one's house, in fact, instead of renting it, or any other advantage that results from possessing money and a common-sense employment of it. As all this is abundantly proved by the Transport Committee's Blue Book, we cannot help again wondering what more the Committee could want, to enable them to come to a decision. Mr. Lindsay was chairman, and he must know very well, that in hiring vessels from ship-owners, the Government have at least to incur the additional expense of all the profit that must go into the shipowners' pockets. These profits are not inconsiderable, when it is in evidence that they are in the ratio of the difference between 67,520*l*. and 19,755*l*. If Mr. Lindsay, therefore, and the shipowners are in any doubt what is best for the country, at all events the Government ought not to be so. If we can save nearly 50,000*l*. merely in conveying 1400 men to Malta, how much might not be saved every year in the whole transport of our troops? Is Mr. Gladstone content to rail merely at "extravagance in the Departments?" Are the hands of the executive tied; and must we wait till Mr. Lindsay and his Committee are reappointed, and another large Blue Book

Digitized by Google

is published, at the end of another session, before the most enlightened of Governments will do aught to stop a manifest waste of public money, that can ill be spared—that can very ill be spared, either by the Imperial or Indian Exchequer?

Mr. Sidney Herbert's scheme for filling up the ranks of the Cavalry subalterns by reducing the prices of commissions has now been some six or eight months in practical operation. Estimated by the results up to this time, its success has been of a moderate character, but as far as it goes it is satisfactory. The sixty-five vacancies among the cornets which existed in the early part of the year have now diminished to thirty-three; and this in the face of a large number of retirements—larger, we are inclined to think, than the average. In 1859 we were only able to get about fifty young gentlemen to accept cavalry commissions, although fully twenty of them were given without purchase. This year, up to the present time, we have gazetted some seventy, notwithstanding that, with with very few exceptions, they were purchased. Of the thirty-three vacancies now existing some have only been created within a short time; and it is not fair to attribute them all to unwillingness to select the Cavalry; and if we were to put down the real vacancies at about twenty, it would give a more correct idea of the progress made in filling them up since the reduced prices have come into operation. The following is a list of the number of subalterns by which each regiment is now deficient in its establishment:

1st Dragoon Guards	4	6th Dragoons	2
2nd ,,	1	7th Hussars	1
3rd ,,	2	8th ,,	2
4th ,,	1	11th ,,	1
7th ,,	3	12th ,,	1
1st Dragoons	1	14th Light Dragoons	1
2nd ,,	1	15th Hussars	1
3rd Light Dragoons	2	16th Lancers	1
4th ,,	1	17th ,,	3
5th Lancers	3	18th Hussars	4

The 5th and 6th Dragoon Guards, 9th Lancers, 10th Hussars, and 13th Light Dragoons, have their full complement of officers.

Turning to the Household Cavalry, in which no change in the prices of commissions has been carried out, we find the 1st Life Guards at its full strength, the Blues with one vacancy; while in the 2nd Life Guards there is not a single cornet. That a Household regiment should be in such disfavour that no fit person can be induced to accept a commission in it, is certainly very disgraceful, and it is high time that the cause should be inquired into, and if possible removed. That it cannot be altogether the examination is tolerably clear; for if it were, why should the 1st Life Guards and the Blues present such contrasts to the other corps, which is constituted in precisely the same way? It is of course entirely superfluous to say that the chief colonel, Lord Seaton, is a soldier under whom it should be a pride for any one to serve; but at Lord Seaton's time of life, when he has just retired from a command which was quite sufficient to engross his attention, it is perhaps too much to expect him to work a regiment into favour that apparently occupies a hopeless position in public estimation, unless some change occurs. But we must say that the time has now arrived when the Commander-in-Chief and Lord Seaton, who are both responsible to the public for the efficiency of the corps, should no longer delay seeking for a remedy and applying it promptly and fearlessly. If extraordinary steps be necessary let them be taken. If the regiment be badly commanded, let a fit Cavalry officer be found who will devote himself to its regeneration, and take a pride in seeing it regain its old position under his hands. The page of the Army List which proclaims that the 2nd Life Guards cannot muster more than half its strength of subaltern officers is a disgrace which ought to be removed. The Duke of Cambridge looks for public support in carrying out reforms. He has never taken a bold step in this direction in which he has not been cordially supported; let him do so now, and he will find himself again sustained by public opinion.

Some of our daily contemporaries contained a dispatch stating that three vessels from England were expected at Malta with reinforcements. We can only account for such a statement by supposing that some mistake of the telegraph has made it appear that reinforcements for Garibaldi were for the garrison of Malta, which is now fully manned, and which there is no intention of reinforcing.

The Rev. H. E. Maskew, Assistant-Chaplain at Aldershot, has been removed to Chatham, and will be succeeded by the Rev. W. Sturges.

THE ARMY.

16th Lancers. Mr. Edwin Cowlan, late Lieutenant and Adjutant of this regiment, has retired from the Service, having received the appointment of Governor of Hereford county gaol. He joined the regiment in 1839, and on leaving it has received from his late brother officers, as a mark of their esteem, a magnificent silver tea-service.

Royal Artillery. The Deputy-Adjutant-General Colonel Bingham, announces in a General Regimental Order, dated the 20th inst., the following information relating to the Royal Artillery:—Lieutenant J. M. Douglas, of the 11th brigade, is raised to increased pay therein, vice P. D. Le Poer Trench, deceased. The following exchanges have been ordered, viz.:—Between Lieut.-Colonel and Brevet-Colonel St. John T. Browne, of the 13th brigade, and Lieut.-Colonel John Travers, of the 14th brigade; Colonel Browne will assume the command of the Royal Artillery in South Wales (head-quarters, Pembroke Dock), and Lieut.-Colonel John Travers will embark for Bombay on the 12th November next. Also, between Captain W. T. Barnett, of the 1st brigade; and Captain G. R. C. Young, of the 6th brigade; also between Captain and Brevet-Major F. M. M. Ommanney, of the 11th brigade, and Captain A. Sievwright, of the 3rd brigade; also between Second Captain W. L. Yonge, of No. 3 battery, 14th brigade, and Second Captain F. G. E. Warren, of No. 9 battery, 4th brigade; also between Second Captain L. F. Hall, of No. 6 battery, 6th brigade, and Second Captain C. B. Le Mesurier, of No. 7 battery, 14th brigade. Lieut.-Colonel Gibbon, C.B., has assumed command of the Royal Artillery in the Eastern District (head-quarters, Colchester). Lieut.-Colonel Middleton, C.B., has been ordered to do duty at Woolwich until further orders. Lieut.-Colonel H. P. Goodenough has been removed from Aldershot to Horfield, Bristol; and Lieut.-Colonel M. O. Nixon from Aldershot to Christchurch. Lieut.-Colonel Burrows has been removed from Alderney to Portsmouth, and Lieut.-Colonel M. C. Dixon from Gosport to Alderney. Lieut.-Colonel S. Cleveland has been ordered to do duty at Gosport. Captain P. W. Phillipps has embarked for St. Helena to join his battery. Assistant-Surgeon Hepworth has proceeded from Woolwich to Hurst Castle, to relieve Staff-Assistant Surgeon Fagan, who has been placed under orders for India. His Royal Highness the General Commanding-in-Chief has approved of the appointment of Captain and Brevet-Lieut.-Colonel C. H. Smith to H Battery of the Horse Brigade, and he has been ordered to join it accordingly. Captain Seale is therefore posted to the 11th brigade vice Smith. The undermentioned riding-masters have been posted to the brigades as follows:—Lieutenant and Riding-Master Everett to the Horse Brigade; Riding-Master Donald, to the 4th Brigade; Lieutenant and Riding-Master Bishop, to the 8th Brigade; and Riding-Master Barnett, to the 9th Brigade.

Royal Engineers. The death of General Thackeray, C.B., colonel-commandant, promotes Major-General Ward to a colonel-commandant; Colonel Stotherd, now commanding at Dover, to major-general; Brevet-Colonels Sir William Denison, K.C.B., Governor-General of Australia, and Durnford, assistant-adjutant-general at Dublin, to colonels; Brevet-Major Collinson, lately returned from Corfu, to lieutenant-colonel; Second Captain Edward Heygate, employed on the survey, to captain; and Lieut. Grant, aide-de-camp to Major-General Sir Fenwick Williams, K.C.B., Bart., in Canada, to Captain. Lieut.-Colonel Collinson will succeed Lieut.-Colonel Ross at Chatham as second in command. The appointments at Dover and assistant-adjutant-general at Dublin are rendered vacant. It is rumoured that Lieut.-Colonel Lafian proceeds to Malta. Captain Gray, R.E., is ordered to Halifax. Colonel Walpole, commanding Royal Engineers at Woolwich, is about to withdraw from the service on a retiring pension, and will be succeeded by Colonel Edward Twiss Ford, Royal Engineers. The 35th company, now at Aldershot, will join head-quarters, and will be succeeded at Aldershot by the 33rd company, from Chatham.

4th Regiment. Ensign Innes, 1st battalion, has 18 months' leave to England.

13th Light Infantry. Captain H. L. FitzGerald is coming home from India in charge of invalids.

17th Regiment, 2nd battalion. The officers of this regiment on Wednesday last gave a grand *matinée musicale* to the *élite* of Folkestone, Sandgate, &c., in the mess-room in the D range. Luncheon was served at 2 p.m, and dancing commenced immediately afterwards in the new reading-room, which was fitted up in a most tasteful manner for the occasion. The string band of the regiment, under the leadership of Mr. Holt, the bandmaster, played during the afternoon a variety of the most popular music of the day. By the permission of the commanding officer the non-commissioned officers opened their weekly ball in the room at the conclusion.

22nd Regiment. We are sorry to read the following in a letter from Malta:—"There has been a good deal of military insubordination of late among the troops in garrison, and a few days ago a man of the 22nd Regiment was tried by general court-martial for striking his captain. Robberies and other offences, committed by soldiers, are becoming quite common, the object alleged in many cases by the culprits being to escape military duty."

32nd Light Infantry. The veterans of the 32nd Regiment, who immortalised themselves by the memorable defence of Lucknow, were invited to spend a day at the Crystal Palace on Tuesday. The band of the regiment, of whom six or seven were at Lucknow at the time, came with them. There were in all about 150 men under the command of Brevet-Major Edmondstoune, accompanied by Captain Giddings and Quartermaster Stribling. Although the invitation was limited to those non-commissioned officers and men of the regiment who shared in the heroic defence, there were many officers present in civilian's dress, who seemed heartily to join in the pleasures more particularly provided for the elect. The tempestuous weather of the morning threw a gloom over the out-door proceedings, and put a stop to sundry sports and pastimes, which would otherwise have been celebrated in the grounds. About twenty-four sergeants, and the wives and children of some of them, partook of a substantial dinner provided by Mr. Strange, and a magnanimous officer of the regiment stood sponsor for many additional ports and sherries to improve the occasion.

34th Regiment. Assistant-Surgeon Pennington has 18 months' sick leave to England.

Royal Marines. A Circular Memorandum from the Lords Commissioners of the Admiralty has been issued at the head-quarters of the Woolwich Division of Royal Marines to the following effect:—"With reference to the provisions of Her Majesty's Order in Council, dated the 11th of January, 1859, the Lords Commissioners of the Admiralty have signified that Her Majesty has been graciously pleased to extend the benefits of such Order in Council as follows, viz.—1. All Marines who shall have fulfilled the conditions of the regulations relating to the award of the medal and gratuities for long service and good conduct, but who are precluded from being the recipients of the medal with a gratuity, in consequence of the aggregate amount to be annually awarded being already appropriated, shall be granted the said medals without gratuities, to the extent of three for each division. 2. Non-commissioned officers, drummers, privates, and gunners, who may have been qualified before discharge, shall be eligible to receive medals without gratuity, if recommended by their former commanding officers within three years after their discharge. 3. Non-commissioned officers on the permanent staff of the Militia, or filling corresponding situations in the naval service, who were eligible previously to their discharge from the corps, for the medal with gratuity, shall also be eligible to receive medals without gratuities, and no limit shall be placed on the grant, as regards the date of discharge in the case of such men so serving. Four commandants of divisions will therefore be authorised in future to make annual applications for the limited number of medals without gratuities, in the same form as that now used, but on a separate sheet. By command of their Lordships, J. R. M. Wesley, Deputy-Adjutant-General."

52nd Light Infantry. Captain Champion is appointed to act as interpreter to the regiment, and Ensign J. C. W. Lever is appointed to act as instructor of musketry during the absence of Lieut. Keyworth.

54th Regiment. Mr. Purnell, of this regiment has just been promoted to an ensigncy for nearly twenty years' active service at home and abroad, for which he has been awarded several decorations. He was invalided from India in October of last year, and since that period has acted as sergeant-major at Landguard Fort. This promotion has reference also to the gallantry he displayed on board the unfortunate ship Sarah Sands, which it will be remembered was destroyed by fire.

71st Light Infantry. Lieut. R. J. Isacke has passed an examination in Hindostanee.

75th Regiment. Captain Malan and Lieut. Hammill have 18 months' leave to England on medical certificate. Lieut. Allfrey is on sick leave to Mussoorie to Nov. 6.

81st Regiment. Lieut. Rochfort is about to retire from the Service.

95th Regiment. A handsome monument of white Carrara marble is now in course of erection at All Saints' Church, Derby, to the memory of the officers of the above regiment who fell in the Indian mutinies and the Russian war. The monument, which is by Mr. T. Gaffin, the sculptor of the Quadrant, Regent Street, is most elaborately carved. It is surmounted with military trophies, and a wreath, containing the names of the different engagements in which the regiment has taken part, and at the base is the badge of the regiment, and the words, "The 95th Derbyshire." The following is the inscription:—"In memory of those officers, non-commissioned officers, and privates of the 95th Derbyshire Regiment, who fell in action, or died from disease during the war with Russia, 1854-56, and in the suppression of the Indian mutinies, 1857-58, the tablet is erected by their surviving comrades:—Lieut.-Colonel J. G. Champion, died of wounds; Major T. Davis, died of disease; Captains G. J. Dowdell, J. G. Eddington, S. Frazer, F. H. Dymock, killed in action; Lieutenants R. G. Polhill and E. W. Eddington, killed in action; Lieutenant and Adjutant J. C. G. Kingsley, killed in action; Surgeons Brown and Smith, died of disease; Lieutenant W. L. Braybrooke, Ceylon Rifle Regiment, attached, died of wounds; and 31 serjeants and 606 rank and file, 1854-56. Captain Evelyn Bazalgette, killed in action; Lieutenant Alexander Fawcett, killed in action; Assistant-Surgeon Robert Fergusson, died of disease; 1 sergeant and 48 rank and file, 1857-58."

Royal Malta Fencibles. Instructions have been received for converting the Royal Malta Fencible Regiment into an Artillery Corps, to be designated the "Royal Malta Artillery Corps." An increase of pay has been sanctioned by the War Office. The officers will receive the same pay as officers of the Line, and 2½*d.* per diem will be added to the non-commissioned officers and men. The regiment is also to be increased by two companies—that is, from 600 to 800 strong.

Good Conduct Regulations.—The following Circular has been issued:—"War-office, Sept. 10, 1860. To remove any doubt as to the extent of the benefit intended to be conferred on the well-conducted soldier by the provisions of the Royal Warrant of 1st March, 1860, the annexed copy of the revised good conduct regulations, embracing the aforesaid provisions, is circulated for the information and guidance of officers charged with the administration of these regulations. The Secretary of State for War considers it necessary to point out that, as the good conduct regulations as now revised are equally applicable to every branch of the service, no deviation therefrom can on any account be permitted, and, in calling attention to their provisions generally, he directs especial attention to the rules laid down in the 10th and 11th paragraphs, page 5, relating to forfeiture and restoration of good conduct badges, and the pay attached thereto.—B. Hawes." The more important of the regulations referred to are to the following effect:—Non-commissioned officers, recommended for a commission without purchase, will be allowed in aid of their outfit 150*l.*, if appointed to the Horse Artillery or Cavalry; 130*l.*, if appointed to the Military Train or Cape Corps; and 100*l.*, if appointed to other corps. Sums, not exceeding 4400*l.*, are distributed in annuities as rewards for meritorious service, to sergeants, and the recipients are entitled to a silver medal, bearing on one side the

Digitized by Google

words "Meritorious service." A reward of additional pay and distinguishing marks for good conduct is granted, under the following rules, to every corporal, trumpeter, drummer, fifer, bugler, piper, and private soldier (excepting the corporals of the Life Guards and Horse Guards), enlisted or re-enlisted into the Cavalry or Infantry on or after the 1st September, 1836, and into the Artillery or Engineers on or after the 1st November, 1836, always providing he shall have been uniformly well-conducted for two years preceding each claim. Having served 3 years, provided his name shall not have been entered into the regimental defaulters' book for at least two years immediately preceding his claim, 1*d.* a-day; 8 years, and having been in the receipt of 1*d.* a-day, 2*d.*; 13 years, and having been in the receipt of 2*d.* a-day, 3*d.*; 18 years, and having been in the receipt of 3*d.* a-day, 4*d.*; 23 years, and having been in the receipt of 4*d.* a-day, 5*d.*; 28 years, and having been in the receipt of 5*d.* a-day, 6*d.*; There are various conditions accompanying the granting of the privileges and benefits embraced by the Warrant, the most important being that which very properly debars all but the steady soldier from any chance of participation in the advantages especially prepared as rewards for "good conduct" only. It is as follows:—"As this reward is strictly an honourable distinction, to be conferred only upon the well-conducted soldier, the commanding officers of regiments are strictly enjoined to enter in the regimental defaulters' book the name of every soldier who shall be convicted by court-martial, or who, in consequence of misconduct, shall be subjected to forfeiture of pay, either with or without imprisonment, or any other punishment beyond seven days' confinement to barracks; and the commission of every offence which shall impose upon the commanding officer the necessity of recording the soldier's name in the regimental defaulters' book shall render the man ineligible for this reward for two years from the date of such entry, should no imprisonment be inflicted, and in case of imprisonment from the date of release; and, if he be already in possession of this distinction, shall deprive him of his distinguishing mark and good conduct pay for one year; and a second recorded offence within twelve months shall render two years of uninterrupted good conduct necessary to obtain a restoration of such reward."

The following Circular Memoranda, signed by Sir James Yorke Scarlett, Adjutant-General, have been issued from the Horse Guards:—"Commanding officers of regiments serving abroad, are desired to make known to the men under their command, and commanding officers of depôts will also understand, that non-commissioned officers coming home for discharge, either at their own request as an indulgence, or on claiming it on completing their limited term of service, if allowed to alter their mind and to continue in the Service, can only do so as privates, unless vacancies for non-commissioned officers exist at the depôt; the vacancies with the Service companies being filled up at head-quarters on the departure of those sent home for discharge.—The General Commanding-in-Chief, in concurrence with the Secretary of State for War, desires that schoolmasters be allowed to take out of the military libraries, without payment of fees, such works of reference as they may require to assist them in preparing lectures for delivery to the troops; the schoolmasters being held strictly responsible for the safe return of the same."

The Government has given directions for a new and commodious messhouse to be erected at Fort Pitt, Chatham, the present messrooms having been found inadequate for the accommodation of the increased number of medical officers attached to that establishment since the formation of the new army hospital school at Fort Pitt. A number of Royal Engineers commenced marking out the ground and clearing away the trees on the site selected yesterday, and the building is to be at once proceeded with.

On Friday (yesterday) there was a grand display of all the available troops of the garrison on Southsea Common, Portsmouth. An attack was made upon Southsea Castle, which was of course well defended, after which the retreat was sounded, and the men slowly retired under the protection of the guns from the ramparts surrounding the town. The 5th Hants Rifle Volunteers was brigaded with the troops, and the whole of the manœuvres were executed under the command of Major-General Lord William Paulet, C.B., the Governor of Portsmouth.

Soldiers' Home, Gibraltar.—Few persons have any just idea of the trying nature of the soldier's position at Gibraltar; but we may mention that without a pass no soldier can ascend the Rock, or pass beyond the barrier at the extremity of the inundation at the North Front. The present Governor, Sir W. Codrington, has endeavoured to render the confinement less irksome, by permitting the men, under certain wholesome restrictions, to row about the bay, and this is almost the sole opportunity afforded them of passing their leisure moments free from temptation. Those men, therefore, who have neither money nor inclination for this amusement, must spend their time either in barracks, or else in the abominable wine-shops and other villanous resorts in the town. The actual good already done by the Home, is immense. Some surprise has been expressed at the absence from the Report, which has been issued by the praiseworthy originators of the Soldiers' Home of any signs of approval on the part of the superior military authorities; but it must be remembered that the institution is at present a private affair, the sole property of the philanthropic founder. The Governor highly approves of the Home, and assists it in every way, and military and civil authorities take equal interest in its welfare. The committee was formed of individuals, in most cases the personal friends of the founder, and they all are anxious to assist in elevating the soldier's social position. Although up to the present time the institution has been private property, it is the wish of the founder to secure it permanently, if possible, to the garrison, and to a certain and limited extent for the Navy also; and it is hoped that this may eventually be effected by public aid.

Chatham.—Dr. Langenbeck, Professor of Military Surgery in the Prussian Army Medical School at Berlin called the Pepiniere, and of general surgery in the university of that tity, visited Chatham and dined with the officers of the Medical Staff at Fort Pitt on Monday last. The medical officers of the Royal Navy doing duty at the station were invited to meet him at dinner. Professor Langenbeck, who was Surgeon-in-Chief of the German Army during the war in Schleswig-Holstein, is at present regarded as one of the first, if not the first surgical authority and operator in Germany.

The New Army Medical School at Fort Pitt.—The building which has been some time in progress at Fort Pitt, Chatham, for the new Army Medical School about to be formed at that establishment, is now completed, and will be immediately opened, the professors together with a number of the students having already arrived. Thirty-five additional candidates are expected to arrive at the hospital on Monday next, and these, together with the students now at Fort Pitt, will attend the lectures to be delivered by the professors, in order to qualify themselves for commissions as army surgeons, after competitive examinations. The formation of this medical school is looked forward to with much interest.

SHORNCLIFF CAMP.

On Wednesday last His Royal Highness the General Commanding in Chief paid a visit to Shorncliff. His Royal Highness, who arrived at Folkestone station by the 10·40 a.m. train, attended by Major-General Sir Richard Airey, K.C.B., Quarter-Master-General; Major-General W. F. Forster, K.H., Deputy-Adjutant-General, and Brevet-Lieut.-Colonel T. H. Clifton, A.D.C., was received at the station by Colonel Taylor, Major Gamble, and Major Forster, staff from Shorncliff, who escorted His Royal Highness to the camp. On arriving at the ascent of the Military Road a saluting battery of Armstrong guns stationed at the south-eastern plateau overlooking Sandgate, fired a royal salute of 21 guns, and then limbering-up, galloped across the ground to their station on the right of the line of troops which was already formed, stretching from the C range of huts to near the main-guard house. The troops under arms consisted of a squadron of the 5th (Princess Charlotte of Wales's) Dragoon guards, under the command of Captain Garrard; 4 batteries of the 4th brigade of Royal Artillery, under the command of Lieut.-Colonel Hon. G. T. Devereux; the 34th company of Royal Engineers, under the command of Captain Gordon; the 1st battalion 16th (Bedfordshire) Regiment, Lieut.-Colonel G. J. Peacocke; the Headquarters and 4 companies 2d battalion 18th (Royal Irish), Lieut.-Colonel Carey; the 17th (Leicestershire) Regiment, under the command of Colonel G. W. Francklyn—who also commanded the brigade in the absence of Brigadier Williams, through illness—and on the extreme left the 4th battalion Military Train, under the command of Lieut.-Colonel B. O'Brien. As soon as His Royal Highness arrived at the saluting point a royal salute was given, the bands playing the national anthem; the duke and his numerous staff then rode slowly down the line, and minutely inspected the whole of the regiments. The troops then broke up into open columns of companies right in front, and marched past quick, the 5th Dragoons leading; the Dragoons next filed past by threes, the Artillery and Military Train trotted past, and the infantry marched past in columns of battalions, quarter-distance. The 5th then galloped past in open columns of threes, cutting the sword exercise, which was admirably done. At the conclusion of this the manœuvres of a field-day commenced, His Royal Highness giving directions for all the movements, which were done without any previous preparation, thus making them more interesting. The object of the movements was repelling an attack on the camp up the gorge, leading from Sandgate; for this purpose the 18th were thrown out as skirmishers with supports, and descended the hill, spreading out on the right so as to command the approach by the Military Road, the 16th and 17th being kept as a reserve. The Artillery were placed on the brow of the acclivity, so as to enfilade the approach. The battery on the right then commenced to cannonade the approaching enemy, and then retired; the firing was continued by the battery on the left, near the permanent barracks, after which they retired, and the battery placed in the centre, took up the firing; the guns then retired, upon which the 16th advanced in line, and commenced file-firing from the right of companies; they then retired by fours right in front, and the 17th, who were in line on their left rear, opened file-firing from the right of companies, the Dragoons making repeated charges between the intervals; the troops, the 16th and 17th, then formed in line, with their left resting on the mainguard house, the right extending towards the C range under cover of the 18th skirmishing, the Artillery being formed upon each flank, and the Dragoons on their left rear. The line then fired a volley by subdivisions of battalions, the Artillery also pounding away on each flank, after which the Dragoons advanced through the interval between the left of the line and the Artillery, and wheeling to the right made a splendid charge along the whole front, cutting the sword exercise, and returned by the right rear. The battalions were then formed up in contiguous columns, and the commanding officers being called to the front, His Royal Highness addressed them, but the public were too distant to catch what was said. The troops were then marched to their quarters. The number of troops under arms was 2547 men, and about 160 officers, with 413 horses. His Royal Highness then retired to General Mansel's to luncheon, and afterwards inspected the General Hospital and the huts in B range, at present in use as a hospital. He afterwards proceeded to Hythe to inspect the School of Musketry, and returning from thence, went to Dover by the 7 p.m. train, for the purpose of reviewing the troops there on Thursday.

[We have inserted these accounts from our correspondents at length, in order to show the activity of the authorities along the south-eastern coast, where General Mansel is indefatigable in his exertions. The Duke of Cambridge in these inspections really put the officers and men to thorough practical tests, and it was admitted on all hands that the manœuvres which were commanded, and in some instances led in person by His Royal Highness, were exceedingly beautiful and accurate, and showed that the General Commanding-in-Chief not only handles troops in a very able manner, but that he can combine the movements of the various arms of the Service with great skill and judgment. He developed the artillery fire most admirably, and very old officers—very good judges—declared that there could not be a more complete little field-day and a better conducted operation than the defence of the Shorncliff Camp, and the manœuvres incidental to it under the duke's command.—Ed.]

An inquest was held at the Camp by Mr. Delasaux, on Monday last, on the body of Peter Ward, a private soldier of the 18th Regiment, whose body was found floating in the canal on the previous day. The deceased had been missing from Sunday week, and it was supposed he had deserted. An open verdict of "Death by drowning," was returned.

DOVER GARRISON.

On Monday last Major-General Mansel, Commanding the South-Eastern District, arrived here by the morning train, accompanied by Colonel Taylor, Assistant-Adjutant-General; Major Gamble, Assistant-Quartermaster-General; Major Forster, A.D.C., and Captain Carleton, Major of Brigade; and was met at the station by Major-General Craufurd, Colonel Stotherd, R.E., Colonel Cuppage, R.A., Colonel Inglefield, R.A., Major Field, R.A., who escorted the General to the new exercise-ground on the Deal Road, where the 2nd brigade of Royal Artillery, a company of the Royal Engineers, the 47th Regiment, under the command of Colonel Kelly, C.B., and the 1st battalion of the 60th Rifles, under the command of Sir John Jones, K.C.B., were drawn up in line. After marching past, the evolutions of a field-day commenced under the direction of the General. The rain, however, a great foe to military spectacles, now began to come down very smartly, preventing the manœuvres of an intended attack upon the Castle, the guns of which had in the meanwhile been manned by the Royal Artillery. The order was given for the troops to return to their quarters; as the men marched down the steep incline of the castle hill, the guns from that fortress (an 8-inch gun was fired from the top of the Keep as a signal), and the numerous outlying works surrounding it, commenced their fire, and presently from the top of the Keep came forth the flash and roar of guns, surprising even the "oldest inhabitant," who, we opine, had never before beheld the sight; from the East Demi-bastion—where the cannonade commenced—the East Battery, Bell Battery, Spur Battery, and from the four guns from the top of the Keep, a rapid fire was kept up during the whole time of the march of the 47th and 60th Rifles along the Deal Road. The gallant general, with his staff, then entered the Castle under a salute of thirteen guns from the saluting battery. Practice was afterwards carried on at a target placed in the sea, about 1800 yards from the right hand gun, in the East Battery, and from a gun on the Keep; two rounds were also fired from a 13-inch mortar to test the new platforms lately erected for these heavy guns at a range of nearly 3000 yards. The practice was very indifferent, and the mortar experiment was not very felicitous. Notwithstanding the state of the weather, General Mansel made most minute and protracted investigation into the state of every inch of the works in progress and completed. The 47th Regiment is considered a "show corps," and looks as well as in its best and most famous days before the Alma.

On Thursday His Royal Highness the Duke of Cambridge inspected the western fortifications and reviewed the troops quartered at Dover. His Royal Highness arrived from the inspection at Shorncliff on Wednesday evening by the train of the South Eastern Railway due at Dover at 7·10 p.m., accompanied by Major-General Sir R. Airey, K.C.B., the Quarter-Master-General of the forces; Colonel Foster, R.E., Colonel Clifton, and Dr. Gibson. A royal salute was fired from the Castle in honour of the arrival of the Commander-in-Chief, who was received at the railway station by Colonel Cuppage, R.A., Colonel Stotherd, R.E., and other officers of the garrison. His Royal Highness passed the night at Birmingham's Royal Ship Hotel, where he was joined on Thursday morning by General Mansel, commandant of the district, attended by his aide-de-camp, Major Forster; General Craufurd, commandant of the garrison; Colonel Stotherd, R.E.; Colonel Cuppage; Colonel Inglefield, R.A.; Major Field, R.A.; Major Simpson, R.A.; Brigade Major Jones. The Duke proceeded to view the progress made in the extensive fortifications at the Western Heights. Having carefully examined those important works, His Royal Highness went on to the Castle to review the troops stationed in the garrison, consisting of Royal Artillery, Royal Engineers, the 47th Foot and 60th Rifles, four companies of H.M.'s 18th, in addition to the depôts from Walmer, the 23rd Welsh Fusiliers, the 12th, the 7th, the 2nd Foot, &c. &c. A variety of manœuvres were executed, 20 rounds of blank cartridge per man being allowed. The heavy ordnance then opened fire from the Castle, and an attack on the Castle was directed by the infantry from the north-west side—its assailable quarter. The whole of the evolutions were witnessed with great interest by a large number of spectators. His Royal Highness (who was, it is believed, satisfied with the result of his inspection) and staff, left Dover by express train at a quarter to four under a salute of 21 guns.

The regiment of Antrim Militia Artillery assembled on parade at seven o'clock on Thursday morning, and after inspection by the commanding officer marched to the Royal Arsenal Station of the North-Kent Railway, accompanied by the band of the corps, and proceeded thence to London, *en route* to Pembroke, where the regiment is to be stationed.

The Army Gazette.

WAR OFFICE, PALL MALL, September 25.

88th Regiment of Foot—Major-General Sir George Buller, K.C.B., to be Colonel, vice Lieutenant-General Horatio George Broke, deceased.

Corps of Royal Engineers—For Major-General Sir Harry David Jones, K.C.B., to be Colonel-Commandant, vice Nicolls, deceased, as stated in the *Gazette* of the 4th September, read Lieutenant-General Sir Harry David Jones, K.C.B., &c.

4th Regiment of Light Dragoons—Robert Soames, Gent., to be Cornet, by purchase, vice Gist, promoted.

6th Dragoons—Assistant-Surgeon Valentine Mumbee M'Master, from the 78th Foot, to be Assistant-Surgeon, vice Burton, appointed to the Staff.

7th Light Dragoons—The appointment of Mr. Richard Archibald Farquharson to a Cornetcy, by purchase, which appeared in the *Gazette* of the 21st inst., has been cancelled.

18th Light Dragoons—Cornet Edmund Bernard Liebert to be Lieutenant, without purchase, vice Dane, deceased; Cornet Charles Arthur Tisdall to be Lieutenant, by purchase, vice Liebert, whose promotion, by purchase, has been cancelled.

Royal Artillery—James Graham, Gent., late Quartermaster Forfar

Digitized by Google

and Kincardine Artillery Militia, to be Paymaster, vice Robins, resigned.

Royal Engineers—Captain Charles Pasley, from the Seconded List, to be Captain, vice Brevet-Major Francis Du Cane, resigned.

The following to be substituted for the appointment of Second Captain C. A. Rice, which was notified in the *Gazette* of the 2d of March, 1860:—

Second Captain Charles Augustus Rice, from temporary half-pay, to be Supernumerary Second Captain; Second Captain Charles Augustus Rice, from the Supernumerary List, to be Second Captain, vice Warren, promoted.

Military Train—Captain Thomas Sutton Kirkpatrick, from the 28th Foot, to be Captain, vice John Blake, who exchanges; Ensign John Matthew Benthall to be Lieutenant, by purchase, vice James, who retires.

Grenadier Guards—Major and Brevet-Colonel the Hon. James Lindsay to be Lieutenant-Colonel, without purchase, vice Brevet-Colonel F. W. Hamilton, C.B., promoted, to be Major-General; Captain and Lieutenant-Colonel Edward G. Wynyard, to be Major, without purchase, with the rank of Colonel in the Army, vice Brevet-Colonel the Hon. James Lindsay; Lieutenant and Captain Claud Alexander to be Captain and Lieutenant-Colonel, without purchase, vice Wynyard; Ensign and Lieutenant Edward Smith Bridges to be Lieutenant and Captain, without purchase, vice Alexander.

5th Regiment of Foot—The appointment of Lieutenant Netterville J. Barron as Adjutant, vice Sutton, resigned, to be antedated to the 16th of December, 1858.

9th Foot—Lieutenant William Harris Burland to be Captain, by purchase, vice Marston, who retires; Ensign Richard Fenton to be Lieutenant, without purchase, vice Tayler, deceased; Ensign Arthur Henry Josselyn to be Lieutenant, by purchase, vice Burland; James Edward MacDonnell, Gent., to be Ensign, without purchase, vice Fenton.

19th Foot—Ensign John Campbell Taylor Humfrey to be Lieutenant, without purchase, vice Thomas Thompson, deceased; William Robert Thornhill, Gent., to be Ensign, without purchase, vice Humfrey.

25th Foot—Assistant-Surgeon William Tydd Harding, from the Staff, to be Assistant-Surgeon, vice Sylvester, whose transfer from the Staff in the *Gazette* of the 18th of September, 1860, has been cancelled.

28th Foot—Captain John Blake, from the Military Train, to be Captain, vice Kirkpatrick, who exchanges.

32d Foot—Lieutenant-Colonel and Brevet-Colonel Robert Sanders, C.B., from half-pay 19th Foot, to be Lieutenant-Colonel, vice James Dodington Carmichael, C.B., who exchanges; Major Granville George Chetwynd Stapylton to be Lieutenant-Colonel, by purchase, vice Lieutenant-Colonel and Brevet-Colonel Sanders, C.B., who retires; Captain John Birtwhistle to be Major, by purchase, vice Stapylton; Lieutenant Charles Edward Lane Bluett to be Captain, by purchase, vice Birtwhistle; Ensign Charles E. Le M. Cherry to be Lieutenant, by purchase, vice Bluett.

43d Foot—Lieutenant Samuel Tomyns Sargent to be Captain, without purchase, vice Captain and Brevet-Major Disbrowe, deceased; Charles William Pole Warner, Gent., to be Ensign, without purchase, in succession to Lieutenant Sargent, promoted.

44th Foot—George Bain, Gent., to be Ensign, by purchase, vice Maguire, promoted.

45th Foot—Staff Assistant-Surgeon William Cherry to be Assistant-Surgeon, vice Bartley, promoted on the Staff.

48th Foot—James Talbot, Gent., to be Ensign, by purchase, vice Keyworth, promoted.

64th Foot—Lieutenant F. Du Blois Lukis to be Captain, by purchase, vice Hinchliff, promoted to an Unattached Majority, by purchase; Ensign Charles Hamilton Sams to be Lieutenant, by purchase, vice Lukis.

71st Foot—Quartermaster James Twigg, from half-pay of the 1st Light Infantry, British Swiss Legion, to be Quartermaster, vice Anderson, appointed Paymaster.

94th Foot—Ensign John Mackinlay to be Lieutenant, by purchase, vice Brinckman, who retires; Ensign John Joseph Blake to be Lieutenant, by purchase, vice Rolls, promoted; Quartermaster William M'Call, from the Military Train, to be Ensign without purchase, vice Heycock, appointed to the 75th Foot; Henry Jones, Gent., to be Ensign, by purchase, vice Mackinlay; Francis John Hassard, Gent., to be Ensign, by purchase, vice M'Call, who retires.

3d West India Regiment—James Frederick Cousins, Gent., to be Ensign, without purchase, vice Stewart, promoted in the Gold Coast Artillery Corps.

Ceylon Rifle Regiment—Ensign Guy William Frederick L'Estrange has been permitted to retire from the service by the sale of his commission.

Gold Coast Artillery Corps—Ensign Robert John Stewart, from the 3d West India Regiment, to be Lieutenant, without purchase, vice Williams, promoted to an Unattached Company, without purchase; Thomas Davies, Gent., to be Ensign, without purchase, vice Marshall, whose appointment has been cancelled.

UNATTACHED.

Captain Chamberlain Henry Hinchliff, from the 64th Foot, to be Major by purchase.

MEDICAL DEPARTMENT.

Assistant-Surgeon Alexander Fisher Bartley, from the 45th Foot, to be Staff Surgeon, vice Kelaart, deceased.

Assistant-Surgeon Robert Graves Burton, M.D., from the 6th Dragoons, to be Staff Assistant-Surgeon, vice Hoile, placed upon half-pay.

Assistant-Surgeon William Ashton, M.B., from the 53d Foot, to be Staff Assistant-Surgeon, vice Cherry, appointed to the 45th Foot.

VETERINARY DEPARTMENT.

Thomas Channon, Gent., to be Acting Veterinary-Surgeon.

STAFF.

Frank Potter, Gent., to be Paymaster for General Service.

BREVET.

Captain Herbert George Deedes, 60th Foot, to be Major in the Army.

Captain Henry Wray, of the Royal Engineers, to have the local rank of Major in Central America.

The undermentioned promotions to take place consequent on the death of Major-General Sir Michael Creagh, Colonel 73d Foot, on the 14th of September, 1860:—

Brevet Colonel Charles Hastings Doyle, from Lieutenant-Colonel half-pay unattached, to be Major-General.

Lieutenant-Colonel Thomas Pattle, 1st Dragoon Guards, to be Colonel.

Major John Henderson, 16th Foot, to be Lieutenant-Colonel.

Captain John Lindredge Elgee, Royal Artillery, to be Major.

Memoranda—Major William Forbes has been permitted to retire from the service by the sale of an Unattached Majority, he being about to become a settler in Nova Scotia.

The Hon. Artillery Company of London—Sergeant Richard Dawes to be Lieutenant; Sergeant William Jacobs to be Ensign.

MILITARY STAFF CLERKS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I beg to call attention to the very extraordinary disparities which at present exist between the ranks of staff clerks appointed under the provisions of War Office Cir. 321, which are as follows:—1st class clerk—rank of sergeant-major; 2nd class clerk—rank of sergeant; 3rd class clerk—rank of sergeant.*

Now, sir, would it not have been fair to have given the 2nd class clerk a higher rank than the 3rd class clerk—say the intermediate rank of quartermaster-sergeant? whereas under existing regulations he is actually inferior in rank to any other clerk (except the 3rd class clerk) in the Service, an orderly room clerk having after a certain period the rank of company sergeant, or troop sergeant-major.

The additional rank would not cause any additional pay to be granted to the 2nd class clerk; and as the change required only regards his position, perhaps the authorities may soon revise the Circular in question.—I am, &c.

A SECOND-CLASS STAFF CLERK.

* The clerks of the Commissariat Staff Corps are in 3 classes, but the 2nd class has the rank of quartermaster-sergeant, and the 3rd class clerk has the rank of 2nd class staff sergeant. Thus a 3rd class clerk of the Commissariat Staff is actually higher in rank than a 2nd class Military Staff Clerk.

THE NAVY.

ADMIRALTY, SEPTEMBER 24.

PROMOTIONS.

Assistant-Paymaster C. A. Shapcote, promoted to the rank of paymaster.

Acting Second-Class Assistant-Engineer H. F. Saunders, promoted to the Cordelia.

APPOINTMENTS.

Captains—The Hon. C. G. J. B. Elliot, C.B., to the St. Jean d'Acre, vice Captain T. P. Thompson, invalided; and Thomas Harvey to the Cressy, vice Elliot.

Commanders—J. M. Reeve to the Cæsar; Commander W. Swinburn to be Inspecting Commander of Coastguard, vice W. H. Jones, superseded at his own request.

Lieutenants—C. W. S. Blount to the Ariel; John Burgess to the Eagle; G. Y. R. Rattray to the Marlborough, for disposal; William B. Pauli to the Impregnable; Richard S. Bateman to the Cumberland.

Master—E. J. Kemp to the Brisk.

Chaplain and Naval Instructor—The Rev. W. C. P. Baylee, M.A., to the Victory.

Surgeon-Superintendent—Dr. Alexander Watson to the Palmerston, convict-ship.

Paymasters—S. H. L. Giles to the Hogue; A. Robinson to the Wellington; G. P. Rickards to the Victory; T. C. J. Dryden and W. H. Reeves to the Donegal.

Assistant-Surgeon—John J. Dodbyn (acting) to the Landrail.

Second Master—John Riches to the Landrail.

Midshipman—H. Freeling to the Hannibal.

Master's-Assistant—Charles Brent to the Sanspareil.

Assistant Paymaster—J. S. Daniell (in charge) to the Firefly.

Assistant Clerk—Edmund H. Key to the Formidable, for Admiral's office at Sheerness.

First-Class Assistant-Engineers—W. Donneson to the Cumberland, as supernumerary; J. Langrish to the Fox-hound; and H. Payne to the Mersey.

Second-Class Assistant-Engineers—G. Thompson to the Cornwallis, for service in the Ruby; J. Hansford to the Colossus, for service in the Biter.

Third-Class Assistant-Engineers—F. Grundy to the Megæra, as part complement; A. Wilkins (acting) to the Megæra as supernumerary; William Allan to the Cumberland, for service in the Fisgard.

Agamemnon, 91, screw liner, Captain Thomas Hope, formed part of the squadron under Rear-Admiral Mundy at Naples by the last accounts.

Alert, 17, screw steam-sloop, Commander W. A. R. Pearse. This sloop was at Vancouver's Island when the last mail was dispatched to England, and it would appear by letters received from her that another court-martial has taken place on one of her officers, which has resulted in the dismissal from the Service of Mr. C. H. Carpenter, mate (1855). The charge brought against this officer was insubordination and general misconduct. It is now to be hoped that the Alert will be a peaceable well-disciplined ship, as her previous state was anything but satisfactory and creditable to the Service.

Ardent, 3, paddle steam-sloop, Commander John E. Parish, was at Pernambuco on the 16th of July, having been dispatched to that port from Rio de Janeiro by Rear-Admiral Sir Stephen Lushington, with Captain Wainwright, his flag-captain, who was authorised to institute inquiries into circumstances connected with that fatal passenger ship the Accrington, as also with the loss of the British ship John and Lucy.

Argus, 6, paddle-wheel steam-sloop, Commander Herbert F. W. Ingram, was at Marsala on the 1st inst. On Wednesday, the 29th of August, the officers gave an entertainment to the English residents of that place, which consisted of private theatricals very ably performed by some of the crew; the pieces played were "My Wife's Daughter," "The Secret," and the amusing farce of "The Village Lawyer," interluded by comic singing and some astonishing feats of tumbling performed by two sailors, complete acrobats. The company afterwards sat down to an excellent supper laid out under a tasteful canopy of flags, and illuminated by some pretty, and at the same time warlike-looking chandeliers on the quarter-deck. Supper was followed by a few quadrilles, after which the guests departed, highly delighted with their evening's amusement.

Bacchante, 51, screw frigate, Captain Mackenzie, flag-ship of Rear-Admiral Sir Thomas Maitland, C.B., commander-in-chief on the Pacific Station, arrived at Rio de Janeiro on the 9th of August, and sailed again on the 16th for her station.

Black Prince, 36, iron-clad screw steamship building at Glasgow. An immense forging, drawn on two huge trucks by a team of about 40 horses, passed through the streets of Glasgow on Tuesday, on its way from Parkhead Forge to the ship-yard of the Messrs. Napier and Son, at Govan. The fabric was the stern-post and part of the keel intended for the steam-ram Black Prince, now in course of construction at the building-yard of Messrs. Robert Napier and Son. The stern-post, which springs to a height of about 40 feet, was forged apart from the keel-piece, and the two welded together in a novel and powerful manner, by improved mechanical appliances, in the Parkhead Forge of Mr. Rigby. As the whole forging contained upwards of 30 tons of metal, its removal from the forge to the ship-yard was necessarily attended with much labour and anxiety. Upwards of five tons were added to its weight by the wood and iron fixings and lashings requisite to secure its safety, and not fewer than 200 engineers and carters attended the marine prodigy in its passage. They were ably officered by Mr. Rigby, assisted by Mr. John D. Napier, and Mr. Ryder, from Messrs. John Penn and Son, engineers, London. We expressed a hope a short time since in this journal that the Black Prince was in a more forward state than the Warrior, but from all we hear it is to be feared that both ships are equally backward in their construction. The time originally fixed for the launch of these ships was May last. An extension of time was then granted, and a confident expectation was held out that the end of this year would see the ships afloat. There is now not the slightest chance of this being realised; and we shall be fortunate, we are told, if they are ready for trial by the fall of 1861. This is most unsatisfactory.

Brisk, 16, screw corvette, Captain Algernon F. de Horsey, had, according to the last accounts from the Cape of Good Hope, gone on a cruise to Zanzibar, with Rear-Admiral Sir Henry Keppel on board.

Brunswick, 80, screw liner at Devonport, went out of harbour for the trial of her machinery on Monday. On her return she was placed in the first-class steam reserve.

Buzzard, 6, paddle steam-sloop, sailed from Rio de Janeiro on the 23rd of August for Monte-Video. Commander Francis Peel has been invalided from this vessel, and Lieutenant John Trevenen (1850) has been appointed Acting-Commander. Lieutenant Trevenen has been serving as First Lieutenant of the Curaçoa since December, 1857. A court-martial was held on board the Madagascar on the 15th of August, Rear-Admiral Sir Thomas Maitland, president, for the trial of John Martial, quartermaster, and William Brooks, ordinary seaman, both of the Buzzard, for a breach of the second article of war. Martial was sentenced to be disrated, to receive fifty lashes, and to be discharged from Her Majesty's service with disgrace; Brooks to receive fifty lashes, and also to be discharged with disgrace.

Cæsar, 90, screw liner, Captain Thomas H. Mason, sailed from Malta on the 16th inst., for Beyrout, with provisions and stores for the ships stationed on the coast of Syria.

Cuba, schooner, tender to Imaum, was lying in Port Royal harbour on the 8th inst.

Curaçoa, 31, screw steam-frigate, Captain Augustus Phillimore, was at Monte-Video on the 20th of August.

Dee, steam-vessel, Master-Commanding Pullen, left Woolwich on Thursday, with a full cargo of machinery for vessels fitting out at the western yards.

Donegal, 101, screw-liner, Captain Henry Broadhead, has been taken into No. 8 dock at Keyham steam-yard.

Doris, 32, screw steam-frigate, Captain Edmund Heathcote, will, it is reported, be stationed on the coast of Syria during the winter months.

Espoir, 5, screw steam-sloop, Commander S. Douglas, having had her defects made good, was towed on Wednesday, by the Confiance, from Hamoaze into Plymouth Sound.

Euryalus, 51, screw frigate, Captain J. W. Tarleton, C.B., with His Royal Highness Prince Alfred on board, arrived at the Cape of Good Hope, on the 24th of July. The Euryalus was to leave for England in the early part of this month, and may be looked for about the 10th to the 15th of October.

Fire Queen, paddle steam-yacht, Master-Commander F. W. Paul, with the flag of the Commander-in-Chief, Vice-Admiral Henry William Bruce, went out of Portsmouth harbour on Wednesday afternoon.

Forte, 51, screw steam-frigate, Captain Edward W. Turnour, was lying in Simon's Bay on the 21st of August.

Foxhound, 4, screw steam-sloop, Commander Alfred Mitchell, fitting out at Sheerness, is nearly ready for sea. She is ordered to the Mediterranean.

Gorgon, 6, paddle steam-sloop, Commander Pim, is completing in her rigging department at Portsmouth, and otherwise preparing again for foreign service.

Hannibal, 91, screw liner, Captain Arthur Farquhar, flag-ship of Rear-Admiral George Rodney Mundy, C.B., was at Naples by the last advices. It is reported at Malta that the Commander-in-Chief would shortly relieve Rear-Admiral Mundy at Naples, and that the latter officer would proceed to the coast of Syria. On the 10th inst. Garibaldi visited this ship accompanied by a very numerous and picturesque staff of officers. The admiral received his distinguished visitor at the entrance port of the ship with every mark of respect, the band playing, and the marines under arms under the command of Captain Pickard, but no salute was fired either on the General's arrival or departure.

Harrier, 17, screw, in No. 2 dock, Portsmouth, having undergone extensive repairs, is now nearly out of the hands of the artificers and ready to leave the dock.

Hecate, 6, paddle steam-sloop, Commander Hoskins, arrived at Rio de Janeiro on the 14th of August, and sailed for Vancouver's Island on the 20th to relieve the Plumper, Captain Richards, Commander Hoskins exchanging vessels with the latter officer.

Hibernia, 104, sailing three-decker, Commander the Hon. Augustus C. Hobart, was in Malta harbour on the 22nd inst. On the 21st, being the anniversary of the birth of the Grand Duke Constantine of Russia, she fired a royal salute and hoisted the Imperial Russian standard at the mizen. This compliment was paid to the Russian nation in consequence of the presence in the harbour of the Imperial screw frigate Gromoboy.

Himalaya, 6, iron screw steam-ship, Captain John Seccombe, was at Malta on the 22nd inst., waiting further orders.

Imaum, 10, receiving-ship, Captain Samuel Morrish, bearing the broad pendant of Commodore Hugh Dunlop, was in Port Royal Harbour on the 8th inst.

Intrepid, 5, screw steam-sloop, Commander Joseph H. Marryat, was at Naples by the last accounts.

Landrail, screw steam-vessel, Commander T. H. Martin, recently launched at Deptford, and completed at Woolwich Yard, having received the whole of her crew and stores, left on Thursday for Greenhithe to adjust compasses, before proceeding to her destination on the West Coast of Africa.

Lapwing, 4, screw steam-sloop, Commander F. M. O'Reilly, was at Latakia by last advices.

Liffey, 51, screw steam-frigate, Captain George W. Preedy, C.B., will, it is stated, winter on the coast of Syria.

Liverpool, 51, screw frigate, is ordered to be launched from Devonport dockyard on the 30th of October.

London, 90, screw liner, Captain Henry Chads, was at Naples by the latest accounts.

Lynx, screw tank-vessel, proceeded out of Portsmouth harbour on Tuesday evening for trial after repairs.

Marlborough, 131, screw three-decker, Captain Wm. H. Stewart, C.B., flag-ship of Vice-Admiral W. F. Martin, was, according to our latest correspondence from Malta, daily expected there from Beyrout, and it was reported she would proceed to Naples for the winter after a short stay at the island.

Mars, 80, screw liner, Captain James N. Strange, is still fitting at Devonport for foreign service. It is stated that a number of her crew are absent without leave.

Megæra, 6, iron screw troop-ship, Commander Henderson, has completed coaling from the Malabar, and has hauled alongside the dockyard at Portsmouth for further service.

Digitized by Google

Newcastle, 51, screw frigate. Arrangements are now being made at Deptford dockyard for the launch of this fine frigate, which is ordered to take place at the first spring tides in October; and the 15th of that month is mentioned as the day.

Oberon, 3, iron paddle steam-vessel, Lieut. and Commander F. G. C. Paget, was at Buenos Ayres on the 9th of August.

Orion, 91, screw liner, Captain Frere, after anchoring for a few days in Malta Harbour, left again on a cruise on the 19th inst.

Orlando, 50, screw, having had her engines altered, made a trial of her machinery at Devonport, on Tuesday, after which she was placed in the first-class steam-reserve.

Osborne, 2, paddle steam-yacht, Master-Commander George K. Bower, arrived at Portsmouth on Wednesday afternoon from Antwerp and Dover, having called at the latter port to land some of the Royal household.

Pantaloon, 11, screw steam-sloop, was launched at Devonport on Wednesday afternoon.

Philomel, 8, sailing brig, has been placed alongside the dockyard at Devonport to be fitted for the preventive service at Sheerness.

Princess Royal, 91, screw, was removed from the steam-basin at Portsmouth yesterday.

Quail, 1, screw gunboat, Lieut.-Commander Noel Osborn, was in Gibraltar Bay on the 18th inst.

Queen Charlotte, 104, now in No. 8 dock, Portsmouth, undergoing repairs, was the flag-ship of Admiral Lord Exmouth at the battle of Algiers. She was built at Deptford in 1810, after a plan by Sir William Rule, and is 2289 tons burden. She has served altogether about four years in commission, and is a fine specimen of a three-decked ship of what must now be considered a by-gone period; for although only a few years have passed away since the Queen Charlotte bore an admiral's flag in action, yet the improvements in naval architecture and the colossal development of steam-ships have been so great as to make this fine ship appear as though constructed in the middle ages. Her future destiny, however, will not be less useful than the one short passage of her short naval career was glorious. She is intended to take the place of the old Excellent gunnery-ship, formerly the Boyne, 101 guns, built in 1810, and now moored off the north end of the dockyard at Portsmouth. For the special duty to which she will be appropriated, the Queen Charlotte is nearly ready, having been in the hands of the artificers for some mouths past, who have adapted her for a gunnery-ship in a most efficient manner. From a personal inspection of her, we bear willing testimony that nothing has been left undone that will facilitate the novice and the seaman gunner in that branch of their naval education, upon a thorough knowledge of which the fate of all future actions at sea will depend. The internal fittings of the ship are also well arranged, every convenience that can add to the comfort of the officers, men, and boys has been attended to. Indeed in this respect the ship is well worthy of a visit. The ward room—the marine cadets' berth, as well as the "studys" of the lieutenants and the cadets, are tastefully fitted up. Nor have the warrant officers been forgotten, for perhaps their mess-berth is one of the best, as it is certainly the largest in the ship, and is fitted up with that attention to comfort unknown in those days when Lord Exmouth hoisted his flag in the ship. Their cabin is 14 feet by 42 feet, and will "mess" 60 warrant officers. There is also a seamen's schoolroom where those who study gunnery will write their books previous to receiving their warrants. The boys of the ship have also a schoolroom fitted up with desks and forms, and the usual conveniences for study. The men will sleep on the lower deck, and the boys on the middle deck, so that the mess-deck will be perfectly free from all closeness. To the other excellent arrangements to be found in the Queen Charlotte must be added the seamen's washhouse, which is fitted up with every sort of lavatory convenience, including a bath. The "head" is also well sheltered and housed, and the hawse holes are glazed, comforts, which add much to the well-being of the men in the winter. The orlop deck is fitted up with a "street" of cabins, extending fore-and-aft, for the lower grade of officers, and the snug little cribs have mahogany lockers and cupboards. To facilitate the transmission of orders, "speaking-pipes" are fixed up in profusion. Some of them lead both to the fore and aft magazines. The above remarks by no means include all the novelties to be found in the future "Excellent" gunnery-ship, but only those that are most prominent, and we have only to notice in concluding our rapid survey, that the captain and commander's cabins, although very pleasant berths, are, perhaps, the most unpretending in this well-found ship. The Queen Charlotte, although an historical ship, is not honoured with a place in the official Navy List. We presume the compilers of the book have neglected to notice her while in a state of transition.

Racoon, 21, screw corvette, Captain W. C. Chamberlain, left Smyrna on the 12th inst. for Rhodes, Kos, Samos, and Khios. She was under further orders for Syria.

Renown, 91, screw liner, Captain Arthur Forbes, was at Naples by the last advices.

Sanspareil, 70, screw liner, Captain Arthur P. E. Wilmot, C.B., having been provisioned, and having taken on board supernumeraries and stores for screw steam coast guardship, Hawke, left Plymouth Sound on Monday. She was towed into an offing by the steam-tug Thais, and then made sail for Queenstown.

Scourge, 6, paddle steam-sloop, Commander William G. Jones, was in Gibraltar Bay on the 18th inst.

Scylla, 21, screw steam-corvette, Captain Rowley Lambert, arrived at Malta on the 20th inst., from Messina, and the Malta papers state that a marine officer and a private marine belonging to her were to be tried the following day by court-martial. Our private correspondence down to the 22nd makes no allusion to this circumstance.

Sidon, 22, paddlewheel steam-frigate, Captain R. B. Crawford, was, by the latest advices, at the Mauritius.

Spiteful, 6, steam-sloop, Commander Wilson, at Woolwich, has received the whole of her crew and stores, and was removed on Thursday from the basin to the river. She is under orders to leave this day for the slave preventive service on the West Coast of Africa.

Spy, 3, brigantine, Lieut.-Commander John Hanmer, was leaving the harbour of Rio de Janeiro on the 25th of August.

St. George, 91, screw, Captain the Hon. F. Egerton, arrived at Spithead on Wednesday from the eastward. She is reported to have been ashore on the banks of Flushing for some hours while in charge of a pilot.

St. Jean d'Acre, 101, screw liner, Acting Captain John D. McCrea, was off Malta on the 22nd inst. Captain the Hon. Charles G. J. B. Elliot, C.B., has been transferred from the Cressy to the command of this ship.

Supply, steam-vessel, Master-Commander Balliston, having received a full cargo of provisions and other stores at Deptford, for the fleet at Malta and Gibraltar, arrived at Woolwich on Tuesday for the purpose of coaling, which, having completed, she proceeded on her voyage.

Terrible, 21, paddle steam-frigate, Captain F. H. H. Glasse, C.B., was at Smyrna according to last advices, but under orders for Salonica.

Trusty, 14, iron-cased steam floating-battery, in dock at Chatham, has a number of shipwrights employed on her in removing those portions of her hull which are found to be decayed from the ravages of the marine worm. During the progress of the work the timbers have been found to be considerably decayed, but every portion of the bottom found to be infested with insects is carefully removed, and new planks substituted, in order that none of the insects may be left in the wood to continue their destructive ravages. It is admitted by the most ardent admirers of wooden ships that the Trusty was exposed, during the experiments at Shoeburyness, to as severe a "pounding" as could be brought to bear against her, and they must, therefore, be astonished at the comparatively small injury inflicted on her frame. The result of the opening out of the Trusty should give rise to serious reflections as to the chances in the event of an engagement of Wood *versus* Iron.

Wasp, 13, screw steam-sloop, Commander Charles Stirling, was running into Table Bay on the 22nd of August.

DOCKYARD POLICE.—Sir Richard Mayne, chief commissioner of the metropolitan police, and Mr. Mallalieu, superintendent of the R division, are now actively engaged in carrying out the details of the Dockyards Police Act, under the authority and direction of the Home Secretary. One sergeant and two constables from each division of the metropolitan police have been appointed for service at Portsmouth dockyard, under four inspectors from the R division, who have already proceeded to that establishment. When the arrangements for Portsmouth are complete, the provisions of the act will be applied to the dockyards at Plymouth, Pembroke, Sheerness, Chatham, &c. The members of the existing constabulary force at these establishments will, if fit for service, as stated in a previous number of this journal, be afforded every facility for entering the metropolitan police, and it is understood that a number will be superannuated. The dockyards at Woolwich and Deptford, and also Woolwich Arsenal, will not be affected by the new regulations, as these establishments have been for many years under the police superintendence of the R division. Sir Richard Mayne and Mr. Mallalieu visited Devonport dockyard in the early part of this week, and inspected the police force. Sir Richard, in his address to the force, stated that the whole would be subjected to medical inspection by the surgeon of the dockyard, and those eligible would be transferred to the Metropolitan Board; it was merely a transfer from the Admiralty department to that of the Secretary of State. No man would be removed from the town, but they would not be permitted to keep any kind of business, or exercise the elective franchise. In all other respects it would be the same; those ineligible would retire on pension, or otherwise, according to their several circumstances.

THE NAVAL RESERVE IN THE NORTH OF ENGLAND.—The naval reserve on the north-eastern coast continues to progress most satisfactorily, the total strength of the force from Blyth to Hartlepool being now 1000 men, all of whom are advanced very considerably in their drill. A few days ago a couple of floating targets were moored off the battery at Roker, and so excellent was the practice made by a number of the reserve men with shotted guns, that both targets were destroyed. The men of the reserve who are at present being drilled on board the Castor frigate in the river Tyne were exercised on Thursday week with the life-rockets at Priors Haven, near Tynemouth.

The Admiralty have recently made the appointment of a second-class boatswain to some of the yards at home, for the purpose of assisting the boatswain of the yard in landing timber and stores. This officer will be borne on the books of the guard-ship, and receive 1*s.* 6*d.* per day in lieu of provisions, and his time will be allowed to count as sea time.

Vice-Admiral (retired) Arden Adderley, who entered the Navy on the 4th June, 1796, and who served in the ever-memorable action off St. Domingo in February, 1806, becomes entitled to the 1*l.* 5*s.* per diem list, in consequence of the demise of the Hon. Henry Dilkes Byng, which occurred at Southsea on the 23rd instant.

The Navy Gazette.

ADMIRALTY, SEPTEMBER 28.

Notice is given that the distribution of the proceeds received and tonnage bounty awarded for the brigantine, Name Unknown, captured on the 4th February, 1859, by Her Majesty's ship Triton, will commence on Monday, the 8th October, 1860.

The following are the shares due to an individual in the several classes:

	£	s.	d.		£	s.	d.
Flag share	58	0	6	Seventh class	12	5	9
Lieutenant commanding	137	16	6	Eighth class	6	2	11
Fourth class	36	17	4	Ninth class	4	1	11
Fifth class	20	9	6	Tenth class	2	0	11
Sixth class	18	8	8				

Notice is also given that the distribution of the proceeds received and tonnage bounty awarded for the schooner Name Unknown, captured on the 4th May, 1859, by Her Majesty's ship Triton, will commence on Monday, the 8th October, 1860.

The following are the shares due to an individual in the several classes:—

	£	s.	d.		£	s.	d.
Flag Share	101	11	4	Sixth class	35	0	4
Lieutenant Commanding	241	4	7	Seventh class	23	7	0
Fourth class	70	0	8	Eighth class	11	13	5
Fifth class	38	18	3	Ninth class	7	15	8
				Tenth class	3	17	9

ADMIRALTY PATRONAGE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As you take a great interest in everything connected with the Navy, I should like to draw your attention for a few moments to the recent Admiralty appointments, and I think you will find that their usual boast in the House of Commons, that they always do justice to the Naval Service, is anything but borne out. Vice-Admiral Sir Arthur Fanshawe, who returned from ill-health, from being Commander-in-Chief in the Mediterranean, has had interest enough to get himself appointed Port-Admiral at Devonport, after having been nearly three years in command; and is now to have a further three years, so that an invalid can do the duty of Port-Admiral; Vice-Admiral Sir Fanshawe Martin, a cousin, I believe, of the former, has just succeeded him as Commander-in-Chief in the Mediterranean, after having the good berth of a Lord of the Admiralty for some time.

Vice-Admiral W. James Hope Johnstone has but recently returned from a three years' command at Rio de Janeiro, and is now re-appointed to another three years' command at Sheerness. Admiral Hope Johnstone (whose family name was Hope, and who has been one of the most fortunate men in the Service), has received a command so enviable, and so justly deserved by many;—so that some of the best commands are made subject to family interest, when there are 26 Vice-Admirals and 48 Rear-Admirals on the Active List, many of whom are very meritorious officers. NAUTICUS.

THE MILITIA.

The Antrim Artillery has moved from Shorncliff to Pembroke to be stationed-

The Militia Gazette.

WAR OFFICE, PALL MALL, SEPTEMBER 25.

Hertfordshire Militia—Augustus Dixey, Gent., to be Surgeon, vice Henry Francis Coley, resigned.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the commissions held by Ensigns Richard Carr, Thomas Bolton Ogden, and William Style Doria, in the 3d Regiment of the Duke of Lancaster's Own Militia.

WAR OFFICE, SEPT. 28.

Memorandum.—Royal Cumberland Regiment of Militia—Her Majesty has been pleased to signify Her pleasure, that Captain Beetham, who retires, his services not being further required, be removed from the strength of this Regiment.

3rd Regiment of the Duke of Lancaster's Own Militia—Charles Birch, Gent., to be Lieutenant; John Hargreaves, Gent., to be Lieutenant.

Memorandum.—The Queen has been graciously pleased to accept the resignation of the Commission held by Ensign John Berkeley Michell in the 2nd Regiment of King's Own Staffordshire Militia.

INCREASED PAY TO MILITIA STAFF.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Knowing the great interest which you have always evinced in the welfare of the regular Army, and also its twin sister, the Militia of the United Kingdom, I beg leave to call your attention to the provisions of the Circular Memorandum dated 1st September, 1860, addressed to commanding officers of militia regiments, granting an increase of pay to certain individuals on the permanent staff, and excluding others from this much-required boon. One shilling and twopence per diem has been added to the rank of sergeant-major, bringing the militia of this grade on the same pay as the sergeant-major of the line (beer money excepted). Next is the militia quartermaster-sergeant, whose pay increased, and five shillings per week added as store allowance, being something more than the non-commissioned officer of equal rank in the line receives. Twopence per diem is also added to the ranks of orderly-room and paymasters' clerks. Both of the latter officials much required something in remuneration for all the work expected from them, especially in an embodied state.

On perusal of this long-looked-for document I was much surprised to find that nothing has been granted in excess of the usual eighteenpence to the remainder of the non-commissioned officers composing the permanent staff. It is thought that there must be an error in the wording of the document alluded to, as some paymasters of militia are paying their staff-sergeants at the rate of one shilling and tenpence per diem, fourpence in excess of the old scale, which rate does not come up to the sergeants of the line, minus threepence; while the ranks before alluded to (viz., sergeant-majors and quartermaster-sergeants) are equal if not in excess of the line (beer money excluded). But if the pay of the staff-sergeants of militia is to remain at the usual rate of eighteenpence per diem, the corporal of the line of five years' service is in receipt of a penny per diem more than the veteran staff-sergeant of militia, who has encountered the climate of all the British colonies and her foes on perhaps many a hard-fought field. Why this great distinction as regards pounds, shillings, and pence? The militia staff-sergeants have often important and laborious duties to perform, especially in the winter season of the year; they are often sent out recruiting from one extremity of the county to the other; and it matters not how often they accompany (or conduct) their recruits to head-quarters, they are not allowed a farthing as travelling expenses, whilst the ranks who have received the increase of pay are never called out upon those duties.

It is expected that staff-sergeants must know drill and be competent to impart instruction to others, to keep accounts, and have a thorough knowledge of military forms, &c. &c., and to keep themselves respectable,—how can all this be done for eighteenpence per diem; many of the staff are not pensioners, especially in the Irish regiments. We have been a long time in anticipation of an increase of pay, but this half measure has caused discontent.

Having already trespassed too long on your valuable time, in conclusion I feel convinced that the militia in place of being benefited by this measure will shortly sustain a severe loss in the greater part of its most efficient and serviceable staff-sergeants. You will find that on the expiration of their present engagements they will in most all cases seek some more lucrative employment; and I am sorry to think that few, very few indeed, old non-commissioned officers will be likely to tender their services to the militia-staff, except to serve in the capacity of sergeant-majors or quartermaster-sergeants.—I am, &c., ONE OF THEM.

VOLUNTEERS.

METROPOLITAN.

9TH (WEST) MIDDLESEX RIFLES.—Upwards of sixty new members from the firm of Marshall and Snelgrove of Oxford Street, attended their first drill at Allen's Riding-School, on Wednesday evening, and the number of recruits having greatly increased during the past fortnight, it is determined that drills shall take place every evening, except Thursday, at the Orderly Room—Allen's Riding-School. It is intended also to establish classes for instruction in fencing, bayonet exercise, single-stick, &c., during the winter months. A reading-room will also be opened free to members, several officers having signified their intention of supplying the daily papers, periodicals, &c., at their expense. On Tuesday evening about three hundred members of the corps marched from head-quarters to St. John's Wood Barracks, headed by a Volunteer drum-and-fife band; and to-day the corps will muster at Lord's Cricket Ground, at 4 p.m., for a general parade and march out. Lieut.-Colonel Lord Radstock has added a prize of a Westley Richards's breach-loading rifle to the best shot in skirmishing, to the list of prizes already announced. Upwards of 300 members have passed through the course of musketry, and the several classes during the week have progressed very satisfactorily. Drills will continue as usual at head-quarters on Mondays and Thursdays, 7 a.m.; and Tuesdays and Fridays, 7 p.m; also at Portman Barracks on Mondays and Thursdays, 7 p.m.

28TH (LONDON IRISH) MIDDLESEX RIFLES. — It was intended that this corps should have marched out on Saturday afternoon last; but in consequence of the very unpropitious state of the weather, the officers in command decided on not going out, much to the disappointment of many of the men who have almost become used to wet Saturdays. The strength and efficiency of the corps continue daily to increase, and the men look forward with much pleasure to the opening of the practice ground, near the Victoria Dock, which will be in the hands of the corps in a very short time.

29TH (NORTH) MIDDLESEX RIFLES.—Under the title of the North London Collegiate Cadet Company of the 29th Rifle Volunteers, between fifty and sixty of the young gentlemen of the North London Collegiate School, at Camden Town have been attached to this corps, and it is expected that the company will be speedily made up to 100. The general cadet company is also progressing most favourably, and it is intended to form a bugle cadet band.

WORKMEN'S VOLUNTEER BRIGADE. — This corps assembled in the Guildhall on Saturday at six p.m., for the purpose of being inspected by General Beatson, under whose command it was understood the brigade would fall in. General Beatson, who was accompanied by Colonel Claremont, after carefully inspecting the battalion, said that having been invited by the council to be honorary colonel of that regiment and general of the brigade, he felt pride in accepting the command. He regretted that as he was under orders for India he should not be able personally to take an active interest in the development of the brigade, but an officer would be found to represent him, and when he returned he hoped to find them 10,000 strong, and he would lead them then against any enemy in the world. General Beatson warmly complimented the adjutant, Captain Geddes, on the progress which the battalion had made. The Workmen Volunteers number now nearly 600 enrolled, and with the companies who have signified their intention to join them, the muster-roll of a regiment 1000 strong will be complete.

The Lumber Troop, more correctly called the "Lombard Troop," from having been originally an organisation of the Association of the Lombard Merchants for the defence of their banking establishments, has been now a long time upon the peace establishment; but there is, it is rumoured, an intention on the part of its members to again place the troop upon an effective footing—not as a convivial club, which it lately became, but as a cavalry Volunteer corps. The military chest, the sword of state, and all the other portions of the regimental pharaphernalia are still preserved at the club-house, the Falcon Tavern, Fetter Lane. General Thompson is the senior military officer upon the troop roll.

CHESHIRE.

2ND CHESHIRE RIFLES.—On Saturday the members of the Oxton and Claughton Company, Captain V. King, proceeded to Leasowe Common, for the purpose of competing for three prizes, which were contributed by the ladies of Oxton and the neighbourhood. At the close of the contest the prizes were awarded—the first to Private Loftus, who had scored 13; the second (after shooting off a tie for 8) to Private Ashburner, and the third to Private Sill.

CUMBERLAND.

CUMBERLAND RIFLES.—A return shooting match took place between the Workington (7th Cumberland) Rifle Volunteers and the Skiddaw Greys (3rd Cumberland) on Friday last at Workington, ending in a victory for the Skiddaw Greys, who in the first match in the beginning of the present month were beaten by two points by the Workington. In the evening a silver bugle, subscribed for by the ladies of Workington, was presented to the 7th Cumberland, who now muster about 70 strong, in the new market-hall.

ESSEX.

3RD (BRENTWOOD) ESSEX RIFLES.—This corps assembled on Friday last, by invitation of Mr. C. T. Tower, a private in the corps, and proprietor of the beautiful Park of Weald. This veteran Volunteer, now in his 86th year, commanded a Volunteer brigade in 1803, and was reviewed by His Majesty George III. in Hyde Park, and at the review in June last marched before Her Majesty as a private. The corps marched into the park about 12 o'clock, and shot for prizes. We give the scores of the five best shots:—Private Morris (prize), 15 rounds 24 points; Corporal Bush (prize), 15 rounds 23 points; Sergeant Hill (prize), 15 rounds 19 points; J. Hill (cadet corps), 15 rounds 17 points; Private Dawson, 15 rounds 16 points.

GLOUCESTERSHIRE.

GLOUCESTERSHIRE RIFLES.—The first great meeting of the 2nd battalion took place at Cheltenham on Wednesday morning. The competition was restricted to three members of each of the 14 companies of the 2nd battalion, and the prizes competed for were the county prize of 25*l*., 15*l*., 10*l*., and 5*l*., at 300, 500, and 600 yards' range. These prizes were won by Gloucester and Cheltenham in the following order:—First prize, Private T. A. Washbourne, 3rd company (Gloucester); second prize, Ensign Gregory, 13th Cheltenham; third prize, Private Jack, 7th company (Cheltenham); and fourth prize, Private Riddeford, 3rd company (Gloucester). There were five prizes for the 200 and 300 yards' range—viz., 15*l*., 10*l*., and three of 5*l*., and these were won by the following gentlemen at the points of 16, 12, 10, 10, 10, viz., Private Box, 11th company, Private Riddeford, 3rd company; Sergeant Smith, 6th company; Private C. O. Smith, 5th company; and Sergeant Davis, 2nd Gloucester.

HAMPSHIRE.

5TH HANTS RIFLES.—This corps paraded at their armoury yesterday at 2 p.m., and proceeded to Southsea Common, and were brigaded with the troops of the Line on the occasion of an attack upon Southsea Castle. The whole of the garrison turned out on that occasion, and executed a variety of manœuvres in a very soldier-like manner, Major-General Lord Wm. Paulet, C.B., commanding the South-Western District, accompanied by a brilliant staff, commanded in person.

KENT.

2ND (RAMSGATE) KENT RIFLES.—The inspection of this corps took place on Friday week last. At the conclusion Colonel Luard expressed his high satisfaction at the appearance and discipline of the corps, which reflected great credit on the captain and drill-sergeant, adding that it would be his duty to report most favourably of the corps to the authorities at the War Office.

The 1st Battalion was reviewed on Saturday afternoon last by Colonel M'Murdo, Inspector-General of Volunteers, in the park of Sir T. M. Wilson, Bart., at Old Charlton. The usual battalion evolutions were carried out, and at the conclusion of the proceedings Colonel M'Murdo complimented the officers commanding upon the efficiency attained by the several companies present.

LANCASHIRE.

8TH (BURY) LANCASHIRE RIFLES.—On Saturday last this corps assembled at Chesham, the seat of O. O. Walker, Esq., under the command of Major Hutchinson, for the purpose of receiving silver bugles, which the ladies of Bury had subscribed for the 1st and 2d companies. Mrs. Hornby, the wife of the rector of Bury, on the captains of the 1st and 2d companies being called to the front, presented the bugle to the 2d company, and Miss Walker, daughter of William Walker, Esq., to the 1st company. The prizes in the late rifle contest were then presented to the successful competitors.

11TH LANCASHIRE RIFLES.—This corps, under the command of Major Pedder, marched on Saturday afternoon from their depôt to the grounds of Mr. John Cooper, "the Oaks," Penwortham, to receive a silver bugle, subscribed for by the ladies of Preston. Mrs. Cooper presented the bugle.

A Volunteer Artillery Corps, in addition to the Regiment of Riflemen, is in the course of formation in Preston. About 100 young men have already enrolled themselves, and their services have been offered to Her Majesty through the mayor, Mr. Thomas Walmsley.

NORTHUMBERLAND.

NORTHUMBERLAND RIFLES.—On Saturday evening last the Stephenson companies of the Newcastle-upon-Tyne Volunteers met in the Corn Exchange of that town for the purpose of presenting to the successful competitors at a shooting-match lately held at Tynemouth the silver medals given by the officers of the companies for the best shots at 200 yards. Sir John Fife, the Major-Commandant of the Newcastle Rifle Corps, presented the medals to Sergeants Usher and Shepherd, and Privates Innes and Broadbent, the successful competitors.

NOTTINGHAMSHIRE.

The Robin Hood Rifle Volunteers, who, it may be recollected, were especially remarked for their fine appearance at the Queen's review in Hyde Park, are to be presented on Wednesday next, the 3rd prox., by the ladies of Nottingham with colours, a bugle, and a charger for the adjutant. Lady Belper, and other ladies, will take part in the ceremony, which will be doubtless impressive and attractive.

SHROPSHIRE.

7TH SHROPSHIRE RIFLES.—This corps met on Friday last at the Wrekin, to contest for a rifle, the gift of Captain Eyton, which after a severe contest was won by Corporal M'Kenzie, making 13 points. Ranges—300, 500, and 600 yards; five rounds at each distance.

STAFFORDSHIRE.

21ST (RUGELEY RANGERS) STAFFORDSHIRE RIFLES.—On Friday week last this corps was inspected by Lieut.-Col. Newdigate, who said he was very proud to be connected with such a company; that it was as good, if not the best he had inspected; he could see by the colour of the belts that the men had frequently attended drill.

STAFFORDSHIRE RIFLES.—An inspection of the 1st battalion by Lord Hatherton and the inspector of the district took place at Trentham on Wednesday last. When the inspection had been about half gone through the sun suddenly disappeared, and the rain came down in torrents, greatly interfering with the latter half of the inspection; both cavalry and infantry, however, stood the pelting of the storm bravely, and, if as steady under fire as they were under water, they will make first-rate soldiers. The inspection was very satisfactory.

STIRLINGSHIRE.

2ND STIRLINGSHIRE ARTILLERY.—This corps, under the command of Lieutenants Murrie and Ash, was inspected on Saturday last by Captain J. M'Gillivray, of the Coast Guard Artillery, the inspecting officer of the district, who expressed his satisfaction with their appearance.

YORKSHIRE.

3RD (BRADFORD) YORKSHIRE RIFLES.—Major S. C. Lister, Major-Commandant, has been promoted to the rank of Lieut.-Colonel. He has also been appointed to the command of a brigade at the review of the Yorkshire Rifle Corps at York on the 28th inst.

4TH WEST YORK RIFLES.—On Friday last this corps was publicly presented by two ladies with a silver bugle and marching colours. The bugle was presented by Mrs. Akroyd, the wife of Mr. Edward Akroyd (formerly M. P. for Huddersfield), the major of the regiment, and the colours by Mrs. Bury, on behalf of the ladies of Halifax.

VOLUNTEER ARMOURIES.—A correspondent calls attention to the fact that by the Act 44, Geo. III., cap. 54, sect. 42, it is provided that commanding-officers may appoint places for the deposit of arms and persons to take care of them, that two deputy-lieutenants shall view them, and the expense shall be paid by the receiver-general of the county, "provided always that no expense to be incurred shall exceed in amount such sum as His Majesty shall be pleased to authorise." But the Secretary of State issues conditions before he will sanction the formation of any rifle corps, and among them is the following: "That accommodation for the safe custody of the arms and a competent person to keep them in good order, be provided at the cost of the corps, and that the expense of keeping the same in repair be borne by the funds of the corps." This condition of course relieves the county from the expense and throws it exclusively upon the Volunteers. Had not the Act of Parliament provided that the Volunteers should be relieved from this burden, there would be no ground of complaint. The annual cost to each corps for the proper custody of the arms, is not less than 200*l*. per annum, to say nothing of the expense in many cases of erecting a suitable armoury.

A GERMAN VIEW OF THE VOLUNTEER MOVEMENT.—A very remarkable article, translated for the "Volunteer Review," has appeared in a German military paper, the *Allgemeine Militär-Zeitung*, upon the Newton Volunteer Review, and the organisation and condition of the English Volunteer force, the former of which appears to be well comprehended by our German neighbours, while on the latter the writer, taking a very fair and sufficiently approving view of what we have done, points out some defects and suggests some improvements. He makes the observation, that the drill of the men has produced results and efficiency as satisfactory as could possibly be expected. But he thinks the training of the officers is yet under par, and upon that subject he has the following remarks:—"If the whole movement is to lead to something, this is the point where Government will have to step in. All companies which are still existing—singly, or by twos and threes—ought to be compelled to combine together in permanent battalions, to engage adjutants from the regulars. These adjutants should be bound to give to all the officers of their respective battalions a regular course of instruction in elementary tactics, light infantry service in all its branches, and the regulations affecting the internal routine of service in a battalion. The officers should be bound, besides attending Hythe, to do duty, for at least three weeks, with a regiment of the Line or Militia in some encampment, and finally, they should, after a certain time, be all made to pass an examination, proving that they have learnt at least the most indispensable part of their business. Such a course of instruction and examination of the officers; further, a medical examination of the men, in order to weed out those who are physically unfit for field service (and there is not a few), and an annual revision of the company lists, for the removal of those men who do not attend drill, who only play at soldiers, and will not learn their duty—if this was done, the 120,000 men now existing on paper would be considerably reduced, but you would have an army worth three times the one which now counts 120,000 men on paper."

MOUNTED RIFLE VOLUNTEERS.—Her Majesty's Government being anxious to encourage the formation of the Mounted Rifle Volunteer corps, the Secretary of State for War has addressed the Lords-Lieutenant of the different counties in England and Wales upon the subject:—"War Office, Sept. 10.—My lord, I have the honour to state for your information that I shall be prepared to sanction the appointment of a sergeant-instructor to every corps of Mounted Rifle Volunteers which is not entitled to the service of an adjutant. The sergeant-instructor so appointed will receive pay at the rate of 1*s*. 10*d*. per diem with an allowance of 4*d*. per diem in lieu of lodging, fuel, and light, and will, under the provisions of the 21st clause of the Act 44 George III., cap. 54, be subject to the Mutiny Act and to Articles of War, and will be liable to be tried by a court-martial for any offence committed against that Act or Articles of War. The qualifications of a sergeant-instructor of a mounted rifle Volunteer corps should be as follows: 1. Five years' service (three of which as a non-commissioned officer) in the regular army, or in the army of the late East India Company, or in Her Majesty's Indian forces. 2. A complete knowledge of mounted drill. 3. A good character, as established by satisfactory testimonials. 4. The age of the sergeant-instructor is not to exceed fifty years. He will be required, if necessary, to be attached to a regiment of infantry of the line to learn mounted drill. He will also be required to pass through a course of musketry instruction at Hythe if he has not already done so. Recommendations of sergeant-instructor for mounted rifle Volunteer corps should be made by commanding officers to the Lord-Lieutenant of the county, and, if approved by him, should be submitted for the consideration of the Secretary of State for War. I have to add that in cases where the corps consist of more than 100 enrolled members a second sergeant-instructor will be allowed, and where the numbers exceed 200 a third sergeant on the same terms. And in every case the sergeant-instructors should be mounted by the corps on all mounted duties. I have the honour to be, my lord, your obedient servant, Sidney Herbert. To the Lord-Lieutenant of the county of ——."

NORTHAMPTONSHIRE.—The Northamptonshire Rifle Association held their first meeting on Thursday in Althorp Park, the seat of Earl Spencer, on which occasion the first competition for the prizes for rifle shooting and a grand review of the whole of the corps in the county by the Earl of Euston took place. The association is the result of the extensive support which the Volunteer movement has received in the county, and is founded on the plan of the National Rifle Association, most of the regulations of which they have copied. Earl Spencer was the first to recommend the adoption of the movement by the county, and to establish a corps, of which he is the captain. His example was followed by Earl Pomfret, who raised a corps at Towcester; and by Lieut.-Colonel Loyd

Digitized by Google

Lindsay, son-in-law of Lord Overstone. The number of competitors had been originally fixed at five men, distinguished for proficiency in the use of the rifle, from each of six corps; but as one of the corps declined to compete, their number was equally distributed throughout the other five corps. The challenge cup, value 25*l.*, and several other prizes, were won by Sergeant Presland, of the Towcester corps. This cup, however, will not be retained by the winner permanently, but is open to annual competition. A cup, value 10*l.*, was also offered as a prize to all comers, and was won by Mr. J. Biggs of Elkington. The shooting of the successful competitors was remarkable for steadiness, but many others, who are accounted good shots at ordinary practice, appeared to have lost some of their self-possession. As the time that could be given to shooting was necessarily short, the number of competitors was limited, and to furnish amusement for all, the committee of management had organised athletic games, such as running, leaping, &c. Earl Spencer entered the lists for some of these, and won a second prize for a running jump. There was also some archery, the prizes for which were well contested. The review was held in a very suitable portion of the park, the Volunteers being in a valley formed by extensive and gently descending slopes on either side, and was witnessed by about 15,000 people. It passed off most successfully, and Lord Euston congratulated the Volunteers on their creditable appearance.

WILTSHIRE.—A grand review of the Rifle Volunteer forces of Wilts and some of the adjacent counties, under the authority of the Right Hon. Sidney Herbert, Secretary of War, took place in Clarendon Park, near Salisbury, the seat of Sir F. H. H. Bathurst, on the afternoon of Wednesday last. A variety of evolutions were gone through, according to an official programme, in the presence of the reviewing officer, General Lord William Paulet, C.B., at the conclusion of which there was a general salute, the bands playing the National Anthem. The General afterwards addressed the Volunteers in complimentary terms.

DEVON COUNTY VOLUNTEER ASSOCIATION.—The association have just issued the programme of prizes to be competed for at the grand shooting match at Newton Abbot, on Tuesday, the 9th of October, and succeeding days. The rifle ranges are within half-a-mile of the station.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, SEPTEMBER 25.

1st Battalion of Dumbartonshire Rifle Volunteers—Thomas Graham, Esq., to be Adjutant, from the 2d of July, 1860.

1st Battalion of Elgin Rifle Volunteers—Kenneth MacKenzie, Esq., to be Adjutant, from June 28, 1860.

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[FROM OUR OWN CORRESPONDENT.]

NAPLES, 22nd September.—On Sunday, the 16th inst., Garibaldi left Naples for Palermo on a mission of importance relating to affairs of state, and after a stay of six hours in the latter city, returned on the Tuesday following. The post of pro-Dictator was filled by General Sirtori; during his absence Generals Trivulzio and Cosenz were spoken of at the first, but the final choice was wisely made in favour of Sirtori, who is a Neapolitan. Many appointments have been made to public offices, and amongst others Dumas, the novelist, appointed honorary director of the institution lately called the Museo Borbonico, now the "Museo Nationale." He, the decree of appointment states, will submit to the Dictator a project for compiling from the archives connected with Pompeii and Herculaneum an archæological and historical record of these cities and their inhabitants, choosing such assistants as he may deem best fitted to the work of assisting him. All objects in the museum connected with the fine arts are henceforth to be under the direction of the Minister of Public Instruction. All civil *employés*, dismissed for political causes in 1848, will, if they have not since accepted office under the Bourbon dynasty, be regarded as having served the intervening time, so far as regards their becoming entitled to pensions. The remaining punishment is remitted to the following: Raffaele Verre, condemned by the Court of Salerno, 10th March, 1852; Francesco Matarazzo di San Biase, condemned 25th June, 1851; Antonio Venturini, condemned 31st March, 1859, for the occurrences of Sapri; Raffaele Turain, condemned 19th December, 1859; Giuseppe Averardi, condemned 20th November, 1858; and Francesco Romano, condemned in consequence of the events at Sapri. In addition to the above notices, the official journal publishes a proclamation from the Minister of Police to the effect that, as certain ecclesiastics have been of late abusing their sacred office, by disturbing the public peace, circulating false accusations against men high in office, and otherwise producing disturbances, it is found necessary to repress such attempts, so that, whilst the Dictator is desirous of advancing the cause of religion, he is, at the same time, determined not to permit any person or persons to disturb the common weal under guise of religious zeal, or any other pretence. Deputations from Basilicata and Polenz waited upon the Dictator during last week, and presented congratulations and professions of sympathy and identity of feeling of the most gratifying nature.

Some anxiety was felt for several days before the arrival of the 19th instant, known as St. Januarius' day—when, as is well known to the faithful, the blood of the saint liquefies—in consequence of a rumour having got abroad that the miracle would not take place this year in consequence of the misfortune of its patron, Francesco Secondo. At length the eventful day came, and salvos from the forts and castle proclaimed to the world of Naples that the miracle had taken place, and was this year an hour before its usual time. It was expected that some reactionary move would have been attempted through the credulity of the people; and whether this, if at all entertained, were deemed unwise or unsafe, I do not profess to say, but merely notice it as an event of political significancy. The daily papers of the same date contain the form of oath taken by Liborio Romano, Minister of the Interior, as follows:—"I, Liborio Romano, Minister of the Interior, swear fidelity and obedience to Victor Emmanuel, king of Italy, and his successors. I swear to observe and cause to be observed the statute and every other law of the state for the inseparable benefit of the king and the Italian country." After swearing himself in, Romano administered a similar oath to the other ministers, and they in turn to their subordinates. Now as the statute of Piedmont before decreed on the 14th has thus become law of the land, it may not be out of place to say that its general purport and contents might be briefly described as follows:—Article 1 declares the Roman Catholic the established religion, but all others tolerated according to law. Article 2 declares the government to be monarchical and representative. Article 3, that the legislative power be exercised by the king and two chambers, the senate and deputies, collectively. Article 4, that the person of the king is sacred and inviolable. Article 5, that the executive power belonged to the king, as well as the right to declare war, make peace, &c., &c. Articles, 6, 7, and 8, declare severally that the king names officers of state, sanctions and promulgates laws, and can grant grace of pardon, remission of punishments. Article 9 binds the king to convoke the two chambers every year; and, whilst it gives him power to prorogue the sittings of parliament, and dissolve the chamber of deputies, yet enjoins that in case of such right being exercised, he is to summon another before the expiration of three months. Article 10 enjoins the presenting of propositions relating to imposts to the lower house first. Articles 11, 12, 13, 14, 15, and 16, relate to the majority of the king, and the provisions for regency during his minority, or incapacity to govern. Article 17 gives the queen-mother the guardianship of the minor until the age of seven, after which the regent becomes his guardian. Article 21 provides for the support of the hereditary prince, and all princes and princesses of the royal blood. Article 22 defines the king's oath. Article 23 the regent's oath. Article 24 guarantees the equality of citizens in the eyes of the law. Articles 26 and 27 guarantees respectively personal liberty and inviolability of the residence. Article 28 grants freedom of the press, and enjoins that bibles, liturgies, &c., are not to be printed without the permission of the bishop. Article 29 declares property inviolable. Article 31 guarantees the public debt. From Article 33 to Article 38 inclusive, relates to the formation of the Senate. From Articles 39 to 64 refers to the constitution of the chamber of deputies. From Articles 65 to 74 relates to the ministry. From 75 to 81 relates to Despositioni Generali; and from Article 82 to Article 84 relates to Dispositions Transitoires. The above may be regarded as the general features of the statute under which it is expected the whole kingdom of Italy will soon be governed. There is no disguise maintained as to the ultimate purpose of uniting all Italy under the sceptre of Victor Emmanuel; and the programme, as far as I can make out, from reliable authorities, is to first complete the Neapolitan affair, and then pass on to the Roman States, after which an attempt will be made to drive the Austrians out of the country. The policy is evidently to prevent the annexation of Naples to Sardinia at present, and the reason for this course was plainly stated by Gavazzi in one of his public lectures, to be the fear that were Naples annexed now, a similar bad result would follow to that which would have followed the too sudden annexation of Sicily, namely, that the movement would have stopped short of the total liberation of Italy. It seems that those who most desire annexation, now see the necessity of retarding it; whilst the absolutists or re-actionary party, with the utmost desire to upset the revolution altogether, profess to desire immediate annexation, well knowing that nothing would more retard, if not neutralise altogether, the desire of liberating the Continent. A telegram from the Intendant of Terra di Livoro announced in the course of the week, that a re-actionary demonstration had taken place at Mola di Gaeta, which although encouraged by the presence of two Bourbon princes, D. Luigi and D. Alfonso, was suppressed by the exertions of the National Guards, an exhibition of zeal and patriotism, which so far from eliciting the praise it merited, was rewarded by the general disbanding of the force in question, and the appearance of a proclamation placing the city in a state of siege. Meantime, the first engagement since the flight of the king from Naples has taken place near Caserta. Garibaldi, wishing to occupy a commanding position by reaching Cajazzo, crossed the river near Capua for that purpose, and, in order to carry out his purpose effectually made a feigned attack on the left; in consequence of this latter part of the plan being misunderstood, the small force stationed there converted their false into a real attack, and, advancing to the very walls of Capua, were received with a discharge of grape, and a charge of cavalry, and had to retire with loss. With the exception of this mishap the project of Garibaldi was carried out successfully, the river passed, and the desired position at Cajazzo occupied. It is stated that the Neapolitans have driven out the troops of Garibaldi and reoccupied Cajazzo. The state of affairs is now as follows:—Garibaldi has some 30,000 men in the field, and so disposed as to have not only a force between Naples and Capua, but also a large body of troops between Capua and Gaeta; in consequence of this arrangement the retreat of the garrison of Capua is completely cut off, and as they do not amount to more than 14,000 men, and without any prospect of relief, their surrender is inevitable.

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription is 7*s.* 7*d.* per quarter, or 30*s.* 4*d.* per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. Russell, Esq., and business letters and advertisements to Mr. Archibald Graham, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.
Office, 16, Wellington Street, Strand, London, W.C.

RIFLE VOLUNTEER BANDS.—Officers in command are invited to apply to BOOSEY & SONS for a LIST OF THEIR MILITARY MUSICAL INSTRUMENTS, forwarded free.—Boosey & Sons, 24, Holles Street, W.

ELSTOB'S RIDING BELTS, Hunting Drawers, Breeches, Knickerbockers, Elastic-seated Riding Trousers, 32*s.*; Bedford Cords, best quality, 42*s.*; Belts and Drawers, 21*s.* each.—12, AVERY ROW, BROOK STREET, NEW BOND STREET, W.,
(Exactly opposite Ford's Hotel in Brook Street).

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

RIFLE CORPS PRESENTATION SILVER BUGLES.—BOOSEY & SONS have taken out a Plate Licence for the Manufacture of the above Bugles in sterling silver, which they can furnish at Twenty Guineas very best make. Persons manufacturing these instruments without a licence are liable to a penalty of Twenty Pounds. COPPER BUGLES, the same as supplied by Boosey & Sons to the War Office, Two Guineas. Ditto, strongly electro-plated and burnished, Three Guineas. Cord and Tassel, 3*s.* 6*d.* Ditto in green silk, 8*s.* Enamelled leather case, 12*s.*
Boosey & Sons, Military Instrument Manufacturers, 24, Holles Street, London, W.

RIFLE & ARTILLERY DUTY-BUGLES, TRUMPETS, &c.—Volunteer Corps are respectfully informed that the patterns approved by Her Majesty's War Department can now be had of the Makers, Messrs. RUDALL, ROSE, CARTE, & CO. Price, with Lines and Tassels complete, Two Guineas.
SILVER BUGLES, for Presentation, from Twenty Guineas.
ELECTRO-PLATED BUGLES, in Case, Four Guineas.
BUGLE and TRUMPET-MAJOR DUTY-BOOKS, 3*s.* each, giving instructions, and all the regulation sounds.
DRUM MAJOR DUTY-BOOK, 4*s.* FIFE-MAJOR DUTY-BOOK, 3*s.*
PERCIVAL HUNTING-HORNS in Copper and Sterling Silver.
RUDALL & CO.'S PRICE LIST, with Guide for the Formation of Bands, and Corps of Flutes and Drums, and Estimates of Cost, sent free per post.
Military Musical Instrument Manufactory, 20, Charing Cross, London, S.W.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, SEPTEMBER 29, 1860.

We are happily either above or below the regions of "la haute politique," which must be not only hazy, but stormy just at present—in a sort of North Sea breeze, with no lights in sight and a good deal of sea on, and sand-banks and shoals everywhere—but we cannot be indifferent to the military aspect of the affairs which are commanding the attention of the world. It may be true, as we are informed, that in this free and constitutional country we are living under the mild dictatorship of the noble member for Tiverton, and that, therefore, it is not much matter what individual atoms may say or write; but there can be no harm in directing our eyes to incidents which may materially affect the course of our policy, or, at all events, the fame and reputation of the country in the estimation of Europe. On the one side we have had the Pope's brigade of Irishmen, who must be spoken of in the præterite tense—the *spolia opima* or *pessima*, as the case may be of Spoleto—who fought, or were engaged to fight, all for religion and a little for pay and bounty, and who to the world are British subjects, though they certainly violated all claim to British protection when they enlisted to serve a foreign prince in defiance of the laws. On the other hand, there are the Garibaldian excursionists, who are not the less outside the pale of the law because they have sought merely to turn its flank by a pretext which can scarcely be called ingenious, and who may meet with rough usage, should they by any fortune of war fall into the hands of the Neapolitan troops. In both of these little armies there have been feather-bed soldiers, who cried out because their rose-leaf beds hurt their tender sides, and whose martial ardour was quenched by a slash of sea-water, or a draught of sour wine of Orvieto. Whatever these men do, in some sense the character of this country in its relation to European states is concerned in their acts. Then there is a third class of British subjects abroad who are in a *mezzo termine*—the tourists, the sight-hunters, the excitement-seekers, the popularity-hunting lawyers, who haunt the edges of battle-fields, and sniff the smoke of powder from convenient distances. That most of these will behave like stout-hearted Britons in the time of danger we are quite certain; and already they have shown the metal of which they were made in the actual shock of battle, and in the trying fire of a panic We shall not stop to speculate on the curious complications which might arise, if gallant Mr. Evelyn Ashley had been conducted hot from the fight of Santa Maria, into the presence of Francis II. But what would have happened if Mr. Edwin James had been taken prisoner, and if the unaccredited envoy or the "officious" ambassador of England to Dictator Garibaldi, had actually been carried off in that sweeping charge of the royalist horse? He, the bosom friend of Garibaldi, the chronicler of his toilet-table doings, the leaky recipient of the Dictator's confidences, and the dangerous guardian of his private thoughts concerning the Emperor Napoleon; he, who had sat in council with Cavour, had been the honoured cargo of a Sardinian war steamer, and had received the addresses and honorific gratulations of the liberal bar of France—he, in the hands of the King of Naples! Why, it would have been hard to persuade Francis and his friends that such a captive was not equal to a kingdom's ransom, and that it was not more than a counterpoise to Castelfidardo. We are glad the capture was not effected; for, after all the learned gentleman's special correspondence in the papers, after his pompous progress, his interviews with the Prime Minister of Sardinia, and with the Dictator, and his boasted relations—as well as those suggested, rather than indicated—with the leaders of the movement, it would have been very difficult for Mr. James to have persuaded the Neapolitans he was only out for a lawyer's holiday, and that he was merely airing his lungs for *Nisi Prius* juries and the Marylebone stump. Anyhow, he could not deny he was a Member of the House of Commons, and the aspirant for an office which would make him a member of the British Government. Vain would it be for even the learned gentleman to try and swallow his sheets of letter-paper; vainer still to argue that according to the letter of the law of nations he was quite justified in all he had done; vainest of all to seek to persuade the "brutal despot, the tyrant of Naples," that he, Mr. James, was no friend of Palmerston—quite the contrary, that he was his sworn foe, and the plague of his life in Parliament—*vide* Hansard, if Hansard could be found in Gaeta. With admirable celerity, however, Mr. Edwin James solved all the difficulties by the simple process of running away, not merely from Santa Maria but from Italy. Faster than the royalist horse, faster than panic itself, than the dispatches, and as fast as the telegraphic messages, the learned enthusiast rushed from the fated land, and arrived panting at Boulogne, filled with dreadful visions of the Garibaldians in full rout, and a storm of furious horsemen, and the black horrors of cannon shot, and the blazing eyeballs of bursting shells. Those rifled cannon throw their balls a perilous way! What a pernicious marksmen it was who pulled the friction fuse of the deadly barrel which sent its screaming messenger to tear off the door-step of the carriage, on which the Honourable Member's valuable foot had rested but an instant before! Are we to have the life of an embryo Solicitor-General put in peril because of his chivalrous gallantry in running to battle-fields, or his equally dangerous tardiness in getting away from them? Is Marylebone content to allow her champion to trifle with his life? If necessary, let some steps be taken to keep him at home. At all events, we can better lose his letters than his life. And we can assure him that notwithstanding all he saw—or thinks he saw—the cause in which he once evinced such touching enthusiasm, and of which he now takes so gloomy a view, is not yet lost, even though he may have left Garibaldi to himself.

If, as appears now to be the fashion, all important measures are to be initiated by committees and commissions, while the responsible Government is to sink into a mere paid executive, then it is surely time to bethink us, whether something ought not to be done to improve the status and composition of the committees which are thus becoming practically our chief instruments of government. They must have a wider range of functions; so that they may be enabled to deal thoroughly with what is remitted to their consideration. They must have a longer tenure of office, and not be dissolved at the end of each session; in order that they may not be hurried to precipitate conclusions. Only the few thoroughly good men of business in the House should be considered eligible to be nominated upon them; that the members may be fully competent, and gain constant experience by being frequently engaged upon investigations which are more or less cognate. And, lastly, it may be necessary to inquire if they should not be paid.

We are led to make these reflections, not because they have only now struck us for the first time, but because of an instance of the grave inconvenience to the real business and best interests of the country, arising from the present practice, which has been pressed upon our notice in considering the Report of the Transport Service Committee. It comes out in the evidence of Mr. C. A. Wood, that the late East India Army Commission only examined a single witness on the all-important question of the frequency of the reliefs and the transport of troops for India; and that witness, Sir Alexander Tulloch, happening to express an opinion diametrically opposed to a resolution of Sir De Lacy Evans's Committee of the preceding year, the question was simply "shirked," and neither further gone into, nor reported on! And yet our present system is, to send regiments to India for ten years—often after long periods of previous colonial service—while it has been abundantly proved by the statistics of the Army, that from the casualties affecting the troops in India, a regiment becomes exhausted long before 10 years,—in fact, "there is a fresh army every eight and a half years!"

What with deaths and invaliding, what with men's period of service expiring, and the purchase of discharges, a regiment that is sent to India has changed entirely its whole composition long before the ten years have expired. And yet the system continues! It continues; and we send out the men's wives and children with them or after them, to be in like manner brought back again, or carried to their long homes, in the course of a very few years. There is, too, an enormous mortality among the poor children who are thus foolishly shipped abroad. Not to take the shocking case of the Accrington, in which the mortality was frightful, it appears, from a return of the mortality in twelve vessels (not including the Accrington), that out of 476 deaths which occurred on board, only 18 were adults, and the remaining 458 children. Of these poor victims no less than 388 were under three years of age. In fact, about half the soldiers' children of that age who are sent to India are known to die. In these twelve vessels, 861 were embarked, of whom 388 died!

The absurdity of supposing that the soldiers themselves become more healthy the longer they are retained in an unhealthy climate, was sufficiently exposed in the recent debates on the amalgamation of the Indian and British Armies. Of course there is a certain truth underlying what is called being "acclimatised." After the first shock to an English constitution—the first fever or attack of cholera or dysentery—no doubt when the person recovers—which, however, sometimes does not happen at all—he is, for a time, less likely to have a second attack, and he regains a degree of health which may only afterwards suffer from a gradual enervation and weakening of his constitution, till its vital energy is exhausted. Some constitutions are tough, and can bear this slow deterioration for many years; but with most Englishmen, especially among the common soldiery, neither wise nor prudent as to how they live, it leads rapidly to death or utter prostration.

As a remedy for these known and half-acknowledged evils, Mr. Wood and others humanely propose to shorten the term of Indian service to five years, and to dispense with sending out the soldiers' wives and children to India altogther. The result would be a large saving of the soldiers' own lives, and the lives of the greater number of their children. If this plan were adopted, a reasonable addition to the pay of those soldiers whose periods of service expired before the five years, would probably induce them to postpone their return, till their regiment was coming home; the regiment would be kept together; and we should no longer have melancholy evidence how few soldiers require transport back to England, compared with those who have been conveyed to India. The soldier going on this five years' Indian service would be placed in an analogous position to the sailor whose ship remains five years in commission on a foreign station. Their absence from their families would be alike. And, indeed, if the period were reduced to four, or even to three years, it might not be unwise. Nothing is more expensive than a bad system of management, which kills our soldiers in hospital, instead of reserving them for the field of

Digitized by Google

battle, or for an honoured retirement after a long service.

Perhaps no argument of greater weight has been used against the proposition for having about eight additional troop-ships all as large as the Himalaya, for conveying troops to and from India and the colonies, than the fact that, as things are now managed, there are so much fewer men to bring home than we carry out. Compared with the hired transport system, there is no doubt but it would be even cheaper to have such ships and bring them home almost empty, than to go on as we are doing. But the proposed system of more frequent reliefs and shorter service abroad, supplies the answer to the only argument apparently of consequence against having a proper service of Government troop-ships. It does so in the most gratifying way. We must not always be harping upon the saying that "the Channel has been bridged by steam," and always only thinking of the French. Let us look to our colonies and India. The whole ocean has been bridged by steam. And it will be to the everlasting disgrace of England, if we do not make use of the means which science, under Providence, has given us, for shortening the weary years of foreign service hereafter to be required from the bravest, most devoted, and most deserving troops in the world.

We hope, too, that the Government will have more self-respect than to wait till a Parliamentary Committee "recommends" this justice to be done. We are not arguing for the Committee and Commission system of governing the country. All we say is, if we are to have it, let us not always have raw hands set to every subject, and not time allowed them for their work. But we prefer the constitutional system. We have the Cabinet; we have the Secretary for War, the Under-Secretaries, and all their permanent coadjutors, including the Commander-in-Chief; we have the Secretary for Indian Affairs and his Council; we have the Duke of Somerset and the Lords of the Admiralty; the Secretary for the Colonies and all his staff. If these men are altogether incompetent to settle such questions, or apathetic, or simply idle, we are certainly in evil case, and must look to Mr. Gladstone's threatened "revolution" for some rough remedy. But, if the Ministry have any ambition to be indeed our rulers, they have only, in this and a thousand other matters, to read, mark, think, and *act*, and the voice of Parliament and the people will go with them.

The Admiralty must fairly wish the faculty of invention had never been invented, or that it had ceased to act since the beginning of this present century. Here are all the crafty, silly, wise, and ignorant men in the country, mechanical, or non-mechanical, applying themselves to the study of what are called improvements, and assailing the Board with demands for the trial of all sorts of hobbies, not one in a thousand of which has the smallest puff of breath within its ribs. Why could not the world be content with handy old liners, which "went round like a top" in tacking with nice, comfortable jackass frigates, and sturdy, old bomb-ketches, impelled by the natural and obvious agency of the winds and canvas? Since steam was invented there has been nothing but trouble; and, because the inventors' detestable race stumbled upon one good thing they think they have acquired a right thereby to disturb the repose of departments for ever. With steam came the long range, and with the long range came the armadillo battery, floating in a shell of iron on the ocean. The Admiralty must be more than mortal not to be angry; not that we assert they are, only we think it is likely they consider "*quieta non movere*," a very wholesome rule. As to the armadilloes, first doubts were hinted that they could be built, and then dislikes were hesitated as to such innovations at all; and finally, when their existence could not be gainsaid, it was suggested that English cannon were more powerful than French guns, or that the French were throwing away their hopes and their money on a practical humbug and monster iron rams. The readers of this journal were at all events warned, from the very commencement, not to put too much faith in the results of the experiments at short ranges against the iron armour of various projectors, although some of them were ridiculous enough; and we raised the true issue several weeks ago, in the ARMY AND NAVY GAZETTE, in an article in which it was pointed out that the real question was, not whether Sir W. Armstrong and Mr. Whitworth could pierce the iron mail of a *frégate blindée* at 200 yards, or at double that distance, but that it was whether a swift iron-coated man-of-war, with a heavy armament, could not destroy a fleet of wooden ships no matter how they were manned, from a distance, which would secure her sides from the return fire. Since that time the question has been re-opened by a remarkable letter from Capt. Halsted, which it would be superfluous to reprint in our columns. It appeared just at the very day that some of our contemporaries had committed themselves to a great deal of nonsense in reference to thundering broadsides, and hearts of oak, and the penetrating power of our new artillery, which the letter of Captain Halsted gave an ethereal touch unto at the moment. Then the sterling hard-headed sense of Captain Sherard Osborn came in to lighten the way of our great contemporary, who had rather yawed in giving his broadside on the matter, and had consequently failed somewhat in hitting what he aimed at, so that he luffed up more than once and trained his guns anew.

A "Captain, R.N." brought in a few Sebastopol experiences about those terrible shells; and though he rather overlooked the fact that the shells which did more moral execution than we care to talk about among our men, on 17th October, 1854, were fired from very large guns in casemated embrasures with a plunging fire, and that therefore their effects were more powerful than would be the horizontal fire from ships' decks. We say with him emphatically, "For God's sake keep out the shells." "Observer" if not following the ARMY AND NAVY GAZETTE sailing on a parallel line, points out that there is an issue yet to be decided between the experiments of Captain Hewlett and the statement of Captain Halsted, but we know that officers in actual command have very different moral perceptions from those officers who live *en retraite* in Perthshire solitudes. There is one issue which must be settled. Can we build a ship like the Gloire to steam 13½ knots an hour, to carry seven days' coal, 500 rounds per gun for a heavy armament of rifled cannon, and steel-plated sides with port-holes six feet clear of the water in an ordinary seaway? If we cannot, we must be prepared to show at an enormous risk that our great rivals cannot do so either. We believe the Admiralty are not indifferent to the gravity of that issue.

The correspondence which has appeared in the columns of the leading journal on the subject of iron-clad ships during the week, proves that the time has come when a decision must be arrived at as to whether we are to be satisfied with large fleets of wooden line-of-battle ships, or, if we are to take advice from our neighbours, and adopt the system which they are bringing into play of having armour-cased vessels wherewith to fight our future battles. We believe that the Comptroller of the Navy is most anxious not to be behind in the race which France bids fair to run with us in the building of iron steam-ships; and we are certain that any apparent delay which has taken place in giving orders for the construction of a further number of these formidable but most expensive ships, proceeds merely from a desire on his part to be convinced that he possesses the plans and models of vessels best calculated not only to act as engines of warfare, but as safe sea boats. The Lords of the Admiralty have also, we believe, felt reluctant to hazard any more of the public money in what might have been considered a hazardous experiment, and have been desirous first of testing all the various qualities of the Warrior and Black Prince. These ships should, according to contract, have been ready for sea at the very moment we are writing, but from delays which have arisen from various causes, the time mentioned for their being fit for service is precisely the autumn of next year. We have taken pains to ascertain the reason of this serious breach of covenant, and find that the authorities have a right to complain of the tardy conduct of the contractors, although, on the other hand, the latter excuse themselves by saying that they are not to blame for the alterations which have been made by the Admiralty during the time the ships have been building, and for which they have claimed an extension of the period originally allowed them.

The Royal Commissioners have prepared a series of questions having reference to the sanitary condition of Her Majesty's troops, and of the local European and native troops in India. To these questions answers are required from every station throughout India and its dependencies. It is the expressed wish of the Commissioners that these questions should be filled up and signed concurrently, by the commanding officer, the engineer, and the medical officer at every station. The first section relates to topography, and a series of questions are given, calculated to elicit the fullest information on the topography of the station, embracing everything which can be brought under this comprehensive head. The 2nd section relates to climate. The 3rd section refers to the sanitary condition of the station, embracing all the points usually included under this head. The 4th section contains minute inquiries into the health of the troops. The 5th section contains questions intended to elucidate the effect of total abstinence, temperance, and drunkenness on the amount of sickness, mortality, and crime at the station. Diet is dealt with in the 6th section. Dress, accoutrements, and duties come under the 7th section. Instruction and recreation constitute the 8th section. Military prisons and everything relating to them are disposed of in the 9th. The subject of field service and all that relates to the conduct of the line of march of troops, bivouacking, camping, billeting, all medically considered, are embraced in the 10th section. Section 11 relates to statistics of sickness and mortality, and the large subject of military hospitals is exhausted in the 12th section, while the burial of the dead forms the concluding part.

We regret to hear that an order has been issued in India—at least in the north-west provinces—waging war, not against vice and immorality, but against "soldiers' pets." It is a cruel and foolish order, as we understand it; and people in England will scarcely wonder that the Indian Service is unpopular, when they hear that the military authorities have issued orders—First, that all pictures, engravings, and decorations of the sort, are to be removed from the barrack-rooms; Secondly, that private lights are not to be used by the soldiers, to whom indeed oil lamps, fed with very bad oil, which give little light and much smoke, are issued. Thirdly, that all "pets" are to be removed out of the barracks, and that the out-houses which have been built for them are to be pulled down and destroyed. An edict of extermination has gone forth against the parrots, monkeys, dogs, pigeons, and other mute friends of the poor soldier, and if some kindly officer does not shelter them in his compassion for his men, they are killed or driven forth. Verily this is the way to nurse discontent, and to feed the spirit of mutiny.

As some misunderstanding appears to exist, in spite of the statement in the recent numbers of the ARMY AND NAVY GAZETTE, that the officers to whom the question had been referred had sent in their report to Government in reference to the disposal of Indian prize money, we think it as well to repeat, that the principles on which the prizes shall be disposed of have been settled as far as the Commissioners are concerned. By far the largest amount of prize made by any of the columns in India was secured by the force under General Whitelock at Kirwee and Banda in the summer of 1858. The proceeds seem to have been quietly absorbed by the Indian government, who have preserved such a judicious silence in reference to the transaction, that not one paper or document could the Indian Board at home lay before the Prize Commissioners, who made their report accordingly, without referring to the very large sum which must sooner or later—we fear it will be later—distributed to the force.

The French army seems to avail itself largely of the columns of the *Moniteur de l'Armée* for the expression of individual desires, and each week there is a long list of wants, which are curious enough in their way. For instance, "a chef de bataillon desires to exchange with a major of two or three years' rank, address, &c.;" "The paymaster captain of 7th Chasseurs à Cheval at Chalons-sur-Marne, desires to change with a captain of the first-class of a regiment of Chasseurs in France;" "M. Radet, captain, 1st Cuirassiers, at Sarreguemines, asks to change with a captain of Chasseurs d'Afrique or of Spahis;" "A lieutenant of Chasseurs d'Afrique desires to change with one of his colleagues in France, the cavalry of the reserve excepted." "At the competition for the post of master tailor of the 46th Regiment on 10th September, there being only one candidate, a new competition will be held at Soissons, on 5th November." These notifications are inserted as advertisements.

The following Circular which has been recently issued from the Admiralty, reflects credit on their Lordships; it is a step in the right direction, and should take effect among the class of men to which it is directed.

My Lords Commissioners of the Admiralty having had under their consideration the periods of service hitherto prescribed to entitle well-conducted Seamen to the several rates of good conduct pay, are pleased to direct, under the authority of Her Majesty's Order in Council of the 10th instant, that the period of service to entitle such Seamen to the first grant of good conduct pay shall be three years instead of five years; and that the successive additions shall be, as heretofore, after every further period of service of five years, subject to the conditions prescribed by the Good Conduct Regulations established by Her Majesty's Order in Council of the 15th of January, 1849.—By Command of their Lordships, C. PAGET.

Major General W. Freke Williams has resigned the command of the 2nd Infantry Brigade at Shorncliff, his period of Staff service having expired. He will be succeeded by Colonel Garvock, who, to the claims of active and varied service, adds the strong recommendation of being at a time of life when he will be able to fulfil the physical duties of the office—a consideration, we may remark, which has not been invariably attended to of late in the selection of officers to give practical instruction in field movements on a large scale.

On Friday week some trials were made before the Committee of a new large gun with a charge of 25 lbs. of powder, and firing an elongated shell 174 lbs. weight, which are said to have given satisfactory results; but we have not heard of the conclusion of the experiments this week.

Lieut.-General Gascoigne resigns the Dublin command to-day, when he will be relieved by Major-General the Hon. A. A. Dalzell, who will in turn be succeeded in the Cork district by Major-General C. W. Ridley.

THE RUSSIAN ARMY.

[From our own Correspondent.]

Warsaw, Sept. 19th, 1860.

The intended visit of the Czar to this place, and to the great camp which is its chief attraction, has been postponed. It was to have taken place about the middle of the present month, but political complications have caused it to be deferred. The accouchement of the Empress, and the non-completion of that portion of the St. Petersburgh railway, upon which the Czar will be the first passenger, are assigned as the causes of this delay; but the unsettled state of Europe, the amount of business now upon the hands of the Emperor of Russia, as upon those of all other crowned heads at this moment, together with—last, though not least—a desire to take advantage of this visit to Warsaw, to accomplish in *propriis personis* the reconciliation of the two Emperors of Russia and Austria, the latter of whom is to be invited hither upon the occasion,—such are the considerations which have had more to do with the delay than babies or railroads.

This same visit of the Emperor of Austria will be somewhat a strange affair—a reconciliation rather of the head than of the heart, at least, if one may judge from the bitter tone in which the Russians speak of the Austrians. It will be long indeed before the latter recover the prestige and position which they lost by the part which they thought fit to play during the Crimean War, a part which has given far deeper offence to the Russians than if they had openly declared themselves upon one side or the other, and boldly waged war against the Russians if they could not conscientiously act as their allies.

Everything here bespeaks preparation for the Czar's visit; the troops are being rubbed up to a state of efficiency, which makes one hope that in another war they may be our allies instead of our enemies; the summer exercises in the "polygon" have ceased, and the troops are employed in making up cartridges instead of burning them, and in repairing the batteries, and mounds, and trenches, which, by way of practice, they have, hitherto, been busy destroying. The great camp, now occupied by about 40,000 men and 112 guns, is being furbished up to an unwonted pitch of cleanliness; it is almost difficult to find one's way about it, now that the old land-marks of dirt and the old pest heaps are removed. At the Emperor's palace at Lazienki lamps hang from the trees; and wooden edifices and scaffoldings, suggestive of fireworks and illuminations, block up the avenues. At the great fortress of Modlin (or the "New Georgien") about twenty miles north of this, the casements erst occupied by the Czar Nicholas, and still containing his uncomfortable plain camp-bed, have been polished up until every one of them looks like a little boudoir, and it is difficult to believe that those delicately painted walls, with festoons of mauve and pink flowers hanging over them, are boomproof, or, that those charming little windows, with their rich curtains, are embrasures. The fortress (which is, I believe, the largest in Europe, or in the world, having accommodation for 40,000 men) is at present commanded by General Brümmer, who commanded the Russian Artillery at the Siege of Kars.

And so all Warsaw and its environs are on the *qui vive* for the Czar. Prince Gortschakoff (commanding-in-chief here) has just returned from leave to receive him; and General Kotzebue, his chief of the staff, has more work on his hands than he knows how to get through. You must know that the preparations of a Russian army for a review are more extensive than ours. The men must have coats which are not threadbare and in rags, served out to them for the occasion, and arrangements have to be made (on a pretty large scale, too) to ensure the peculation and corruption of those in authority being kept secret; the poor, cheated, patient, half-starved soldier, has to get up a cheerful appearance, and look happy for the nonce; and this is no easy matter, let me assure you. Something, too, has to be done to replace the sham cartridges with gunpowder ones; and it is sometimes a matter involving a good deal of consideration and intricate calculation to account for all the artillery and cavalry horses, still more so for a large portion of the forage, which anyone knows more about than the unfortunate quadrupeds who should have eaten it. This is no exaggerated case, I can assure you. Persons unacquainted with the Russian system may be excused if they are a little sceptical about the amount of roguery and peculation prevailing among the officials in that most corrupt country; but to those of your readers who know more of the Russians, what I have said will be neither new nor incredible. It would be interesting to relate one or two little anecdotes which I have collected, bearing upon the subject; but I should be swelling my letter to too great a bulk by doing so. Perhaps on some future occasion, should I have the opportunity of chatting over the Russian army, I may return to this subject.

After this it will not be surprising to learn that the private soldier is the only one who anticipates the Czar's visit with any real satisfaction; his conscience at least is easy; poor fellow, there is nobody for him to cheat, and so he has no *exposé* to fear. The exhaustive process of peculation ceases at this stage, and the result is that the man's mind is easy, and his coat threadbare; besides there is a direct benefit to him in the Czar's visit; every man reviewed upon these occasions receives half a rouble (about 1*s.* 7*d.*), and, small as it is, this sum is no mean one to a man whose nominal pay is only 1 rouble and 20 copecks (or about 3*s.* 11*d.*) a quarter; while (thanks to the system I have above referred to) he actually receives not more than 30 or 40 per cent. of that amount. The poor devil will go and spend his wretched half-rouble in "vodka" when the reviews are over; who can blame him if he gets as drunk as he can for the money? At least his noisy "God save the Czar" will be a heartier one than those more decorous protestations of loyalty uttered by the sleek courtiers and generals over their champagne; and the liquor at any rate will have been honestly earned.

Owing to the Czar's visit being so late this year, it is probable that there will not be as much manœuvring as usual, and that the visit will be a shorter one; but though short, it promises to be brilliant; in addition to the Emperor of Austria, the Prince Regent of Prussia, the King of Bavaria, the Grand-Duke of Baden, and other of the German princes are expected to be present.

At this moment there are, as I have above stated, about 40,000 men in the camp, but during the Emperor's visit between 65,000 and 70,000 will be collected; it was at first intended to have had 100,000 men present, but the unsettled state of Europe has rendered it desirable to employ a large number on the frontiers and in the different forts, added to which the lateness of the season would make it difficult for so large a number of troops to get back to their respective cantonments and quarters before the bad cold weather set in.

Anyone wishing to visit Warsaw should undoubtedly do so during this Imperial visit, when there is much to interest and amuse—particularly military men; at other times I imagine it to be about the stupidest and most unsatisfactory town to sojourn in in Europe.

I may, however, as well mention, for the benefit of any of your readers who may contemplate a trip hither, that they must make up their minds to exorbitant charges and meagre fare.

The Hotel de l'Europe, which is undoubtedly the only habitable hotel, is a magnificent establishment, but infamously managed, particularly the cookery department; the Hotel d'Angleterre boasts a better *cuisine*, but the charges are enormous.

This is the more to be regretted, as a trip to Warsaw during the Imperial visit would otherwise be agreeable enough, and the fact of the camp and exercising ground being only about three miles from the town, and of the manœuvres not beginning until a reasonable hour—nine o'clock or thereabouts—facilitate matters considerably, and enable the visitor to get to the scene of action comfortably without hurry.

THE ORGANISATION AND USE OF CAVALRY.

From the Papers of the late Field-Marshal Radetzky, *written* 1837-8.

(*Concluded from p.* 657.)

LIGHT CAVALRY.

The best light cavalry in the world is that of those people whom we call barbarians, as the Bedouins, Tartars, Cossacks. I mean here by light cavalry those skirmishers whose duty it is to watch over the safety of positions, marches, and to keep open communications &c. The value of these troops consists less in their scientific drill, than in their natural instincts, in the self-reliance which each individual gains in a roving life, in the cunning which their practical warfare acquires, in their facility of movement guided by the signs which nature gives them, in their endurance of hunger, thirst, and all sorts of hardships, in their knowledge of their steed with whom they have almost been brought up. These qualities are of incalculable value for the outpost service of an army, and cannot be drilled into a man. States which possess tributary tribes of this description have an immense resource in them, because with their help they can spare their regular cavalry, reserve it for the decisive battle, and save it from being distributed. But it is not in our power to form cavalry of this description, because we cannot transplant the habits and customs of barbarians into the centre of civilisation. All that we can do is to make our regular light cavalry respond as much as possible to the duties it has to perform.

The amount of our light cavalry in proportion to the cavalry of the line is great; hence it ensues that we are obliged to use our light cavalry as cavalry of the line. In fact it were a pity if we were only to use our fine hussar and uhlan regiments as outpost troops; these regiments have done deeds on the battle-field which would not disgrace the noblest squadron of chivalrous knights. Nevertheless, the important duty of watching over the safety of the army must be done, and consequently there is no other means but to entrust it to the hussars and uhlans. The question then arises: Is there no means to be found to prevent our excellent light cavalry from being dispersed and scattered? The Hungarian insurrection fell before the spirit of the age and the art of war, like everything which belonged to the feudal system. In the last campaigns so called Veliten were embodied. If this system was organised, a certain number of these troops might be added to each regiment, to form an outpost cavalry which would do as good service as the Cossacks.

The war which the French are waging in Africa is a great school for them, if they can adopt the peculiarities of their opponents, which they must do if they wish to succeed. They will thus be enabled to bring a light cavalry into the field against us, which, despite the superiority of the elements which we possess, may prove most formidable.

CAVALRY OF THE LINE.

By cavalry of the line I mean that cavalry which is destined to form in line of battle, to support the attack of the infantry, to turn quickly to account any advantage obtained, to keep the enemy's cavalry in check, to cover the wings of the line of battle where it is wanting in *points d'appui*, and on a retreat to charge the advancing and pursuing enemy, to facilitate the reforming of the infantry. It is the middle between the light cavalry and the reserve cavalry. For this service the chevaux-légers are best suited. All cavalry should be provided with pistols, for a fire-arm is often of great service to a horseman for personal defence, and quite indispensable to give an alarm or signal; for though we should use light cavalry exclusively for outpost duty, still occasions do happen when the cavalry of the line must take this duty upon itself, and replace the light cavalry. As in the general rule the cavalry of the line fights with the infantry, it is very necessary for both arms that they should be accustomed to each other. Consequently, on the dislocation of troops care should always be taken that the cavalry of the line should be so distributed, that wherever one or more army divisions meet for grand manœuvres in peace time, a portion of the cavalry of the line should always be with them.

This cavalry is not destined to act united in large masses, but is divided according to the wants of the *corps d'armée*. But with the *corps d'armée* itself it must never be scattered, but kept together as carefully as possible, for it is only by united strength that a battle can be fought with success.

The cavalry of the line should not be brought into action too soon, or employed in isolated, not deciding attacks, as thereby it is only weakened, fatigued, and demoralised. It must patiently wait for the moment that the infantry has opened it a path; and therefore this cavalry must not engage a battle, as it would be irretrievably exposed to the enemy's artillery, nor ought it to deploy in front until ready to charge. A display of strength to impose upon an enemy is a military gasconade, which can only tell upon a cowardly foe; and such a foe need never be feared.

When the battle is engaged the cavalry of the line should remain in columns, and, if possible, out of sight of the enemy. Forming in columns is the only serviceable one for cavalry, because in this position it is always able to manœuvre at a moment's notice; and a manœuvre must always precede a charge, for cavalry cannot and must not fight standing still. I have always found double columns with intervals, or what is called the manœuvring column, most serviceable; its development on every side is easy; it is a compact form, which the general has in hand, which he can easily direct either to attack the enemy in front or to fall upon his flank.

No fixed position can be assigned to the cavalry of the line in a line of battle, as it depends upon the locality, whether it is placed on the wing or in the centre of the corps. In positions where the wings want support, it is best placed upon the wings, because it here covers best the weak points of our line of battle, has free action, and can easily fall on the enemy's flank, especially if the enemy's wing is exposed to a cavalry attack.

No rules can be laid down for what must be left to the genius of the commander; he alone must decide when to bring his cavalry into action. By a surprise, as occurred in the battle of Rossbach, a charge of cavalry often decides a battle. But the happy opportunity lost, and if the enemy has had time to take up position in order, then it is a mistake to bring the cavalry at once into action; it must be kept quiet until the enemy's infantry is shaken by battle and is disconcerted, when a successful charge of cavalry may rout the enemy, or gain us breathing time. It is true there may be moments in a battle when a cavalry commander may strike a decisive blow by a sudden impetuous attack, but, as a general rule, the cavalry must be under the command of the commander of the corps, as he alone is able to judge when the moment has arrived for the cavalry to go into action.

If there are examples in the history of wars that single squadrons have done wonders, even decided battles, this does not alter the fundamental rule that care should be taken not to scatter the cavalry, and allow isolated attacks; their losses are so difficult to replace, and nothing demoralises so much as thoughtless and unsuccessful attacks, and yet this is one of the commonest faults. In my career I have witnessed it over and over again, and I feel it a duty to warn cavalry against this great mistake, which is totally opposed to the very nature of cavalry. Cavalry cannot protect itself behind ground; it is deprived of that great auxiliary of the infantry; it requires freedom for its movements, or else it cannot act. Its element is attack, movement—its ruin a passive position.

PATRIOTS AND FILIBUSTERS.*

We think that on the whole the columns of *Blackwood's Magazine*, in which it originally appeared, perhaps showed off this narrative to greater advantage than does the separate volume in which it is now given to the public; there is an inartistic want of arrangement about it—a sort of jerky unconnectedness—which was scarcely of so much consequeuce in the columns of a monthly periodical, and which was certainly much less apparent there than it is in the little volume before us. On the very title-page there is a foreshadowing of this fault; the leap from patriots to filibusters is sufficiently abrupt, and the manner in which, in the body of the work, we are hurried about in search of one or the other is anything but pleasant. Mr. Oliphant is such a great traveller himself, and has become so accustomed to "roughing it," that he judges of his readers' feelings by his own; not a moment is allowed us to expostulate against being dragged about in this ruthless manner. Mr. Oliphant takes hold of us by the arm and hurries us over half Circassia, across giddy mountain ranges, through all sorts of dangerous passes and doubtful fords, along four several routes—all beset with difficulties and hardships—to Khiva; here, there, and everywhere, in fact, in Central Asia where Russian influence is felt, and her aggressive policy observable, which is saying a great deal; and having thus filled up one-half his book with Asia, he starts off, in Part II., to America, does the "Great Dismal Swamp," follows for some distance the footsteps of Longfellow's "Evangeline," and the fortunes of General Walker, and eventually dismounts from his fiery, but somewhat exhausted, Pegasus at the door of a house in Panama, where he leaves us, almost inclined to register a vow never to travel with him again. But, after we have slept off our fatigue, we are disposed to modify this opinion to a great extent; it was very hard work while it lasted, certainly, and we should probably have enjoyed ourselves considerably more had we travelled over less ground; had we devoted ourselves to patriots, for example, and left out filibusters altogether, or *vice versâ*; but still it has not been an unpleasant or unprofitable ramble on the whole. Mr. Oliphant is an able and intelligent guide; he points out to us the beauties of the landscape in a very satisfactory manner; he tells us as we go along little anecdotes of Circassians, and Russians, and Kirghis, and negroes, and others of the cosmopolitan population whom we catch glimpses of during our travels. He has a keen eye for a pretty face, and the only occasion upon which he seems inclined to loiter at all, is, we blush to say, in a harem, where "a charming little creature . . . with soft lustrous eyes, and long jet lashes" fed him with chestnuts, and very nearly proved fatal to his peace of mind.

But it is not merely for the sake of giving picturesque sketches of Circassian valleys, or of introducing us to little girls with soft eyes, that Mr. Oliphant carries us over so much of the eastern and western worlds. "Patriots and Filibusters" is happily not so aimless; it is instructive as well as amusing; and while Mr. Oliphant tells us a good deal respecting the social habits and character of the people among whom he has travelled, he points his narrative with some extremely able and interesting speculations relative to the policy of Russia and the United States. As the former more immediately concern ourselves, and as the views of Lord Elgin's ex-secretary are those of a gentleman who has travelled with his eyes open, we think we may profitably give a few extracts from his pages, as conveying a very good general notion of what are the schemes and intentions of Russia in this part of the world.

In the first place, Mr. Oliphant considers that we committed a great fault in not making the independence of Circassia one of the clauses of the last treaty of Paris; our position in the East is more nearly affected by this than may at first be imagined. "The whole question of Eastern aggression by Russia hinges upon the existence" of the northern line of forts by which the independence of Circassia can alone be secured; "without them Russia could never have hoped to subdue Circassia, any more than she could have taken Kars if she had left one gate open. The success of the Russian war in the Caucasus depended upon the efficacy of the blockade, that could only be secured by the reconstruction of these forts. Now that these are rebuilt, Schamyl has been captured, and Circassia has been again thrown upon its own limited resources, the latter must soon be exhausted; and, when the besieged country has entirely capitulated, the only barrier to Russian aggression in the East will have been swept away. . . . When she has thoroughly incorporated Circassia into her dominions she will in all probability proceed to annex those provinces of Ghilan and Mazanderan to the south of the Caspian, which will have been mortgaged to her by Persia. If she had intended to relinquish her Eastern policy she would not have cared for the subjugation of Circassia, as the country itself is too impracticable to be of any intrinsic value; but the continuance of the Circassian war leads us to infer that she has not relinquished that policy, and that she intends again to threaten Turkey when a convenient season offers—not only upon the banks of the Danube, but on those of the Araxes. It is supposed that the rectification of the Bessarabian frontier will secure us against a repetition of the siege of Silistria. The non-construction of the Circassian forts was the only guarantee we could have had against the recurrence of the siege of Kars. It is a pity that the work was left half done" (pp. 73, 74).

It is thus easy to see how the possession of Circassia would facilitate Russia's further designs upon Turkey; the manner in which its possession is connected with the growth of Russian power in Central Asia now remains to be shown, and this, together with the extent to which these changes would affect ourselves, is then considered in two very interesting chapters. The mode by which Russia would be likely to execute her designs is as follows:—holding Circassia, she would proceed to obtain possession of Khiva, the frontier of which is "conterminous with that of Persia from Herat to Astrabad, for a distance of four hundred miles. If Khiva became a Russian province, the whole northern frontier of Persia,—from its most easterly to its most westerly point, from Boukhara to Turkey,—would form the southern boundary of the Russian empire" (p. 129). Persia would thus be placed in imminent peril, while means of making this conquest subservient to Russia's designs upon her would not be wanting; an excuse for commencing hostilities against her is easily found, and, if we may credit Mr. Oliphant, Russia would not have any difficulty in finding willing allies under these circumstances, for "the most bitter enmity has ever existed between the Khivan tribes and the Persians, fostered by the fanaticism consequent upon their professions of opposite Mohammedan creeds, and they would gladly seize this opportunity of avenging themselves on a power which has incessantly persecuted them, while even Cabul might be incited to join in a crusade against the heretical Sheas" (pp. 129, 130). All this would affect us directly, perhaps, to but a small extent: the further advance of a Muscovite army occupying Khiva "through Cabul and the Hindoo Koosh would be attended with almost insurmountable difficulties. Bjornestjerna, the Swedish general, in his work on the East Indies, says it will require four campaigns before a Russian army could possibly arrive at the Indies by this route; and, indeed, the slightest acquaintance with the nature of the country to be traversed, will be sufficient to justify our discarding the notion of a Russian army invading India from Orenburg and Khiva" (p. 127); but indirectly the effect of a Russian occupation of Khiva would be immense. Mouraviev says, unreservedly, "Masters of Khiva, many other states would be under our rule. The possession of it would shake to the foundation the enormous commercial superiority of those who now rule the sea" (p. 127); while it is easy to see that the entire submission of Persia to Russia would be a calamity which we could hardly over-estimate. "The independence of Persia," says Mr. Oliphant, quoting from another author, "is the only apparent obstacle to a position by Russia which would enable her to destroy in Asia the power of the Sultan, already shaken in Europe; to annihilate our commerce in Central Asia; to force us to diminish our revenues, and largely to augment our expenditure in India, where our finances are even now embarrassed; to disturb the whole system of government in that country during peace; to threaten it with invasion in war; and to oppose to our maritime and commercial superiority her power to shake our empire in the East" (pp. 128-9).

All these things considered, Mr. Oliphant arrives, we think, at but a natural and just conclusion when he observes that, "If we had during the last war, by a prompt conveyance of troops to the seat of war in Georgia, and a strict blockade of the eastern shores of the Black Sea, in conjunction with the Ottoman and Circassian armies, driven out the Russian forces at present occupying them, we should never again have heard rumours of a Russian army being at Khiva" (p. 130).

We have been betrayed by the importance of the subject into so much longer an exposition of our author's views than we had at first intended, that we have left ourselves no space for a consideration of the other multifarious topics of which he treats: our opening remarks will perhaps have sufficiently indicated the nature of these topics; that they are crowded and frequently unconnected we have also stated, but beyond this we have little or no fault to find; willingly do we concede the ability which characterises the work as a whole, while such considerations as those of which we have just given our readers an outline are, we think, sufficiently valuable and interesting to outweigh any minor defects of inartistic grouping, and an overcrowded canvas.

Patriots and Filibusters; or, Incidents of Political and Exploratory Travel. By Lawrence Oliphant, Author of "Lord Elgin's Mission to China and Japan," "Minnesota and the Far West," &c. (Blackwood, London and Edinburgh, 1860.)

NEW ZEALAND.

The following is an exact return of the losses in the recent repulse of our troops:

40TH REGIMENT. — *Killed:* Lieutenant C. F. Brooke; Sergeant O'Callaghan; 4 corporals; 22 privates.

Wounded: 21 privates.

NAVY. — *Wounded:* Captain F. B. Seymour, R. A.; 1 Royal Marines; 8 seamen.

ROYAL ARTILLERY.—*Wounded:* 4 gunners.

OFFICIAL INSPECTION OF DEPTFORD DOCKYARD.

His Grace the Duke of Somerset, accompanied by Vice-Admiral the Hon. Sir Richard S. Dundas, K.C.B., Rear-Admiral the Hon. Frederick Thomas Pelham, C.B., Mr. Whitbread, M.P., Rear-Admiral Sir Baldwin Walker, Bart., K.C.B. (Comptroller of the Navy), Colonel Greene (Director-General of Works), and Captain John Moore, C.B. (Secretary to the First Lord), arrived at Deptford on Tuesday morning at half-past 11 o'clock, for the purpose of conducting the annual inspection of the dockyard, the Royal Marine Barracks, and the Royal Victoria Victualling-yard. Their lordships were received at the latter establishment by Captain Superintendent Buckle, and a guard of honour composed of the Dockyard Battalion of Volunteer Rifles, under the command of Captain Wilkinson, accompanied by the band of the corps. Their lordships first visited the superintendent's office, and then proceeded to inspect the several departments of the victualling establishment, comprising the implement stores, the rum stores, the surgery, the wine, soap, and salt provision stores, every necessary information being afforded by Mr. Jameson, store-keeper, and Mr. Wilkinson, receiver. Their lordships next visited the transport stores, and minutely inspected the immense stock of blankets, seamen's clothing, &c., which are forwarded from this depôt to the various stations of the Royal Navy. Having viewed the cooperage and steam saw-mills, their lordships proceeded to inspect the manufacturing portions of the establishment, consisting of the mustard mills, the chocolate mills, and the bakery, the whole of the workmen being at the time employed, and the powerful steam machinery with which these departments are fitted being in full operation. After concluding the inspection of the victualling establishment, their lordships partook of refreshments at the captain-superintendent's residence, and subsequently proceeded to the dockyard, where they examined the steam saw-mills, planeing machines, joiner's shop, smitheries, the several building-slips and vessels in progress, and the powerful hydraulic cranes recently constructed on the line of wharves for the purpose of loading transport vessels with stores. Their lordships, accompanied by the captain-superintendent, Mr. Fincham, master shipwright, and Mr. Pearn, master-attendant, then went on board the Zebra, 17, screw-sloop, now in a forward state, and the screw-frigate Newcastle, of 51 guns, which their lordships ordered to be launched on the 15th of October. Having inspected the dry docks, the moulding-loft, the mast-house and spar stores, their lordships were much interested by viewing a remarkable specimen of ancient naval architecture which, it has been stated, has been in store at this yard 220 years, namely, the royal state barge used by the Sovereigns of England from the period of James the First to that of Queen Anne. This vessel is clinker-built, of great length, beautifully carved and decorated; and although unused for the last century is in a tolerable state of preservation. Their lordships also inspected the slaughter-houses used for killing beasts for the service of the Navy during the Crimean war, and which are again to be used for a similar purpose, the Admiralty having decided upon such an alteration from the present system in order to improve the quality of meat stored for the Navy. Having viewed the extensive site of land which has recently been purchased by the Government, and is now walled in as an enlargement of the establishment, their lordships decided upon the erection of various new storehouses, and proceeded to the barracks occupied by a detachment of the Royal Marine Light Infantry. The various departments of this establishment having undergone examination, their lordships took leave of Captain Buckle at four o'clock, and left the dockyard, accompanied by Mr. John Penn, for the purpose of paying a visit of inspection to the immense engineering factory of that gentleman, at Coldbath, Greenwich, where a large portion of the machinery for the steam-ram vessel, building at the Thames Iron Works, Blackwall, is now in course of preparation. Having occupied some time for this purpose their lordships left for town about six o'clock.

HOW PRIZE MONEY IS MADE UP.—The plundered property seems to have been of a most miscellaneous character. The booty gathered together at Awah, for example, comprised the most heterogenous articles, usually sold at absurdly low prices. The largest sum given for a horse was 43 rupees, while a grey pony was purchased for 1 rupee 8 annas. Buffaloes averaged about 3 rupees each; cows varied from 1 rupee 8 annas to 5 rupees 8 annas; bullocks from 1 rupee to 17 rupees 8 annas; and asses from 8 annas to 3 rupees; while a ram fetched 3 rupees 8 annas. Coats of mail were to be had for 8 annas to 2 rupees 8 annas; tulwars for 1 rupee to 2 rupees 12 annas; tents from 1 rupee 12 annas to 450 rupees; and tom-toms for 10 annas to 3 rupees. A bird-cage fetched 2 annas, a drum 9 annas, a shield 12 annas, and a group of figures 5 annas. Three elephants, however, realised 1700 rupees, and a tonjohn and palanquin 390 rupees. The sale list of the property captured at Kotah embraces a still greater variety of articles. Lots of bedding, fans, clothing, carpets, silver ornaments, parrots, boxes, a leather bag, brass idols, looking-glasses, rope, a velvet pillow, a pistol box, brass and copper pots, lace cloth, a stone idol, silver thread, iron wire, brass wire, cowrie ornaments, sabre leather, hookas, silver cloth, ponies, horses, bullocks, an umbrella, chairs, a book, betel-nut, quilts, a turban, a cat, a clock, an American watch, a sword, a copper inkstand, copper vessels, copper dishes, a musket box, lotahs, tape, a palanquin, sandal-wood, a writing-desk, opium, a large durbar tent, an elephant howdah, country paper, cups, spices, wheat, elephant armour, scales, gold ornaments, couches, hides, flags, brass guns, silver parrots, peacocks, cows, and fish, silver toys, shawls, tables, chair-armour, and quantities of native manufactures, form a strange and barbarous medley, and prove the sagacity of the troops in ferreting out whatever could be turned into money, from a small sword that was knocked down at two annas to a bedstead, that realised 500 rupees. The amount of misery and ruin represented by these fantastic columns of the prize agents is appalling to conceive. How many thousands of individuals were reduced to abject want to make up that total of 46,726 rupees, 2 pies, that appears at the foot of the Kotah tables, it is terrible to contemplate. We may, however, hence learn to form some idea of the anguish and wretchedness that would fall on myriads of Englishmen if ever a French army were to burst into our metropolis.—*Allen's Indian Mail.*

THE WARFARE IN NAPLES.

King Francis is not yet altogether driven from the Field. Indeed, as we have several times explained, he occupies in Gaeta and Capua a fine position. He has two fortresses, one commanding a river at an important point, the other capable of standing a lengthened siege. He has an army, and we gather from the letters that reach us from various quarters that his regiments are recruited by numbers of disbanded soldiers, who make their way from Naples to Gaeta. He has also a large arsenal in the latter place, and, really, assuming that his troops will fight, he has in his hands powerful means of resistance, his only weak point being a want of war-ships, the Parthenope constituting, so far as we can gather, the whole of the royal navy. Under these circumstances anything that throws a light on the means at the disposal of Garibaldi to defend Naples or force the line of the Volturnus, and invest Gaeta by land, is of extreme interest.

The royal army, as we know, held Capua in force. This town, originally fortified by Vauban, stands on the left bank of the Volturnus, so that the bridge in rear over the river is protected by the fortress, and the royal army was able to advance if it should seem desirable or to retreat on Gaeta. All the other bridges over the river had been broken down, and the boats withdrawn to the right bank. The fords were watched by parties of infantry, supported by guns, and the reserves were at hand to reinforce any threatened point. The royalist left was at Cajazzo close upon the hilly country, but on the right bank of the Volturnus. The outposts were on the left bank, in front of Santa Maria, and at other points. The possession of Capua thus barred the advance of Garibaldi, who had the option of taking it or turning it by throwing himself to the right among the hills, a movement which would uncover Naples.

Garibaldi's position was at Caserta and Santa Maria, two points commanding all the roads leading into Capua, and those diverging to the north-east towards Campo Basso and the upper course of the Volturnus, and also in advance of Aversa, whence a road leads up to the river and thence to Capua. General Türr commanded the troops on the 19th, the day of St. Januarius, whose blood liquefied in honour of Garibaldi, to the great delight of a superstitious people. Seeing the strength of the enemy's position in front, and unwilling to try the nerves of his troops in the ordeal of a forced passage of the river on pontoons or in boats, he conceived the idea of adopting Calabrian tactics, and occupying the mountains above Cajazzo, in order to support the insurrection, and alarm the garrison of that place. A small body was therefore sent through the hills to the north and across the Calore, an affluent of the Volturnus, and the commander reported the feasibility of driving the Neapolitan troops from Cajazzo. He was immediately reinforced and directed to carry the place. To prevent the army in Capua from succouring Cajazzo General Türr determined to advance upon several points, and thus keep the enemy employed. On the right Türr in person, with the brigadiers Saulis and Eber, moved through the hills upon the river in two places, one the passage to Cajazzo itself, and engaged the enemy, who justified the foresight of the general by marching reserves to the assistance of the outposts. Nothing occurred in this quarter which throws any doubt upon the bravery of the troops, but their impatience led them into unnecessary peril. On the extreme left, the column moving up the Aversa Road by La Foresta to attract the enemy, was judiciously held in hand, and did exactly what was required without incurring loss. But in the centre it was otherwise. Here the column, destined to drive in the vedettes in front of Capua, advanced from Santa Maria along the main road. But they did more than was needed. Provided with guns to sustain any conflict outside the walls, it never could have been intended that with two twelve-pounders they should batter the walls of Capua. When the royalists fell back the attacking column remained within gunshot, and of course lost men. None but case-hardened veterans, acting under an absolute order, could be expected to stand so unequal a combat, and it is to be regretted that Colonel Rostoff did not withdraw his men in good order while they held together. Unhappily, he stayed too long, and when his soldiers should have retired, they broke and fled. Of course the Neapolitans poured out of their stronghold and inflicted considerable loss upon the fugitives; but when the panic was restrained and the troops got together, they again drove back the enemy as far as the line he formerly held. In spite of the loss in the centre, the object of the combined movements was accomplished, for the expeditionary column had rushed upon and seized Cajazzo, and had up to the 22nd prevented the enemy from retaking it.

The whole affair must have caused Garibaldi some serious reflections. He must have felt that work was before him more severe than that of marching upon Naples. The royalist gunners proved themselves to be proficient in the management of their arms, for all accounts speak of the quickness and accuracy of their fire. Their reserves were smartly handled, and in no case do they appear to have committed the blunder of leaving outposts too long in the front. Nor, on the other hand, is there much to complain of in the conduct of Garibaldi's young soldiers. The main mistake was in the exposure of the central column in masses to the cannon of the place. The whole is covered by the achievement of the object of the extended movement, the capture of Cajazzo, and by the practical experience acquired of the extent and strength of the enemy's position. It should have shown to Garibaldi that his military work is incomplete, and that he would be better employed in completing it than in political squabbles. The means at his disposal, and the position he held, do not inspire one with any apprehension of a successful offensive movement from Capua; but it is clear that the day is not yet won by Garibaldi.—*Globe.*

The *Times* correspondent sends an account of the affair at Voltorno. The main object of the movement was the capture of Cajazzo, and that being done the other advances, intended to mask that operation, were given up.

"The movement of Eber's column having been observed from Capua several large columns of infantry and cavalry, besides a battery of artillery, were seen approaching in haste to support the forces concentrated on these points. Towards noon General Türr sent the order to the Brigade Saulis to retire, the news having arrived that the operation towards Cajazzo had been successful, and that Catabene and his riflemen had driven the enemy from that position. This retreat was effected in perfect order.

"When the Neapolitans saw that our riflemen retired they took courage, and came down to the edge of the river, shouting 'Viva il Re!'—nay, three of them swam across to turn the farm-house which had afforded a *point d'appui* to our riflemen. Garibaldi, seeing this, gave the order to occupy the house and keep the Neapolitans within due bounds. Twenty riflemen and 20 of the Swiss company of the Brigade Eber were sent down, who cleared the shore in less than ten minutes, in spite of the heavy cannonade which was opened upon them, and which soon set the whole house in a blaze. Towards 2 p.m. this brigade likewise received the order to withdraw. The Neapolitans, as soon as they saw the movement, began shelling, and with so accurate an aim that several shells burst right amidst the troops, but by a miracle hurt not a single man.

"The advance on the high road from Santa Maria to Capua had likewise begun soon after the others. The Neapolitans followed their usual tactics, drawing the advancing column within the range of the guns of the fortress. They succeeded better than ever before, for one of the brigades engaged got out of hand and advanced without order till it came within range not only of the guns of the fortress, but likewise had to sustain an offensive return which the enemy made with artillery and cavalry. In vain did our two guns try to oppose the superior force; the commander being wounded, and many of the artillerymen and horses, the guns had to be dragged back by the infantry. The Brigade Tuppi was sent in support, but unfortunately its commander was mortally wounded in the very outset. This threw the column into confusion, and for a moment the enemy had time to retake part of the position lost and burn the farm-houses, which had been of great assistance to our men in their advance. But this was only for a short time, for, order having been restored, the Neapolitans were again driven back to the border of the olive wood, close to the glacis of the fortress.

"By 2 p.m. all was over on this side too, but not without the loss of a hundred men.

"The column to the left from La Foresta advanced similarly, but was more fortunate in keeping within its instructions, attracting the enemy's attention on that side, but without engaging in a combat.

"On the whole our loss in wounded and dead amounted to 160 men, but the object of the movement was obtained by the taking of Cajazzo.*

"Sept. 22.

"On this side nothing new since the 19th, the Neapolitans in the outskirts of Capua firing away a great deal of artillery ammunition on all who show themselves. We, on our side, are waiting for the development of the movement towards Cajazzo. This latter place was, according to the last accounts, threatened by the Neapolitans, and the Regiment Vachieri, of the Division Medici, was sent to assist."

* As has been remarked, in reference to our own Correspondent's letter, the news that Cajazzo has been retaken by the Neapolitans, if true, shows that the whole movement has been a *coup manqué*.

MARRIED SOLDIERS.

The following Circular, relative to the erection of separate barrack-rooms for married soldiers, has been just issued from the War Office:—

"The Secretary of State for War has had under his consideration the question of the accommodation in barracks for married non-commissioned officers and soldiers. Special quarters for this object are being erected year by year as funds can be made available, but some time must necessarily elapse before such quarters can be provided throughout barracks generally. With the view, therefore, of at once improving the condition of married soldiers in those cases where special quarters do not exist, Mr. Secretary Herbert has decided, in concurrence with His Royal Highness the General Commanding-in-Chief, and with the sanction of the Lords Commissioners of Her Majesty's Treasury, upon the following regulations:—

"1. The allowance of lodging money to 3 per cent. of married soldiers, which has been hitherto permitted to be charged in the regimental accounts irrespective of the accommodation available, will cease from the 1st of October, 1860, and lodging money will only be granted when accommodation in barracks on the scale hereafter laid down cannot be afforded.

"2. Every married soldier not in excess of the number hereinafter specified, living in barracks, shall, when a separate room has not been specially and permanently provided for his accommodation, be entitled to the amount of accommodation usually allotted to four single soldiers,—*e. g.*, a room lettered for 12 men shall be available for three married men, and one room's issue of fuel and light in kind shall be issued to the three families collectively. The number of women to be admitted into barracks to which this regulation shall apply shall not exceed the following scale:—The wives of the regimental staff-sergeants, the wives of the sergeants of each troop, battery, or company in the following proportions, viz:—3 out of 4 or 5 sergeants, 4 out of 6 or 7, 5 out of 8 or 9, and 6 out of 10 or upwards. The wives of all other non-commissioned officers and men in the proportion of 5 to 60 men, and above that number of men at the rate of 8 per cent. of the whole number of the regiment, battalion, troop, battery, company, or detachment, as the case may be.

"3. As a rule, unmarried soldiers should be first accommodated in barracks; any surplus accommodation should then be allotted to married soldiers in the foregoing proportions, and any married soldiers, not in excess of the above number, still remaining unprovided with quarters, should receive lodging allowance; it being clearly understood that the sergeants and soldiers having at present a separate room permanently set apart for their use are not included among the number of married soldiers entitled to the advantages of this Circular, and that in no case are the numbers of those accommodated in barracks or drawing lodging-money for want of accommodation to exceed the number referred to in Article 2.

"4. The lodging-money of married soldiers for whom room cannot be found in barracks will be increased from 2*d.* to 4*d.* a-day. This allowance will be claimed on form No. 1 of Circular 13 of the 1st of September, 1856, to which must be added the joint certificate of the commanding-officer and the barrack-master that the number of married sergeants and soldiers included therein do not, with the number accommodated in barracks, exceed those fixed by Article 2.—B. HAWES."

THE PRINCE CONSORT'S LIBRARY AT ALDERSHOT.

The following General Order to the Army has been issued from the Horse Guards by His Royal Highness the Commander-in-Chief:—

"In announcing to the officers of the Army and Militia the opening of the library at Aldershot, presented for their use by His Royal Highness the Prince Consort, the Duke of Cambridge congratulates them on this additional proof of the interest which the Prince Consort takes in their welfare, and commends to their especial care the preservation of a gift so graciously bestowed and so highly beneficial to the Service.

"By order of his Royal Highness the General Commanding in Chief,

"JAMES YORKE SCARLETT, Adjutant-General.

"1. The library will be under the management of a committee, consisting of—1. The General Officer commanding the camp. 2. The Assistant-Adjutant-General of the camp. 3. The Assistant-Quartermaster-General of the camp. 4. The officer commanding the Royal Artillery. 5. The commanding Royal Engineer. 6. Two officers specially selected.

"2. The committee will report direct to His Royal Highness the Prince Consort every quarter on the general state and efficiency of the library, and they are requested to submit to His Royal Highness any changes which they think it desirable to introduce, either in the system of management, in the rules and regulations, or in the fittings of the buildings, &c.

"3. The librarian will receive his instructions from and be entirely under the orders of the committee.

"4. At present Second Corporal Watson, Royal Engineers, has, on trial, been appointed librarian, and the committee are requested to report from time to time, on his general conduct and efficiency.

"Rules and Regulations of His Royal Highness the Prince Consort's Military Library at Aldershot:—

"1. Every officer of the Army and Militia will have free access to the library.

"2. Civilians will be permitted to attend, on obtaining a card of admission from any one of the members of the Library Committee.

"3. The library will be open daily, viz.:—On week days from 9 a.m. to 7 p.m., in summer; from 9 a.m. to 6 p.m., and from 8 p.m. to 10 p.m. in winter; and on Sundays from 3 p.m. to 6·30 p.m. On Wednesdays the library will be closed at 1 p.m., to admit of cleansing the rooms.

"4. The librarian will be in constant attendance, excepting during his dinner, from 1 p.m. to 2 p.m., to afford the officers every information as to the books, and to give them every assistance in his power.

"5. Officers will not be allowed to smoke in any other part of the building than the smoking-room.

"6. Officers wishing to take a book to the smoking-room are requested to leave their names and the number of the book, with the librarian, and to return the book to the librarian when done with.

"7. No book is to be taken out of the building for any purpose whatever.

"8. It is particularly requested that the books should not be left in the smoking-room, but be returned to the librarian when done with.

"9. It is expected that no marginal notes, annotations, or marks be made in the books.

"10. It will materially assist to preserve the efficiency of the library if officers would be good enough to report to the librarian any defects in the books or missing pages; and the librarian will at once take the necessary steps to have such defects replaced.

"11. No presents of any kind to be made to the librarian."

A circular has been lately issued, calling the attention of medical men in India to the therapeutic properties of narcotine or anarcotine. Dr. Palmer, the opium agent, at Ghazeepore, has prepared a large quantity of it from the adulterated opium. His account is exceedingly interesting, and it would appear that his success in the treatment of remittent fever by the employment of this drug has been very marked; obstinate cases of hemiciania appear also to succumb to the influence of this drug. We hope many of our readers will furnish us with the results of their experience in this preparation, with a view to giving publicity to a medicine apparently second only to quinine and cobweb in the treatment of malarious fevers.—*Indian Lancet.*

Amongst the distinguished personages recorded as having been presented to the Prince of Wales at Quebec we see at the head of the list the name of Lord Aylmer, a descendant of Sir Matthew Aylmer, Rear-Admiral of the Red, one of the heroes of La Hogue, and Governor of Greenwich Hospital, who escorted to this country the first sovereign of the House of Brunswick, in his journey from Hanover to take possession of the throne. In tracing his descent from this ancestor, the present lord counts in the line many other ancestors in the naval and military service of the Crown. There is certainly nothing more interesting than to find the same gallant race who, in other times, served their Sovereign in camp, in council, and on the quarter-deck, now represented by one whose energy has helped to create a nation spreading over the wide territories of England in America.

GEORGE IV. FIGHTING AT WATERLOO.—Elliston the actor, when the *Coronation* was performed, in which he took the principal part, used to fancy himself the king, burst into tears, and hiccup a blessing on the people. I believe it is certain about George IV., that he had heard so much of the war, knighted so many people, and worn such a prodigious quantity of marshal's uniforms, cocked-hats, cocks' feathers, scarlet and bullion in general, that he actually fancied he had been present in some campaigns, and, under the name of General Brock, led a tremendous charge of the German legion at Waterloo.—*Cornhill Magazine for October.*

The Indian and China mails bring little news of importance, and the telegrams require elucidation. The news sent us from Shanghae, dated August 2, is that the allies left for the Peiho on the 26th of July, or, in other words, two days later than, according to the previous intelligence, the attack was to have been made. The French are said to have been landing simultaneously at Peihang; and, finally, we are told that a severe engagement had taken place with pirates, that 200 had been slain, and two European leaders captured.

Obituary.

he naval service has just lost one of its t popular officers of the old war, in the on of Vice-Admiral the Hon. Henry Dilkes g (on the retired list), who died at his lence in Queen's Terrace, Southsea, after a t illness, on the 23rd inst. The deceased ır was fourth son of the fifth Viscount ington, and grand-nephew of the unfortu- Vice-Admiral Hon. John Byng, who was ated the 14th of March, 1757. The ised officer entered the Navy in March, , on board the Arrow sloop. He next d as A.B. and volunteer the St. Alban's, nd the Topaze, 36, on the Halifax station; me midshipman in 1799 of the Madras, and proceeded in her to China; served wards as mate in the Imogene, Galatea, aur, and Texel; was nominated in 1803 cting-lieutenant to the Sulphur bomb, confirmed to the Sagesse in the West es; subsequently served in the Hindostan, Lancaster, 64; Centurion, 50, and Bream oner. Was engaged towards the close of in the Rio de la Plata, and intrusted by Home Popham with the command of the m hope in the first unsuccessful attack on te Video, and on the morning of its assault capture (Feb. 3, 1809) he entered the ch at the head of the 38th Regiment. He wards aided in seizing the men-of-war and t vessels in the harbour. On the 12th of mber he was confirmed in the command e Goree, sloop of 18 guns, 9-pounders, in h he afterwards had a very long running with the American brig Tom of Baltimore, ing 20 24-pounders and 200 men. In he joined the Mohawk, 13. In the brilliant scenes which were about that enacted in the Chesapeake, under Sir ge Cockburn, Captain Byng took a very guished part, which gained him the cly expressed thanks of the Commander- ief. Assisted in the attack upon Craney d; was nominated captain of the Diadem, was appointed captain of the ordinary at mouth in 1833, and from the 17th of uary, 1842, to the end of 1843 was em- d as commodore at Jamaica, but was elled to return home from ill health. placed on the retired list of captains, ; rear-admirals, 1849, and vice-admirals, The daughter of the gallant deceased, Hon. Beatrice Byng, has been for several one of the maids of honour to Her Majesty Queen.

e death of Captain Joseph C. Cammilleri, e reserved list, has been announced. The at deceased was a native of Malta, and ed the Navy in the month of November, on board the Spider brig. Captain nilleri saw much service during the war. was on board the Active at the gallant off Lissa, and also, in the same ship, at capture of the Pomone, French frigate. erved on the American lakes, and at the cessful attack on New Orleans. Captain ailleri was at all times a most active and is officer, and never neglected an oppor- of distinguishing himself; his promotion, ver, was of very slow growth, he was made tenant in 1815, a commander in 1829, as shelved with the rank of captain on 8th of July, 1851. Captain Cammilleri a Companion of the most distinguished of St. Michael and St. George, and up day of his death was only in receipt of *d.* a day, and when he claimed the increase half-pay to 12*s.* 6*d.*, which he was led to t when he was selected for promotion by rancis Baring in 1851 for his "good es," the Admiralty of the present day informed him that they had no funds for a purpose. In a letter to a brother on this subject, dated October last, he ides with this modest remark, "It is time the Admiralty did something for us ave seen so much service." He lived twelve months after this was penned, is last hours were not cheered by the tion of his hopes and just expectations. v thousands annually devoted to the se of the half-pay of the veterans of the ır would go far in making any Board of alty popular, and would tell well with the s and men now serving.

following Circular has been addressed e commanding-officers of all Volunteer :—"1st A, Cinque Ports Artillery Volun- Dover, August 14. The great sympathy has been evinced by all classes for the ers by the late melancholy accident to the under my command, induces me to sub- rough you to your corps the propriety in and all similar cases, should any such unately occur, of each Volunteer con- ing a sum not exceeding sixpence for the of the families of those whose lives have a sacrifice, and of those who have ed injuries while in the performance of duty. Trusting you will approve of this stion, Mr. Steriker Finnis, the treasurer s corps, will thankfully acknowledge any unication you may please to address t. I have the honour to be, sir, your ent servant, E. L. Wollaston, Captain- mandant."

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BALLARD—September 23, at Pembroke, the wife of Commander J. B. Ballard, R.N., of a son.
BRADFORD—September 25, at 33, St. George's Road, Eccleston Square, the wife of Lieut.-Colonel Bradford, Grenadier Guards, of a son.
BRISE—September 21, at Spains Hall, Essex, the wife of Lieut.-Colonel Ruggles Brise, of a son.
CHAMBERS—September 21, at Everton, Lancashire, the wife of Major J. H. Chambers, 6th Royal Lancashire Militia, D.L., J.P., of a daughter.
CHAMPION—August 8, at Mhow, India, the wife of Major J. H. Champion, Assistant-Adjutant General, Mhow Division, of a son.
CORNWALL—At Rawul Pindee, Punjaub, East Indies, the wife of Major Cornwall, 93rd Highlanders, of a daughter.
COX—September 24, at 17, Upper Eccleston Place, Belgravia, the wife of Major W. H. Cox, Royal Artillery, of a son.
DALE—August 12, at Kamptee, Central India, the wife of Captain J. Douglas Dale, 40th Regiment, Madras Army, Cantonment Magistrate of Kamptee, of a daughter.
DUFF—September 22, at Nairn, the wife of Major R. W. Duff, Depôt Battalion, Aberdeen, of a daughter.
HULEATT—September 21, at Stoke, Devon, the wife of the Rev. Hugh Huleatt, Chaplain H.M.'s Forces, of a son.
KELLY—September 21, at the Western Heights, Dover, the wife of Colonel Kelly, C.B., 47th Regiment, of a son.
KNOX—September 23, at 55, Inverleith Row, Edinburgh, N.B., the wife of Henry Needham Knox, Esq., R.N., Lieutenant Commanding H.M.S. Louisa, of a son.
LARKINS—September 22, at Byfleet, Surrey, the wife of Lieut.-Colonel W. H. Larkins, late of the Bengal Army, of a daughter.
MAYERS—September 21, at Heavitree, Exeter, the wife of Lieut.-Colonel Mayers, of a son.
NAPIER—September 21, at 4, Queen Street, Mayfair, the wife of Captain Gerard J. Napier, R.N., of a son.
SPARROW—July 27, at Woodbine Villa, Wellington, Nitginis, East Indies, the wife of George W. Pennington Sparrow, Esq., M.D., 3rd Battalion 60th Royal Rifles (née Pickering), of a daughter.

MARRIAGES.

BLAKENEY—ASHBROOK—September 25, at Durrow Church, Queen's County, by the Rev. W. Moore Brabazon, assisted by the Rev. R. Deverill, Major Robert Blakeney, 48th Regiment, to the Honourable Mary Sophia Flower, eldest daughter of Viscount Ashbrook.
CHEKE—TAYLOR—August 7, at Simla, by the Right Rev. the Lord Bishop of Calcutta, George Nicholas Cheke, Esq., Bengal Medical Staff, to Isabel Agnes, daughter of the late Captain Taylor, H.M.'s Indian Army.
DICK—ESPIE—September 20, at No. 12, Antigua Street, Edinburgh, by the Rev. Sir Henry Wellwood Moncreiff, Bart., William Dick, of H.M.'s Customs, London, to Agnes Gilmour, only surviving daughter of the late George Espie, M.D., of Brousterland, East Kilbride, Lanarkshire.
GODFREY—MANTELL—September 20, at St. Mary's Church, Bitton, Gloucestershire, by the Rev. D. R. Godfrey, rector of Stow Beadon, Norfolk, and brother of the bridegroom, assisted by the Rev. H. N. Ellacombe, vicar of the parish, W. H. R. Godfrey, Esq., Lieutenant and Adjutant of H.M.'s 35th Regiment, Madras Army, son of the Rev. Dr. Godfrey, of Bath, to Marianne, youngest daughter of F. R. Mantell, Esq., of Westover House, Bitton.
HALL—THEOBALD—September 22, at St. George's, Hanover Square, Edward Hall, Esq., 18th Royal Irish Regiment, to Augusta, fifth daughter of James Theobald, Esq., of Hyde Abbey, Winchester.
LOW—HALLOWES—September 25, at Milton Church, by the Rev. H. W. Redknapp, John Low, Esq., 15th Regiment, to Catherine Louisa, youngest daughter of Captain Hallowes, R.N., of Milton House, near Portsmouth.
PALMER—DAWSON—September 20, at Rochester Church, Staffordshire, by the Rev. Charles Palmer, rector of Withcote, Captain Thomas Palmer, late of the 47th Regiment, to Harriet Elizabeth, second daughter of the late Edward Dawson, Esq., of Whatton House, Leicestershire.
STEWART—TOWNSHEND—September 25, by the Rev. John Armistead, William Frederick Stewart, Esq., Captain in H.M.'s Bengal Irregular Cavalry, to Cornelia Jane, third daughter of Lee P. Townshend, Esq., of Wincham Hall, Cheshire.
STEWART—WHITEHOUSE—September 25, at Instow, N. Devon, by the Rev. A. Lloyd, rector, Captain Charles Thornton Stewart, of H.M.'s Bengal Engineers, to Eliza Maria, relict of the late E. S. Whitehouse, Esq.
WILLIAMSON—DEANE—August 7, at Bellary, by the father of the bride, Benjamin Williamson, Esq., M.B., Assistant-Surgeon, Hydrabad Contingent, to Charlotte Jane, eldest daughter of the Rev. B. O'Meara Deane, B.A., Chaplain on the Madras Establishment.

DEATHS.

BAKER—September 24, Jane, wife of Captain W. H. Baker, R.N., aged 63.
BAXTER—August 20, at Ahmednugger, Captain J. F. Baxter, H.M.'s 56th Regiment, eldest son of James Baxter, Esq., Sibdon Castle, Salop.
BENNETT—August 22, at Maldivia, St. Helena, Eleanor Lock Bennett, relict of Captain James Bennett, of the late H.E.I.C.'s St. Helena Regiment, aged 80.
BROOKE—June 27, killed in battle, at Waitara, New Zealand, Charles Francis Brooke, Lieutenant 40th Regiment, aged 25, youngest son of William Brooke, Esq., Master in Chancery, Dublin.
BUNDOCK—September 16, at Paignton, near Torquay, Devonshire, Mrs. Bundock, widow of the late Lieutenant John Bundock, R.N.
BYNG—Septemberr 24, at Southsea, Vice-Admiral the Hon. H. D. Byng, aged 78.
COODE—September 25, at Locking, Weston-super-Mare, Charles Penrose Coode, Major in the Royal Marines, and eldest son of the late Vice-Admiral Sir John Coode, K.C.B., aged 40.
DAVIES—August 3, at Kaira, Bombay Presidency, Captain Henry Freshfield Davies, of H.M.'s 29th Bombay N.I., aged 35.
GOLDSMITH—September 24, at Blenheim Lodge, Northfleet, Edward Goldsmith, Esq., aged 79, for many years in the H.E.I.C.S.
HAWES—September 21, Maria Gurney Hawes, youngest daughter of Sir Benjamin and Lady Hawes.
MOORE—September 5, at "The Aloes," Gibraltar, Eliza, wife of the Rev. Charles Moore, Chaplain to the Forces, and of Garlennick House, Cornwall.

CONTRACTORS.

Ex. Senor Don Jose de Salamanca. | Worthy S. Streator, Esq.

ENGINEER-IN-CHIEF—Thomas W. Kennard, Esq., C.E.

TEMPORARY OFFICES—11, St. Helens Place, Bishopsgate Street, London, E.C.

THE ATLANTIC AND GREAT WESTERN RAILWAY—378 miles in length—is the middle link of a Grand National Line of 6 feet gauge, 1200 miles in length, from New York through the great States of New York, Pennsylvania, Ohio, Indiana, and Illinois to St. Louis; of which about 800 miles have been many years in operation. It possesses extraordinary facilities for construction, having no tunnels, no deep cuttings, few bridges, and no ferries; avoiding the Alleghany Mountains on the South, and occupying the natural channel of trade between them and the Lakes on the North. It traverses some of the most fertile portions of New York, Pennsylvania, and the "Garden of Ohio." It passes through the large shire towns or centres of 14 Counties in the State of Ohio, with more than one million of inhabitants, and a taxable property of 260 millions of dollars, and accommodates 17 cities and towns in New York and Pennsylvania, heretofore without Railway facilities.

The differing laws of the States of New York, Pennsylvania, and Ohio, through which the line runs, render separate organisations necessary, though practically the whole is one line The present issue is confined to the Bonds of "New York," that section being now finished; a considerable portion of the works in "Pennsylvania" is also finished, and the "Ohio" section is in a very forward state, and can be completed in 1861. As each of these sections is opened, the Bonds will be issued to the public, all the funds being provided in the meantime by calls on Stock and advances by the Contractors.

The Atlantic and Great Western connects with the New York and Erie (of which it is a continuation) at "Salamanca," about 400 miles from New York; and the New York and Erie Railway Company deem "the connection to be of such importance, from the large and valuable traffic which it will concentrate and throw on their road, that they have covenanted to pay to the Atlantic and Great Western a bonus of 10 per cent. on the gross receipts from Freight and Passengers, during five years from completion; and 5 per cent. for another term of five years thereafter." This bonus is especially appropriated to securing the interest on Bonds.

The association of M. de Salamanca with the Atlantic and Great Western Railway, is a voucher that the merits of the enterprise are not overstated, and an assurance that the whole line will be rapidly completed and its resources developed.

The Bonds are secured by a first registered mortgage, constituting a lien on the income and all corporate rights, privileges, lands, franchises, plant and property of the Railway; and give the holder the right of conversion into shares at par until the 1st of January, 1864.

The Bonds of the present issue are of 1000 dollars each, redeemable at par in twenty years, are transferable without stamp or endorsement, with Interest coupons attached, and will be paid on the 1st of January and 1st of July in each year, at the Bank of London, Threadneedle Street, London, and at the Banking House of Messrs. Duncan, Sherman, & Co., New York.

The Bonds will be issued at 80 per cent., or 180*l.* sterling per Bond—to include the coupon due 1st January, 1861, and will be delivered on 1st November, or earlier at option of buyers.

The road represented by these Bonds is finished, its cost is known and liquidated, and its interest and dividends will be paid from its actual earnings.

The value of the security offered may be best appreciated by comparison with the four great lines of the same system.

The total Income of these lines for the last four years has been as follows.

	Erie. Dollars.	Pennsylvania. Dollars.	Baltimore and Ohio. Dollars.	New York Central. Dollars.
1856	6,349,050	4,720,193	4,385,951	7,773,169
1857	5,742,606	4,855,669	4,616,993	8,027,251
1858	5,151,616	5,185,330	3,856,485	6,528,412
1859	4,482,149	5,362,355	3,618,618	6,200,848

And these receipts, divided by the mileage obtaining traffic, give the following receipts per mile:—

	Erie. Dollars.	Pennsylvania. Dollars.	Baltimore and Ohio. Dollars.	New York Central. Dollars.
1856	11,237	12,722	11,572	12,848
1857	10,164	13,088	12,182	13,268
1858	9,117	13,976	10,175	10,790
1859	7,933	14,453	9,547	10,249
Average ...	9,612	13,559	10,869	11,788

The contract cost of the Atlantic and Great Western Railway is 37,000 dollars per mile, say 7400*l.* sterling. Hence, an average receipt per annum equivalent to that of these four great lines, of one of which it is a continuation—will give an annual return upon the whole cost, Capital and Bonds, of 17·35 per cent., allowing 50 per cent. for working expenses.

Copies of Prospectus, with Reports of Engineer-in-Chief and Maps, will be forwarded on application to the Brokers or to the Offices of the Company No. 11 St. Helens Place, London.

Hayward & Leggatt, 79, Cornhill, E.C.

M. M. KEANE, late Secretary of Royal Northern Yacht Club, at the request of several yachting friends, has established himself in West Cowes, Isle of Wight, as AGENT for the BUYING and SELLING of YACHTS, and as SUPERINTENDENT of their building, lengthening, and repairing; as also for marine insurance thereon. In support of his ability to fulfil these duties properly, and in respect of his being held worthy of confidence as regards integrity, he begs leave to state he holds testimonials of service speaking to these qualifications and others of a similar nature, which can at any time be shown if required. Any sale of yachts effected in conjunction with secretaries of royal yacht clubs or yacht agents generally. The commission to be considered as divisional. And, at the risk of appearing self interested, M. Keane feels bound to point out to the various owners of yachts in the far-off parts of Great Britain and Ireland the greatly increased prospect of both a speedy and satisfactory sale of their vessels if laid up in such a splendid yacht rendezvous as Cowes, so easily approachable from London and the whole south of England. Owners of yachts placing them in M. Keane's charge, at Cowes, for sale, after their crews have moored them, will have simply to pay a charge of 1*s.* per day as compensation for their safe keeping until sold; damage from fire and violence of weather or collision, M. Keane not being responsible for, these being necessarily covered by insurance; but security for the price of any yacht placed in his hands for sale can be fully given if demanded, or advance in cash on proposed amount of sale.

Be pleased to address Captain M. Keane, No. 10, Bath Road, West Cowes, Isle of Wight.

Terms of Agency for the Buying and Selling of Yachts:—Up to 1000*l.*, 2 per cent.; from 1000*l.* to 2000*l.*, 1½ per cent.; from 2000*l.* upwards, 1½ per cent. For constant superintendence on the building a new yacht, of Class A 1, 2 per cent.; this to include designs for interior accommodation, &c. For constant superintendence on the repairing or lengthening a yacht, if amounting to the sum of 200*l.*, 3 per cent.; and, if amounting to 300*l.*, 400*l.*, or 500*l.* or upwards, 2 per cent. Any expenses incurred by agent in advertising yachts for sale or purchase, at the desire of owners, or in forwarding telegrams, as also such travelling expenses as may be incurred at owners' request, to be defrayed by such owners.

THE EXMOOR PONIES, COBS, AND GALLOWAYS.—The ANNUAL SALE of SIXTY EXMOOR PONIES, the property of F. W. Knight, Esq., M.P., and TWENTY-FIVE COBS and GALLOWAYS, the property of Mr. Robert Smith, will take place (as usual) at Bampton Pony Fair, on Thursday, October 25.—Catalogues will be prepared one month prior to the sale, and every information given by Mr. Smith, Emmett's Grange, Southmolton.—Sept., 1860.

CHAMBERLAIN'S ROYAL PORCELAIN WORKS.—Admission of Visitors to the Works to be had on application at the Show Rooms, from 9 A.M. to 6 P.M. each day, except Saturday from 9 A.M. to 2 P.M.—W. H. Kerr & Co., "Proprietors," Worcester, successors to Messrs. Flight, Barr, & Co., and Messrs. Chamberlain & Co.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

GARDNERS' £2 2*s.* DINNER SERVICES complete, best quality. A large selection of patterns of the choicest description. Breakfast, Dessert, Tea, and Toilet Services, at the lowest possible prices. Cut Wines, 3*s.* 6*d.* per dozen; Cut Quart Decanters, 7*s.* 6*d.* per pair.—H. & J. Gardner (by appointment to Her Majesty, the Board of Green Cloth, Lords of the Treasury, Admiralty, Office of Works, Customs, and the other Government Offices), 453 and 63, Strand, Charing Cross, W.C. Established 108 years. Engravings free by post.

CABIN FILTERS.—The Last Improvement.—Dr. Ward says "I would strongly recommend every family going a distant voyage to take one of LIPSCOMBE'S SELF CLEANSING CHARCOAL CABIN FILTERS; it will be found invaluable." These Patent Filters can only be obtained of Lipscombe & Co., Temble Bar, W.C.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. Burrow, Great Malvern, Worcestershire.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. Dicker, 10, Craig's Court, Charing Cross, S.W.

MONEY.—Noblemen, Officers in the Army, Persons holding Government Appointments, Clergymen, and other Gentlemen, can have Advances upon their notes from a private channel without life insurance or delay, and with secrecy.—Apply to Mr. Hudson, 28, Regent Street, Piccadilly, W.

H. J. & D. NICOLL'S Establishments Gentlemanly and Moderate-priced Clothing REGENT STREET, CORNHILL, & MANCHEST

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND STREET, LONDON, W.

DINNEFORD'S PURE FLUID MAGNESIA

has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
and Sold by all respectable Chemists throughout the Empire.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, Deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.*; Ointment, per pot, 1*s.* 1½*d.*, and 2*s.* 9*d.*; Essence, per bottle, 11*s.*, or family bottle containing four times that quantity, 33*s.* Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 78, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Just published, gratis, or post free for one stamp, to be had of all Agents, and at 22, Newman St., W., Extracts from Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

NERVO-ARTERIAL ESSENCE, prepared only by Dr. WM. BATCHELOUR, M.R.C.S.E. 1835, and M.L.A.C. 1834. It strengthens the vitality of the whole system without reaction, and speedily removes nervous complaints. In bottles, at 2*s.* 9*d.*, 6*d.*, 11*s.*, and 33*s.*, at Goodyer's, 31, Regent Street, Hill's; Butler & Crispe's, 4, Cheapside, E.C.; Sutton & Co., Bow Churchyard, E.C.; Barclay & Sons, Farringdon Street, E.C.: 12, Finsbury Place South, City, E.C., and all Chemists.

RUPTURES. — HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage 6*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

NAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; SANGER, 150, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KEATING, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.

EVANS & LESCHER, London, Patentees.

CHARLES KNIGHT'S POPULAR HISTORY OF ENGLAND.

THE Publishers of this Work have to announce a change in its mode of issue. The necessity for this change rests upon the following representation of the Author, which appears to the Publishers as conclusive as they trust it will be satisfactory to the Public.

"I have been occupied," says Mr. Knight, "during nearly five years, in writing the Popular History of England, for Monthly Publication. With three exceptions it has appeared regularly during that period; and has now reached to Fifty-three Numbers, bringing up the narrative to 1793. I now find it impossible,—in the first place, with a proper regard to my own health, and, secondly, with an anxious desire to complete my book in a way to justify the favour with which it has been received,—to proceed with a *Monthly* Publication. The pressure of a periodical issue, with so short an interval between each publication, has become incompatible, according to my view, with a due regard to the research and thought which are necessary to deal with the vast accumulation of materials for history since the period of the French Revolution. The difficulty which now presses upon my responsibility for accuracy and impartiality has not been felt by me in the earlier stages of my undertaking, when the field of investigation was more limited. It has now become so onerous as to demand a decisive change.

"I propose, therefore, that it should be announced that the publication in Monthly Numbers will be discontinued, and therefore that a Number will not appear on the 1st of October.

"That the quantity required to complete Vol VII. will be published as a Part, or Section, in the month of January, simultaneously with the publication of the Volume.

"That Volume VIII., completing the work, will be published in the course of 1861; and, for the convenience of purchasers, will be divided into two Parts, or Sections."

In making this announcement the Publishers have only to add, that on the appearance of each of the Parts, or Sections, the Work will also be on sale in the usual form of Shilling Numbers.

☞ The Six Volumes of the POPULAR HISTORY OF ENGLAND, which are now completed, bring down the narrative from the Invasion of Cæsar to the close of the American War. The first Four Volumes, forming the First Division of the Work, carry down the history to the Revolution of 1688, and are published with a copious Index. The Second Division, commencing with Vol. 5, will come down to that period of the reign of her present Majesty, which has become a constitutional epoch in the important change of the commercial policy of the country. The price of each Vol. is 9*s.*

Illustrated Lists of Prices post free. John Lillywhite has lately been specially appointed to supply several of H.M. Regiments at home and abroad.

CRICKET. — J. D. BARTLETT, Manufacturer of the Repercussive and Cane-handle Bats, which are acknowledged by our best Cricketers the best driving bats ever made. They have a beautiful spring in the handle, and are warranted not to break. Clubs, Schools, and Regiments supplied at reduced prices, wholesale and for exportation.—171, Waterloo Road, S.W.

MAPPINS' TABLE CUTLERY.—SEASON 1860.

CAUTION.—MAPPIN BROTHERS beg to advise their customers and correspondents that they have only one establishment in London, viz., at London Bridge, and they hope that their friends will be careful to address them in full, either Mappin Brothers, London Bridge, London, E.C.; or Mappin Brothers, Queen's Cutlery Works, Sheffield. Established in Sheffield, A.D. 1810. None are genuine without their corporate mark, the "Sun," granted to their father by the Cutlers' Company of Sheffield, June 26, 1835.

Messrs. MAPPINS' Table Knives still maintain their unrivalled superiority; all their Blades being their own Sheffield Manufacture, are of the very first quality, with secure Ivory Handles, which do not come Loose in Hot Water; and the difference in price is occasioned solely by the superior quality and thickness of the Ivory Handles.

MANUFACTORY, QUEEN'S CUTLERY WORKS, SHEFFIELD.

DAVIESON'S EVERLASTING TEETH.
THE LATEST DISCOVERY.

MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 448, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

[COPY.]
"Ordnance Select Committee, Royal Arsenal, Woolwich, April 17th, 1860.
"Sir,—Since I last addressed you on the subject of your Waterproof Cartridges, I have to inform you that 60 of them have been exposed in an atmosphere saturated with moisture, at a temperature of 90 degrees, for a fortnight. The result has been favourable, as far as this test is concerned, to their Waterproof qualities.
"I have, therefore, to request you will be good enough to state, for the information of the Committee, the nature of the lubrication you employ; whether it is in any way connected with the Waterproof properties of the Cartridge, and whether, in the event of their being adopted, the Service lubrication, which is wax, might not be employed.
"I have the honour to be, Sir,
"Your obedient Servant,
"J. H. LEFROY, Colonel, R.A.
"Mr. Thos. H. Anthony,
"37, Broad Street, Birmingham."

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

OF course it is very gratifying to learn that the Admiralty has at last given orders for building more iron-cased frigates. On September 1st, we called special attention to the startling last words of Lord Clarence Paget in the House of Commons, announcing—almost as a boast—that France would have ten such vessels to our four; and we then expressed a hope that, when Parliament should next meet, his lordship would be able to state that at the very least our armour-plated vessels equalled those of France. Since then the subject has been incessantly before the public, and has been treated in the *Times* both in leaders and leaded correspondence, we might say, of the heaviest metal. We cannot think, however, that the manner in which this important matter has been handled in England redounds much to our credit. Everybody appears to have their own pet theory about it—that is, everybody except the authorities. Not that they have therefore thought it a duty to enact the part of impartial judges, anxious to arrive at the truth, and not caring in what quarter they might find it. On the contrary, they have rather acted as if it were capital fun to set the inventors by the ears, and point at their various contradictions. We had four iron-plated vessels laid down to be built—laid down in fact so firmly upon the stocks, that it looks as if they are never to quit them. They were ordered by the Admiralty, because "France was doing something of the sort,"—some called them "Pakington's folly"—and their merits were not believed in at the Admiralty. In this free country it was not surprising that some said they would be of no use except as rams to run down line-of-battle ships; some others laughed at the idea of the line-of-battle ships calmly waiting to be "pitched into" in such a rough manner; some said they would not swim; others that they would roll like tubs; some that they would have no speed; some that they would be shaken by the concussions of broadsides and fall to pieces; some that they would be set on fire through their open port-holes; some that they could not carry heavy guns; and the mischief is, there has been nobody earnestly and heartily engaged in hearing and weighing the evidence on every side, and obviating objections and difficulties. Sir George Sartorius, although a British Admiral, could get no hearing at the Admiralty; and even now, in October, 1860, when the French have the La Gloire and the Pallas on the water, the La Normandie ready for her armour, and the Magenta and the Solferino and the other five we know not how far advanced, we have Halsted *versus* Whitworth still pleading as to facts before the general public, like contending suitors in the outer courts of Westminster Hall.

We hinted in the GAZETTE of 15th September, that we had reason to believe the French had discovered a composition of metal, more tough, light, and elastic than iron or steel for their blindage. We must not therefore rest contented with vessels which are unquestionably better than wood, even if not entirely invulnerable; we ought, while those now to be laid down are building, to strain every nerve to discover the French composition, or otherwise to devise other vessels that will be quite invulnerable. On 1st September we gave a description of the Magenta and Solferino, which was published in November, 1859; we now beg to call attention to the following extract from a letter of the French correspondent of the *Standard*, published 22nd of October last, which will show that what is now being discussed in England, had then been already settled in France, after five years diligently spent in the necessary experiments:—

"While on the subject of these floating batteries, allow me to point out a terrible mistake which our naval authorities have fallen into. From sundry paragraphs which have recently appeared in the London papers, it appears that the old floating batteries which were built at the time of the Crimean war have been used as targets to test the Armstrong guns, and the shot having gone through the iron plates, it is given out that the Armstrong gun renders iron plates nugatory. This is a mistake that may cost us very dear when comes the tug of war. It is highly probable that the old iron plates that have been rusting for the last five years on the sides of the Trusty afford no resistance to the new conical shot; but the plates which are used in the French service, and which have been exposed to the severest tests during the last five years, tell a very different story. *In the first place these plates are not iron, but an amalgam of iron, steel, and another substance, the nature or name of which I have, notwithstanding the most strenuous efforts, been unable to ascertain. But the composition is much lighter than iron, enables the thickness of the plates to be immensely increased, while their impenetrability to shot, conical or otherwise, has been fully proved.* The experiments took place in this fashion:—A target was formed with great care, exactly like the section of a ship's side, and was covered with these new plates. *It was then for six months fired at three times a week at various ranges, the maximum of which was a hundred, and the minimum twenty-five yards, by unrifled 90-pounders throwing a round shot, and by rifled 50-pounders throwing a conical shot weighing 100 lbs. One shot only* (a conical one) *penetrated the plates;* the head of the ball lodged in the plate; and the concussion was such that the remainder of the shot broke clean off as it had been shaved by machinery. It is with these plates that the floating batteries, the gunboats, and the steam rams are now protected; and it is quite obvious, whatever may be the merits of the Armstrong gun, that the shot from it passing through the old plates by no means proves that it would be so successful against the new description of *blindage*."

Surely this should make us think. And is it not a pity that we have no Board of Construction under the Admiralty, to have thought of all this long since, before it is now thrust upon our notice by the busy doings of our neighbours across the Channel? It is very true the Royal Commissioners on the Defences of the Kingdom recommended floating batteries, with guns mounted under shot-proof cupolas, as part of their scheme. And it is very gratifying to find the press has such influence, that by incessant "nagging" on the subject, another tardy step is now taken. But after all, we are sorry to say the press is not very highly instructed, or quite "posted up," on the subject. To say nothing of the almost antiquarian lore of the *Saturday Review*, even on Thursday last our leading contemporary, doing its best to sum up between Mr. Whitworth and Captain Halsted, speaks of the flat-fronted Whitworth bolts, as similar in their action to round shot, and having less power of penetration than if pointed, when we thought it was notorious that the flat-fronted, elongated shot's specific merit was its power of punching clean holes through the metal. When a bolt is thus flat-fronted, and strikes fair "end on," its whole force is brought to bear equally upon the whole surface of the part it strikes, and all must yield to the stroke, if it cannot resist and the shot is not diverted. But when a pointed elongated ball strikes "end on," it impinges with its whole force only upon a very small point, and as it begins to enter the plate a surrounding lateral pressure is obliquely brought to bear against the force of the bolt, which therefore cannot on mechanical principles make its way by a clean "punching," like the flat-fronted missile. A round shot has an effect between the two. It has not the sharp "punching" penetrative power of the flat-fronted bolt; but any part of its circumference being flat—so to speak—for a few inches round, it has almost an equable and direct action, and batters in, if it cannot cut through, the plates. As the initial velocity of round shot from 10-inch guns exceeds that of any Armstrong or Whitworth bolt, the firing of the round shot at short distances, such as 200 yards, is of course the severest test that can be applied to prove the strength of metal plates. It was such a test that was recently applied by Captain Hewlett to numerous plates at Portsmouth, the effect of which was stated in the *Times* of 14th September last in the following words: "The only results that have been obtained have been the success of the Jones's angulated principle." All the plates struck direct were smashed or broken, and the framework behind them was loosened and shattered. By diverting the shot, the effect of the heavy concussions was avoided; and the problem is, how far that principle can be carried out and applied.

There is one other most important point that appears to be generally overlooked in the discussion of iron *versus* wood, and armour-clad frigates *versus* line-of-battle ships. Many, almost all writers, have dwelt upon the overwhelming power of the liner's guns, *if* she could only safely approach to turn round and bring her broadside to bear. Could nothing then be done to shield the bows and bulwarks of a wooden line-of-battle ship, or a heavy armed wooden vessel like the Mersey, or similar vessels with still greater speed and the highest sailing qualities, while they approach an iron-cased frigate, till near enough to fire a salvo or concentrated broadside into her? This would meet Mr. Whitworth's objection, that vessels wholly iron-clad cannot carry their heavy armour and a heavy armament besides. These vessels would carry the minimum extent of iron casing at their bows, with guns of the heaviest calibre at their sides. They might be as invulnerable as the iron-cased vessels while both were "end on," approaching one another; but when they came to close quarters, the wooden vessel (if Mr. Whitworth's hypothesis is correct) would, with her heavy armament, have altogether the advantage.

The Members of the Committee appointed to inquire into the state of the Royal Dockyards will resume their labours, under the presidency of the Right Honourable Frederick Peel, on Tuesday the 16th instant.

The authorities at Whitehall have, during the week, had under their serious consideration the necessity of building a further number of iron armour-clad ships; and, although we believe nothing definitive has as yet been resolved upon as to the exact plans which are to be used in their construction, we have reason to know that several of these ships will be laid down. It is further proposed that one of these shall be built at Chatham Dockyard. We shall, consequently, be in a position to judge as to the respective merits of the work performed in public and private establishments.

The following changes and appointments among the superintending officers of recruiting districts have recently taken place. Lieutenant Oldham, 51st Light Infantry, has moved from Clonmel to Reigate, vice Lieutenant Fagan, 4th Regiment, and is succeeded at Clonmel by Lieutenant Hawker, 47th Regiment. Lieutenant Eyre, 48th Regiment, has moved from Preston to Manchester, vice Ensign Emerson, 8th Regiment, and is succeeded at Preston by Lieutenant Hartwell, 2nd battalion 17th Regiment. Lieutenant Bell, 1st battalion 16th Regiment, has been moved from Limerick to Lincoln, vice Lieutenant Gilby, 32nd Light Infantry, and is succeeded at Limerick by Lieutenant O'Connor, 2nd battalion 6th Regiment. Lieutenant Browne, 1st battalion 19th Regiment, is appointed superintending officer at Aberdeen, in succession to Lieutenant Carew, 29th Regiment, who rejoins his corps.

The following officers have been awarded good service pensions of 100*l.* a-year each, viz.: Major-General C. W. M. Balders, C.B., who has just retired from the command of the cavalry depôt at Maidstone; Colonel E. B. Brooke; Colonel Pole, 12th Lancers; Colonel Little, C.B., 9th Lancers; Colonel W. Parke, C.B., half-pay, 53rd Regiment, late of the 72nd Highlanders; Colonel W. J. D'Urban, on the staff at the Cape, and Colonel W. D. Deverell, retired full pay.

THE ARMY.

1st Life Guards. Captain Bateson and Lieutenant Lord Powerscourt are on leave of absence for an extended tour in India.

1st Dragoon Guards. Captain Crewe has left England to join the head-quarters at Bangalore.

7th Hussars. At a general court-martial assembled at Umballa, June 23, Cornet Richard Simmons was arraigned on the following charges:—1st. With having at Umballa, on May 12, failed to appear at the place appointed by his commanding officer for parade, for watering order, although duly warned to attend. 2nd. With conduct to the prejudice of good order and military discipline in having at Umballa, on May 12, after having been directed to attend at the commanding officer's quarters to account for his absence, as stated in the first charge, appeared there in a state of intoxication. 3rd. With having at Umballa, on the night of May 12, before being set at liberty by proper authority, broken the arrest in which he had been placed by his commanding officer, by quitting his quarters and proceeding to those of the acting adjutant of the regiment. 4th. With behaviour in a manner unbecoming an officer, and to the prejudice of good order and military discipline in having, on the occasion of his proceeding to the quarters of the acting adjutant, as above stated, presented a pistol at that officer, and endeavoured to compel him by intimidation to return his, Cornet Simmons's, sword. *Finding.*—The Court is of opinion that the prisoner, Cornet Richard Simmons, of Her Majesty's 7th (the Queen's Own) Light Dragoons (Hussars), is guilty of the charges preferred against him. *Sentence.*—The Court sentences the prisoner, Cornet Richard Simmons, to be cashiered. Approved and confirmed, Hugh Rose, General Commanding-in-Chief in India. *Recommendation to Mercy.*—The Court begs to recommend the prisoner to the merciful consideration of His Excellency the Commander-in-Chief, on the ground that his present position, recently attained, proves former meritorious service. *Remarks by His Excellency the Commander-in-Chief.*—The finding and recommendation of the court to mercy are just. It would not be for the good of the Service that the prisoner should remain in his regiment, to which he has given an example of very great insubordination and irregularity; on the other hand, the prisoner's very good and gallant services do not allow Sir Hugh Rose to abandon him to his fate. The benevolence of His Excellency the Viceroy enables him to provide Mr. Simmons with a useful and honourable livelihood, and to afford him an opportunity of regaining the esteem of his superiors, which he won by his devotion and his bravery.—Cornet Simmons had been recently promoted from the ranks for gallantry in the field.

9th Lancers. A squadron arrived at Aldershot from Dorchester on Tuesday, one from Exeter on Wednesday, a third on Thursday, and the head-quarters yesterday. The regiment is quartered in the South Cavalry Barracks. Cornet Hepburn is on sick leave to Oct. 15.

10th Hussars. Captain Levett is in command of the squadron at Ipswich. Colonel Baker is in Italy, observing the military movements of the combatants in Naples.

12th Lancers. Lieut.-Colonel Fyler and Captains King and Allen have been placed on half-pay by the reduction of the strength of the regiment from the Indian establishment.

16th Lancers. The officers with the squadron at Woolwich are Captains Dynon and Stewart, and Lieutenants Stoodley and Barron.

Royal Artillery. The K battery, Royal Horse Artillery, has removed from Aldershot to Dorchester, and No. 5 field battery from Aldershot to Exeter, to be stationed. Colonel St. John G. Browne arrived at Pembroke Dock on Thursday last, to take command of the Artillery in the district, in succession to Colonel Burnaby, who leaves with his corps. The R battery, commanded by Brevet-Major C. G. Arbuthnot, and No. 5 battery of the 8th brigade, under the command of Captain A. Green, have left Aldershot, the former to be stationed at Dorchester, and the latter at Exeter.

Royal Engineers. The following alterations have occurred in this corps, viz.:—Colonel Twiss, appointed Commanding Royal Engineer at Chatham; Lieutenant-Colonel Laffan, ordered to Portsmouth; Lieutenant-Colonel Owen, C.B., removed to Devonport; Lieutenant-Colonel Baillie, lately arrived from Newfoundland on leave; Lieut.-Colonel Bourchier, C.B., arrived from the Bahamas on leave; Captain Pasley, late on the seconded list, placed on the effective list, and ordered from Melbourne to New Zealand; Captain Stuart, appointed to the Inspector-General of Fortifications' office; Captain J. H. Smith, appointed deputy-assistant-quartermaster-general at Aldershot; Captain Murray, ordered from Aldershot to Newfoundland; Captain Gray, to New Brunswick; Captain Scratchley, to Melbourne; Captain Savage, to the West Indies: Major Armit, to Guernsey; Captain Moggridge, from the West Indies, on sick leave; Lieutenants Bolland and Salmond, removed from Aldershot to Pembroke; Clive from Aldershot to Portsmouth; and Bond, from Dover to Chatham; Swetenham, on leave in India; Frankland, on leave from Gibraltar; and Wheatley, ordered to Gibraltar. Colonel E. T. Ford, at present in command at Pembroke, will succeed Colonel Walpole, who is about to retire from the Service on Major-General's pay as Commanding Royal Engineer at Woolwich. The 33rd company, Captain Stevens, will relieve the 35th company at Aldershot, the latter being under orders to proceed to New Zealand.

Grenadier Guards. The 3rd battalion, numbering about 800 of all ranks, under Colonel the Hon. H. H. M. Percy, V.C., has arrived at the Tower from Dublin to be quartered, and the 1st battalion, of the like strength, under Colonel Lambert, has proceeded to the Royal Barracks, Dublin, to be quartered for one year.

10th Regiment. Captain J. M. Smyth of the 1st battalion is about to retire from the Service. Surgeon Franklin is on leave to November 30.

11th Regiment. The 1st battalion of the 11th Regiment, under the command of Colonel Moore, was on Wednesday inspected at Portsmouth by Major-General Lord W. Paulet, C.B. The regiment formed in line on Southsea Common, and received Lord W. Paulet on his arriving on the ground with the usual military honours. The regiment then formed into columns of companies in open order, and were closely inspected by his lordship, passing along the front and rear of each rank. Marching past in slow and quick time followed, together with a variety of evolutions which were all gone through with steadiness and precision. The bayonet exercise, with and without the word of command, was most excellent. At the conclusion of the inspection his lordship, addressing the regiment, alluded to the fact of there being as is always the case, some men in the regiment, whose numbers, he said, did not exceed three or four, but who had given a good deal of trouble, and whose perversity he was determined to conquer before he had done with them. "Barring this," said his lordship, "I have no fault whatever to find with the regiment. It is all I can wish. I know how you can do your work, as I have had you under my command previous to your arrival in this garrison."

24th Regiment. The *Port Louis Gazette* says:—"The 24th Regiment has now been in our island nearly two months. It has often happened that when a regiment lands in a strange country after a three months' voyage, there are some irregularities and disorders committed by a few out of so large a number of soldiers. It is with satisfaction that we announce that nothing but favourable reports reach us of the soldiers of this regiment; and their conduct so far reflects credit not only on themselves but on their colonel and officers also. As we have not been sparing of blame towards another regiment when we thought it was well deserved, we shall be excused for having noticed the orderly conduct of the men of the 24th Regiment since their arrival. Let us add that we have not had to record for some time any complaints against the soldiers of the 5th Regiment, which leads us to think that a good example has not been lost on them."

26th Regiment has moved from the Curragh to Dublin, to be stationed for the winter.

36th Regiment has left the Curragh for Richmond Barracks, Dublin, to be stationed for the winter.

41st Regiment. On Saturday last the quarters of this regiment at Aldershot were the scene of two awful murders. It appears that about half-past 1 o'clock, Owen Chipp a lance-sergeant, and John Coles, a lance-corporal of the 41st Regiment, were sitting at the table immediately after dinner, playing draughts, when, without the slightest provocation on their part, a private named James Johnson, deliberately walked behind Sergeant Chipp, and placed the muzzle of his rifle in the middle of his back, and fired; the bullet, after going through the unfortunate man's body, entered the breast of his comrade, Corporal Coles, passed through his body, and fell flattened against the wall. Sergeant Chipp rose, staggered three or four paces, and fell dead between two bedsteads. Corporal Coles fell backwards and died instantly. The murderer was immediately secured and taken to the guard-house, from whence he was conveyed by two policemen, escorted by two privates and a corporal, to the police-station. The only cause given for this dreadful occurrence was, that the murderer had been sentenced to three days' confinement to barracks for insubordination, both the deceased having appeared against him. At the inquest the prisoner endeavoured to make out that the occurrence was accidental, but a verdict of wilful murder was returned.

47th Regiment. His Royal Highness the General Commanding-in-Chief, after the review of the troops at Dover on Thursday last, expressed his gratification at the manner in which this regiment manœuvred on that occasion. The following is the substance of the Regimental Order issued by Lieut.-Colonel Kelly, C.B. "The colonel commanding has much pleasure in making known to the officers, non-commissioned officers, and men of the regiment, the remark of His Royal Highness the General Commanding-in-Chief, relative to the efficiency of the regiment, which was expressed in the following terms—'I consider the 47th one of the best regiments in the service.' The commanding officer has therefore much pleasure in thanking the officers and non-commissioned officers for the able support they have rendered him in bringing the regiment to its present state of proficiency, which elicited from the Commander-in-Chief the above remark, which he considers must be highly gratifying to all ranks."

60th Rifles. The 4th battalion has moved from the Curragh to Richmond Barracks, Dublin, to be stationed.

96th Regiment has moved from the Curragh to Ship Street Barracks, Dublin, to be stationed.

With the view of encouraging the cultivation of a knowledge of the Hindustani language among the officers and troops belonging to the East India depôts at Chatham, the authorities at the Horse Guards have appointed a teacher of that language to be stationed at the garrison.

On Thursday detachments of troops belonging to the 1st battalion, 19th, 75th, 81st, 91st, and 94th Regiments, arrived at Chatham garrison from Eastbourne, where they have been stationed for some time, in order to go through a course of long-range rifle-firing previously to embarking for India.

THOMAS'S GUN.—The trial of Thomas's rifled cannon was concluded last Tuesday with the most satisfactory results. Five rounds were fired; two at ten degrees, and three at 37 and a half degrees of elevation. The charges of powder were 23 lbs., 25 lbs., 25 lbs., 25 lbs., and 28 lbs. It was ascertained the first day that the velocity was about 1200 feet a second, and the time of flight of the last shot was 40 seconds. One of Armstrong's guns was lately fired with the same elevation, when a range of over 8000 yards was obtained, the time of flight being 32 seconds; but as the velocity of his shells is nothing like 1200 feet a second, the range obtained on Tuesday must have been considerably greater. There was no sign of the slightest strain upon the gun after this enormous test—a quarter of a hundredweight of powder, and an expanding projectile of 174 lbs. weight—a test to which no other gun has ever been subjected. Both Mr. Whitworth and Sir W. Armstrong had numerous private trials before their guns were publicly tried, but the construction of this large gun was based upon a system developed by thousands of experiments, and Mr. Thomas felt so assured of its truth that he refused all attempts that were made to have a private trial at Stockport before the gun was sent to Woolwich.

The medical students for commissions as army surgeons, who have been ordered to join the new Army Medical School established at Fort Pitt, have arrived at head-quarters, Chatham, in order to be present at the formal opening of the school.

Frequent reports having been made to the military authorities at Chatham of the great danger of accidents occurring to the public and military from the want of caution exhibited by the parties engaged in rifle firing at the practising-ground, St. Mary's, an order has been issued by Major-General Eyre to the troops under his command, directing that no rifle matches are to be made without notice having first been given to the instructors of musketry of the several battalions, who will fix the day and hour at which such matches may take place.

SHORNCLIFF.

At the recent visit of the Duke of Cambridge to the camp, His Royal Highness inspected most minutely every part of it; the Artillery mess-room at the permanent barracks drew his attention from its very limited extent, as also the very imperfect fittings of the kitchen, and requested an estimate might be made of the cost of a new mess-room, as also a new and improved stove for the kitchen. This shows the desire His Royal Highness has to increase the comforts of both officers and men in the Army.

4th brigade Royal Artillery.—The half-yearly inspection of the above brigade by Lieut.-General Mansel, K.H., commanding the south-eastern district, took place on Thursday last, the gallant general made a most minute inspection of the brigade. A foot undress parade took place at 2 p.m., when the men being drawn up in line in open order, the general passed down both ranks, and expressed his entire approbation of the appearance of the men, and the efficient state of the brigade. At the close of the inspection the general partook of luncheon in the mess-room, with Lieut.-Colonel the Hon G. L. Devereux and the officers of the brigade.

The 4th battalion of the Military Train, under the command of Lieutenant-Colonel O'Brien, paraded on Tuesday morning last for the purpose of presenting a medal and a gratuity of 15*l.*, for long and meritorious service and good conduct, to Regimental Sergeant-Major John Gibbon. The colonel, in making the presentation, addressed a most eulogistic speech to the sergeant-major, and afterwards called the attention of the younger soldiers present to the proud position in which the sergeant-major stood on that occasion, reminding them at the same time that the like course was open to one and all of them.

Captain F. A. Hawker, No. 1 Company, Civil Service Rifle Volunteer Regiment, and Ensign T. B. Robertson of the 1st (Victoria) Middlesex Rifles are at present doing company and battalion duty with the 17th Leicestershire Rifles at this camp.

The new reading-rooms in the D and E ranges have been opened, the former for the use of the 17th Regiment, and the latter for that of the 4th brigade of Royal Artillery.

A few pounds might be very judiciously expended in levelling the south side of the camp, opposite the saluting point, which with some beech, or other material scattered over it, would admit of better marching past than that which occurred on the late visit of inspection of the General Commanding-in-Chief, when, although His Royal Highness shifted the point to a more favourable spot, the ground, from the heavy rain of the preceding day was so muddy that it was next to impossible for good marching to be made, the men slipping about in all directions.

The repairs of the General Hospital are still protracted, and it will be winter before the invalids on the camp are accommodated in their own comfortable quarters once more; of course nobody is to blame for the delay that has taken place, but all engaged in the hospital from the inspector downwards have suffered from the inconvenience thereby occasioned.

STATIONS OF THE BRITISH ARMY.

Corrected up to 5th October, 1860.

[Where two places are mentioned, the last-named is that at which the Depôt is stationed.]

1st Life Guards—Regent's Park
2nd do.—Hyde Park

CAVALRY MEDICAL OFFICERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In alluding, in your issue of the 22nd ult., to the manifest injustice of deducting 8½*d.* a day from the pay of cavalry medical officers for every charger kept by them for the public service, seeing that the Warrant of 1858 exempts surgeons of infantry regiments from such deductions, you omit mentioning that, prior to the passing of the said Warrant, cavalry medical officers were in receipt of an allowance of 1*s.* per day for every such horse kept for the public service. Directly the Warrant passed, this sum was disallowed the cavalry surgeons, though it is still granted to the Horse Artillery medical officers.—I am, &c.

OBSERVER.

CAVALRY EXPENSES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—You glory in the success of Mr. Sidney Herbert's scheme so far, and well you may. Nevertheless, I fear many cornets that have lately entered must soon leave the Service on account of having been deceived as to the choice of chargers. The original Order of Council said, "Troop or remount horses." Now the choice is confined to the latter, and cornets on joining have every obstacle thrown in their way, and (should they be allowed a horse at all) find that they must pay within six days 30 guineas each, besides the expenses and risk of breaking for young horses that will not be fit for parade for ten or twelve months, thus raising the price to 47*l.* or 50*l.* This is bad enough, but after all, the cornetcy, outfit, &c., may be got over for 1000*l.* But the mess expenses are much more than any young man ought to be called upon to pay, whatever his means may be, *as a soldier.*

The mess account amounts to from 190*l.* to 250*l.* per annum, and the young officer cannot lower it; he has also to pay and clothe two men, with one woman, and two horses; this with washing will take another hundred: add to this replacing uniforms, plain clothes, boots, subscriptions to balls, and fifty other calls, with—what is worse than all—drink allowance to the troops, instruments to the band, champaign to the mess, &c. If the cavalry is to be kept up at all, cornets ought to be enabled to live on their pay (144*l.*) with a private allowance of 150*l.* or 200*l.* a year, and the infantry regulations as to wine ought to be insisted on, dinner and after-dinner wine being a separate charge. I, as a guardian of an officer who does not run into debt, shall persuade him to leave the Service sooner than submit to such a foolish expenditure. Country gentlemen with landed property ought not at the commencement of life to be taught to squander money away in mere eating and drinking. Will such a course teach them to improve their estates? I have not the least objection to the Minister for War or Commander-in-Chief knowing my name, if you are called upon for it.—I am, &c.,

A GUARDIAN.

VOLUNTEERS AND REGULARS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—An order has been issued to the effect, that all Volunteer officers are to be saluted when in uniform. Without questioning the propriety of this, may I ask as an officer in the regular Army, whether the compliment is to be reciprocated by privates of Volunteers? If not, you may be prepared to hear of a great deal of bad feeling being excited between those who are not already as united as they might have been, had the Volunteers adhered to the original intention of the great "movement."—I am, &c. CENTURION.

A Circular Memorandum has been issued from the Horse Guards quoting reports from the Ordnance Select Committee, relative to Martin's liquid iron shell, for the information and guidance of officers of artillery. Further experiments have been ordered to be carried on with the view of ascertaining—1. The maximum charge the shells will stand. 2. Their effect against fascines, gabions, platforms, and carriages. 3. Their fitness for enfilading works. 4. Their effect when filled one hour before being discharged. The destructive effects of this shell are fully detailed in the reports accompanying the Circular. In the latest experiment five 8-inch shells, filled with molten iron, were fired from a 68-pounder at the Undaunted, frigate, at distances varying from 200 to 350 yards. Four set the ship on fire, which was extinguished. The fifth, fired at 350 yards with 8 lb.-charge, set fire to her so effectually that it was found necessary to sink her.

A grand review of Portsmouth garrison took place on Southsea-common on Thursday afternoon. The troops engaged consisted of a field battery of Royal Artillery of six guns, a squadron of Yeomanry Cavalry; 2nd Hants Volunteer Artillery Corps, 5th and 6th Hants Volunteer Rifles, 10th brigades of Royal Artillery, 1st and 2nd battalions of the 11th Regiment, the 19th Regiment, the Royal Marine Light Infantry, from Gosport, and the Bedfordshire Militia. After they had been inspected by Major-General Lord W. Paulet and a numerous staff, the troops marched past in review order, and afterwards executed a series of movements of attack and defence. They advanced towards the beach to the eastward of Southsea Castle, and commenced a vigorous fire, being supported by the heavy guns on the Castle ramparts, which made some good practice with shell and shot. The troops finally retired into the garrison, which commenced a tremendous cannonade from all the guns commanding Southsea Common and the approaches to the King William Gate, the fortifications being also manned by the troops of the line, who took up their position as they entered the garrison. The guns on the Spur Redoubt, which command the harbour channel, were manned by the Artillery Volunteers. A vast concourse of persons assembled to witness the spectacle.

The Swedish corvette Lagerbjelkie, Captain Melander, arrived at Spithead on Wednesday morning, and exchanged salutes with the garrison and Victory flag-ship. She is from Stockholm, bound for the Mediterranean.

Vice-Admiral of the White, William James Hope Johnstone, the commander-in-chief at Sheerness, inspected the crews of the flag-ship Formidable, 84, and the Cumberland, 70, guard ship of steam ordinary, on Tuesday.

THE NAVY.

ADMIRALTY, OCTOBER 2.

PROMOTIONS.

Commanders to be Retired Captains—John Neilson Gladstone, who entered the Navy in 1820; and Alexander John Græme, who entered the service in 1813.

Commanders, retired, of 1830, to be Retired Commanders of 1816—Henry Nason, who entered the Navy in 1803; and Dey Richard Syer, who entered the Navy in 1803.

Chief Engineer—Frederick W. Brown, with seniority from the 24th September, 1860.

APPOINTMENTS.

Commander—H. C. Glyn to the Miranda.

Lieutenants—Thomas W. Oliver to the Cornwallis; Osmond de B. Brock to the Royal Adelaide; Logie A. Whimper to the Impregnable.

Masters—Jabez H. W. Rowlett to the Brisk; Arthur Thomas to the Miranda.

Surgeon—Henry Slade to the Miranda.

Paymasters—Thomas Leccombe (additional) to the Impregnable; James C. Meagher (additional) to the Formidable; George Barnes to the Miranda; John Burke (additional) to the Wellesley.

Second Master—W. R. Cronin to the Rhadamanthus.

Midshipmen—The Hon. Edward Dawson, Charles Johnstone, Andrew Wauchope, and Francis D. Radcliffe to the St. George; John Fellowes to the Ariel; Henry A. Digby to the Tartar.

Naval Cadets—W. Sherborne to the Racoon. The following appointments are to be dated the 1st inst.:—G. B. Bedford, R. G. Fairfax, Lord A. S. Pelham Clinton, F. R. Dicken, and A. P. Patton, to the Royal Albert; H. J. T. Hildyard, H. H. Wilding, M. W. Abbott, Edward Ramsey, W. F. S. Manor, A. S. and J. Leacock, C. W. Herbert, and G. F. Trollope to the Marlborough; R. J. Fortescue and W. E. B. Atkinson to the Cressy; A. M. Causton and A. P. Watson to the Renown; David G. Proby, Nathaniel Cotton, H. W. S. Gibson, and E. A. Cooper to the Victor Emmanuel; E. Riddle and C. E. Gissing to the Centurion; A. J. Ballantyne and E. J. Wingfield to the Nile; J. W. Sunderland to the Agamemnon; H. F. Kemble and W. M. Annesley to the Amphion; C. W. Atkinson, P. H. Rickman, and C. Langford to the Hannibal; G. W. M. Eliot, G. R. C. Eyres, G. S. Lindeman, and C. G. Horne, to the Algiers; Thomas H. W. Beddoe and H. A. Coventry to the Exmouth; H. J. G. Garvett, H. T. Wright, and R. H. Ramsden to the Liffey; A. P. Pascoe, H. S. Price, and A. B. Jenkyns to the Doris; C. H. Warren to the Orion; G. H. R. Willis and Charles E. Wood to the Melpomene; W. W. King, A. C. Loveridge, and J. Swan to the Conqueror; W. M. Carey to the Aboukir; L. W. Hyman to the Mersey; F. A. Moysey and J. A. Fraser to the Trafalgar; F. C. Brown, N. L. H. Clark and F. Coddington to the Sanspareil; A. A. Duffield and H. M. Milman to the Emerald; R. C. Gorst to the Ariadne; James Hazel and A. A. Lee to the Edgar; J. T. Harding, A. E. Bancroft, and H. G. Stevenson to the Mars.

Masters' Assistants—John B. Palmer, George S. Brodie, Thomas H. Smith, R. H. M. Maxwell, and George Alexander Broad (additional) to the Marlborough; Miles S. S. Bree to the Aboukir; Herbert George T. Packer to the Diadem; Nathaniel Child to the Centurion; Edgar C. Baker (additional) to the Victory, for the Rolla; George G. M'Ewen to the Tartar; John A. Jones (additional) to the Britannia for the Scalark.

Clerks—C. P. Walker to the Blenheim; Henry Ellis to the Ajax; Arthur Hughes to the Victory as supernumerary; H. J. Nash to the Illustrious; Adolphe Hunter to the Trafalgar.

Clerks' Assistants—J. J. Gormully to the Trafalgar; Thomas A. Miller to the Donegal; G. R. Johnson to the Victory, as supernumerary; E. M. Jago to the Miranda.

Chief Engineers—Patrick J. Lambert to the Cornwallis; Charles Tucker, promoted to be chief engineer and appointed to Indus for service in Narcissus.

First-Class Assistant-Engineers—John Grey (promoted) to the Hogue; Robert Anderson (a) (promoted) to the Snap; Samuel Swan to the Landrail.

Acting First-Class Assistant-Engineers—Wm. Farquharson (promoted) to the Valorous; George M. Dooley (promoted) to the Niger; Archibald Gillies (promoted) to the Furious; John Langlands (promoted) in the Alert.

Second-Class Assistant-Engineer—Richard Henry Jenkyn, promoted to the rank of second-class assistant-engineer in the Indus as supernumerary.

Third-Class Assistant-Engineers—Thomas Barker to the Foxhound; William A. Naughton to the Dee.

Acting Third-Class Assistant-Engineers—Edward Highman to the Indus as supernumerary; Adolphus Andrews to the Blenheim, for service in the Violet.

Acorn, 12, sloop, Commander Richard B. Pearse, was at Swatow by the latest accounts.

Actæon, 26, sailing frigate, Commander John Ward (b), was in the Gulf of Pecheli by the latest advices.

Adventure, 2, screw troop-ship, Commander Edward Lacy, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Algerine, 1, screw gun-vessel, Lieut.-Commander William Arthur, was at Ningpo on the 1st of August.

Ariel, 9, screw steam-sloop, Commander Alexander, fitting for foreign service at Portsmouth, has been again placed in dock, and opened up on her port side amidships for examination, it having been suspected, from a circumstance that occurred in repairing one of her midship ports, that some of her timbers must be in a defective state. The planking has been stripped off from her port gangway to her fore rigging to below her water-line, and eight of her timbers are found to have been destroyed from the effects of dry rot. Workmen are employed in removing them, and new timbers are being prepared for her. She is expected to be out of dock again and complete in her repairs in about eight days' time.

Banterer, 1, screw gun-boat, Lieut.-Commander H. P. Knevitt, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Beagle, 4, screw gun-vessel, Commander Edward Hay,

Digitized by Google

was to leave Tah-lien-whan Bay for the Peiho on the 26th of July.

Bouncer, 2, screw gun-boat, Lieut.-Commander A. R. Owen, was to leave Tah-lien-whan Bay for the Peiho on the 26th of July.

Bustard, 2, screw gun-boat, Lieut.-Commander F. W. Hallowes, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Buzzard, 6, paddle steam-sloop, Acting Commander John Trevenen, was at Monte Video, on the 31st of August.

Cambrian, 40, sailing frigate, Captain J. J. McCleverty, C.B., was in Tah-lien-whan Bay on the 25th of July, but was to leave for the Peiho on the 26th.

Camilla, 16, sloop, Commander George T. Colville, was at Shanghai, on the 1st of August.

Centaur, 6, paddle steam-sloop, Commander E. D. D. Aplin, was at Shanghai on the 1st of August.

Chesapeake, 51, screw frigate, flag-ship of Vice-Admiral Hope, Captain G. O. Willes, was to leave Tah-lien-whan Bay for the Peiho on the 26th of July.

Clown, 1, screw gun-boat, Lieut.-Commander William F. Lee, was in the Canton River on the 10th of August.

Cockchafer, 2, screw gun-boat, Lieut.-Commander Henry L. Holder, was at Swatow, by the last advices.

Coromandel, 5, steam-vessel, tender to Chesapeake, was to leave Tah-lien-whan Bay on the 26th of July, for the Peiho.

Cruiser, 17, screw steam-sloop, Commander John Bythesea, V.C., was to leave Tah-lien-whan Bay, on the 26th of July, for the Peiho.

Curaçoa, 31, screw steam-frigate, Captain Augustus Phillimore, was at Monte Video on the 31st of August.

Dee, 4, paddle steam-vessel, Master-Commander Pullen, has discharged a cargo of boilers and machinery for the Tribune and other vessels in the steam basin a Portsmouth, and has returned again to Woolwich.

Donegal, 101, screw liner, Captain Broadhead, at Plymouth, having had her defects made good, was taken out of the basin on Wednesday.

Dove, 1, screw gun-boat, tender to the Actæon, Lieutenant C. J. Bullock, was to leave Tah-lien-whan Bay for the Peiho on the 26th of July.

Drake, 1, screw gun-boat, Lieut.-Commander A. R. Blane, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Driver, 6, paddlewheel steam-sloop, having undergone a thorough repair at Woolwich, has been removed into the basin, ready for the pendant when required.

Encounter, 14, screw steam-ship, Captain Roderick Dew, was to leave Tah-lien-whan Bay on the 26th of July, for the Peiho.

Enterprise, 4, one of the exploring ships of the Arctic Expediton, now laid up in ordinary at Chatham, has been selected by the Admiralty to proceed to the coast of Scotland, where she is to be used as a coal depôt for the lighthouse at Oban. As soon as she has undergone the necessary fitments and alterations at Chatham she will be towed to her destination.

Esk, 21, screw steam-corvette, Captain Sir Robert J. Le M. M'Clure, was at Hong Kong on the 10th of August.

Espoir, 5, screw steam-sloop, Commander Sholto Douglas, got away again from Plymouth Sound for the Coast of Africa on the 27th ult.

Firm, 1 screw gun-boat, Lieut.-Commander William R. Boulton, was at Shanghai on the 1st of August.

Flamer, 2, screw gun-boat, Lieut.-Commander H. M. Bingham, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Forester, 2, screw gun-boat, Lieut.-Commander Arthur J. Innes, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Foxhound, 4, screw steam-sloop, 200-horse power, Commander Alfred Mitchell, was on Wednesday officially inspected, with very satisfactory results, by Vice-Admiral W. J. Hope Johnstone, accompanied by the Flag-Lieutenant, Thomas A. Mackenzie, prior to the vessel leaving Sheerness for Spithead, there to await further orders. Her destination will be as previously stated in this journal the Mediterranean, unless urgent circumstances should require her presence on a different station.

Furious, 16, paddle steam-frigate, Captain Oliver J. Jones, was at Shanghai on the 1st of August.

Fury, 6, paddle steam-sloop, Acting Commander J. C. Wilson, was to leave Tah-lien-whan Bay on the 26th of July, for the Peiho.

Geyser, 6, paddle steam-sloop, Commander George M. Jackson, from Madeira, arrived in Plymouth Sound on Friday, the 28th ult. She left Plymouth on September 9 with the Pioneer in tow, and arrived at Madeira on the 18th. She departed again on the 19th. The Geyser has experienced very variable winds with heavy rains. On the 15th of September she lost an able seaman, Walter H. Brown, of Plymouth, who was washed overboard and drowned. Spoke, September 26, lat. 45·59 N., long. 7·10 W., the French ship Volner. The Geyser brings home Captain Pole and the crew, 39 in all, of the ship Conway, belonging to Messrs. Baines & Co., of Liverpool, which left that port August 24, with 366 troops and passengers for Calcutta. She encountered very heavy gales and cross seas, and on the 8th of September was dismasted and abandoned about 230 miles N.W. by N. of Madeira, in consequence of her dangerous leaks. The passengers and troops were rescued by the ship Summer Cloud, from London for Sydney, and all safely landed at Madeira. Captain Pole, the officers and crew of the Conway were the last to leave the ship, which then had 8 feet 4 inches of water in her hold; and the water-casks and general cargo were all adrift through her terrific rolling. Every one of the boats was broken to pieces when the mast fell. The crew of the Conway were dispatched for Liverpool on Friday week from Plymouth by the hon. agent of the Shipwrecked Mariners' Society.

Grasshopper, 2, screw gun-boat, Lieut.-Commander John C. Tucker, was at Hong Kong on the 10th of August.

Haughty, 2, screw gun-boat, Lieut.-Commander George D. Broad, was at Hong Kong on the 10th of August.

Havock, 2, screw gun-boat, Lieut.-Commander Charles Fairholme, was to leave Tah-lien-whan Bay for the Peiho on the 26th of July.

Hesper, 2, screw store-ship, Master-Commander W. H. Harris, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Highflyer, 21, screw corvette, Acting Captain W. A. J. Heath, was in the Canton River on the 10th of August.

Hind, 1, screw gun-boat, tender to the Russell, 60, at Falmouth, arrived at Plymouth on Saturday last to collect Coast-guard Volunteers for conveyance to Falmouth to attend drill, and returned to Falmouth on Monday.

Hornet, 17, screw steam-sloop, Commander William B. Elphinstone, on her passage to the Cape of Good Hope and East Indies, was at anchor in Funchal Bay on the 19th of September.

Icarus, 11, screw steam-sloop, Commander Nowell Salmon, V.C., was at Truxillo on the 22nd of August. The following is an extract of a letter referring to the very energetic conduct of Commander Salmon in dealing with the Filibuster Walker:—"The career of Walker and his filibustering companions in Central America has, by the display of a little spirit and energy on the part of Commander Salmon, of the British sloop of war Icarus, been brought to a speedy and not very honourable termination. On the 20th of August the Icarus appeared before Truxillo, and at the summons of her commander Walker and his gang took immediate measures for evacuating the town, which they accomplished the following morning in good order. The force consisted of about 80 men, well armed and provided with ammunition, and after leaving Truxillo it proceeded in the direction of Cape Gracias, where it was attacked by the Honduras troops, losing a few men in the encounter. Subsequently, it appears, the fugitives encamped on the Rio Negro, but here they were met by a force under the command of Alvarez, which had been conveyed thither by the boats of the Icarus. In the action which ensued Walker sustained a complete defeat. He and the 70 men remaining with him surrendered at discretion, and being carried to Truxillo, were delivered to the Honduras authorities, who determined upon making short work of the notorious chief and his aide-de-camp, Colonel Ruttler, by shooting them both."

Imperieuse, 51, screw frigate, Captain Rochefort Maguire, flag-ship of Rear-Admiral Jones, C.B., was to leave Tah-lien-whan Bay for the Peiho on the 26th of July.

Inflexible, 6, paddle steam-sloop, Commander G. A. C. Brooker, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Insolent, 2, screw gun-boat, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Jackal, 4, paddle steam-vessel, Lieut.-Commander E. F. Lodder, was at Greenock on the 25th ultimo. The Jackal has been very active of late in putting down illegal fishing on the west coast of Scotland. The subjoined refers to some of her last proceedings. She arrived on the 20th of September at Greenock from the Kyles of Bute, for the purpose of coaling. She left again on the following Saturday evening, but instead of anchoring in Rothesby Bay, she steamed to Lochfine, and was brought to at the mouth of the East Loch Tarbet. It appears that the trawlers, having learned that the Jackal was at Greenock, had made all preparations for a raid upon the herrings, and had their boats ready on the Saturday night for the purpose—a fact that the Commander of the Jackal suspected. On arriving off Tarbet the steamer's boats were sent into the harbour, where they succeeded in capturing fourteen trawl boats, with nets on board. These were quietly cut out and brought alongside the Jackal, which arrived at Greenock on Sunday with the flotilla in tow. No fishermen were present at the capture, and their surprise on finding next day that their boats had vanished mysteriously over night must have been considerable. The value of the boats and nets taken is upwards of 300*l.*, and their seizure will throw about sixty men idle. The nets have been put into store. The following is an extract of a letter on the subject, dated Tarbet, September 24:—"Yesterday (Sunday) morning, H.M.S. Jackal made a raid into this bay and seized boats and nets to the value of 300*l.*, an action that has greatly shocked the moral feeling of the place. From first to last it seems to me, even on the supposition that trawling is injurious, which I do not grant, that the trawlers have been treated, not only with want of consideration, but with positive injustice. Everything which harsh and injudicious laws inconsistently executed could effect to stir up in them the spirit of revenge and lawlessness has been already done, and as if that were not enough, they must also be taught that the profanation of a day of rest is a thing to be commended. That the nets taken will be forfeited is certain; but what is to become of the boats is not equally so, indeed no one in the village had any idea that they were liable to be seized. Will not some champion of the oppressed who can make himself heard in the councils of the nation, insist upon having the whole question of trawling rigorously examined, either by procuring the appointment of a Royal Commission, or in some other way? An impartial investigation of their claims is all that the trawlers demand, and in a matter of such importance as that of a regular and cheap supply of herring to our large towns, is due to the country that it be granted."

Janus, 1, screw gun-boat, Lieut.-Commander D. G. Davidson, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Kestrel, 1, screw gun-boat, Lieut.-Commander C. D. Robinson, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Landrail, 5, screw steam-sloop, Commander T. H. M. Martin, went over the measured mile, on a trial of her new engines, supplied by Mr. Humphreys, of Deptford. The trial having been perfectly satisfactory, the Landrail proceeded on her way to Portsmouth, to join the Channel Squadron.

Leopard, 18, paddle steam-frigate, Captain J. F. B. Wainwright, flag-ship of Rear-Admiral Sir Stephen Lushington, K.C.B., was at Rio de Janeiro on the 8th of September.

Leven, 1, screw gun-vessel, Lieut.-Commander Joseph S. Hudson, was to leave Tah-lien-whan Bay, on the 26th of July, for the Peiho. On the 13th of July, at 1 o'clock, John Dalliger, the marine who shot at Lieutenant Hudson and the second master of the Leven, paid the penalty of his crimes. Punctually at that hour a boat from every vessel in the fleet assembled about the flag-ship, the Leven being moored just astern. A large open space was kept, and at a signal from the Admiral the boats approached the Leven in two equal divisions. A rope was extended on either side, to which the boats were strung after all the bowmen had gone on board. The rigging of every ship was then manned by all hands to witness the execution. At half-past 1 the prisoner was brought out, stripped of his uniform. He was deadly pale, but his step was firm, and he walked without support. A rope was passed round his neck, the signal given, and in two seconds the bowmen had run him up to the fore-yardarm. There a loop was loosed and the body fell with a tremendous jerk, at least six feet. A couple of struggles, and all was over. There is no doubt he was astonished at his sentence; for as neither of his intended victims had died, he expected to escape with seven years' transportation. He fully deserved his fate, for his crime was attended with most aggravating circumstances. He joined the Leven about five months ago from the Marine Battalion with a bad character, the corner of his certificate being cut off. Lieutenant Hudson, in the hope of enabling him to re-establish his character, took him as his own servant. On the 8th of July Lieutenant Hudson missed some brandy and wine from his cabin, charged Dalliger with the theft, and told him he should be punished. Next morning, as he lay on the sofa after breakfast, Dalliger stole round and shot him in the back of his neck, after which he shot the second master. Before being executed he made a statement confessing his crime, for which he was heartily sorry, regarding his death as only too little punishment, and "begging pardon of those two whom he had so nearly destroyed in his anger." Lieutenant Hudson is going on satisfactorily, but is compelled to leave for England; and the second master is nearly cured. He had a narrow escape. The ball cut off the tip of his ear, and passed into his shoulder, whence it was extracted without great difficulty.

Madagascar, sailing frigate, store-ship, Captain R. D. White, was in the harbour of Rio de Janeiro on the 8th of September.

Magicienne, 16, paddle steam-frigate, Captain John E. Commerell, V.C., was in Tah-lien-whan Bay on the 25th of July, but was to leave on the 26th for the Peiho. In reference to the arrangements for the embarcation of the horses for the expedition, the correspondent of the *Times* says:—"The horses were shipped on the 23rd, and I went over to the bay to witness the sight. The transports were anchored in the bay, and paddle-box boats, rafts, and horse boats were all in requisition. The best device came from the Magicienne. Two of her paddlebox boats were boarded over and carried thirty-two horses at a time. There was no crowding, no confusion, no orders and counter-orders. The arrangements had been carefully made and were properly carried out."

Mars, 80, screw liner, Captain J. N. Strange, left Plymouth on Tuesday for the Mediterranean.

Nimrod, 6, screw steam-sloop, Commander R. J. Wyniatt, was at Shanghai on the 1st of August.

Oberon, 3, paddle steam-vessel, Lieut.-Commander F. G. C. Paget, was at Buenos Ayres on the 27th of August.

Odin, 16, paddle steam-frigate, Captain Lord John Hay, C.B., was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Opossum, 2, screw gun-boat, Lieut.-Commander George D. Bevan, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Orion, 91, screw liner, Captain J. B. E. Frere, was by the last accounts from the Mediterranean stationed at Marsala to protect British interests.

Pearl, 21, screw corvette, Captain John Borlase, C.B., was to leave Tah-lien-whan Bay for the Peiho on the 26th of July.

Pelican, 17, screw, has been placed in No. 8 dock at Portsmouth, to copper and fit her valves, &c. This vessel is being fitted with engines of 200 horse-power, nominal, by Messrs. Napier of Glasgow.

Pembroke, 60, Captain Charlewood, Coast-guardship in Harwich harbour, has during the past week received on board a strong body of Royal Coast Naval Volunteers, for the purpose of undergoing their annual training. The gallant captain has also permitted the 1st Essex Volunteer Artillery (Harwich) to exercise at ball practice on board, and detachments of men, under the command of Lieutenants Daniel and Barker, have made their first attempt at firing round shot. The target was fixed in the river Stour at a range of nearly 1500 yards, and some very excellent firing took place, the flag having been struck twice by the ball.

Pioneer, 6, screw steam-sloop, Commander Hugh A. Reilly, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Princess Royal, 91, screw, in the first-class steam reserve at Portsmouth, was on Wednesday taken out of harbour to test machinery, &c. The ship drew 21 feet 10 inches forward and 22 feet 9 inches aft. She has a common screw, with a diameter of 17 feet, and a pitch of 21 feet 6 inches. Speed was not tested at the measured mile, the machinery being merely tested at a revolution of engines of 59 maximum. At the conclusion of the trial she was brought into harbour and placed at moorings.

Queen, 86, screw liner, Captain Charles F. Hillyar, was still at Tunis by the last accounts. The following is an extract of a letter from her:—"The dervish, or sceriff, who had been exciting the people against the Christians, has been arrested, taken to the Bardo under a strong escort, and beheaded by order of the Bey."

Renard, 4, screw steam-sloop, Commander J. G. Goodenough, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Retribution, 28, paddle steam frigate, Commodore Harry E. Edgell, was at Trincomalee on the 24th of August, but was about to proceed to Madras. She was however to return to Trincomalee within a fortnight, and then prepare at once to start on her homeward voyage to England.

Rhadamanthus, 4, paddle steamship, Master-Commander R. Sturdee, having undergone repairs which the hard work to which she was for many months exposed rendered necessary, has been undocked at Woolwich, and is preparing to load with machinery for vessels fitting out at the Western dockyards.

Ringdove, 4, screw steam-sloop, Commander Robert G. Craigie, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Roebuck, 6, screw steam-sloop, Commander Francis Marten, was at Shanghai on the 1st of August.

Sampson, 6, paddle steam-sloop, Captain G. S. Hand, C.B., was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Scout, 21, screw steam-corvette, Captain John Corbett,

Digitized by Google

was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Simoom, 8, screw steam troop-ship, Commander J. M. Cooke, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Slaney, 1, screw gun-vessel, Lieut.-Commander was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Snake, 4, screw steam gun-vessel, Commander Henry Harvey, was to leave Tah-lien-whan Bay for the Peiho on the 26th of July.

Snap, 2, screw gun-boat, Lieut.-Commander W. O. Butler, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Sparrow, 5, screw steam gun-vessel, has been undocked at Woolwich, to be coppered, and otherwise fitted for commission.

Sparrowhawk, 4, screw steam-sloop, Commander J. C. Byng, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Sphinx, 6, paddle steam-sloop, Commander G. F. Day, V.C., was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Spy, 3, brigantine, Lieut.-Commander John Hanmer, was at Bahia, on the 12th of September.

St. George, 91, screw liner, Captain the Hon. F. Egerton, arrived at Plymouth on Tuesday for Portsmouth.

Starling, 2, screw gun-boat, Lieut.-Commander James H. Whitshed, was at Hong Kong on the 10th of August.

Staunch, 2, screw gun-boat, Lieut.-Commander Edwin J. Pollard, was in the Canton River on the 10th of August.

Supply, steam store-ship, Master-Commander Balliston, which arrived at Plymouth on Sunday for Portsmouth, *en route* for Malta, was obliged to be taken into dock, and a new blade fixed to her screw. She was taken out of dock again on Tuesday morning, and reported ready for sea, and has sailed for her destination.

Swinger, screw gun-boat, has been temporarily masted and fitted for the purpose of attending upon the ships of the Channel squadron during their stay at Spithead.

Urgent, 6, screw steam troop-ship, Commander H. W. Hire, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Vulcan, 6, screw steam-troop ship, Commander A. C. Strode, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Watchful, 1, screw gun-boat, Lieut.-Commander F. W. Inglefield, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

Weazel, 1, screw gun-boat, Lieut.-Commander William Howorth, was at Hong Kong on the 10th of August.

Woodcock, 1, screw gun-boat, Lieut.-Commander G. S. Bosanquet, was to leave Tah-lien-whan Bay on the 26th of July for the Peiho.

The correspondent of the *Times*, writing from Victoria, Vancouver's Island, on the 9th of August, bears such strong testimony to the necessity of keeping up for the present a strong squadron on the north-west coast of America, that we cannot show how we agree with him more strongly than by quoting his own words :—"For some little time we had a strong squadron in Esquimalt harbour, presenting a sight for which I trust England will always keep herself pre-eminent. Her wooden walls were represented by the Ganges flag-ship, Admiral Sir R. Lambert Baynes, whose newly-acquired honour of a K.C.B. afforded universal satisfaction both afloat and on shore; the Topaze, the Satellite, the Termagant, the Alert, the Plumper (surveying-ship), and the two gunboats Grappler and Forward. The squadron is now dispersed. The Termagant is at Nanarimo coaling. She struck against a rock in Plumper Pass, on her way up, by reason of her having to go through at slow speed; but her damage is not serious, and is being repaired by the artificers of the fleet. The Alert has gone on a cruise up the coast, and will proceed as far north as Sitka, in the Russian territory. The Plumper has returned to the coast of British Columbia to resume her surveying operations. The Satellite has left for England, and the gunboat Grappler is stationed in Victoria harbour, as a 'demonstration' against the Northern Indians encamped on the shore, and to disarm them as they arrive. The other gunboat is occasionally employed in the same service, and has just returned from Nanarimo. The services of these gunboats are most useful to both colonies, and the sending them on the station was a proper and necessary course, for which the Government deserves a grateful acknowledgment. The flag-ship and the Topaze are still here. Uninformed people at home may think so large a squadron as we have on this coast an unnecessary display and a useless expense. I venture respectfully, but very confidently, to combat this opinion. It is true our neighbours are not at this moment in a threatening aspect; but nothing tends so much to keep them on their good behaviour as the knowledge that we are prepared for them, and that 'the chances are against them.' I exonerate the American Government from entertaining a wish to quarrel with England; but a considerable body of the more adventurous, needy, and reckless of their countrymen are always ready to assist an unscrupulous instrument like General Harney in any enterprise which will promise fame, or gain, or notoriety, and to their ears no cry is so grateful as that of 'a war with the Britishers.' And this danger is increased by the fact that the government has no control over this numerous class, nor even, as evidenced in the case of General Harney, over its own military officers, when the latter happen to be rich and unprincipled, and at the same time ambitious of renown, however questionable. This is a sad and uncomplimentary commentary, but it is well that the truth should be freely told in these cases. Another very important use we have for a squadron here, is to watch the Indians for a time, now that they are breaking themselves loose from the control which their exclusive trading with the Hudson's Bay Company imposed on them. General Harney is gone at last. His conduct towards the Hudson's Bay Company was so outrageous, that his government repudiated his proceedings, and promised to make amends for the injuries he inflicted upon the Company. In fact, the authorities at Washington appear to have become ashamed of him, and he has been recalled, it is said, to undergo 'an inquiry.' The American force on San Juan remains as he left it. Our Marines are also still stationed on the island, and it is much to be regretted that they cannot be spared to be placed on points of Vancouver's Island, where their presence is rendered necessary to protect our settlers from the Indians. The savages, it is true, have not as yet molested any of the whites, but their frequent fierce and bloody frays among themselves terrify the settlers."

STATIONS OF THE ROYAL NAVY IN COMMISSION.

With the dates of Commission of the Officers in Command.

Aboukir, 90, sc., Capt. D. Curry, 1846, Channel Squadron.
Acorn, 12, Com. R. B. Pearse, 1856, East Indies.
Actæon, 26, surv.-v., Com. J. Ward (b), 1858, East Indies.
Adelaide, tender to flag-ship, Cape of Good Hope.
Adventure, sc. store-ship, Com. E. Lacy, 1856, East Indies.
Advice, st.-ves., tender to Sanspareil, Cork.
Agamemnon, 91, sc. Capt. T. Hope, 1852, Mediterranean.
Ajax, 60, sc. Capt. J. M. M'Niell Boyd, 1856, Coast Guard.
Alacrity, 4, sc., Com. J. K. E. Baird, 1857, Mediterranean.
Alecto, 5, st.-ves., Com. H. J. Raby, V.C. 1855, Coast of Africa.
Alert, 17, sc., Com. W. A. R. Pearse, 1855, Pacific.
Algerine, sc. gunboat, Lieut.-Com. W. Arthur, 1854, East Indies.
Algiers, 91 sc., Capt. G. W. D. O'Callaghan, 1846, Channel Squadron.
Alligator, at Whampoa, lent to Consular Department.
Amethyst, 26, Capt. S. Grenfell, 1853, Pacific, ordered home.

THE MILITIA.

The Royal Radnor Rifles, Major L. H. Peel commanding, are under orders to assemble at Prestigne on Tuesday, the 30th inst., for 27 days' training.

The Antrim Artillery are under orders to replace the Hampshire Artillery at Pembroke dock. The volunteering from the Hampshire Artillery was concluded last week, and resulted in 34 men volunteering for the 15th battalion Royal Artillery, and five to the 12th Lancers and 14th Dragoons. This, with 43 given last year to the Royal Marines, makes a total of 82 men since their present embodiment. A rather novel feature occurred in several men wishing to volunteer into the Navy.

The Bedfordshire Light Infantry, under the command of Colonel R. T. Gilpin, was inspected this week on Southsea common. The troops marched out of quarters at the conclusion of the men's dinner hour, and formed. Major-General Lord W. Paulet, C.B., commanding the South-West District, and his staff, soon afterwards arrived on the ground, and was received by the troops with a general salute. After his lordship had closely inspected the whole of the men the *regiment marched past in slow and quick time, wheeled into* line upon the original alignment, and performed several other evolutions. The regiment at Lord Paulet's desire was then drawn up at quarter-distance column, right in front. At the conclusion Lord William advanced to the front and said,—"Colonel Gilpin, I can but say how pleased I am with what I have seen to-day of your regiment, more especially as your inspection was quite unexpected, you only having had notice of it last evening. The steadiness and soldierly bearing of the men in the field, and the manner in which they have gone through their work this day, are beyond all praise. The internal economy of the regiment is equally good. Your books are well kept; your barracks are in first-rate order, and in a thorough state of cleanliness; in fact, nothing could be better. The conduct of the men of the Bedfordshire while they have been in this garrison reflects all possible credit on you, your officers, your men themselves, and the county to which you belong." The Bedfordshire since they have been embodied have given 640 men to the Line, and are now only 33 short of their assigned complement.

First Staffordshire Militia. On Wednesday, the 19th ult., Colonel Talbot arrived at Newcastle, where the head-quarters of this regiment is stationed, and the officers presented him with a handsome silver salver as a token of their esteem and regard, on which the following inscription is engraved:—"Presented to the Hon. W. P. Talbot, Lieut.-Colonel of the King's Own Stafford Militia, by his brother officers, on his marriage with Lady Emma Stanley."

The Militia Gazette.

WAR OFFICE, PALL MALL, October 2.

Memorandum—Her Majesty has been pleased to accept the resignation of the following commission:—

Hampshire Militia Artillery—Second Lieutenant Frederick Ponsonby Cammilleri.

WAR OFFICE, PALL MALL, October 5.

2nd Regiment of King's Own Staffordshire Militia—Ensign Thomas Bradney Shaw Hellier to be Lieutenant, vice Coldwell, resigned.

Huntingdonshire Militia—Morgan Vane, Esq., to be Lieutenant, vice Jones, promoted.

2nd Regiment of the Duke of Lancaster's Own Militia—Thomas Hillier Percival, Gent., to be Lieutenant.

Her Majesty has been graciously pleased to accept the resignation of the Commission held by Captain Roger Forrest, in the 6th Regiment of Royal Lancashire Militia.

Memoranda.—2nd or North Durham Regiment of Militia—Her Majesty has been graciously pleased to accept the Resignation of the Commission held by Captain Percival Spearman Wilkinson.

Lieutenant Francis G. Suttie, lately serving in the Royal Albert, has relieved Commander Loftus Robinson in his duties as Flag-Lieutenant to Vice-Admiral H. W. Bruce, the Naval Commander-in-Chief at Portsmouth.

Commander Francis Peel, late in command of H.M.'s steam-sloop Buzzard, on the Brazils station, who has been compelled to invalid owing to the state of his health, has arrived in England.

VOLUNTEERS.

METROPOLITAN.

9TH (WEST) MIDDLESEX RIFLES.—The leave of absence to officers and members having expired, the usual parades of this corps have been resumed. The majority of the officers have been attached to regiments at Aldershot and Winchester, and have obtained a knowledge of military duties. On Tuesday the corps marched for battalion drill to St. John's Wood Barracks, and a number of persons assembled to hear the band and see the movements.

11TH (ST. GEORGE'S) MIDDLESEX RIFLES.—The following prizes for the annual course of 1860 will be awarded at the conclusion of it, on the 20th inst.:—A Challenge Cup—the property of the corps for ever—to be held for one year by the member who has the honour of winning it; the qualification for entry to be confined to those who have passed into the first class in the second period. First Prize: The Gold Medal of St. George's will be awarded to the winner of the Challenge Cup. Second Prize: A Silver Tankard (presented by the Right Hon. Sir Hamilton Seymour), to the member who gains the greatest aggregate number of points in the three classes throughout the course, with the proviso that he is a marksman with a minimum of seven points. Third Prize: A silver goblet, value 7*l.* 10*s.*, to the best shot in the third class, standing. Fourth Prize: A silver cup, value 5*l.*, to the best marksman in each company. In addition to the above, the following prizes will be shot for, at the conclusion of the course: A Whitworth rifle (presented by a lady). The qualifications are—that every competing member should have attended eight full dress parades since the 1st of June; have completed his course of musketry instruction in the corps; be in the first or second class in either of the three periods; and use the Lancaster rifle. No member eligible who has enjoyed the advantages of a recognised course of instruction at Hythe or elsewhere. The distances to be 300, 400, and 500 yards. A Lancaster (·453 bore) rifle, presented by Mr. Charles Lancaster, for the best shot at 200, 300, and 400 yards, on the Hythe principle.

15TH (LONDON SCOTTISH) MIDDLESEX RIFLES.—There are now 800 enrolled members in this corps, and the numbers continue to increase. A company of cadets is being formed of boys from ten to fifteen years of age. Besides the prizes offered to the corps for rifle shooting by Lady Elcho and other ladies, as well as by officers and members of the corps, the sum of 50*l.* has just been presented to the prize fund by Mr. Frank Morrison, in whose establishment there are about 60 Volunteers. Shooting has been steadily practised at the Wimbledon targets during the summer. Several members of the corps intend to compete at the rifle meeting in Paris.

29TH (NORTH) MIDDLESEX RIFLES.—A public meeting of the inhabitants of Camden and Kentish Towns was held on Tuesday evening at the British School Rooms in the Kentish Town Road, for the purpose of giving support to the 29th North Middlesex Rifles, and taking steps for the formation of a Camden and Kentish Town and Haverstock Hill company. A committee was formed, and a number of members enrolled.

METROPOLITAN RIFLES.—On Wednesday evening the Metropolitan Rifles, to the number of 400, together with 100 cadets, met at the yard of the Reformatory Institution, Euston Road, and performed a number of evolutions, under the direction of Sergeant Pettit, of the London Scottish. Lord Elcho and a number of gentlemen who take an interest in the Volunteer movement were present. At the close of the evolutions his lordship said he could not refrain from complimenting them on the proficiency they had attained, which was alike creditable to them and Sergeant Pettit. While he had been away they had selected a dress which looked extremely neat. They knew he had peculiar, or, at least, strong opinions on dress. He saw that they preferred a tight dress to a loose one. It was thought that if men were to look smart they must be tightly dressed; and if they were determined to look smart and be uncomfortable, then they must just be so. The corps already numbered 400; but it could not be said to have a regular existence until the sanction of the Lord-Lieutenant to its organisation had been obtained, and he promised to do his best to secure it. The corps was designed to be open to all classes of society. The cost for the uniform would not exceed 55*s.*, so no man need be deterred from joining on the score of expense. The corps was to rest on an independent basis—every man was to pay for his own uniform.. His lordship concluded by stating that during the short time he remained in London he would do his utmost to get the Metropolitan Rifles efficiently started, and retired amid loud cheers.

BEDFORDSHIRE.

BEDFORD RIFLES.—This corps, under the command of Captain W. Crosbie, met for rifle practice on Friday week, in their ground, situated near the Kimbolton Road. They shot for three prizes—about thirty entered. The practice commenced with five rounds to each man, at 200 yards, and afterwards four rounds at 300 yards. At the conclusion it was found that there were three ties for the highest score, and the competitors were Mr. Gillions, jun., Mr. S. Carter, and Captain Maley. It was decided that they should have three shots each at 300 yards, to see which should claim the head prize. The result was that Mr. Gillions obtained the first, Mr. S. Carter the second, and Captain Maley the third prize. Major Hastings Russell, M.P., the Commander of the Corps, reviewed it on Friday afternoon, and said that it was a corps that the county might be proud of.

DURHAM.

GATESHEAD RIFLES.—On Saturday afternoon last the members of this corps mustered in full force at the drill-ground, West Street, to receive a very handsome silver bugle, the gift of the ladies of that borough. The gentry of the town and neighbourhood assembled in considerable numbers, and the Newcastle Volunteers, under the command of Lieut.-Colonel Sir John Fife, were also present on the occasion. The various companies were formed into open square, and the bugle was formally presented to the corps by Mrs. Green in a graceful speech. Captain Hawks, the commanding officer, received the bugle amid the hearty plaudits of the bystanders, and read the inscription engraved upon it. Accompanying it were a handsome rosewood case, and a parchment scroll, containing an address to the corps.

EDINBURGHSHIRE.

CITY OF EDINBURGH ARTILLERY.—This corps is about to complete a battalion by the formation of an eighth company. In reply to a letter addressed to him by the secretary, Lord Clyde has expressed his willingness to be enrolled as an honorary member of this company.

ESSEX.

7TH (ROCHFORD) ESSEX RIFLES.—This corps has had a competition at Southend for a silver cup, presented by Mrs. Tawke, and a silver cream ewer, provided from the funds of the corps. The competitors for the first prize, which was shot for at 400 yards, were 13 in number. Messrs. R. Hill and H. Allen each made four points, and had to shoot off their tie at 300 yards, when Mr. Allen proved himself superior. For the second prize 22 gentlemen competed at 300 yards. Sergeant Knapping and Mr. W. Cause each scored four points, but in shooting off their tie Mr. Cause was the victor. The prizes were awarded on the beach, Mrs. Tawke presenting them.

GLAMORGANSHIRE.

17TH GLAMORGANSHIRE RIFLES.—On Saturday, the 29th ult., this corps made its appearance in public, equipped in gray uniform, green facings, shakoes with raven plumes, black patent leather belts, and cartouche box, bronze ornaments; the cost of each suit is 4*l.*, the whole of which is paid for by Mr. Evan Evans, proprietor of the Vale of Neath Brewery and captain of the corps. From Cadoxton they proceeded to Neath, headed by their brass band amid the acclamations of the inhabitants. The 15th company (Neath) Glamorganshire Rifle Volunteers, under the command of Captain Rowland, were drawn up in front of the Town Hall and saluted the 17th company. After marching through the principal streets of the town they returned to Cadoxton, where they were joined by the 15th company and the Briton Ferry Volunteer Artillery company, and went through battalion drill in a very praiseworthy manner.

GLOUCESTERSHIRE.

BRISTOL AND GLOUCESTERSHIRE ARTILLERY.—This corps held a meeting to compete for various prizes on Friday. The first match was for the ladies' prizes, open to the 1st Gloucestershire (Bristol) Artillery Volunteers, and Volunteers of any other artillery corps who may be members of the club. This match was shot for with the artillery rifled carbine, Government pattern, at ranges of 100, 200, and 300 yards, five rounds at each range, standing. The first prize, a silver claret jug, was won by Sergeant Nattriss, who made 19 points; the second prize, a silver tankard, by Private Gilford, 17 points; third prize, a Westley Richards's rifle carbine, value 15*l.*, by Sergeant Hanson, 15 points; fourth prize, a silver beaker, Private Stanton, 15 points; fifth prize, a silver cup, Lieutenant Bean, 15 points. The second match was open to all members of the club and to representatives of any company of Volunteers, and was shot for with the long Enfield rifle, Government pattern, at ranges of 300, 500, and 600 yards, five rounds at each range. The first prize, 15*l.*, was won by Viscount Fielding, *who scored 13 points;* the second, 10*l.*, by Sergeant Baker, 12 points; and the third, 5*l.*, by Sergeant Hanson, who made the same number of points as Sergeant Baker; but in consequence of the latter scoring the largest number in the long ranges he took the higher prize. The third match, for prizes of 10*l.* and 5*l.*, was open to all comers, and was shot for with the Whitworth rifle, at ranges of 600 and 700 yards, five shots at each range. The majority of the competitors in this match retired from the contest after firing the first range. Sergeant Bingham and Private Hanson, who each made seven points, agreed to divide the stakes, and fire for the honour at 700 yards, when Sergeant Bingham was the victor. The lord-lieutenant and officers on the ground expressed themselves as very well satisfied with the firing. On Saturday the competition for the regimental challenge gold medal, which was not completed on the second day of the rifle contest of the Bristol Rifle Volunteers, was concluded. The shooting was at ranges of 800 and 900 yards, 10 rounds at each distance, and there were 12 competitors. Ensign Pinney and Private C. Thomas, both of No. 3 company, each made eight points, and in firing off the ties Ensign Pinney won at the sixth shot. The medal, which is a very handsome one, is to be held for one year, and to become the property of any member winning it two years in succession.

HAMPSHIRE.

2ND (PORTSMOUTH) HANTS ARTILLERY.—On Thursday last, pursuant to regimental order, this corps paraded at 2 p.m. for the purpose of taking part in the field-day on Southsea Common, on which occasion the whole of the available troops in garrison assembled, and performed the usual evolutions and attacks upon the castle, &c. The whole being under the command of Major-General Lord William Paulet, C.B., commanding the south-west district.

5TH HANTS RIFLES.—This corps had a preliminary parade on Thursday morning at 7 o'clock, and another at 2 o'clock on the same day, at their armoury, after which the regiment proceeded to Southsea Common, and were brigaded with the troops of the garrison under the command of Major-General Lord William Paulet, the governor of Portsmouth.

PORTSMOUTH (CIVIL SERVICE) ARTILLERY.—The clothing of the men has now arrived, and nearly 300 of the stout artisans of the dockyard are enrolled. They marched on to the Common on Thursday last, and will attend divine service on Sunday (to-morrow) next.

KENT.

5TH AND 6TH (CANTERBURY) KENT RIFLES.—These companies have been presented with banners by Mrs. and the Misses Austen (the wife and daughters of Captain Austen). The banners are composed of silk and velvet, and are embroidered with the Kentish horse and the motto "Invicta." Captain Austen presented the banners to the two companies in the names of the donors, and their reception was briefly acknowledged by Captain Plummer of the 5th, and Lieutenant Fielding of the 6th company.

TUNBRIDGE.—An influential meeting of the residents of Tunbridge was held a few days ago, Mr. T. Hallowes, R.N., in the chair, for the purpose of forming a company of cadets to be attached to the company of Volunteer rifles belonging

Digitized by Google

to the town, the 17th Kent. In the course of the discussion which followed, it was stated that the parents of 42 youths had given in the names of their sons as being anxious to join, and they were accordingly accepted for enrolment; it being also decided that the age for admission to the corps should be between 9 and 17, the subscription being likewise fixed at 12*s.* per annum.

LANCASHIRE.

On Saturday last, by permission of the Lord-Lieutenant of Lancashire, the Kirkham Artillery, the Lytham, and the Rossall Rifles were reviewed by Colonel Patten, M.P., at Rossall. A large number of ladies, of Volunteers, and others, assembled to witness the manœuvres. When the review was over the officers were called to the front and complimented on the style in which the movements had been executed. The troops then formed three sides of a square, and Colonel Patten, in the name of the Rossall Rifles, presented the captain of that company with a handsome sword as a recognition of his services in the formation of the corps. The Volunteers and their friends, to the number of nearly 400, afterwards sat down to dinner in the great hall, where complimentary toasts were drunk to Colonel Patten, to the Kirkham and Lytham corps, as the guests of the day, and to Mr. Osborne, head-master of Rossall. The Newton Review rifle contest at Southport was concluded on Saturday with decidedly the best and most exciting shooting that had occurred during the five days' matches. Indeed, we are assured that the scores made exceeded anything done at Wimbledon; and we heard many expressions of regret on Southport Sands that Mr. Ross, junior, was not present to maintain, if he could, the honours which he won at the national gathering. We are told that Mr. Ross, at the three ranges of 800, 900, and 1000 yards, scored 24, with 10 shots at each range, or 30 in the whole; but on Saturday, at the same ranges, with 15 shots, Captain Ick, who is rifle instructor to the 2nd Cheshire Militia, and Mr. J. Leece, of Manchester, each scored 15; and in shooting off the tie, they produced some real excitement by each getting an outer three times in succession, Captain Ick missing the target the fourth time, while Mr. Leece got an outer, and thus won the Southport cup. Captain Ick had previously made 16 under the same circumstances for a prize of 50*l.*; while Mr. Marriott, 4th West York Volunteers, made 15, and Mr. Leece 13; all these scores being above Mr. Ross's average. The weather on Saturday was as unfavourable as on any day during the contest. The beach was not so sloppy as on Thursday, nor was the wind as strong; but the day was exceedingly dull and bleak, the wind, which was rather to the north of east, being bitingly cold. The targets did not stand out well against the heavy sky; and the excellent shooting was therefore all the more praiseworthy. The tide was again inconveniently high; and although some of the targets had been removed still more landward than on Friday, and the shooting was not commenced until nearly half-past twelve o'clock, only six of the ranges were usable.

An official inspection of the 45th, 66th (Borough Guard), and 69th Lancashire Volunteer Companies, forming part of the 1st Lancashire Battalion, took place on Tuesday evening at the Corn Exchange, Liverpool. Among the officers present were Lieut.-Colonel Bousfield, Captain Robertson (instructor of musketry to the battalion), Captain Bowen (45th), Captain Mayer (66th), Captain Tristram (69th), Adjutant Holden, and other officers of the companies. Major Buchanan, assistant inspector of Volunteers for the western district (successor to Major Harman, lately removed to York), was the inspecting office. The companies having been put through their drill a hollow square was formed. Major Buchanan then called the officers around him, and briefly addressed them.

MIDDLESEX.

12TH (BARNET) MIDDLESEX RIFLES.—A rifle-shooting match between the members of the 12th Middlesex has recently taken place. The following was the result:—Mr. Hammerton, 16 points; Mr. J. Brooks, 14; Sergeant Baines, 12; Mr. Scarlett, 11; Mr. Schmidt, 10. The remainder of the competitors did not succeed in scoring double figures. Sergeant G. Brooks, belonging to this corps, who was a prize winner at Wimbledon, was not a competitor on this occasion. At the conclusion of the match Mr. Hammerton, whose shooting was excellent, as shown by the large score he obtained, was warmly congratulated on his victory.

NOTTINGHAMSIHRE.

THE ROBIN HOOD RIFLES.—On Tuesday a grand review of the Robin Hood Rifles took place at Nottingham, when the presentation of colours to the corps, in addition of a charger to Adjutant White, and a silver bugle, took place. The colours were presented by Lady Belper; the charger by Mrs. Storey (wife of the captain of the Castle Company); and the bugle by Mrs. Enfield (wife of the town clerk). The demonstration was considerable, and the success decided.

SURREY.

5TH (REIGATE) SURREY RIFLES.—The prizes given by the Hon. Captain Monson, M.P., were shot for on Wednesday by the members of the 5th Surrey Rifle Corps. Mr. F. Blackiston was the successful competitor for a very handsome rifle, making 14 points out of ten shots at 200 and 300 yards. The second prize, a silver cup, was won by Mr. Hughes, Jun., who scored 11. A ladies' purse was won by Sergeant James Nicholls, who scored five points from five shots at 450 yards.

14TH (WOTTON) SURREY RIFLES.—On Wednesday a *fête* was given to this corps at Jayes, the seat of Lee Steere, Esq. The meeting opened at 10 o'clock, with military evolutions, on the beautiful green of Ockley village, including marching, slow, quick, and double time, skirmishing, &c., all of which were pronounced, by many well able to judge, to be most efficiently performed. These evolutions were completed by 1 o'clock p.m., when the corps adjourned to an excellent dinner, provided by their liberal entertainer. The afternoon was spent in athletic sports in the park surrounding Jayes. The day was beautiful—sunshine and blue sky—a real rarity this year. Most of the gentlemen and ladies in the neighbourhood of Dorking and Horsham were present; and we doubt not but the popularity of the Volunteer movement in these parts will be much increased by these and such like gatherings.

SUSSEX.

ROTTINGDEAN.—On Saturday last, the 29th ult., two additional valuable handsome cups were shot for by Volunteers of different corps at Rottingdean, near Brighton, on the same spot which had been lent on a previous occasion by Mr. Elcot M'Naghten, the ranges being, as on the former occasion, 200, 300, and 400 yards. The first cup contested for was presented by Captain Rucker, of the 25th Kent, the winner of a cup at the previous match. It was won by Corporal Bayley, of the 3rd Kent, who also was the winner of the second prize attached to the other cup, given by Ensign Barnes, also of the 25th Kent. The second cup (of Mr. Bowes) was then shot for, and was won by Mr. Sergeant Winser, 3rd Kent; Captain Rucker's second prize falling to Mr. Seppings, of the Civil Service Brigade.

INSPECTION OF STAFFORDSHIRE VOLUNTEERS.—On Monday afternoon last the fourth battalion of Rifle Volunteers, commanded by Colonel Vernon, was inspected on the drill ground, Wolverhampton, by Major Dick, Assistant-Inspector of Volunteers, in the presence of Lord Hatherton, the Lord-Lieutenant of the county, and his staff. The day was fine, and the town wore quite a holiday appearance. Thousands flocked to the scene of the review, and among the spectators were some of the principal inhabitants of the town and neighbourhood. Seven of the eight companies comprising the battalion were represented, and the Volunteers, who numbered about 300, presented a fine appearance. The inspection then took place, and after an address from Major Dick, Lord Hatherton addressed the battalion.

HAMPSHIRE.—A general review of the Hampshire Volunteers is intended to take place shortly. We understand that Lord Palmerston has expressed his willingness, and even his desire, that the review should be held at Broadlands, and that the committee of the local corps (the 11th Hants) have urged the Lord-Lieutenant to appoint the premier's park as the place of meeting for the Hampshire companies.

VOLUNTEER CAMP NEAR CHELMSFORD.—On the 13th inst., a Volunteer encampment will be formed upon Nazing Wood Common, about two miles and a-half from the Broxbourne station of the Eastern Counties Railway, when the West Essex Yeomanry Artillery and Cavalry, the Hon. Artillery Company of London, and the Victoria Rifles. will meet together, and any other rifle corps of Essex, Hertfordshire, and Middlesex, disposed to avail themselves of the advantage of brigading with artillery and cavalry by joining in the review and field-day of that afternoon.

DEVONSHIRE.—The Second Devon Battalion of Volunteer Rifles, under the immediate command of their colonel, Lord Valletort, was reviewed on Wednesday in the park of the paternal estate, Mount Edgcumbe. It consisted of seven companies, in the following order:—1st Company, Plymouth, commanded by Captain Bewes; 2nd Devonport, Captain Beer; 3rd, Stonehouse, Lieutenant Rodd; 4th Tavistock, Lieutenant Perry; 5th, Plymouth, Lieutenant Collier; 6th, Devonport, Captain Cutliffe; and 7th, Stonehouse and Maker, Lieutenant Vallack. They mustered about 400, and having formed line saluted, formed square, and performed various evolutions, to the satisfaction of Major-General Hutchinson, the Commander of the Forces in the West, who were present; they piled arms, and were regaled by their colonel on the ground with refreshments, which included a large supply of pasties made with venison, the produce of the park. Major Duperier did field duty as Adjutant. The Volunteer bands of Plymouth and of Tavistock were in attendance. The weather was fine; and the spectators, among whom was a large proportion of the relatives and friends of the battalion, were much gratified by the exhibition.

VOLUNTEERS AND TOLL-BARS.—A case of considerable importance, as affecting the privileges of Volunteers, was heard in the County Magistrates' Court, Liverpool, on Saturday. Henry Parkinson, collector of tolls at Walton-on-the-Hill, was summoned under the General Turnpike Act, for having, on 14th July, "demanded and taken from Hugh Neill the sum of twopence, for the toll of the horse he was riding, he being exempt from payment of toll, being an officer of the Liverpool Volunteer Artillery, in uniform and on duty." On the day in question Dr. Neill was acting as aide-de-camp to the Inspector-General, Colonel M'Murdo. As they passed through the toll-bar, Dr. Neill, by way of claiming exemption, said, "Officers in uniform on duty," and they rode on. When Dr. Neill's groom came up, however, the toll-collector said, "Now, then, let's have the money," and required payment from him for his master and Colonel M'Murdo also. "Why," said the groom, "officers don't pay." "Oh," said the collector, "everybody pays to-day," and insisted on being paid. After hearing the case, the magistrates retired to deliberate, and, on their return into court, Mr. Rathbone said that the bench were unanimously of opinion that the case had been proved, but they did not wish to inflict anything like a vindictive penalty, and they hoped that a fine of 5*s.* and costs would be sufficient to show all toll-collectors throughout the kingdom the course they ought to adopt with respect to Volunteers passing through their gates with their arms and accoutrements.—*Edinburgh Courant, September* 27.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, OCTOBER 2.

1st Nottinghamshire or Robin Hood Rifle Volunteer Corps—Jonathan White, Gent. (late Sergeant-Major 2d or Queen's Royal Regiment), to be Adjutant, from the 13th of March.

OPENING OF THE NEW ARMY PRACTICAL MEDICAL SCHOOL.

The opening of the New Practical School for candidates for commissions in the Medical Department of the Army, took place on the 2nd inst., at Fort Pitt, Chatham. The Right Hon. Sidney Herbert, Secretary of State for War, accompanied by Dr. Gibson, C.B., Director-General of the Medical Department, and Dr. Sutherland, one of the Royal Commissioners for inquiring into the sanitary condition of barracks and Army hospitals, arrived at Fort Pitt about noon, and were received by Dr. Hume, the principal medical officer, and staff of the establishment. The Commandant of the Garrison, General Eyre and his staff, together with Colonel Twiss, commanding the Royal Engineers, arrived shortly afterwards. An inspection was then made of the hospital wards, bath-rooms, cook-house, and other parts of the Invalid Hospital, with the condition of which the Secretary for War expressed himself fully satisfied. The visitors then proceeded to the hospital for lunatic officers and soldiers, and minutely examined every part of the establishment. They then adjourned to the mess-room for luncheon. At 2 o'clock the visitors before-named, together with the medical officers of the Army and Navy doing duty in the garrison, the professor of the school, and the candidates, assembled in the new lecture-room, when an introductory address was delivered by Deputy-Inspector-General Longmore, the Professor of Military Surgery. At the conclusion of the lecture Mr. Sidney Herbert spoke to the candidates, pointing out the advantages which were expected to be derived from the practical courses of study into which they were about to enter, and expecting them to turn the opportunities afforded of acquiring useful knowledge to the fullest account. He stated that just before leaving London he had been perusing a diary kept by the Adjutant-General of the Army in China, and that the Adjutant-General expatiated on the great advantage which had evidently been experienced in the improved healthy state of the Army, in consequence of the appointment of a medical officer with the special function of a sanitary inspector. This was the first time that such an officer had existed with a British force, and was one of the results of the new Army medical regulations. The Adjutant-General had observed that good not only sprung from the personal inspection of the sanitary officer himself, Dr. Rutherford, but also from the medical officers; those doing duty with regiments following his example, and paying greater attention to preventive, as compared with curative measures for health, than had ever perhaps been before devoted to the subject. After Mr. Sidney Herbert, Major-General Eyre and Dr. Gibson briefly addressed the candidates, and the Secretary for War and other visitors shortly afterwards separated.

The new buildings connected with the School consist of a lecture-room, hygienic laboratory, microscopical room, and model museum room. Professor Parkes was to commence the course on practical hygiene on the following day, and Professor Aitken the course on practical pathology on the 4th instant.

The following changes have been made in the officia *Navy List* for the past quarter: — Vice-Admirals, retired, Henry Jenkinson and Edward Saurin have been removed from the 1*l.* to the 1*l.* 5*s.* per diem list. Rear-Admirals, retired, William Shepheard and William Luckraft have been removed from the 18*s.* to the 20*s.* per diem list. Captains, retired, Samuel P. Pritchard, Henry Stroud, William Hext, and William Haydon, from the 18*s.* to the 20*s.* per diem list. Captains retired under Order in Council of 1st August, 1860: John MacDonell, 1846, David Peat, 1847, Thomas V. Watkins, 1847, William Radcliffe, 1848, James Anderson, 1849, James A. Stevens, 1850, Edward Herrick, 1855, and James Rawstorne, 1855. Commanders J. G. Bickford, W. E. A. Gordon, E. G. Hore, C. Vesey, H. Trollope, J. A. P. Price, W. Armytage, R. H. Risk, T. M. S. Pasley, and the Hon. F. A. Foley, have been raised to the rank of captain. Commander C. G. Phillips, 1848, has been placed on the reserved half-pay list. Commanders retired with the rank of Captain under Order in Council of August, 1860: Henry W. Hill, Thomas Mitchell (b), George Drew, William Prowse, Horatio Jauncy, C. A. Johnston, E. B. Stewart, T. Smith (c), W. Robinson, G. Hewett, W. Marshall (b), H. Tause, B. Haines, W. Pretyman, W. Robson, J. T. Nott, H. J. Jones, J. Bowie, J. Harding, J. Stephen, G. Caswell, W. Critchell, G. Spong, W. V. Read, C. E. Wilmot, G. Goldfinch, R. Dowse, W. Hamley, E. E. Gray, G. Howes, J. H. Helby, G. Oldmixon, C. H. Baker, T. Kisbee, J. Hains, L. Roberts, T. Thompson, W. K. Nicolas, S. R. Protheroe, J. E. Knight, J. W. Brown, W. Maxwell, G. F. Westbrook, J. Bulley, M. F. Brownrigg, W. J. Scudamore, C. Simmons, W. H. Baker, J. J. Keeling, R. Joachim, H. Lloyd, F. N. Clerk, and J. S. Keatley. Lieutenants to be Commanders: W. H. Blake, R. G. Douglas, J. Simpson, H. West, W. Strickland, D. Herbert, J. W. Pike, J. T. M. Nicholl, J. B. Field, L. C. H. Robinson, P. Soumarez, S. J. Greville, C. M. Buckle, E. C. Symons, C. H. Simpson, L. J. Moore, E. Nares, A. J. Kingston, J. E. Bickford, E. H. L. Ray, C. T. Jago, C. J. Wrey, C. Fairholme, F. R. Purvis, W. H. Edye, L. H. Versturme, Hon. E. G. L. Cochrane, C. R. F. Boxer, J. S. Graham, and W. S. Brown. Lieutenants G. Y. Paterson (1841) and John Reid (1842) have been placed on the list of commanders on reserved half-pay. Commanders retired under Order in Council of the 1st of August, 1860: Edward Littlehales, E. H. Kenney, A. C. T. Dickson, G. T. M. Purvis (a), C. E. Tennant, Hon. C. St. Clair, J. C. Bynon, T. Woodgate, J. J. Robinson, W. S. Cooper, J. F. L. Wood, M. Thomas, J. Sankey, and J. V. Willyams. Lieutenants retired with the rank of Commander: E. Haswell, E. Digby, B. G. S. Day, A. Aitkin, E. Hill (a), O. Swan, and T. R. Fowler.

The port division of the Channel fleet, under the command of Rear-Admiral John E. Erskine, arrived in sight of Portsmouth on Wednesday morning at half-past seven o'clock. The squadron consists of the Edgar, 91, screw, Captain James E. Katon, bearing the Rear-Admiral's flag; the Trafalgar, 91, screw, Captain E. G. Fanshawe; the Algiers, 91, screw, Captain G. W. O'Callaghan; the Mersey, 40, screw, Captain Henry Caldwell, C.B.; and the Diadem, 32, screw, Captain James H. Cockburn. The ships came in under sail and steam, and anchored at Spithead at ten o'clock.

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription is 7*s.* 7*d.* per quarter, or 30*s.* 4*d.* per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. Russell, Esq., and business letters and advertisements to Mr. Archibald Graham, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.
Office, 16, Wellington Street, Strand, London, W.C.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, OCTOBER 6, 1860.

The second summer of the year is giving us for the first time a few gleams of sunshine; it is lighting up the camps of instruction at Aldershot, the Curragh, and other pleasant places, where there are dreams of "birds," and shadows-before-coming of the fox and the pheasant, in flight and in death, where there is a present excitement about "leaves," not thick as those in Vallombrosa, but nevertheless not inordinately sparse, or rigidly refused.

It would be unjust to our officers to suppose that they are not fond of their profession, because they are not averse to getting away from camp. And hereby hangs many a tale! As we write the Camp at Chalons is being broken up. The 6th French are moving from the banks of the Marne to a pleasant sort of place called Paris; the 23rd to the neighbourhood of partridges and hares at Langres; the 44th to Paris and Charenton; the 7th Chasseurs to the joys of Besançon; the 13th to the pleasures of Toulouse; the 19th to Vincennes—ah! Versailles and Paris are so near; and so on. Artillery, cavalry, all are on the move, and the camp at Chalons will cease to be a geographical expression of the present. Another portion of the French army is moving from Lyons to spend the autumn and winter—the fashionable season, in fact—at Rome. There are two brigades of these lucky fellows, commanded by General De Gerandon, the 3rd battalion of Chasseurs, the 19th Foot, the 51st of the Line, under General Chambarlhac; the 39th, the 71st, the 4th Hussars, the 8th field battery of the 16th Regiment of Artillery, the 5th company of the 2nd Regiment of Engineers, under General Micheler. Just think where their English co-relatives are! Ponder, too, on the fate of those who, for the next four, five, or six months may be doomed to contend against the mud, the rain, the snow, the cold, and the railway fares of the camps, in which our troops must live. The value of those camps is no doubt very considerable, but it might be quite as great, and very much greater, without any of the disgust and irritation which are the concomitants of camp life in England and Ireland. It must be remembered, after all, that our Army is but the paid, ancient, and tested definition of the Volunteer principle; and that although the public service must be performed at any cost somehow or other, it would be unwise to force gentlemen of independent fortunes to ask themselves why they were undergoing all the inconveniences and social discomforts of a military life, which they think rightly or wrongly to be attended by no military advantages, when they might be enjoying the pleasures of country or town life, and the more certain enjoyment derived from the fulfilment of their duty in civil life as country gentlemen. A British officer has fallen on evil days when, in his own land, he has no stable in which to put up his poney, and where his dog-cart must stand out in the open. Of course, Monsieur le Sous-Lieutenant Casseralle would laugh at the notion of such luxuries; but his early experiences of life were by no means like those of the son of our rector, who has been led by a bit of red cloth into the Line. We are very far indeed from feeling any sympathy with the "grumblers" of our Army, but "grognards," old or new, may have some show of reason on their side; and we do not see why the authorities should not take heart of grace, and take steps to render the inconveniences of camp life, as it is likely to present itself this winter, a little less intolerable. We do not propose a medal for two winters at Aldershot, or a clasp for a Shorncliff campaign; but we are of opinion that without any increase of expense such improvements could be effected in camp life, that it would not be so repulsive as it is to many officers at present. What might not be done, for example, if the "authorities" would but order permanent roofs to be put to the stables of some of the horses at Aldershot, instead of the canvas coverings, which cost a great deal of money, and must be renewed every three or four months? What would be the saving in horseflesh if they would put up bars between kicking chargers, or of nosebags and corn if they would but erect mangers? Such small miseries from a legion which is strong as many devils,—small boons would go a great way to alleviate their tortures and cast them out; and even though they went into the swinish herd of the economists they could not do much harm. "All drill" and "no play" must make your soldier a very dull and perhaps a very wicked boy. Imagine the life of the man—the private above all—who from towns remote, without any resource or pleasant sauntering ground—with nothing but the regimental reading room or the canteen—has the long British winter to face—leaveless, wifeless, sportless, on the muddy swamp of his camp! It is a moral Inkerman in which he must fight without hope of aid. Is it so? In India our soldiers get up private theatricals. So do our officers; and many a night is passed pleasantly by means as innocent as can be desired. The Russians have their singing-schools, and chorus, and parts-song evenings. The officers join and direct the men, just as our officers did in India. If encouragement, or, rather, initiation, were to be given, the results must be good for the men, and for the officers there are some judicious changes; and there is also a little consideration to come into play which will deprive the word Aldershot or Curragh of its terrors. As to the purely military questions connected with these camps we shall speak on a future occasion.

The deficiency of military and naval historians in old times does not permit us to know what was the general sentiment of the fighting world when some ingenious blacksmith invented the cuirass or the rostrum; but we venture to think that there were grey-headed marshals and admirals in the armies and navies of the ancient world who, at the time of those innovations, were firmly convinced that a good stout javelin or arrow could strike through any coat of mail, and that a heart-of-oak trireme, impelled by stalwart slaves, would send these new-fangled galleys to the bottom. We have at the present moment, for good or for evil, in this country an agency more powerful than that of any council of chiefs, terrestrial or marine—it is called Public Opinion; and it is not necessarily either the representative of the writers of the press, of the clacque of parliamentary leaders, or of the momentum of temporary popular excitement. It may be the solid

Digitized by Google

residuum cast down by the fermentation of these influences, or it may be the spirit which comes out of the *caput mortuum* of the distillation; but it surely differs from its original components in the soundness, wholesomeness, and permanence of its characteristics. In the columns of our great daily contemporary we generally find, by careful analysis, not only the actual product of the various processes by which public opinion is formed, but the exact action set forth day by day of the processes which lead to the result. It is in no vain spirit of boasting that we say, the conclusions which the *Times* has, with gigantic power, enforced in its recent articles on steel or iron-clad vessels were arrived at and enforced in the ARMY AND NAVY GAZETTE at a time when they were not only exceedingly unpopular, but when they were opposed to the supposed knowledge and experience of our Governmental departments, as well as to the prejudices of the profession. Not very long ago it was believed that armour of proof was of no use, because, if the plated warrior came within the penetrating range of your cross-bow, he might be hit by a lucky bolt; but no one seemed to consider that if the hero kept beyond that range he could, without danger, shoot clean through the naked flesh and blood opposed to him. Hampered with his iron plates, it was difficult to suppose the warrior could keep his distance or move with agility; but then steam, like a war-horse, was called in to aid the knight, and by careful training he learned how to carry the ponderous armament. In order to meet this formidable antagonist, the use of special ordnance, provided with special missiles, was proposed; and it was shown that, if the enemy remained stationary at a short distance, his sides could be pierced by great efforts, whilst it is not yet determined that those are wrong who affirm similar results could be produced by the heaviest sea-service artillery. When we saw the *Times* inclined to support the views of those who declaimed against the utility of cuirassed vessels, because they were not shot-proof under certain conditions—little likely to occur in action—and to argue against any outlay in building them, we feared that the authorities might be induced to adopt the opinion which was prevalent at the time; and it was with much satisfaction, therefore, we perceived the discussion to which the columns of our contemporary were thrown open, had exercised its natural influence, and that the propriety of entering upon the competition which the activity of our ally presented to us was fully recognised and enforced. The last article on the subject, however, would convey the notion that La Normandie is a failure, and that the non-success of that ship is a drawback to the triumph claimed for the builders of La Gloire. We have no information to corroborate the statement; on the contrary, we believe La Normandie is still in the basin at Cherbourg, and that she never has been to sea—indeed, we doubt if her iron plates are on her sides yet. "Unhappily we cannot," says the *Times*, "refuse the obligation of the cost of the new fabrics if it is imposed upon us." And so say the Admiralty, we are glad to believe. Mr. Whitworth would no doubt be better pleased to see the money spent in more rifled guns; but, notwithstanding his admirable mechanical skill and the great results he has achieved, we are inclined to doubt the soundness of his judgment when we see him gravely writing what sounds very like nonsense, about hitting the axis of a ship's screw, or her port-holes, under impossible conditions. Mr. Whitworth seems to think that a seaman in action can work his tangents, scales, and sights, as coolly as if he were a trained mechanic experimenting in his workshop, and that his aim can be as steady and true on board a ship at sea, amid the smoke and turmoil of battle, as would be Mr. Whitworth's own on the sands of Lancashire on a calm, still day.

The absurdities spoken and written about "concentrated broadsides," have been disposed of by Captain Halsted, who has knocked some other notable fallacies and follies on the head; and we would suggest to those who think there is nothing like leather, and who contend that little gun-boats, with big rifled guns, would dispose of the cuirassed giant, steaming 13·5 knots, and armed as heavily as themselves, to go to sea in one of their darlings, and see the gun cast loose, and some practice made in the least possible sea way, 'ere they are quite so confident. For ourselves, with some experience, we must say we never yet saw very good practice from a gun-boat under return fire. On one occasion we were on board a heavily armed steam-sloop, flying the flag of a British Admiral, and attended by some four or five steam gun-boats, when a field battery opened upon us from some 1500 yards. Sloop and gun-boats replied, but our fire could not silence the field-guns, and we drew out of range at last. An iron-coated ship could have run in close, and swept off guns and gunners by a few shot and shell. We leave our readers to draw the moral for themselves.

We were somewhat startled on Saturday morning last, to find in the daily papers the announcement of the total loss of the Conway, chartered by the Emigration Commissioners to convey soldiers, women, and children, for Calcutta, coincident with the article in this journal, in which we said we did not think "the unaccountable loss of the Commissioners' vessel, the Guiding Star, sufficient to bear out the strong views, as to the unseaworthiness of their vessels, entertained by Mr. Phillipps and Mr. Marshall." The language used by these gentlemen before the Transport Service Committee was certainly very strong; so strong, indeed, that it appeared as if it were in a measure coloured by some degree of animus towards the Emigration Board, arising from a difference of opinion as to the best mode of ventilating transport vessels. We therefore only slightly alluded to it; but the dismasting and abandonment of the Conway, compel our attention to the serious warning given by both the eminent shipowners above named, that such an occurrence would probably happen.

We observe that Messrs. Baines have written to the *Times*, stating, that they have claimed a full investigation by the Board of Trade, in order to prove the perfect sea-worthiness of the Conway. We do not wish to prejudge the result; but, of course, with the Conway at the bottom of the sea, 300 miles north-west of Madeira, much *ex post facto* light cannot possibly be thrown upon the matter by any such inquiry now.

We apprehend that the weakening of a vessel by cutting holes in her deck for ventilation, in the manner objected to by so many ship-owners, would chiefly be felt in the want of support for the masts in a heavy gale, such as that encountered by the Conway. Captain Sabiston, of the Summer Cloud, who, providentially fell in with her, and nobly managed to receive all on board, thus writes:

"On Sunday, 9th of September, we fell in with the ship Conway, dismasted, and full of women, troops, and children. It was our duty to stand by them, in the state they were in, till morning, when we took off 416 souls. We began at 8 a.m., and finished at 9 p.m., all in our three boats, without a single accident, and the Conway rolled fearfully. I never yet saw such a fearful scene of wreck and destruction in my life before; her masts all lying over her stern, and men, women, and children rolling about the decks."

In the midst of such a scene of distress as this, it cannot be expected any satisfactory evidence will be obtained from the rescued master and crew. While the storm was bursting over them and their masts were falling, it could scarcely be critically observed how far the decks yielded or withstood the strain. It can, however, be ascertained in what respect the Conway was considered unsafe by the India Council's surveyor; and also whether her decks were afterwards cut up when she was engaged by the Emigration Commissioners.

It was in the early part of July last, it seems, that the India Council rejected the Conway, and a few weeks afterwards that she was accepted by the Emigration Commissioners, whose mode of doing business was so lauded by Mr. Mackay, partner of Messrs. Baines & Co.'s firm. Mr. Phillipps gave his evidence on the 13th July, Mr. Mackay on the 20th of that month.

Although it appears that the Commissioners of Emigration are less strict in their survey of vessels than the India Council or Admiralty, Mr. Phillipps is of opinion that their "vexatious restrictions" cause an increase of price for transport, and is "decidedly of opinion that the cost to the country of taking out emigrants has, in consequence of the management of the Commissioners, increased to a considerable extent." This, however, is of minor consequence, compared with the safety of the passengers. But one obvious question suggests itself. The Conway was engaged by the Commissioners of Emigration, not to convey emigrants, but to take 364 soldiers, women, and children to Calcutta; and she was taken up by them a few weeks after the officer of the India Council had surveyed her, and rejected her as unfitted for such service. Here we have a revived specimen of "divided government" in its very worst form—not between the Indian and English officials, and at some decent interval of time, but between two public offices in London, engaged in doing similar duties, and at the same moment. It only wanted such a proof of the absurdity and great danger of the present system to confirm the strong testimony received by the Transport Service Committee, that an efficient single Transport Department is a public necessity. The lives of our soldiers, their wives and children, ought no longer by any possibility be risked in vessels like the Conway; and we cannot help asking, who is responsible for permitting the Emigration Board to take up that vessel, and risk upwards of 400 lives, after she had been rejected and reported unfit by a competent officer?

Major J. T. N. O'Brien, 20th Regiment, has been appointed provisionally as Military Secretary to Major-General O'Brien, commanding the troops in Ceylon. Captain O. H. A. Nicolls, R.A., is appointed Aide-de-Camp to General O'Brien.

Captain Milligan, 39th Regiment, is Aide-de-Camp to Major-General Lord William Paulet, commanding the South-Western district.

Lieutenant F. G. Coleridge, 25th Regiment, has been appointed Aide-de-Camp to Governor Keate of Trinidad.

Captain James Paul, 65th Regiment, has succeeded Captain Stack, of the same corps, as Brigade-Major at Auckland, New Zealand.

Captain Gascoigne, Grenadier Guards, is acting as Aide-de-Camp to Major-General C. W. Ridley, C.B., the newly-appointed commander of the troops in the Cork district.

Captain J. T. Chandler, of the 47th Regiment, has been appointed Staff Officer of Pensioners at Waterford, in the room of Captain Driver.

Captain E. Welch, late of the 93rd Highlanders, has been appointed Barrack-Master at Montreal.

Captain C. M. Creagh, late 80th Regiment, has been appointed Barrack-Master at Dundalk, vice Shrapnel, transferred to Quebec.

The correspondent of the *Moniteur de la Flotte*, writing from Toulon on the 30th of September, says:—"Ship-building here is not very active. At this moment the attention of the authorities is chiefly devoted to the construction of the Invincible, an iron-plated frigate, building on the same model as the Gloire—a vessel which has shown such brilliant results." It would appear from this that our intelligent neighbours are thoroughly satisfied with the performances of the Gloire, and that they are resolved not to be left behind in the race for the reconstruction of their navy.

Vice-Admiral Sir Charles Fremantle, K.C.B., the Commander-in-Chief of the Channel Fleet, transacted business yesterday at the Admiralty, and subsequently left for Plymouth. The gallant admiral will, however, on arrival there, strike his flag, and proceed on leave of absence.

According to existing arrangements, Her Majesty the Queen and the Prince Consort will embark on board the royal yacht, the Victoria and Albert, at Antwerp this day week, the 18th inst.

The following paragraph has appeared in the *Times*:—

"We regret to learn that in consequence of continued and increasing illness, Vice-Admiral of the White Sir Arthur Fanshawe, K.C.B., recently appointed Port-Admiral at Plymouth, is obliged to resign that appointment. The gallant Admiral had a severe attack on Tuesday. On Wednesday he was visited by Staff-Surgeon Robert T. C. Scott, of the flag-ship Impregnable. The second in command, Rear-Admiral of the Red Sir Thomas S. Pasley, is at present absent on leave, and his duties as Superintendent of the Dockyard are performed by Commander James Brown, R.N., the master-attendant. At the present moment, the flag-ship Royal Albert being in the Sound, it is possible that the Lords of the Admiralty may appoint the Captain of the Fleet, Rear-Admiral Robert F. Stopford, to undertake the duties temporarily of the Port-Admiral at Plymouth. Vice-Admiral of the White Sir Houston Stewart, K.C.B., is spoken of as successor to Admiral Fanshawe."

We share in the regret exhibited by our contemporary in reference to the state of Sir Arthur Fanshawe's health, as no officer could be more popular in the Service than he is. We, however, hope, in the event of a vacancy occurring, that the Duke of Somerset will pause before he confers the appointment on his relative, Sir Houston Stewart, who has only within the last few months returned from the enjoyment of a lucrative command. Surely, the Vice-Admirals' list can supply another name besides that of Sir Houston's.

The Starboard Division of the Channel Fleet, consisting of the Royal Albert (flag), 121, Conqueror, 101, Centurion, 80, Aboukir, 90, arrived in Plymouth Sound on Wednesday. It is stated that the Aboukir will have to go up Hamoaze to undergo some repairs. In the event of Sir Charles Fremantle proceeding on leave—which, owing to private affairs, will probably be the case—the command of this portion of the Fleet will devolve on Rear-Admiral R. F. Stopford.

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From our own Correspondent.]

Naples, 29th September.—The cause of events is progressing here, but not with its characteristic rapidity. This week, however, has not been without its incidents; amongst which ranks first in local interest the loss of a Garibaldian position at Cajazzo, and its subsequent recapture by the Calabrese troops, but not without loss on both sides. I have, through the kindness of General Militz, a native of Poland, had an opportunity of inspecting the country in the vicinity of Caserta and Capua. An aide-de-camp of the general accompanied the party to which I belonged, and pointed out the different positions, including those of the Garibaldians at Cajazzo, and the Neapolitans at Capua. I was thus enabled to obtain a much more satisfactory and comprehensive notion of the whole relative position than I could otherwise have had. My first impression (and in all probability the impression of many others) was, that on arriving at Caserta I had but to go on to Santa Maria and find Garibaldi's followers in great force, whilst opposite would be the advance posts of the Neapolitans thrown out some distance in advance of Capua. Former war experiences in the Crimea, and even in Sicily, led me to expect this. So that, leaving Naples at 10 a.m., I expected to have completely inspected the ground, and returned the same evening. Trains from Naples to Caserta and Santa Maria run all day long, and convey munitions of war as well as troops, with a mixed freight of nondescripts, consisting of amateurs, recruits, &c. Tickets are dispensed with almost altogether, or at least if purchased, a work of supererogation is performed thereby. On reaching Caserta, which may be regarded as the head-quarters of the Garibaldian force, the train stopped a short time, depositing recruits, &c., and then went on to Santa Maria. Arriving here the carriages were soon emptied, and a motley crowd, in which red shirts and rifles were numerous and conspicuous, set out in their simplicity for "the front." After passing some little way along a hot, dusty road, I came to a barricade with two field-pieces in position, and expected to have had a "parlamento" before being allowed to pass; to my surprise, however, no prohibition was made, and I pursued my way until I reached the most advanced post on that road. Here an officer very civilly informed me that further progress was prohibited. On my representing to him that I wished to get to the front he, *more Hibernico*, replied that there was no front, or at least nothing more to see than outposts such as the one he was in charge of. Under these circumstances there was nothing for it but to return to Caserta, where through the kindness of the general, as I have mentioned above, a very satisfactory view of the whole position and ground was afforded us. There are several large bodies of Garibaldians in the neighbourhood, between Caserta and Capua, but there does not appear to be any such concentration of them as one might expect, or such as will without doubt be made when the time of making the assault arrives. The king is said to have been seen upon the walls at Capua, so that he is evidently encouraging the garrison as much as possible by his presence. Garibaldi's troops are becoming impatient of the delay, and are all desirous of getting the orders to storm at once; it is well known that their artillery, without being in first-rate force, is sufficient to make a breach, and the orders to attack are daily expected. *Notizie de Capu*, or news from the actual seat of war, are published daily in Naples, and vended through the streets, but as yet these flying sheets contain nothing of interest. The enrolment of a national army is progressing at an astonishing rate, and has already advanced to a considerable height.

Garibaldi has appointed a commission to inquire into the state of the Neapolitan prisons, with a view to the classification of prisoners and other reforms, all of which are much needed. He also published an address to the Venetian refugees, directing them to form a corps, and organise themselves for purposes of war. A decimal coinage is also ordered, which will come into circulation on the 1st of January, 1861. The Bishop of Ariano, of the order of "Predicatori," has given in his adhesion to the new government, and in the most solemn manner sworn allegiance to the King of Sardinia. A decree of the Dictator's has appeared for the purpose of warning clerical agitators of the consequences of persisting in their former evil ways; it announces that every such offence of disturbing the minds and consciences of the people will, on proof, be punished with an imprisonment of from three months to two years; if the offence be committed by means of written or published instructions, the penalty will be from six months to three years' imprisonment, and in all such cases there will be a further punishment of a fine to extend as far as five hundred ducats; if the counsels given be calculated to produce disobedience to the laws of the state or to public authority, the punishment will be imprisonment of duration not less than three years, and a fine of not less than five hundred ducats; and, moreover, if the instructions alluded to as seditious, be, on publication, followed by a revolt, the originators will be considered as accomplices, and treated accordingly. The Cardinal Archbishop having proved contumacious has thought fit to absent himself without leave, and his property is in consequence confiscated and devoted to public use as follows — 300*l.* a-year is allotted as the stipend to be paid to his successor, and the remainder goes to increase the stipends of the inferior orders of the clergy of the diocese. A ladies' benevolent committee has been formed for the purpose of collecting money and medical comforts for the sick and wounded, as well as lint, bandages, and old linen, for the same charitable purpose; and Gavazzi concluded his lecture on Thursday last with an appeal to the sympathies of the audience assembled in the square of St. Francis de Paul, adding that if they were prepared now to testify their patriotism, to at once contribute to the urgent need by throwing in every one his pocket handkerchief! The consequence was, that in a few minutes several thousands of these useful articles were collected, and many donations of linen and money as well.

The national fleet amounts now to a considerable strength, The vessels remaining at Gaeta are, the sailing-frigate Partenope, and the paddle-wheel brigantines Saetta, Messaggiero, and Delfino. The Neapolitan officers who have, with the exception of those at Gaeta, all given in their adhesion to the new government, have proposed to the authorities to allow them to navigate the ships round the coast for the purpose of recruiting men, they themselves meanwhile serving as seamen until the new crews be raised. This proof of patriotism on their part is highly lauded by the Neapolitan journals. Our attention here is divided between the expected attack on Capua and the news from the Papal States. The French force at present in the Roman territory has assumed the title of Division of Occupation, commanded by General Count de Goyon, and is composed of the 1st brigade, General de Noue; 25th Regiment of Infantry, Colonel Floyd; 40th Regiment of Infantry, Colonel Peyssard; 20th battalion of Cacciatori-a-piedi, Commandant Lepage des Longschamps. 2nd brigade, General Ridouel; 7th Regiment of Infantry, Colonel de Maussion; 62nd Regiment of Infantry, Colonel Aymard. Cavalry—half a squadron of the 4th Regiment of Hussars. Artillery—4th and 7th batteries of the 16th Regiment of horse artillery; 4th company of the 4th squadron of the artillery train; 4th company of the artillery artificers. Engineers—3rd company of 2nd battalion of 2nd Regiment of Engineers. Further reinforcements were spoken of by last advices.

The following is the latest proclamation from the Dictator, and bears date the 27th September, 1860:

"The head-quarters is at Caserta. Our brethren of the Italian army, commanded by the brave General Cialdini, combat the enemies of Italy, and conquer.

"The army of Lamoricière has been cut to pieces by these brave fellows. All the provinces subject to the Pope are free. Ancona is ours. The valorous soldiers of the army of the north have passed the frontier, and are upon Neapolitan territory.

"In a short time we shall have the good fortune to grasp those victorious right-hands. "G. Garibaldi."

The daily papers in publishing the above order of the day express their satisfaction thereat, and congratulate the city on its tenor and import.

THE CHINA EXPEDITION.

By the China mail, which arrived in London, we have accounts of the Allied expedition. We learn that the British forces quitted Tah-lien-whan Bay for the Peiho on the 26th July, at which date the French expedition was to have left Che-fow. It is satisfactory to be assured that our forces are complete in every respect; though unhappily the same cannot be said of our allies, who are represented as defective in numbers, short of artillery, and without cavalry or sufficient means of transport. Expectations are entertained that the display of force will alone suffice to bring the Celestial Government to terms; but Lord Elgin has determined upon striking a blow before treating, and for this purpose the first division of the Army will be landed at Peh-tang, and advance on the forts, upon which a combined attack will be made by land and sea. We make the following extracts from the letter of the special correspondent of the *Times* with the expedition:—

"Since I last wrote the plan of attack has been changed. In April last reconnaissances were made by the English and French, which resulted in an arrangement that the French force should land south of the Peiho, at a place called Chi-kau, while the English proceeded to Peh-tang, twelve miles north of that river, and there disembarked. The Taku forts would thus be taken in reverse on either side. However, on the 16th instant, Colonel Schmitz, the *chef d'état major* of the French army, returned from a more extended reconnaissance, and reported that it was impossible to effect a landing at any place to the south. The water is so shallow, and the mud so deep, that, though the men might possibly be landed, the shore is quite impracticable for horses and artillery. Sir Hope Grant and Admiral Hope left next morning for Che-fow, and a council of war was held at General Montauban's head-quarters on the 18th, when it was determined that the whole force, French and English, should land at Peh-tang, and that the attack from the south should be abandoned. General Montauban named the 26th as the day when he should be ready to start, and accordingly we sail to-morrow morning.

"On Friday, the 13th, the French General and Admiral Charner paid a visit to the English camp. Sir Hope Grant had made arrangements for an inspection of the artillery and cavalry, and at 11 a.m. Lord Elgin accompanied the English and French Commanders-in-Chief and the French Admiral to Odin Bay. The troops were drawn up on the beach; King's Dragoon Guards, Probyn's Horse, Fane's Horse, and half a battery of Armstrong guns. It was a lovely summer's day, as the bright morning sun glistened on the spears of the wiry Sikhs and the heavy sabres of the stalwart King's Dragoon Guards. The bright scarlet coats of the dragoons were in happy contrast with the blue-black tunics and turbans of Probyn's Irregulars, while the red turbans and light blue dress of Fane's Horse, relieved the more sober hues of the Artillery uniform.

"A salute of 19 guns welcomed Lord Elgin, and two of 13 guns each, greeted the French Admiral and General. Lord Elgin, General Montauban, Sir Hope Grant, and their brilliant staffs, were mounted on some 30 magnificent Arabs, and cantered along the front of the cavalry drawn up in line two deep. They then ascended a hillock, and the cavalry and artillery defiled before them. The King's Dragoon Guards turned out clean and soldierlike as if they were stationed at Aldershot instead of being encamped in Manchuria. Probyn's and Fane's Horse were models of light cavalry soldiers, wiry and active, hand and seat equally easy. The Royal Artillery looked as usual,—ready to go anywhere and do anything. There were upwards of 1000 sabres, and I unhesitatingly say, that in no part of the world could 1000 horses be found in finer condition or more suited to their work. It is more than probable that no one of them had ever been inside a stable, yet they looked as blooming and fresh as the flower of the Pytchley or the front rank of the Quorn will turn out soon after this letter reaches England. Why do not the military authorities utilise these Sikh Irregulars elsewhere than in India? They have no prejudices of caste or race; they will eat and drink whatever you give them, are hardy and robust, accustomed to a climate much like our own, and, when properly looked after, not inordinately given to loot. Their conduct here has been exemplary, and they are the very men for outpost and picket duty. France has her Spahis, and Russia her Cossacks. The Sikhs are superior to either, and India will afford many a Probyn and Fane to lead them. After the cavalry had defiled we had tilting at the tent-peg. A peg is hammered firm into the earth, about three inches only being visible; at this the horseman, armed with a long spear, rides full tilt, his object being to pierce the peg *en passant*, and bear it off on the point of his lance. This exercise requires a firm hand, a good eye, a steady seat, and a strong wrist. A "muff" will stick his spear into the ground, and will then either bring its point between his horse's legs or its top against his own head, his wrist being violently sprained into the bargain. Your accomplished tilter raises the spear as he pierces the peg, and waving it round his head rides on triumphant. Probyn led and Fane followed, but both missed the peg, their horses being out of practice. Then came a Sikh, with body extended and spear all but sweeping the ground. His shouts and yells urged his horse to the very top of his speed. As he passed the peg he struck it right in the centre, and bore it off amid great cheering. Both officers and men soon got into practice, carrying off the trophy five times in succession. A stick was then stuck loosely in the ground, with a small piece of cucumber at the top. Probyn, at full gallop, sliced off the top; Fane made an equally good cut; and a third officer completed the work —the stick never having been moved. Their sabres are like razors, they have never been acquainted with a steel scabbard, and in the hands of such swordsmen are most deadly weapons.

"It was then announced that a few shots would be fired from the Armstrong guns, and a rush was made to the beach. General Montauban and the officers of his staff inspected the guns most minutely; their principle and mode of working being explained by Captain Brabazon, Royal Artillery. Practice commenced at 900 yards, the object being a small tree on the side of the hill. A percussion shell was fired, which burst with terrific force on striking the ground, about six feet in advance of the tree. Had a column of infantry been near that spot its effect would have been frightful, for the pieces were scattered far and wide in every direction. The next shell struck the ground and exploded seven or eight feet above the tree. Other shots were fired with good effect, and the last two were at long range. In the first of them the gun was too much elevated, the shell flew hurtling right over the hill, and was lost to sight and hearing. The last hit the hill precisely at the spot to which it was directed. I shall abstain from offering any opinion whatever on the gun until it has been tested in action; but I have a word to say about the carriages. I minutely examined those which were out to-day. They are made of the best teak, and most substantially put together, having been ordered expressly for withstanding the wear and tear of China, where the roads are few and bad and the sun frightfully hot.

"A force of 1500 men and one or two ships will be left to guard Tah-lien-whan, where the stores will be kept and hospital marquees erected for the sick. Here they will remain until, the unhealthy months of September and October being past, they can be sent to Hong Kong, and thence to the Cape. An hospital ship will also remain *en permanence* in the bay to receive the more serious cases, while two others will accompany the expedition to the Gulf. We count 39 French ships in port at Che-fow, some of them transports of the largest size. The Dryade, the Enteprenants, and one or two others, were originally intended for large frigates, and then cut and lengthened. They brought 900 and 1000 soldiers each, and lost very few men on the voyage. The Rhone, Loire, Rhin, &c., are steamers of another class, built expressly for the service, and not excelled by any transports afloat. The Rhone carried 950 men, with provisions for six months. She is upwards of seven feet high between decks, and admirably fitted in every particular. But the transport service is not popular with the officers of the French navy, who naturally desire to take a part in the more active service of their profession. There are but six despatch gunboats in the bay, and they are the only French vessels that can cross the bar of the Peiho. On shore the scene is busy and bustling. Large shears have been set up close to the water, and the crews of the different men-of-war are busily engaged in landing and putting together the three iron gunboats which came out in the Weser. Fifteen of these gunboats have been sent from France in different ships, but three only have arrived. The Chinese question will, therefore, be settled one way or other before the missing boats reach their destination.

"These gun-boats are made of iron, and sent out in 15 pieces. The bow and stern pieces form two compartments, the remainder of the vessel a third. They are 78 feet long, and 18 feet beam, with two rudders, one at the stem, another at the stern. Each boat is 75 tons burden, carries one rifled 30-pounder, and draws five feet water. The boiler weighs six tons and a half. For eight days past the French blue-jackets have been busy landing these boats, and yet two are lying disjointed as they came out of the ship, while the third has seven pieces joined together. The officers who command them have done all that energy and skill could devise, and the men have worked with a will. But it is one thing to make experiments in a dockyard with everything at hand, another to work in a deserted bay on the coast of China. At Toulon the boats are put together in 36 hours. Not one of them will be completed here under a fortnight, if then.

"The good health of the troops continues. Less than four-and-a-half per cent. are on the sick list, including therein all the men who have cut their feet with oystershells while bathing. There are not more than one per cent. of serious cases. One regiment, the 99th, is 598 strong, and has but two men absent from duty. The hospital ships are models of comfort, and even luxury. No want of "medical comforts" here. Whatever the patient requires is at hand, from champagne and sherry to sago and arrowroot. The consequence is that Sir Hope Grant has embarked 11,194 men for service at the Peiho, in as good condition as though they were taken from the healthiest rural district at home.

"The arrangements for embarking reflected the greatest credit on Colonel Mackenzie, Colonel Walker, and the Quartermaster-General's Staff, as well as on Lord John Hay and the naval officers. 2000 cavalry and artillery horses, and nearly 3000 ponies and baggage-horses, were embarked without a single accident. As each transport was filled, a

Digitized by Google

saucy little gun-boat walked up to her—a pigmy beside a giant—hooked her on, and carried her whither she listed. There is nothing afloat like these English gun-boats. They turn within their own length, poke their noses into every creek along the coast, and are the school in which some of the best men in our Navy have been trained.

"The infantry embarked on the 24th, and in the afternoon I walked over the ground occupied for a month by the First Division. The trenches and field ovens marked the spot where each regiment had been, and the Chinamen were hunting about for bottles, old boots, bones, firewood, and whatever they could lay hands on. As soon as the soldiers were embarked, Sir Hope Grant requested the "notables" of the nearest village to assess the damage which had been done to their property by the six regiments which had just left the ground. They made a careful survey, and presented a claim for 180 dollars, about 40*l.* of our money. This modest demand bears unquestionable testimony to the good conduct of the men and to the honesty of the country people. In fact, looting up here has been all but unknown."

THE ORGANISATION AND USE OF CAVALRY.

From the Papers of the late FIELD-MARSHAL RADETZKY, *written* 1837-8.

(*Concluded from p.* 670.)

RESERVE CAVALRY.

The reserve cavalry forms the real, great, distinct cavalry corps of an army. It is not, therefore, placed like the cavalry of the line, in line of battle, but stands behind it in reserve. It has a distinct commander, and is under the immediate orders of the commander-in-chief. It appears on the field of battle when the battle is nearly decided. Its task is to complete the victory or save us from defeat.

Much depends upon the prudent and determined command of this body of men. Every army may number good cavalry officers amongst its generals, but it is not easy to find a commander for a cavalry reserve corps. It requires a man of great physical powers, with a keen military eye, full of fire and even impetuosity, yet combined with great command of temper so as never to allow himself to be led into a hasty fruitless attack. But as soon as he seizes the proper moment, and orders his squadrons to advance, then hesitation must be cast aside, nothing must stop his impetuous onslaught, he must only consult his own courage and determination, and lead on his men chivalrously sword in hand.

It is clear that it is not easy to find men of this stamp to combine so many qualities; but when the materials are to be found, they ought to be cultivated, and opportunities given to practice in the management of large bodies of cavalry, for practice alone sharpens the eye. As the reserve cavalry is meant to act only in large masses, it must be accustomed to it. I cannot admit the principle that a brigade or a division is to be handled the same as a regiment. Such a body requires a larger space, and it is more difficult to form a judgment of a large space than of a small one. Moreover, there are more difficulties massed together in a large space than in a small one. When and where the reserve cavalry is to be employed—that must be left entirely to the discretion of the commander-in-chief. But here again the principle holds, that it must not be brought too soon into action, and its action reserved for the decisive moment. Desperate charges of cavalry seldom succeed, unless the enemy's infantry has first been broken.

All cavalry, whether successful in the charge or not, gets into disorder. But this disorder becomes a chaos if it allows itself to follow up victory or takes to flight. In this condition a comparatively small division may snatch victory from it. It is, therefore, a general—especially for reserve cavalry—practical rule, that it must never follow too far in pursuit. For pursuit, light cavalry is better suited than heavy cavalry; and it must take up the task while the victorious heavy cavalry re-forms again in order to continue its action to strike a still more decided blow. Hence it follows, that the reserve should always have light cavalry attached to it, which follows close upon it in columns, covering its flank, or retreat if worsted, and endeavouring always to command the enemy's flank, and bring him to a stand by a bold attack.

Most cavalry attacks are made in parallel fronts, because they are the most natural. But here the victory is most sanguinary, as both parties fall upon each other with all their might. If, therefore, we can possibly manage to fall upon our enemy's front *en oblique*, this manœuvre alone ought to be sufficient to give the victory. But it is no easy task to carry out this manœuvre, as our opponent has taken his precautions. We must therefore take him unawares; he exposes himself most easily to this danger, if he allows himself to be led into too hasty development of his forces, whilst we are still in column, and have not shown our intentions. Once developed in front, we begin to manœuvre; for to break up a long front into columns again, demands time, and is a dangerous manœuvre in presence of a watchful enemy. A precipitate advance of cavalry is a great and evident proof that the commander has no eye for his task.

If we succeed in driving the enemy's cavalry from the field, it will not soon reappear there; our attack must now be directed against the exposed wings of the infantry, whilst we send our light cavalry in pursuit of the flying enemy. But it is a difficult thing to stop one's own victorious cavalry; therefore, they must be accustomed in time of peace never to follow too far in pursuit. The position of our reserve cavalry must, as much as possible, be kept concealed from the enemy, that he may not guess where our strength lies. But it must always be near the point where the decisive struggle will take place, whether it is that we may then attack or act on the defensive, until the strength of the enemy has been broken against our position. It is always the task of the reserve cavalry to strike the decisive blow.

The position of this cavalry must be in concentrated and condensed order, as it is only in such a position that the troops can be held in hand and managed, either totally or in part according to circumstances. Brigade double columns, the light cavalry in columns in second line on the wings, appears to me the best suited position that can be selected. Thus placed I am able to await the development of my opponent's intentions, I can easily handle every individual brigade, and whilst I threaten the enemy's front with one brigade, I can gain his flank with another.

As the present observations are not intended to lead us into the details of cavalry tactics, it is not necessary here to describe individual manœuvres; I simply wish to point out the importance of the principle of concentrated power upon which depends the whole effect of a cavalry corps. The reserve cavalry must be composed morally and physically of the best elements of the army. The personality of the individual must be visible everywhere. But as the system of picked troops has its advantages and its drawbacks, its *pros* and *cons*, let at least the physical element be considered. The men and horses must be strong and healthy. I should give them a back and front cuirass, a well-made helmet, a hand and shoulder guard; as offensive weapon a lance. Montecucculi justly styled the lance the queen of weapons; that this claim has not yet been disowned is proved by the fact that even at the present day our muskets with the bayonet are nothing more than firearms with a lance at the end. Besides the lance every horseman should have sword and pistols.

As we have divided cavalry into light, line, and reserve or heavy cavalry, it will be naturally understood that the latter ought not to be employed in petty warfare and skirmishing. Each body therefore ought only to be employed against another body when perfectly competent to meet it in point of arms and efficiency.

Quick movements are beautiful, and at times necessary; but as regards heavy cavalry, measure and time must be considered, for the horses must not be blown, and above all things order must be maintained.

To every heavy brigade we should annex a regiment of light cavalry, for which service the uhlans are well suited. The duty of this regiment is to keep a careful eye on the brigade's movements, after a successful attack to pursue the enemy whilst the heavy cavalry pulls up and rallies; it covers its retreat, and by bold attacks on the enemy's flank endeavours to stop an enemy in pursuit.

From these organic principles it is clear that, as regards heavy cavalry, it is not the regiment but the brigade which forms tactical unity, which, however, may be divided according to necessity. Army divisions, as long as they operate together with the main body of an army, have, it is true, no reserve cavalry; but when one or more corps are detached from the army to act as seperate armies they ought to have a cavalry reserve brigade.

I have not alluded here to the co-operation of artillery; but this is naturally understood, for no arm stands more in need of the support of artillery than the cavalry, because its strength is offensive, and not defensive, and without artillery would have to succumb to defensive elements. When, therefore, the organisation of an army does not allow cavalry always to be accompanied by artillery, it would be advisable when manœuvres are held to send artillery to take part in them, so that they may become acquainted with each other, and get accustomed to work together.

The quick and rapid movement of cavalry will not give its commander time to concert measures with the commander of the artillery. It is the duty of the latter to prepare the way for the cavalry, and to support it; he must act as quickly and decidedly as the cavalry. But great practice and careful study are requisite to do this well.

One of the greatest duties of a commander is to husband his strength for a decisive blow. This implies great skill in employing the troops according to their equipment, and according to the nature of the ground. Every locality is suited for infantry, not so for cavalry. A general who sends his cavalry into a mountain gorge must not be surprised if they are defeated. If he weakens and ruins his cavalry by making them do light work, he has no select body to rely upon in the hour of battle by which he might assure a victory.

It is therefore necessary that a clear idea should be formed as to the use of different sorts of cavalry, and that cavalry should be organised according to their special services, and the requirements of an army. By so doing their power will be doubled, and their efficiency increased.

Napoleon is reported to have said, "Take a horse, put a rider on him, and you have a cavalry soldier." With all respect for so great an oracle, I look upon it as a piece of absurdity, for the man and the horse may form the elements of a rider, but by no means make the cavalry soldier.

Tactics have now become a science; but, as I have already observed, the dark side of every science is an attempt at erudition. Simplicity is the greatest problem to be solved in the organisation and management of an army. All erudite manœuvres are unpractical, and half of them ought to be struck out of the regulations as superficial tomfoolery. As regards infantry, they give additional work, without any benefit to the Service; and as regards cavalry, they are highly dangerous and detrimental, for they ruin the horses. Speed, firmness, determination, can only go hand in hand with simplicity.

MALTA.

[FROM OUR OWN CORRESPONDENT.]

29th September, 1860.

H.M.S. St. Jean d'Acre came into this port on the 22nd, from a cruise off Malta, and sailed again on the 24th instant. She is still cruising in sight of the island. H.M.'s steam corvette Argus came in on the 23rd inst. from Messina and Syracuse, bringing 37 officers and sailors from the English squadron.

The Russian frigate Gromoby, which had been lying in this port for several days, left on the 23rd for Beyrout. The Austrian corvette Santa Lucia arrived on the 23rd inst. from Gaeta, and proceeded on the following day for Trieste. It is said that all the Austrian ships of war stationed in the Mediterranean and on the coast of Syria, have been ordered to repair to Trieste, in consequence of the state of affairs in Italy.

It is reported that counter-orders have been received by Admiral Martin, and consequently the flag-ship Marlborough will remain at Beyrout. A survey of the site proposed for the extension of the Malta Great Harbour is now being made, with the object of contracting for the works required to be done. Mr. Winder, an eminent civil engineer, has lately arrived in Malta to act on behalf of the contractors. Mr. Scamp and other professional gentlemen, acting on the part of Government, have also taken up their temporary residence in Valetta.

Lieutenant T. Dolmage, of H.M.'s 22nd Regiment, has entered the service of Garibaldi with the rank of Major. The gallant officer left Malta a fortnight ago, after being allowed to sell his commission. When on leave of absence from the 22nd Regiment he took an active part with Garibaldi's troops at the battle of Melazzo, and attracted the notice of the hero of Italy by his courageous conduct in the field.

THE RIFLE CONTEST AT SOUTHPORT.

(From the *Manchester Guardian.*)

This great rifle contest was concluded on Saturday with decidedly the best and most exciting shooting that had occurred during the five days' matches. Indeed, we are assured that the scores made exceeded anything done at Wimbledon; and we heard many expressions of regret on Southport Sands that Mr. Ross, jun., was not present to maintain, if he could, the honours which he won at the national gathering. We are told that Mr. Ross, at the three ranges of 800, 900, and 1000 yards, scored 24, with 10 shots at each range, or 30 in the whole; but on Saturday, at the same ranges, with 15 shots, Captain Ick, who is rifle instructor to the 2d Cheshire Militia, and Mr. J. Leece, of Manchester, each scored 15; and in shooting off the tie they produced some real excitement by each getting an outer three times in succession, Captain Ick missing the target the fourth time, while Mr. Leece got an outer, and thus won the Southport Cup. Captain Ick had previously made 16, under the same circumstances, for a prize of 50*l.*; while Mr. Marriott, 4th West York Volunteers, made 15, and Mr. Leece 13, all these scores being above Mr. Ross's average.

The weather on Saturday was as unfavourable as on any day during the contest. The beach was not so sloppy as on Thursday, nor was the wind as strong; but the day was exceedingly dull and bleak, the wind, which was rather to the north of east, being bitingly cold. The targets did not stand out well against the heavy sky, and the excellent shooting was therefore all the more praiseworthy.

The tide was again inconveniently high, and although some of the targets had been removed still more landward than on Friday, and the shooting was not commenced until nearly half-past 12 o'clock, only six of the ranges were usable.

The first match was for the

PRIZE OF 50*l.*, open to all comers of any nation, with 20*l.* as the second prize, and 10*l.* as the third; any rifle and any position; five shots at each of the three ranges of 800, 900, and 1000 yards; entrance 5*s.*

There were 88 entries, and 67 gentlemen contested with the following result:—

	Yards Range. 800	900	1000	Points Made. Total.
Hillkirk, Lieutenant, 3rd Manchester	2	2	0	4

Where blanks are left the competitors ceased firing.

Lieutenant Heaton took the lead at the 800 yards range, scoring seven with his five shots, as follows, two representing a centre and one an outer hit :—0, 2, 2, 1, 2 ; while Mr. Leece, Mr. Philips, and Captain Ick, each made six, hitting the target with each shot, the first two getting a centre with their fourth shots and the last with his fifth, Lieutenant Heaton fell off at 900 and 1000 yards, and was not placed ; while Captain Ick raised his score by six at 900 yards, making 1, 1, 2, 2, 0, or 12 at the two ranges, and as he ended with 1, 0, 1, 1, 1 at 1000 yards, he got a total of 16, and thus secured the first prize. Mr. Marriott, who gained the second prize, did so by scoring seven at the 1000 yards range (1, 0, 2, 2, 2) ; and Mr. Leece, for the third prize, got four outers at 900 yards, missing once ; and three at 1000 yards, missing twice. Mr. Prince's seven at 1000 yards was made up of 1, 2, 1, 1, 2, which was justly considered very capital work. The official declaration was First prize, Ick, 16 points ; second, Marriott, 15 ; third, Leece, 13. Mr. Ick and Mr. Leece used Whitworth rifles, and so, we believe, did Mr. Marriott.

The other match was for

THE SOUTHPORT CUP, value 35*l.* ; second prize, 15*l.* ; third, 5*l.*

The ranges and conditions were the same as for the 50*l.* prize. There were 87 entries ; the competitors numbered 59 and 14 ranges were used. The total score was as follows :—

	Yards Range. 800	900	1000	Points made. Total.
Hillkirk, Lieutenant, 3rd Manchester	3	2	1	6
Marriott, 4th West York	0	3	4	7

Where blanks are left the competitors ceased firing.

Very great interest was shown throughout the shooting, from the fact of all those who had made the best scores again entering the lists. There was a general feeling that Captain Ick would bear off all the honours of the day, and be the only competitor who had won two first prizes. This feeling was based not alone upon the facts that the gallant captain had throughout the contest shot more regularly than any of his opponents, and that he was evidently in excellent condition, for it had become known that that morning he had carefully resighted his rifle somewhere in the neighbourhood of Southport, and thus remedied a matter about which there were many complaints on each day—the varying sights of the rifles, and the want of opportunity for testing them according to the condition of the weather. Although for a long time, however, Captain Ick looked a very likely winner of the cup, he was destined to be beaten, after a bravely sustained struggle, and the honour of victory was gained for Manchester by Mr. Leece. Captain Ick made six at 800 yards, by 1, 2, 1, 1, 1, and six also at 900 yards, by 2, 1, 2, 1, his last bullet ricocheting, and, therefore, not counting, although it hit the target. At 1000 yards he made three (1, 0, 1, 0, 1) ; and thus scored a total of 15. Mr. Leece got only nine at the first two ranges ; but at the 1000 yards he started with a centre (2), and followed it up with four outers, thus making six with his five shots, and tieing Captain Ick at 15. Mr. Lawley's best shooting was at the middle range of 900 yards, where he made six (four outers and a centre, the latter being with the fourth shot) ; and he ended with 14, making 0, 1, 1, 0, 2, at the 1000 yards. He thus secured the third prize.

Great was the anxiety shown when Captain Ick and Mr. Leece came to the post to shoot off. The former, who fires from the knee, and has an exceedingly firm and steady left arm, got his sight and fired almost instantaneously. Sharply rang out the blow of the bullet upon the target ; and the white flag showed that an outer had been made. Mr. Leece had hit the target at 1000 yards five times in succession. Could he do it a sixth time? It seemed to be doubted, as Mr. Leece quietly seated himself and dug his heels into the sand, so as to make himself firm for his aim ; but again the bullet rang out against the target, and the white flag was shown by the markers. For a second time Captain Ick knelt, fired, and got an outer ; and for a second time Mr. Leece squatted and did the same. Shooting off for a prize, under any circumstances, must be trying work, and it was impossible in this case for the antagonist to escape the contagion of the excitement among the spectators. Each of them showed that he felt his position to be critical ; but each of them shot a third time and got an outer. The pent-up feelings of the spectators were relieved by a burst of cheering, when Mr. Leece's shot was known to have "told and tied," rendering all the more marked the breathless silence which reigned when Captain Ick again knelt. He fired, and he bent forward, listening most anxiously for the sound of the bullet against the target ; anxiously, too, each spectator strained his or her ears ; but the sound came not, no flag was shown, and Captain Ick rose, uttering in a low tone, "Missed!" Now, there was a manifest feeling that Mr. Leece would also miss. He seated himself, aimed, and dropped his rifle ; he was not satisfied, and the fears of his missing were strengthened. Again he aimed, but there being a movement among the spectators he again brought down his rifle, and looked quietly round, as if to assure all concerned that he was not going to shoot until he was thoroughly content with his sight. Up and off went the rifle at last ; and faintly came back the sound of a ball from the target. But opinions differed as to whether the markers had given signs of a hit ; almost all maintaining that no flag had been shown. The waiting was, indeed, painful ; for as none doubted hearing the sound of the ball, it could only be concluded that although it had hit it had first ricocheted. The "danger flag" was shown from the mantelet, and the markers went out to the target, thus confirming the notion that there was some doubt as to the shot ; but presently Captain Brooks was seen galloping down the range, and the spectators in a body moved up to meet him. He settled the matter speedily. The ball had hit fairly ; an outer had been made ; the markers had never entertained a shadow of doubt upon the point. Thus Mr. Leece won the cup ; and the second prize, so well gained, became the property of Captain Ick.

So ended the "Newton Review" Rifle Contest, 1860. It had been well managed throughout, every competitor, we believe, being thoroughly satisfied with the arrangements made by the honorary secretaries. The shooting was as a whole better than could have been anticipated. The contest closed with perhaps the most hardly-fought match on record ; and it has stirred up a spirit of strong but friendly emulation, which will, we are convinced, result, during the next twelve months, in making crack shots of many hundreds of the Volunteers of Lancashire and Cheshire.

The following calculation with regard to the shooting at Southport have been handed to us. We publish them from a belief that they are reliable, and a conviction that they will prove generally interesting :—

GRAND CUP.—15 rounds ; 300, 500, and 600 yards. 188 competitors ; 896 points ; average per man, 4·76.

50*l.* PRIZE (Mr. W. C. Brooks's).—All comers. Any rifle. 15 rounds ; 300, 500, and 600 yards. 118 competitors ; 1152 points ; average per man, 9·75.

WHITWORTH RIFLE—All comers. Range, 900 yards ; 10 rounds each. Analysis of shooting :—

	Competitors.	Points.	Average.
Whitworth rifle	26	119	4·62
Westley Richards	6	15	2·50
Birmingham small bore	6	13	2·16
Enfield	86	108	1·25

50*l.* PRIZE.—All comers. 15 rounds ; ranges, 800, 900, and 100 yards.

	Competitors.	Points.	Average.
Whitworth	26	186	7·15
Birmingham small bore	6	39	6·50
Westley Richards	6	32	5·33
Enfield	26	51	1·96

SOUTHPORT CUP.—All comers. 15 rounds ; 800, 900, and 1000 yards.

	Competitors.	Points.	Average.
Whitworth	20	150	7·50
Birmingham small bore	5	28	5·60
Westley Richards	8	35	4·37
Enfield	23	41	1·78

THE WHITWORTH AT WIMBLEDON AND AT SOUTHPORT.—The following is a comparison between the total and average scores made at Wimbledon by the 40 competitors who shot for the Queen's prize with the Whitworth rifle, and those made by the competitors at Southport (using Whitworths) in the two open contests on Saturday, the total of the two latter being 46 :—

	Rounds.	Competitors.	Total points.	Average.
Wimbledon	30	40	386	9·65
Southport	15	46	336	7·30

This shows a marked superiority at Southport ; the average being 7·30 per man as against 9·65 at Wimbledon, although at the former each competitor had only half the number of rounds that were fired by each at Wimbledon.

FRENCH NATIONAL RIFLE MATCH.—The committee of the Tir National Français have issued the following address to the Volunteer riflemen and sportsmen of England :—Gentlemen, the high importance that you justly attach to the establishment of national rifle matches in England, and the remarkable skill which your marksmen have displayed in these contests, have inspired us with the desire of inviting you to be present at the practice of the Tir National Français, which the government has allowed to be carried on near the Chauteau of Vincennes. As soldiers of the two great nations who have achieved glory in fighting together on far-off shores in favour of civilisation and of humanity, let us unite, gentlemen, on the peaceful field where skill alone will triumph ; where victory will excite emulation without disturbing that harmony which ought to exist between two peoples destined to appreciate and esteem each other. We hope that English riflemen and sportsmen will feel a pleasure in answering to our call, and that they will, by their presence, add to the splendour of this international *fête*. The prizes offered amount to more than 50,000 francs (2000*l.*). The Tir National Francais will open on the 7th of October inst., and will last twelve days. Receive gentlemen, &c. (by order of the committee), J. F. Augier, Administrateur. The particulars of the matches and prizes, which are very numerous and diversified in character, have appeared in the *Times*, which has called attention to them in a leading article.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BLYTH—September 29, at Clapham, the wife of H. J. Blyth, Esq., of the Admiralty, Somerset House, of a daughter.

CURTIS—September 26, at Aldershot, the wife of Captain Curtis, the Carabineers, of a daughter.

FERGUSSON—September 28, at Edinburgh, Lady Edith Fergusson, of a daughter.

HADFIELD—October 2, at Woolwich, the wife of Lieut.-Colonel Hadfield, Royal Marines, of a daughter.

HAYWARD—September 30, at Cork Barracks, the wife of George Hayward, Esq., Suffolk Militia Artillery, of a daughter.

HOPETOUN—September 25, at Hopetoun House, Linlithgowshire, the Countess of Hopetoun, of a son and heir.

MAYCOCK—August 10, at Simon's Town, Cape of Good Hope, the widow of Brevet Lieut.-Colonel Maycock, 53rd Regiment, of twin daughters, one stillborn.

MOCKLER—September 28, at Herbert Villa, Cheltenham, the wife of Edward Mockler, Esq., Surgeon-Major, Staff, of a son.

MARRIAGES.

BACON—KEATE—September 27, at Margart, Florence, fifth daughter of General and the Right Hon. Lady Charlotte Bacon, to Captain Edward Keate, R.A.

Liverpool, October 3, 1860.

ROYAL ENGLISH OPERA, COVENT GARDEN,

Under the Management of Miss LOUISA PYNE and Mr. W. HARRISON, Sole Lessees.

The Management have the honour of acknowledging the same brilliant reception of the Romantic Opera, "Lurline," that attended its production during the last Season. Its increasing nightly popularity justifies the announcement of this great English Musical Work every evening until further notice.

FIFTH OPERATIC SEASON.—MONDAY, OCTOBER 8th, and during the Week, W. Vincent Wallace's popular Romantic Opera of LURLINE. In addition to the scenery of last Season, will be added an entirely new Mechanical and Scenic Effect, by Messrs. Grieve and Telbin. Characters by Messrs. H. Wharton, H. Corri, G. Kelly, Lyall, and W. Harrison; Misses Leffler, Albertazzi, and Louisa Pyne. Conductor, Mr. Alfred Mellon; Stage Manager, Mr. Edward Stirling; Acting Manager, Mr. Edward Murray. Doors open at half-past Seven, commence at Eight. Stalls, 7*s*.; private boxes, 4*l*. 4*s*.; 3*l*. 3*s*.; 2*l*. 2*s*.; 1*l*. 11*s*. 6*d*.; 1*l*. 1*s*.; dress circle, 5*s*.; amphitheatre stalls, 3*s*.; pit, 2*s*. 6*d*.; amphitheatre, 1*s*. Arrangements have been made for families visiting the theatre to let private boxes, on the first tier, to hold four persons, at 1*l*. 5*s*. nightly, and on the second tier for 10*s*. 6*d*. four persons. No charge for booking, or fees to box-keepers.

OVERLAND ROUTE.

CONTRACTORS.

Ex Senor Don Jose de Salamanca. | Worthy S. Streator, Esq.

ENGINEER-IN-CHIEF—Thomas W. Kennard, Esq., C.E., 36, Great George Street, Westminster, S.W.

TEMPORARY OFFICES—11, St. Helen's Place, Bishopsgate Street, London, E.C.

THE ATLANTIC AND GREAT WESTERN RAILWAY—378 miles in length—is the middle link of a Grand National Line of 6 feet gauge, 1200 miles in length, from New York through the great States of New York, Pennsylvania, Ohio, Indiana, and Illinois to St. Louis; of which about 800 miles have been many years in operation. It possesses extraordinary facilities for construction, having no tunnels, no deep cuttings, few bridges, and no ferries; avoiding the Alleghany Mountains on the South, and occupying the natural channel of trade between them and the Lakes on the North. It traverses some of the most fertile portions of New York, Pennsylvania, and the "Garden of Ohio." It passes through the large shire towns or centres of 14 Counties in the State of Ohio, with more than one million of inhabitants, and a taxable property of 260 millions of dollars, and accommodates 17 cities and towns in New York and Pennsylvania, heretofore without Railway facilities.

The differing laws of the States of New York, Pennsylvania, and Ohio, through which the line runs, render separate organisations necessary, though practically the whole is one line. The present issue is confined to the Bonds of "New York," that section (length 48 miles, capital 750,000 dollars) being now finished; a considerable portion of the works in "Pennsylvania" is also finished, and the "Ohio" section is in a very forward state, and can be completed in 1861. As each of these sections is opened, the Bonds will be issued to the public, all the funds being provided in the meantime by calls on Stock and advances by the Contractors.

The Atlantic and Great Western connects with the New York and Erie (of which it is a continuation) at "Salamanca," about 400 miles from New York; and the New York and Erie Railway Company deem "the connection to be of such importance, from the large and valuable traffic which it will concentrate and throw on their road, that they have covenanted to pay to the Atlantic and Great Western a bonus of 10 per cent. on the gross receipts from Freight and Passengers, during five years from completion; and 5 per cent. for another term of five years thereafter." This bonus is especially appropriated to securing the interest on Bonds.

The association of M. de Salamanca with the Atlantic and Great Western Railway, is a voucher that the merits of the enterprise are not overstated, and an assurance that the whole line will be rapidly completed and its resources developed.

The Bonds are secured by a first registered mortgage, constituting a lien on the income and all corporate rights, privileges, lands, franchises, plant and property of the Railway; and give the holder the right to conversion into shares at par until the 1st of January, 1864.

The Bonds of the present issue are of 1000 dollars each; redeemable at par in twenty years, are transferable without stamp or endorsement, with Interest coupons attached, and will be paid on the 1st of January and 1st of July in each year, at the Bank of London, Threadneedle Street, London, and at the Banking House of Messrs. Duncan, Sherman, & Co., New York.

The Bonds will be issued at 180*l*. sterling per Bond of 1000 dollars—to include the coupon (value 7*l*.) due 1st January, 1861, and will be delivered on 1st November, or earlier at option of the purchaser. Each Bond will bear 14*l*. per annum interest, estimating the dollar at 4*s*.

The road represented by these Bonds is finished, its cost is known and liquidated, and its interest and dividends will be paid from its actual earnings.

The contract cost of the Atlantic and Great Western Railway is 37,000 dollars per mile, say 7400*l*. sterling. Hence, an average receipt per annum equivalent to that of the four great lines now running east and west, will give an annual return upon the whole cost, Capital and Bonds, of 17·35 per cent., allowing 50 per cent. for working expenses.

A notarial copy of the mortgage of the New York section, duly attested, may be seen at the offices of the Company; the original being duly recorded in New York by the trustee.

Applications for Bonds must be made to the Brokers. Copies of Prospectus, with Map and Reports of the Engineer-in-Chief, can be had from the Brokers; or at the Offices of the Company, No. 11, St. Helen's Place, Bishopsgate Street, London, E.C.

MUTUAL BRANCH.

Assurers on the Bonus system are entitled, after five years, to participate in nine-tenths, or 90 per cent., of the profits.
The profit assigned to each policy can be added to the sum assured, applied in reduction of the annual premium, or be received in cash.
At the first division a return of 20 per cent. in cash on the premiums paid was declared; this will allow a reversionary increase, varying, according to age, from 66 to 23 per cent. on the premiums, or from 5 to 15 per cent. on the sum assured.
One-half of the "Whole Term" Premium may remain on credit for seven years, or one-third of the premium may remain for life as a debt upon the policy at 5 per cent., or may be paid off at any time without notice.
Claims paid in one month after proofs have been approved.
Loans upon approved security.
No charge for Policy Stamps.
Medical Attendants paid for their reports.
Persons may, in time of peace, proceed to or reside in any part of Europe or British North America without extra charge.
No extra charge for the Militia, Volunteer Rifles, or Artillery Corps on Home Service.
The Medical Officers attend every day, at a quarter before Two o'clock. E. BATES, Resident Director.

OFFICERS PROCEEDING ABROAD can effect Assurances with THE COLONIAL LIFE ASSURANCE COMPANY on favourable terms.

LOANS GRANTED.

CHUBB & SON, 57, St. Paul's Churchyard, London, E.C.; 28, Lord Street, Liverpool; 16, Market Street, Manchester; and Wolverhampton.

M. M. KEANE, late Secretary of Royal Northern Yacht Club, at the request of several yachting friends, has established himself in West Cowes, Isle of Wight, as AGENT for the BUYING and SELLING of YACHTS, and as SUPERINTENDENT of their building, lengthening, and repairing; as also for marine insurance thereon. In support of his ability to fulfil these duties properly, and in respect of his being held worthy of confidence as regards integrity, he begs leave to state he holds testimonials of service speaking to these qualifications and others of a similar nature, which can at any time be shown if required. Any sale of yachts effected in conjunction with secretaries of royal yacht clubs or yacht agents generally. The commission to be considered as divisional. And, at the risk of appearing self interested, M. Keane feels bound to point out to the various owners of yachts in the far-off parts of Great Britain and Ireland the greatly increased prospect of both a speedy and satisfactory sale of their vessels if laid up in such a splendid yacht rendezvous as Cowes, so easily approachable from London and the whole south of England. Owners of yachts placing them in M. Keane's charge, at Cowes, for sale, after their crews have moored them, will have simply to pay a charge of 1*s.* per day as compensation for their safe keeping until sold; damage from fire and violence of weather or collision, M. Keane not being responsible for, these being necessarily covered by insurance; but security for the price of any yacht placed in his hands for sale can be fully given if demanded, or advance in cash on proposed amount of sale.

Be pleased to address Captain M. KEANE, No. 10, Bath Road, West Cowes, Isle of Wight.

TERMS OF AGENCY for the Buying and Selling of Yachts:—Up to 1000*l.*, 2 per cent.; from 1000*l.* to 2000*l.*, 1½ per cent.; from 2000*l.* upwards, 1½ per cent. For constant superintendence on the building a new yacht, of Class A 1, 2 per cent.; this to include designs for interior accommodation, &c. For constant superintendence on the repairing or lengthening a yacht, if amounting to the sum of 200*l.*, 3 per cent.; and, if amounting to 300*l.*, 400*l.*, or 500*l.* or upwards, 2 per cent. Any expenses incurred by agent in advertising yachts for sale or purchase, at the desire of owners, or in forwarding telegrams, as also such travelling expenses as may be incurred at owners' request, to be defrayed by such owners.

THE EXMOOR PONIES, COBS, AND GALLOWAYS.—The ANNUAL SALE of SIXTY EXMOOR PONIES, the property of F. W. Knight, Esq., M.P., and TWENTY-FIVE COBS and GALLOWAYS, the property of Mr. Robert Smith, will take place (as usual) at Bampton Pony Fair, on Thursday, October 25.—Catalogues will be prepared one month prior to the sale, and every information given by Mr. SMITH, Emmett's Grange, Southmolton.—Sept., 1860.

CHAMBERLAIN'S ROYAL PORCELAIN WORKS.—Admission of Visitors to the Works to be had on application at the Show Rooms, from 9 A.M. to 6 P.M. each day, except Saturday from 9 A.M. to 2 P.M.—W. H. KERR & Co., "Proprietors," Worcester, successors to Messrs. Flight, Barr, & Co., and Messrs. Chamberlain & Co.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

GARDNERS' £2 2*s.* DINNER SERVICES complete, best quality. A large selection of patterns of the choicest description. Breakfast, Dessert, Tea, and Toilet Services, at the lowest possible prices. Cut Wines, 3*s.* 6*d.* per dozen; Cut Quart Decanters, 7*s.* 6*d.* per pair.—H. & J. GARDNER (by appointment to Her Majesty, the Board of Green Cloth, Lords of the Treasury, Admiralty, Office of Works, Customs, and the other Government Offices), 453 and 63, Strand, Charing Cross, W.C. Established 108 years. Engravings free by post.

TO EMPLOYERS.—THE ARMY & NAVY PENSIONERS EMPLOYMENT SOCIETY, No. 22, Parliament Street, S.W., has on its registry men of unexceptionable character, who have served as non-commissioned officers and privates in different branches of Her Majesty's Army and Navy. They are still in the prime of life, and besides the advantage of their military training and discipline, possess the material guarantee afforded by a pension, and are satisfied with moderate wages. Among them will be found men of every qualification, and fitted for situations of trust and responsibility. They are peculiarly fitted for places of the following description:—Hall and door-keepers to public and private establishments, messengers to ditto, grooms, helpers, and occasionally in-door servants and gardeners, porters, watchmen, gate, office, and time-keepers, constables, storekeepers, and park-keepers. No fees or expenses to employers or employed. N.B. The men belonging to the London Division of the Corps of Commissionaires have been obtained at this office.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

H. J. & D. NICOLL'S Establishments for Gentlemanly and Moderate-priced Clothing, REGENT STREET, CORNHILL, & MANCHESTER.

THE CAPE PALETOT, INVERNESS CAPE, or SLEEVED CAPE, used in private life, as well as for Volunteer Corps.
H. J. & D. NICOLL, 114, 116, 118, 120, Regent Street, W.; 22, Cornhill, London, E.C.; and 10, St. Ann's Square, Manchester.

CLOTHING FOR YOUTH.—The KNICKERBOCKER, the Highland Dress, Ladies' Travelling Mantles, Riding Habits, and Pantalons de Dames à Cheval, with much novelty and general excellence, H. J. & D. NICOLL have for the remainder of this season at WARWICK HOUSE, 142 and 144, Regent Street, W. In the autumn this branch will be removed to the rear of the old Establishment.

VISITORS TO THE SEASIDE AND TOURISTS will find much ease and comfort in the NEUTRAL-COLOURED LOOSE COAT, lined by one or more buttons, with Trousers and Vest, all of one material, as originally introduced by Messrs. NICOLL, of Regent Street, W., and Cornhill, E.C.; they recommend also a Black Velvet Coat, and for gentlemen seeking a kind of half-dress morning coat a fine black cloth is specially prepared; this garment is edged with braid and cut somewhat as a riding-coat, and is getting into general use.

MODERATE PRICES WITH GENERAL EXCELLENCE.

E. MOSES & SON can confidently assert that they possess advantages and facilities which are quite beyond the reach of any other house in the trade, and are thereby enabled to offer a REALLY GOOD ARTICLE at a VERY LOW PRICE. The most skilful cutters are employed, and durability of material and workmanship may be relied on.

The BESPOKE TAILORING DEPARTMENT is almost daily replenished from the best home and foreign markets.

The READY-MADE CLOTHING DEPARTMENTS are furnished with an immense assortment of goods for all classes, and all occupations. Also a great variety of CLOTHING for JUVENILES of all ages.

The HOSIERY and DRAPERY, HAT and CAP, and BOOT and SHOE DEPARTMENTS, contain a carefully-selected stock of the best and newest Manufactures.

N.B. Should any article not be approved of, it will be exchanged, or the money returned.

Gratis on application, or post free, E. MOSES & SON'S Book for the Present Season, containing "The Growth of an important Branch of British Industry," with rules for Self-measurement, and List of Prices. Also just published, an elaborate Plan of their City Premises.

SPECIAL NOTICE.—E. MOSES & SON'S Establishments will be CLOSED on MONDAY and TUESDAY, October 8th and 9th, and will be re-opened as usual on Wednesday morning.

CORNER OF MINORIES AND ALDGATE, AND NEW OXFORD ST., CORNER OF HART ST.,
ALSO BRADFORD & SHEFFIELD, YORKSHIRE.

DINNEFORD'S PURE FLUID MAGNESIA

has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, and General Agents for the *Improved Horse Hair Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

and Sold by all respectable Chemists throughout the Empire.

NERVO-ARTERIAL ESSENCE, prepared only by Dr. WM. BATCHELOUR, M.R.C.S.E. 1825, and M.L.A.C. 1834. It strengthens the vitality of the whole system without reaction, and speedily removes nervous complaints. In bottles, at 2*s.* 9*d.*, 5*s.* 6*d.*, 11*s.*, and 33*s.*, at Goodyer's, 31, Regent Street, 3*d.*, Butler & Crispe's, 4, Cheapside, E.C.; Sutton & Co., Bow Churchyard, E.C.; Barclay & Sons, Farringdon Street, E.C.: 12, Finsbury Place South, City, E.C., and all Chemists.

RUPTURES. — HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old metal spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage free, and 16*d.* Illustrated circulars on application to E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

CAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those coated with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; SANGER, 150, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KEATING, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.

EVANS & LESCHER, London, Patentees.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Brunswick Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 6, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Diabetic Affections, Costiveness, Skin Eruptions, Ill-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, also giving a beautiful and clear complexion. Sanctioned by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Sanger & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.*; Ointment, per pot, 1*s.* 1½*d.*, and 2*s.* 9*d.*; Essence, per bottle, 4*s.* 6*d.*, 11*s.*, or bottle containing four times that quantity, 33*s.* Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Savory, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 78, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Pamphlets, or post free for one stamp, of all Agents, and of Newman Street, W., Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINES, containing directions for the cure of every ailment incidental to man, woman, or child.

A Physician and Member of the Royal College of Surgeons, England (Registered under the New Medical Act), attends daily to give advice, without fee, to those purchasing Buchan's Medicines.

J. DENT & CO., FURNISHING UPHOLSTERERS, 30, 31, 32, and 99, Crawford Street, Baker Street, W. Every article of the best description.

CLOSE OF THE SEASON.—CARPETS.—LUCK, KENT, & CUMMING (late of Carpenters' Hall, London Wall, established upwards of 150 years), beg to offer their splendid stock of best BRUSSELS, TURKEY CARPETS, SILKS, DAMASKS, &c., at the most reasonable prices. Several thousand yards of Brussels and other Carpets, last year's patterns, at a very great reduction.—4, Regent Street, W., opposite Messrs. Howell & James's.

THE ROYAL DAMASK TABLE-LINEN MANUFACTORY (Established upwards of a Century), LISBURN, IRELAND. The Proprietors, JAMES COULSON & Co.,
Beg to intimate that their only London Depôt is at No. 46, PALL MALL, S.W.,
A few doors West of the Army and Navy Club.

SAUCES.—Connoisseurs have pronounced LEA & PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea & Perrins' name on Bottle, Label, and Stopper.
Sold by CROSSE & BLACKWELL, London, and all respectable Oilmen and Grocers.
Sole Manufacturers—LEA & PERRINS, Worcester.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the *Lancet* in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE & BLACKWELL, Purveyors to the Queen, 21, Soho Square, London, W.

THE ANNALS OF THE WARS OF THE XVIIIth CENTURY.

By Lieutenant-General the Hon. Sir E. CUST.

Volume I. 1700—1739. | Volume III. 1760—1783.
Volume II. 1739—1759. | Volume IV. 1784—1795.
Volume V. 1796—1799.

Each Volume is complete in itself, and may be had separate, price 5*s.* each.

"A lucid summary of all the most important operations (naval as well as military) of the eighteenth century."—*Army and Navy Gazette.*

"The 'Annals' are invaluable to the soldier who desires to know the history of his profession."—*Times.*

"These volumes supply a store of profitable reading to the soldier or sailor."—*Saturday Review.*

"A military text book."—*Athenæum.*

W. O. MITCHELL, Military Publisher, 39, Charing Cross, S.W.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

Just published, price 1*s.*, free by post for 14 stamps,

DAVIESON'S EVERLASTING TEETH.

THE LATEST DISCOVERY.

MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 449, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

[COPY.]

"Ordnance Select Committee, Royal Arsenal, Woolwich, April 17th, 1860.

"Sir,—Since I last addressed you on the subject of your Waterproof Cartridges, I have to inform you that 60 of them have been exposed in an atmosphere saturated with moisture, at a temperature of 90 degrees, for a fortnight. The result has been favourable, as far as this test is concerned, to their Waterproof qualities.

"I have, therefore, to request you will be good enough to state, for the information of the Committee, the nature of the lubrication you employ; whether it is in any way connected with the Waterproof properties of the Cartridge, and whether, in the event of their being adopted, the Service lubrication, which is wax, might not be employed.

"I have the honour to be, Sir,
"Your obedient Servant,
"J. H. LEFROY, Colonel, R.A.

"Mr. Thos. H. Anthony,
"37, Broad Street, Birmingham."

☞ *It is particularly requested that applications for copies of the* ARMY AND NAVY GAZETTE, &c., *and Advertisements, should* NOT *be sen to the Editor, but to the Publisher,* MR. ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

IT is always interesting, and sometimes instructive, while you are engaged in setting your house in order, improving the locks on your street-door, and sharpening the spikes of your area railings, to spend a leisure hour in having a chat with your next-door neighbour on the subject; his judgment is cooler than your own, flushed as you are with the bustle, expense, and excitement, and half-blinded with the dust which the workmen are raising; so you are glad to hear what he has to say in a friendly way about the repairs which you are making; whether he regards them in the same light as yourself—whether, in short, he approves of them or condemns both their intention and execution.

Now, a certain M. Alphonse Esquiros, known probably to many of our readers as the author of several very excellent papers called "L'Angleterre et les Anglais," which have from time to time appeared in the *Revue des Deux Mondes*, is engaged at present in affording us an opportunity of learning the opinion of an observant and well-informed Frenchman upon the repairs which we are making, and have been making for some time back, in this busy little house of ours. As some of our readers may be unaware of this fact, and ignorant that M. Esquiros is a very agreeable gentleman to talk over the subject with, we wish to call their attention to an article which appeared on the 15th of last month in the magazine above referred to, under the title, "L'Armée et les Volontaires." As this article seems to us, from the familiarity of the subject and the absence of national prejudices which it displays, to be likely to prove interesting to many of our readers, and as it affords a fair promise that the succeeding articles of the series of which it forms the commencement will be equally so, we propose devoting a short space to a consideration of it.

Hardly have we commenced its perusal, when we are attracted by the following sentence, which we scarcely expected from the mouth of a Frenchman: "L'Anglais n'est point belliqueux par goût; il n'aime point la guerre pour la guerre, il n'entrétient point une armée pour le mineux plaisir de voir briller des baïonnettes et flotter des drapeaux. Il a une armée pour defendre son territoire, son commerce, l'immense réseau de ses relations extérieures et de ses affaires." Well said, M. Esquiros! At least our motives are not universally misconstrued! No one, whether Englishman or Frenchman, ever spoke fairer or truer words for England than these; no special pleader of the Volunteer cause has ever expressed more aptly the spirit and intention of the movement.

After this we feel quite satisfied that the subject is in the hands of a gentleman well qualified to handle it, and we resign ourselves fearlessly to his guidance, and in his company enjoy a very agreeable stroll through the military colleges and arsenals of the country; for to these subjects is this particular article devoted; thus forming a fitting introduction to those remarks which he proposes to make hereafter about the Army and the Volunteers.

Of our military colleges, the Woolwich Academy is the one on which our author dwells at greatest length; and he shows a knowledge of the subject far beyond that of an ordinary collector of information. The inner life of a Woolwich cadet is laid bare—the nature of his studies, his athletic games, his leadcutting, the silver challenge-bugle which the conqueror received, the conservative jealousy with which he saw introduced a different order of things, and heard the silver bugle blow the last pæan of victory, and the busy hum of study succeed—all these things M. Esquiros talks to us about with a familiarity which we are tempted to believe must be the result of a more intimate acquaintance with the institution than he chooses to tell us.

But, however the information may have been acquired, we are delighted to find it is made such good use of, and woven so skilfully into the clear and interesting narrative of the origin, progress, and present condition of this Academy, which we have here before us.

It is satisfactory, too, to find a Frenchman attaching the importance which M. Esquiros does to our English custom of establishing all public schools in the country instead of in the town. Count Montalembert, if we recollect rightly, insisted in his "Political Future of England" that much of our national greatness was deducible from this cause, and M. Esquiros inclines to a similar opinion: "Il est à remarquer," says he, "que les Anglais ont généralement choisi pour leurs grandes écoles civiles et militaires des points de vue pittoresques. Le paysage est, selon eux, un moyen d'éducation: les rustiques beautés de la nature disposent l'âme au récueillement et l'air libre des champs et des bois, en même temps qu'il développe les forces physiques, imprime une sorte de vigueur à la santé de l'esprit."

To descriptions of Sandhurst and Addiscombe, M. Esquiros devotes a few pages; and after conveying a very just idea of the nature of the education in these colleges, and of the principles upon which military education in England is at present conducted, he remarks, and we believe with truth,—"L'Angleterre jouit d'un système d'éducation militaire qui peut subir la comparaison avec celui de toutes les autres nations de l'Europe."

The second part of this article is no less able and interesting than the first; it treats of our arsenal at Woolwich, and the powder and small-arm manufactories at Waltham Abbey and Enfield respectively. In connection with the origin of Woolwich Arsenal, M. Eqsuiros tells us a curious anecdote, which may be as new to our readers as it was to ourselves: Before the reign of George I. there existed at Moorfields, a foundry of cannon. In 1716, this foundry was employed to recast a number of the guns captured by Marlborough from the French. Among the crowd assembled to witness the cast was a young German, by some said to have been a Swiss, called Andrew Schalch, who happened to be travelling in England at the time; his keen eye detected that the moulds into which the metal was to be run were damp, and he immediately foresaw that the steam generated by the contact of the molten metal with the damp mould would cause an explosion. This result, which every tyro in a foundry at the present day would be able to predict, under similar circumstances, seems to have been unknown in those days, for when Schalch expressed his fears to the workmen, to Colonel Armstrong, Major-General of Artillery, and, finally, to the Duke of Richmond, who was at that time head of the department, he was looked upon as an officious ignoramus, and snubbed for his pains. However, Schalch was wise enough to retire from the scene, and the cast was proceeded with, resulting, as he had predicted, in a violent explosion, which caused the death of several of the workmen and bystanders.

It is an ill wind that blows nobody good, and though the workmen were blown to pieces by this sudden gust, Schalch's fortune was made by it. He was immediately sought for and invited to appear before the Artillery Committee then sitting in London. So high an opinion was formed of his talents, and so creditable did he pass an examination to which he was subjected, that the superintendence of a new cannon-foundry, the site of which he was requested to decide upon, was offered to him.

Schalch accepted the appointment, and set to work to discover the spot best suited for the foundry; at last he decided upon Woolwich, where a foundry was soon afterwards established, and Schalch eventually received the appointmeut of Master-Founder, an appointment, we presume, similar to that of "Superintendent of Royal Gun Factories," which Sir William Armstrong now holds.

Such, M. Esquiros tells us, was the origin of Woolwich Arsenal.

We cannot follow our author through this vast Arsenal, which from the small cannon foundry has grown into the magnificent establishment which at the present day covers 260 acres of ground.

We are not surprised, however, to find M. Esquiros spending a considerable time in these wonderful workshops and stores, and occasionally standing aghast at the whirling, clattering machinery, at the restless, noisy life of the whole place, and at the great stream of munitions of war, which it pours forth continuously into the ships and conveyances which carry them to all the corners of the globe. What wonder, too, that he moralises a little after his visit to this unequalled establishment, and to the scarcely less complete ones of Enfield and Waltham! However, M. Esquiros is not in the habit of moralising to no purpose; his reflections take a practical form, and find vent in the following weighty paragraph:—"Toute nation du continent, quelle qu'elle soit, qui voudrait se heurter à la Grande-Bretagne, devra y regarder à deux fois: avant tout, elle trouverait devant elle le vieux mur de bois de la vieille Angleterre, qui a jusqu'ici couvert les côtes d'un boulevard impénetrable,— derrière les vaisseaux, des soldats qui s'accroissent et se réorganisent de jour en jour—derrière ces soldats le pays armé." We shall be infinitely obliged to M. Esquiros, if he manages to impress his fellow-countrymen with the truth of this observation; it might some day save a vast deal of trouble. Let us hope that, taking warning from the story of Andrew Schalch, they will not disregard advice thus honestly offered, for we may confidently assure them that any attempt to pour French metal into English moulds would result in an explosion far more disastrous to the workmen than any of which history or anecdote tell.

By an Imperial Decree, dated the 25th of September, the French Emperor has ordered that the following officers be added to the strength of the fleet: 2 Engineers in Chief; 8 Principal Engineers of the 1st Class; 30 Principal Engineers of the 2nd Class. The Engineers in Chief are to be promoted by selection, but must previously have served three years at least as Principal Engineers of the 1st Class. The 1st Class Engineers are to be taken from the 2nd Class, half by selection and the remainder by seniority, and these must also have served three years at least at sea. The 2nd Class are to be taken exclusively from the list of those Engineers who during three years have had charge of an engine at sea. The Engineers in Chief are to be attached to the particular naval ports designated by the Minister of Marine. The 1st Class Principal Engineers are to be employed on shore according to the exigencies of the service. The 2nd Class Principal Engineers are to be employed on shore and at sea. They are to embark on board a ship carrying an Admiral's flag, or a broad pendant, or on board any other ship to which the Minister of Marine may choose to appoint them. The remainder of the Decree contains directions as to the retirement of these officers, and as to their uniforms, which are, by the way, exceedingly pretty and simple.

The Lords of the Admiralty have at length decided upon entertaining a scheme for the formation of a National Transport Service; and the sooner it assumes a practical form the better will it be, not only for the Royal Navy, but for the troops ordered abroad.

Digitized by Google

THE ARMY.

12th Lancers. A detachment left Chatham on Thursday morning, *en route* for York, to join the head-quarters.

13th Light Dragoons. In reference to a paragraph which lately appeared in the *Scotsman*, reflecting upon some officers of this regiment, that paper has published the subjoined :—"We are requested to state, on authority which we cannot question, that the statement in a paragraph appearing on Saturday relative to the expulsion of certain of the officers of the 13th Light Dragoons from the United Service Club, Edinburgh, was in one or two particulars somewhat exaggerated, and that those officers have, after explanation and proper apology, been reinstated as members of the club."

Royal Artillery. Preparations for the erection of the testimonial about to be raised at Woolwich to the memory of the officers and men of the Royal Artillery who fell in the Crimean war were commeneed on Saturday; and the monument, which has been executed by Mr. John Bell, the sculptor who produced the Guards' Memorial also, is expected to be in its place during the early part of next week. Some delay has been occasioned in its erection by a difficulty in procuring appropriate blocks of granite to form the pedestal, one of which, unfortunately, was damaged while under transport to Woolwich. The 5th Field Battery, Royal Artillery Depôt, consisting of 240 non-commissioned officers and gunners, in command of Captain Jones, at headquarters, Woolwich, received their route this day week for Sheerness, where they are to be stationed for the winter. In consequence of the multifarious duties performed by Adjutants of the Brigades of Artillery, it is in contemplation to appoint a Staff Captain to each district, who will relieve the adjutants of a great deal of office-work, and leave them free to give more attention to the drill and discipline of the regiment. It is expected that Boards will be held to test the qualifiations of candidates who may present themselves for these appointments, according to the orders laid down in the Queen's Regulations for the rank of Assistant-Quartermaster-General, in addition to a thorough professional knowledge on regimental matters, which will be required from each officer.

Royal Engineers. Lieut.-Colonel Charles Ford has arrived at Woolwich from Barbadoes to succeed Colonel Walpole as Commanding Royal Engineer at that garrison, the latter officer having retired from the service with the rank and pay of major-general. Lieut.-Colonel A. P. Ross, R.E., who is at present in Prussia, where he has been employed in the negociation of business connected with the Government, will, on his return, proceed to Portsmouth, to take the command of the Royal Engineers at that station. The route for the A troop of the Royal Engineer Train, under the command of Captain Duff, has been received at Aldershot camp, and they will at once commence their march to join head-quarters at this garrison. The half-yearly inspection of the corps of Royal Engineers at Chatham was made on Thursday, Major-General H. Eyre commanding the garrison. The companies now at head-quarters, together with the detachments of Royal Engineers, were formed on the parade-ground of Brompton barracks at ten o'clock; and shortly afterwards Major-General Eyre, attended by his aide-de-camp, Major Congreve, brigade-major, and the other officers of his staff, arrived at the Royal Engineer establishment, where he was received by Colonel Harness, C.B., director of the Royal Engineers, Lieut.-Colonel Stanton, C.B., Assistant-Adjutant-General, and the other heads of departments, the Royal Engineers, who were drawn up in line, receiving him with the usual military honours. Major-General Eyre then commenced the inspection of the companies, passing along the front and rear of each rank. At the close of this portion of the inspection General Eyre had the entire body formed into square, when he addressed the men, and invited any one who had a complaint to make to do so. Two or three men at once responded to the invitation, the ground of complaint, we understand, being relative to some compensation to which they considered themselves entitled during the period they were serving in India, from which they have recently returned. After hearing their complaint the major-general promised that it should be investigated. The companies were then put through a course of company drill, and the manual and platoon exercise, by several officers selected by the major-general for that duty, when both officers and men acquitted themselves in an exceedingly creditable manner. The Royal Engineers were afterwards dismissed, and Major-General Eyre proceeded to inspect the barrack-rooms, libraries, halls of study, school-rooms, &c., and afterwards the books, the unfavourable state of the weather not premitting the corps to be exercssed in any field-day movements on the Lines, as had been originally intended. Before leaving head-quarters, General Eyre was understood to express his satisfaction with the result of the inspection, and there is no doubt that a very favourable report will be made by him to the Duke of Cambridge. In consequence of the large contracts for works about to be thrown up round Portsmouth, agreeably to the recommendations of the Royal Defence Commissioners, a number of Engineer officers are directed to report themselves to the officers commanding the south-west district. It is probable that Lieut.-Colonel Ross will take charge of the new works on Portsdown Hill, and Lieut.-Colonel Bouchier, C.B., those on the Isle of Wight and Hurst Castle. Colonel Simmonds, C.B., having resigned his appointment of British consul at Warsaw, will, when relieved, join and take command of the Royal Engineers at Aldershot. We believe his successor at Warsaw is not yet named.

6th Regiment, 1st battalion. Captain Thompson and Lieutenant Kelson are on leave from the depôt at Colchester to Dec. 31.

21st Regiment, 2nd battalion, at Aldershot, is under orders to proceed to Dover in the ensuing week.

22nd Regiment. Captain Thursby and Captain Winthrop, of the 1st battalion, are on leave from Malta for this month, to proceed to Naples.

23rd Fusiliers, 1st battalion. Captain Lees is under orders to proceed to India overland. Captains Norton and O'Connor, V.C., have joined the depôt at Chatham. 2nd battalion. Major Gubbins is on leave from his battalion at Malta to the 31st of January next.

37th Regiment. Ensign Holton is on leave from the depôt at Colchester to Dec. 31.

38th. Brevet-Major H. P. Vance, is on leave to Dec. 31, from the depôt at Colchester.

44th Regiment. Ensign Overton is on leave to Dec. 31 from the depôt at Colchester.

56th Regiment. Captain Eccles, Lieutenant Gubbins, Ensigns Barnett and Wood, have leave from the depôt at Colchester to Dec. 31.

61st Regiment. A draught of this regiment, consisting of four ensigns and 154 men, women, and children, from the 8th Depôt Battalion, left Pembroke Dock yesterday week to join the service companies of the regiment at Plymouth. The names of the officers are Ensigns Madden, Hon. E. J. Chetwynd, Dashwood, and Long. The whole are under the command of Captain Ashe, 85th Light Infantry, who rejoins on the completion of the above duty.

74th Highlanders. A detachment left Chatham on Saturday last for Gravesend, and there embarked on board a Scotch steamer for Leith.

78th Highlanders. On Friday week Major-General Cameron, commanding the forces in Scotland, attended by the officers of his staff, inspected the barracks and stores of the 78th Highlanders in the Castle at Edinburgh. An order had been issued for the regiment to parade in the Queen's Park between 8 and 9 o'clock, but in consequence of the inclement and threatening state of the weather at that hour the order was countermanded.

79th Cameronian Highlanders. A detachment left Gravesend on Saturday last on board a steamer for Leith.

81st Regiment. Captain Browne has joined the depôt at Chatham.

14th Depôt Battalion. Staff Assistant Surgeon Thomas Butler O'Brien is on leave of absence to 31st of October. This officer has recently returned from service in the West Indies. Staff Assistant-Surgeon Jackson has exchanged with Assistant-Surgeon Hyde of the 12th Depôt Battalion.

The entire force of Chatham garrison was engaged on Saturday morning last in a series of manœuvres, having for their object the instruction of the officers and men in defending the garrison from a supposed attack by an invading army advancing from the river and the direction of the Dover Road from New Brompton. The forces engaged in the attack and defence of the garrison included the Royal and Indian Engineer corps, the depôts of the several East India regiments, composing the three battalions of infantry, together with the division of Royal Marines, the whole of the arrangements being under the immediate superintendence and direction of Major-General Eyre, commanding the garrison and Chatham district. The operations supposed an attack to be imminent at three different portions of the line of defences, extending from St. Mary's creek to the Spur Battery and Fort Amherst, a distance of about two miles, the whole of which were defended by strong bodies of troops, aided by the siege guns. The attacking party was also very strong, and consisted of three divisions, each of the men being supplied with 10 rounds of blank cartridge. At a given signal the three attacking parties commenced their march on the garrison, one emerging from the military road to attack Fort Amherst; the second from the Dover Road and New Brompton, on the sally-port; and the other from Lower New Brompton and St. Mary's Creek, on St. Mary's Casemate Barracks. On the arrival of the several parties at the points of attacks, the assault was made simultaneously on all points of the defences, when, notwithstanding the appearance of a most determined resistance on the part of the defenders, they were driven from their guns and works, as arranged in the orders, the Engineers scaling the ditches with their ladders, and the attacking parties making themselves masters of the garrison.

In consequence of a serious accident, which happened about a month ago, to His Excellency Major-General Slade, Lieut.-Governor of Guernsey, and by which he is confined to the Government House, Major-General Douglas, Lieut.-Governor of Jersey, will inspect the garrisons of Guernsey and Alderney in his place. We hope General Douglas will also extend his inspection to a review of the Royal Guernsey Militia, who were sadly disappointed a short time since in not receiving an expected visit from His Royal Highness the Commander-in-Chief. As General Douglas has just completed this work in his own command, it will give him an opportunity of observing that the Guernsey Militia are now armed with the Enfield rifle, and that the men have already, under qualified instructors, made very considerable progress in acquiring proficiency in the new arm, while their brothers-in-arms in the sister island are still, to their great chagrin, armed with old Brown Bess. In truth, these two islands, standing in the van of England's weakest points, and long coveted by France, should have had the first advantage of scientific improvement in arms and projectiles. Should war break out, they must be left mainly to their own resources; and with the temporary loss of the command of the Channel, their fate would be instantly sealed, although we doubt not from the well-known loyal spirit which animates the inhabitants, that the resistance offered to an aggression would be desperate. Not an Armstrong gun has yet been sent to them, nor has a single islander had the benefit of the Shoeburyness instruction, although we know that the late General Mundy was urgent with the authorities to remedy these deficiencies. Moreover, we may remark that the islands are of more value to ourselves than is generally known. The coasts of France bordering the Channel labour under the disadvantage of tidal harbours, from which their cruisers can issue and return only at certain periods, well known as a matter of course. But with the Channel Islands in their possession, where the bays afford shelter in deep water, they would cripple our commerce on the one hand at will, and save themselves from capture on the other. We think the matter merits consideration. The under-water work of the great breakwater at Alderney has been completed to the latest already contracted for; consequently the operations have been discontinued and numbers of workmen and quarrymen discharged.

Army Hospital Corps for China.—A detachment consisting of 35 non-commissioned officers and privates left Chatham on Tuesday, and embarked at Gravesend on board the transport Strathallan for China.

A Good Idea.—We are told that with the desire of promoting a more intelligible intercourse between our own troops and those of our foreign allies, when called into the same sphere of action, Major-General Sir Richard Dacres, with the sanction of the General Commanding-in-Chief of the Army, has established a French class at the Royal Artillery Barracks, Woolwich, for the instruction of the non-commissioned officers of the corps in that language. M. Baron, who has been attached for some years to Dr. Bridgman's and other military academies at Woolwich, has been appointed instructor to the class, which promises to be very numerously attended. The assembling of the class will commence to-day.

The "Old Westminsters'" Crimean Memorial.—For several days past many persons passing by the Broad Sanctuary have been attracted by the beautiful column, which is being erected in front of the entrance to Dean's-yard, to Field-Marshal Lord Raglan, G.C.B., and eight other distinguished "Old Westminsters," who fell in the Crimea. The first stone was laid, we believe, nearly, if not quite, two years ago, and it is only within the last few weeks that any signs of an erection have appeared above the unsightly hoarding. The cause of the delay has been the desire of the committee to procure three large blocks only of Aberdeen granite for the column, and after all the time wasted this has been found impossible, and smaller blocks have been sent up. The column is now about 33 feet high, and is to rise to 66, or within four inches of the topmost turrets of the new houses in Broad Sanctuary. The Aberden granite, itself three feet six inches in diameter, presents a most beautiful appearance. At about 25 feet from the base are eight shields, which will contain the coats of arms of the departed officers, Lord Raglan's being by itself nearly at the bottom of the structure. Mr. G. G. Scott, of Spring-gardens, is the architect, and Mr. Phillip, of Roehampton-place, Vauxhall-bridge-road, is engaged on a splendid representation of St. George and the Dragon, which is to surmount the column. It is expected that the memorial will be finished by the end of the year.

Troops from India.—The military invalids and troops belonging to the Indian service, who arrived at Gravesend in the troop-ship Cossipore, 730 tons, Captain Vallacott, were disembarked on Saturday morning last at the Custom House quay, Chatham. The military invalids consisted of the 3rd, 6th, and 7th Dragoon Guards; 28th, 31st, 64th, 66th, 79th, and 98th Regiments; and were in charge of the following officers—Captain Anderson, Native Infantry, with Lieutenant G. N. Pepper, 31st, instructor of musketry. After the invalids had been medically inspected five men were forwarded to the invalid hospital, Fort Pitt. Those convalescent were sent to the invalid depôt, St. Mary's barracks, Chatham. The ship also brought home 33 women and 56 children belonging to the 31st Regiment, which has gone to China. Dr. Kitchen, who was appointed at Bombay by the Emigration Commissioners, had medical charge of the women and children. The whole of them were forwarded in vans to Chatham. The following native troops also disembarked, viz.:—54 men of the 1st Fusiliers, 51 men of the 2nd European, and 19 men of the Bombay Artillery. The ship, in addition, has on board the whole of the officers' baggage of the 31st Regiment, with the plate belonging to the mess, which is valuable, and also 14 beautiful Indian tablets belonging to the regiment. Sergeant-Major Foley had charge of the property during the passage. The baggage, plate, &c., is to be deposited in the Tower until the return of the head-quarters to England.

Military Disturbance at Stonehouse.—Yesterday week, between one and two o'clock, a disturbance occurred among a number of privates belonging to the Royal Marines and the 53rd and the 12th Regiments. Most of the men used their belts to a fearful extent, and the marines ultimately got the worst of it, several of them being seriously cut and bruised. All the streets in the neighbourhood were crowded with people; a strong force of the police under the direction of Sergeant Hogan, and picquets from the different regiments amounting to between two and three hundred men, arrived on the spot, and eventually succeeded in quelling the row, most of the aggressors being captured, the police having searched the beer-houses for that purpose. One of the 12th Regiment is stated to be severely injured, his face and head being cut and contused in several places. This is the first military disturbance that has occurred for two or three years, which is attributable probably to the strict vigilance of the picquets; but the authorities have given notice that in future stronger picquets shall be sent out. The stronger picquets were sent out on Friday evening, and again on Saturday, but there was no attempt to renew the *fracas* as had been apprehended.

Poisonous Paperhangings.—The Royal Engineers have received orders from the War Department no longer to permit green paper to adorn the walls of officers' quarters, and of other Government buildings. In some countries on the Continent, the police are stringent in refusing permission to decorators of the beautiful tints now brought out in this favourite colour; and the attention of our own authorities has been drawn to it, from the circumstance of medical men being called upon to treat officers for complaints, to account for the contraction of which they were completely at a loss. It is said that a gallant colonel at Woolwich, who breeds and keeps a large stock of choice canaries, was greatly annoyed in finding the most valuable birds drooping and dying by threes and fours at a time. At length his family being attacked repeatedly by throat and mouth complaints, apparently caused by arsenic, it was suspected that the deleterious substance was evaporated by the heat of the room from the green paper on the walls; and this suspicion proving, on examination, to be well founded, the order above alluded to, was promulgated for future observance.

Isle of Wight.—The War Department has just concluded an agreement with the directors of the new Suspension Bridge thrown over the Yar on the west coast of the Isle of Wight, who, for the annual sum of 35*l.* yearly, permit the free use of their property to all military purposes, and a free passage to all men, women, and children quartered in the Freshwater district, whether walking, riding, or driving. The Yar running up towards Freshwater Fort, is a creek of considerable width, and great

Digitized by Google

depth of mud, almost insulating the Needles Promontory from the rest of the Isle of Wight. So, when it was determined to build the Forts at the Needles' entrance, the Yar became a strong military feature on the plan; and although it was attempted in Parliament to carry the bill for driving the causeway right away across the mouth, and by blocking the stream to reclaim the mud; yet the Government happily would not permit it to pass, and obliged the Company to build a moveable suspension bridge across the stream to connect the causeways. As soon as the work was completed, the Government boat which carried the soldiers and their families across was withdrawn, and these people were exposed to the heavy tax of twopence whenever they went into Yarmouth for supplies. After a long delay and much correspondence, the War Department took the matter into consideration, and to the great satisfaction of the military quartered at Freshwater, their only market town is again free of access.

SHORNCLIFF CAMP.

On Wednesday evening last the officers of the 16th Regiment gave a ball and supper to the visitors and gentry of Folkestone, Sandgate, and the vicinity. The guests began to arrive soon after eight o'clock, directly after which dancing commenced. The ball took place in the new reading-room recently erected in the A range, one of the huts being connected with it by two or three marquees which were fitted up as refreshment and retiring rooms, the supper being laid in one of the huts in the range communicating with the ball-room through the marquees. Amongst the company present were the *élite* of Folkestone, Hythe, Sandgate, and the surrounding neighbourhood, who seemed delighted with the very great exertions made by the officers for their entertainment.

Eleven privates of the Army Hospital Corps stationed at Shorncliff for instruction in hospital duties, have recently been detached to head-quarters at Chatham for the purpose of proceeding to China on service.

A General Order was issued on the 11th instant, that the sentries doing duty at the main guard and regimental guards, should be provided with the new great coats issued last year, to protect them from the inclemency of the weather during the winter months.

The 4th battalion of the Military Train was inspected by Lieut.-General Mansel on Monday last; the battalion, after parading, was minutely inspected, and the gallant general was pleased to express to Colonel O'Brien the great satisfaction he felt in being able to report that the battalion was in a high state of efficiency.

A divisional field-day took place on Wednesday morning last of the whole of the troops in camp by Lieut.-General Mansel and staff; in spite of the inclemency of the weather, the field day was carried out in a similar manner to that which took place on the recent visit of His Royal Highness the General Commanding-in-Chief.

A most gratifying testimonial has been forwarded to Mr. W. H. Mason, Scripture reader to the 16th Regiment at Aldershot, by a few of the non-commissioned officers and men belonging to the 16th, lately removed to Shorncliff from Aldershot. The testimonial consisted of three volumes of "Barnes' Notes on Isaiah," with a suitable address signed by all the members of the class belonging to the above regiment.

The repairs of the general hospital being now completed, the invalids of the different regiments will be removed from the B range, which has for some time past been occupied by them as a temporary hospital. We regret to hear that some cases of flagrant insubordination have occurred recently in some of the regiments at this quiet and orderly camp.

The Army Gazette.

WAR OFFICE, PALL-MALL, OCTOBER 12, 1860.

73rd Regiment of Foot—Major-General Benjamin Orlando Jones, to beColonel, vice Major-General Sir Michael Creagh, deceased.

4th Regiment of Dragoon Guards—James Colquhoun, Gent., to be Cornet, by purchase, vice Marriott, promoted.

6th Dragoons—Captain Thomas Edward Gordon, from the 14th Light Dragoons to be Captain, vice Chapman, who exchanges.

9th Light Dragoons—Assistant-Surgeon George Carleton Clery, from the 17th Light Dragoons, to be Assistant-Surgeon, vice Fuller, who exchanges.

14th Light Dragoons—Captain Frederick Barclay Chapman, from the 6th Dragoons, to be Captain, vice Gordon, who exchanges.

17th Light Dragoons—Assistant-Surgeon Samuel Fuller, from the 9th Light Dragoons, to be Assistant-Surgeon, vice Clery, who exchanges.

18th Light Dragoons—Captain George Harmer Pering, from the 21st Foot, to be Captain, vice Gifford, who exchanges.

Royal Artillery—Second Captain Henry Renny to be Captain, vice G. R. C. Young, placed on temporary half-pay; Lieutenant William George Martin to be Second Captain, vice Renny.

Royal Engineers—Brevet-Colonel Sir William Thomas Denison, K.C.B., on the Seconded List, to be Colonel; Brevet-Colonel Edward William Durnford, to be Colonel, vice Stotherd, removed as a General Officer; Brevet-Major Thomas Bernard Collinson to be Lieutenant-Colonel, vice Durnford; Second Captain Edward Nicholas Heygate to be Captain, vice Collinson; Lieutenant Edward Harding Steward to be Second Captain, vice Heygate.

Military Train—Lieutenant C. W. Farwell to be Captain, by purchase, vice Wolrige, who retires; Ensign George Edward Brace, from the 69th Foot, to be Lieutenant, by purchase, vice Farwell; Thomas Gerard Lockyer, Gent., to be Ensign, without purchase; Quartermaster-Serjeant Frederick Luttrell to be Quartermaster, vice McCall, appointed to an Ensigncy in the 94th Foot.

1st Regiment of Foot—Luke Edmonstone Miller, Gent., to be Ensign, without purchase, vice Frings, superseded for being absent without leave.

2nd Foot—Ensign Thomas Kelly, to be Lieutenant, by purchase, vice Nicholetts, who retires.

7th Foot—Ensign Edward Wynne Griffith to be Lieutenant, by purchase, vice Keyser, whose promotion, by purchase, has been cancelled.

9th Foot—Captain Charles J. Cramer Roberts, from the 49th Foot, to be Captain, vice Grimston, who exchanges.

11th Foot—Ensign Edward Henry Hare to be Lieutenant, by purchase, vice Webb, who retires.

13th Foot—Lieutenant Aubrey Henzell has been superseded for being absent without leave.

21st Foot—Captain John Wynter James Gifford, from the 18th Light Dragoons, to be Captain, receiving the former difference between a Lieutenancy of Cavalry and a Lieutenancy of Infantry, vice Pering, who exchanges.

29th Foot—Captain Richard Coote, from the 46th Foot, to be Captain, vice Gordon, who exchanges.

32nd Foot—The Honourable James Bruce Ogilvy, to be Ensign, by purchase, vice Cherry, promoted.

40th Foot—Ensign John Thomas Whelan to be Lieutenant, without purchase, vice Brooke, killed in action; Ensign Frederick Dudgeon to be Lieutenant, without purchase, vice Whelan, whose promotion of the 4th of September, 1860, has been cancelled.

46th Foot—Captain John James Hood Gordon, from the 29th Foot, to be Captain, vice Coote, who exchanges; Ensign Richard Fletcher Armytage Howorth to be Lieutenant, by purchase, vice Mullen, who retires.

49th Foot—Captain Rolland V. S. Grimston, from the 9th Foot, to be Captain, vice Roberts, who exchanges.

59th Foot—Major and Brevet-Lieut.-Colonel Arnold Edward Burmester to be Lieut.-Colonel, by purchase, vice Brevet-Colonel Henry Hope Graham C.B., appointed Inspecting Field Officer of a recruiting district; Captain and Brevet-Major Robert William Romer to be Major, by purchase, vice Brevet Lieut.-Colonel Burmester; Lieutenant Herbert Edward G. Crosse to be Captain, by purchase, vice Brevet-Major Romer; Ensign Charles Wollaston Hutton to be Lieutenant, by purchase, vice Crosse.

60th Foot William Warren, Gent., to be Ensign, by purchase, vice Worsley, promoted; James Blakie Keith, Gent., to be Ensign, by purchase, vice Meade, promoted. The appointment of Lieutenant James S. H. Algar as Adjutant, vice Tilford, resigned, to be antedated to 7th February, 1860.

75th Foot—Staff Assistant-Surgeon Alexander Mackay to be Assistant-Surgeon, vice Woods, who resigns.

76th Foot—Staff-Surgeon Arthur Bell to be Surgeon, vice Surgeon-Major Scott, who exchanges.

90th Foot—Ensign John Williamson to be Lieutenant, by purchase, vice C. B. Wynne, promoted; Ensign William Stewart Hamilton, from the 12th Foot, to be Ensign, vice Williamson.

Rifle Brigade—Lieutenant Hector S. Vandeleur to be Captain, by purchase, vice the Honourable J. F. Pennington, who retires; Ensign Fitz Roy Wilson to be Lieutenant, by purchase, vice Vandeleur.

Gold Coast Artillery Corps—Captain and Brevet-Major Thomas Cochrane to be Major, without purchase, vice Major and Brevet-Lieutenant-Colonel Bird, promoted to an Unattached Lieutenant-Colonelcy, without purchase; Lieutenant Francis John Bolton to be Captain, without purchase, vice Cochrane.

MEDICAL DEPARTMENT.

Surgeon-Major Robert Thomas Scott, from the 76th Foot, to be Staff-Surgeon-Major, vice Surgeon Bell, who exchanges.

BREVET

Lieutenant-General Sir Charles William Pasley, K.C.B., Royal Engineers, to be General, vice Thackeray, deceased.

Major-General William Cuthbert Ward to be Lieutenant-General, vice Sir C. W. Pasley.

Colonel Richard John Stotherd to be Major-General, vice Ward.

Major-General Charles Dixon, and Major-General Sherburne Williams, retired full pay Royal Engineers, to be Lieutenant-Generals, in consequence of the promotion of Major-General Ward, who stood below them on the Effective List of the Corps at the dates of their retirement, and Colonel Thomas Hore, retired full pay Royal Engineers, to be Major-General, in consequence of the promotion of Colonel Stotherd.

VICTORIA CROSS.

Erratum in the *London Gazette* of Tuesday, June 19, 1860—In the notification of Her Majesty's intention to confer the Victoria Cross on three soldiers of Her Majesty's Army,

For, 1st Battalion, 5th Regiment, Sergeant Robert Ewart,
Read, 1st Battalion, 5th Regiment, Sergeant Robert Grant.

CAVALRY EXPENSES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The leter of "A Guardsman" in your journal of the 6th, divested of the exaggerations of a youthful spendthrift, merits attention. There is reason to believe that his complaints relative to the selection of chargers will be remedied. As regards the compulsatory practice of drinking wine (existing in some regiments of cavalry only), the authorities at the Horse Guards have only to enforce the excellent theoretic orders of His Grace the Duke of Wellington on that head, which, to the best of my recollection, are as follows:—"His Grace does not pretend to say what wines the officers of the Army shall drink; but this His Grace does insist upon, that no officer shall be compelled to pay for wines he does not drink, or entertainments he does not wish to give." His Grace then directs that in all projected entertainments a circular shall be sent for the assent or negative of each, the assents only paying. The support of the commanding officer, as I can testify from many years' experience, is alone required to give effect to it, and every commanding officer in his half yearly confidential report pledges himself that he has so done. A very small effort on his part will insure reasonable entertainments, in which all will cheerfully acquiesce. I am aware, as "A Guardsman" states, that a practice does still exist in some regiments of cavalry of compelling officers to drink or pay for a pint of wine daily. If the authorities are resolved on enforcing obedience to their own orders as expressed by the Duke of Wellington, depend on it that the object of Mr. Sidney Herbert, aided by the Duke of Cambridge, will eventually be accomplished, viz: rendering the English cavalry an efficient and economical branch of the public service.—I am, &c., DROIT.

SUNDAY EXCURSIONS.—Although the weather has been so unfavourable during the entire summer, and especially discouraging on Sundays, we understand the number of Sunday excursionists in the season about to close has exceeded that of any previous year. To the South-Eastern Railway company, long identified with cheap excursions, we believe the credit is due of taking the first step at the beginning of the year in lowering their fares for the public accommodation. They reduced the fare to Hastings, Canterbury, Dover, Ramsgate, and Margate, to 4*s*., thus giving the opportunity at that low rate of 200 miles of pleasant travelling, and of spending several hours at these favourite places on the coast, or in the cathedral city of Canterbury. The traveller on these occasions is carried by express trains with regularity and comfort through the most beautiful part of the country adjacent to London. The facilities for exchanging the scenes of week-day life for the freshness and variety of a railway trip have a most healthful influence both as regards mind and body on the dwellers in the metropolis. It is gratifying to learn that the result, in a financial point of view, has justified the experiment, and that the great boon which the Company has conferred on the public, especially the working classes, is not inconsistent with the interests of the proprietors. Should settled weather continue, large numbers will probably avail themselves of the Sunday and Monday excursions from London Bridge on the remaining days of the excursions, viz.:—Sunday the 14th, 21st, 28th, and on each succeeding Monday. In a country so thickly wooded as that of Kent, the varied tints of the autumn foliage give a beauty to the landscape, which is surpassed perhaps by no other aspect of the year, and the present month is therefore not the least favourable time for visiting that charming district. Residents in London, who may desire an opportunity of seeing their friends in town will note, and perhaps mention the fact to those friends in the country, that there are excursions also on the last two Sundays of the month to London, from nearly all stations on the South Eastern Line. We trust that many a pleasant reminiscence will be treasured out of these trips to cheer the gloom of the long months that must lapse before excursion-trains can be again welcomed.

THE NAVY.

APPOINTMENTS.

Vice-Admiral Sir Houston Stewart, K.C.B., to be commander-in-chief at Devonport, vice Vice-Admiral Sir Arthur Fanshawe, K.C.B., superseded on account of ill-health.

Lieutenants—Henry W. Mist to be flag-lieutenant to Rear-Admiral R. F. Stopford, for temporary service; Sackville W. H. Thompson to the Diadem; Hamilton Dunlop to the Trafalgar; David Boyle to the Centurion; W. H. Elton to the Miranda.

Master—Henry W. Inglis to the Mersey.

Surgeon—Daniel J. Duigan to the Mersey.

Paymasters—E. W. Milman to the Doris.

Masters'-Assistants—Thomas J. Morris to the Miranda; Thomas G. Freeman to the Dasher.

Clerks' Assistants—G. R. Johnson and James E. Gowland (acting supernumerary), to the Victory.

Chief Engineer—John H. Bishop to the Miranda.

Second-Class Engineer—Richard H. Jenkyn to the Indus, for charge of the Charm.

Third-Class Engineers—Thomas Lewis to the Cumberland, for charge of the Cochin; William Watson to the Indus, as supernumerary.

First-Class Assistant-Engineers—John Snell to the Asia, for service in the Blazer; James Ross to the Indus, as supernumerary; Alexander M'Leod to the Curlew.

Second-Class Assistant-Engineers—Thomas Edgar to the Miranda; Thomas Brown to the Colossus; Charles Bonwick promoted to the rank of acting second-class assistant-engineer to the Satellite; John Singer to the St. Jean d'Acre.

Third-Class Assistant-Engineer—Richard Oliver to the Miranda.

Acting Third-Class Assistant-Engineers—G. F. Gossage to the Miranda; Alexander Gillanders to the Donegal; James Torkington and George Alexander to the Indus, as supernumeraries.

Aboukir, 90, screw liner, Captain Douglas Curry, has gone up Hamoaze to have her defects made good. Her crew have been paid wages, and leave has been granted to as many as can be spared from the ordinary duties of the ship.

Algiers, 91, screw liner, Captain George W. D. O'Callaghan went into Portsmouth harbour from Spithead on Monday to undergo an examination and to repair whatever defects may be discovered.

Assurance, 4, screw steam-sloop, Commander C. M. Aynsley, was at Alexandria on the 25th of September.

Banshee, 2, paddle steam-vessel, Com. C. A. Campbell, arrived at Malta from Constantinople and Syria early on the morning of the 3rd inst., having on board His Excellency Mirza Jaffer Khan, Muchir Dovle, or President of the Council of Ministers, Ambassador Extraordinary from the Shah of Persia to the Court of St. James; Fazli Ali Khan, his grandson, and a suite of eleven individuals, who left for England in her Majesty's screw steam-troop ship the Himalaya on the 6th inst.

Biter, screw gunboat, Lieutenant Foster, Commander, tender to the Colossus, has been cruising round the Channel Islands; and her spirited commander, taking advantage of the muddy bottom of the Albert Pier, which is left bare by the receding tide, in the harbour of St. Helier, Jersey, is having her keel and sides cleaned from the accumulation of weeds and barnacles which had seriously impeded her steaming powers.

Cameleon, new screw steam-sloop, to carrry 17 guns, left Woolwich on Thursday, and proceeded down the river in charge of the officers of the steam reserve, on trial of her machinery. She went over the measured mile satisfactorily, and will be placed in the steam reserve.

Centurion, 80, screw liner, Captain Henry D. Rogers, C.B. The crew of this ship at Plymouth have been paid wages, and a certain number have been granted leave. In the meantime the defects of the ship will be made good in Hamoaze.

Curlew, 9, screw sloop, Commander Shaw, at Plymouth, is ready for sea. She will sail shortly for the Brazils.

Dee, paddle steam-vessel, Master-Commanding Pullen, is now in Woolwich Basin, receiving a cargo of machinery for vessels fitting out at the western yards.

Donegal, 101, screw liner, Captain Henry Broadhead. It is expected that the repairs of this ship will be completed at Plymouth this day.

Doris, 32, screw steam-frigate, Captain E. Heathcote, was cruising off Beyrout on the 23rd of September.

Fairy, Royal screw yacht, Master-Commander David N. Welch. The following is an extract of a letter referring to the movements of this pretty little yacht: "An event, which has caused some conversation among the owners of vessels on the Rhine, and others interested, has just taken place in connection with one of the squadron of vessels which accompanied Her Majesty to Antwerp. The screw steamer, the Fairy, was detached from the squadron at Antwerp, and dispatched to Cologne, to attend the orders of the British consul. On her way up the Rhine she passed Emmerich, in the Prussian territory, without submitting to the usual custom-house inspection, on which the authorities there telegraphed to the authorities at Cologne, informing them of what had taken place. The Fairy being armed with some guns, her captain looked upon her, it appears, as a ship of war, and held himself justified in dispensing with the cuscustomary inspection. The authorities at Cologne found themselves equally in doubt, and telegraphed to Berlin, but immediately received orders that the inspection should not be required. Upon this the Fairy continued her passage up the Rhine to Mayence, where it is expected Her Majesty will embark on board of her on the return journey to England, and will thus steam down the Rhine under the Royal standard of England."

Firefly, 4, paddle steam-surveying-sloop, Commander A. L. Mansell, was at Beyrout on the 23rd of September.

Geyser, 6, paddle steam-sloop, Commander Jackson, left Plymouth yesterday week with the Philomel, old sailing brig, in tow for Sheerness, and has arrived in safety with her charge at the latter port.

Gladiator, 6, paddle wheel steam-sloop, Commander Henry D. Hickley, had, by the latest accounts from the United States, arrived below New Orleans with the remnant of Walker's filibuster force. Walker was executed on the 12th of September. It is stated that ten shots were fired at him

Digitized by Google

amid the cheers of the native spectators. His remains were subsequently buried by foreigners, the natives refusing to take any part in the ceremony. Colonel Rudler was sentenced to four years' imprisonment.

Goshawk, screw gun-boat, at Plymouth. Steam has been got up on board this vessel to try her machinery.

Greyhound, 17, screw steam-sloop, Commander F. W. Sullivan, was at Sidon on the 23rd of September.

Himalaya, iron screw steam-ship, Captain John Seccombe, left Malta on the 6th inst. for England. The Himalaya had some 140 naval invalids on board, in addition to a number of military sick. The Persian ambassador, Mirza Jaffer Khan, also embarks in the Himalaya. A correspondent from Malta says: His Excellency leaves in the Himalaya, which has been placed at his disposal to carry him and his suite, 13 in number, to England. The immense proportions of this fine vessel cannot fail to strike the ambassador and his officials with astonishment and admiration, and it is a happy circumstance that so commodious a ship should have been selected for the purpose.

Icarus, 11, screw steam-sloop, Commander Nowell Salmon, V.C., was at Truxillo by the last accounts. The American papers have taken different views as to the conduct of Commander Salmon in reference to the execution of the filibuster Walker. Some of these publications have heaped endless abuse on him, while others approve his conduct, as the following extract from the *New York Times* will show:—"Commander Salmon of the Icarus, far from showing any unnecessary cruelty, did all in his power to save the wretched man and his deluded followers. In a letter dated the 21st ult., Walker then being in possession of Truxillo, Captain Salmon informed him that the Custom-house receipts of the port of Truxillo were mortgaged to his government for the payment of a debt, and that, to protect the interests of Great Britain, he must re-establish the legitimate authority of Honduras. In the same communication he offered Walker the protection of the British flag if he would lay down his arms, refund the money that he or his followers had taken from the Custom-house, and leave the country. These terms were formally accepted by Walker in a letter addressed to Captain Salmon; but while they were in course of arrangement the filibusters surreptitiously evacuated Truxillo, and thereby forfeited all claim, if they ever had any, to mercy or consideration. The Icarus, with a force of Hondurenos, followed in pursuit, and on the 3rd instant they were captured and brought back to the city. Walker, of course, with his usual effrontery, protests 'before the civilised world,' against being delivered over to the tender mercies of the Hondurenos. He claims that he surrendered to the British officer, but as he himself violated the conditions which were proposed to him, and which he engaged to fulfil, there was clearly no surrender at all. As a band of desperate freebooters, roving about the interior of Honduras with no other objects than those of robbery and murder, the extermination of every filibuster would have been a perfectly justifiable act; and they have to thank the British commander of the Icarus that they did not receive this punishment at the hands of the Hondurenos, whose homes they had invaded, and whose national independence they had attempted to destroy. The action of Commander Salmon will, we doubt not, be approved, not only by his own government, but by the government and people of the United States. In the very disagreeable task that it became his duty to perform, he has displayed judgment, discretion, and humanity. We trust that the service he has rendered to common justice in the capture of an outlaw so wedded to deeds of blood as Walker will be fully recognised, and that it will be the means of stopping, for a time at least, these piratical invasions of peaceful and unoffending states, which have reflected such disgrace upon the American character."

Implacable, 72, training-ship, Commander J. W. Dorville, was removed on Saturday last from her moorings in Hamoaze to moorings off Wilcove.

Industry, steam-storeship, which vessel put back to Woolwich on her way to Ascension and Rio, was on Thursday admitted into basin, and on examination the entablature of her engines was found to have given way. The damage will be repaired, and she will resume her voyage in a few days.

Landrail, 5, steam gun-vessel, Commander Martin, which lately left Greenhithe for the west coast of Africa, on arriving in the Channel met with a heavy gale, which compelled her to put back for repairs.

Lapwing, 4, screw steam-sloop, Commander M. F. O'Reilly, was at Tripoli on the 23rd of September.

Leveret, screw gunboat, tender to the Dauntless, coast-guard ship in Southampton Water, was, on Thursday, hauled up on the landing-cradle at Haslar gunboat-yard for the purpose of having her ringston valves repaired and being re-coppered, &c., which was completed by 2 p.m., and the boat ready for launching off again, had the tide suited. No better illustration could be given than the present one of the suitability of Haslar-yard as a building and repairing yard for this class of boats. In this case no dock was vacant in Portsmouth-yard to receive the Leveret. Besides relieving the dockyard at Portsmouth in a matter in which its accommodation is most stinted, a gunboat can be hauled up at Haslar-yard, for repairs, at one-fourth the expense it would cost to dock her. Haslar-yard has, however, many defects. With its one launching cradle, and its one locomotive, it would take nearly a month to get all the boats stored in the yard into the water. A private bridge spanning Haslar-creek is a great obstruction to communication with the yard, every gunboat passing under it having to take down its masts. At certain times of the tide, owing to the peculiar set of the tide just at this point, it is a difficult matter to get a boat clear through the passage under the bridge without jamming her broadside on to the piles, or against that portion of the arch supporting the roadway above, in which case either the centre of the bridge must be carried away or the gunboat sunk. The Admiralty have been for some time in treaty for the purchase of this structure, but we believe have refused to agree to the terms demanded by the proprietors. We have on a former occasion alluded to the admirable manner in which the duties of the service are carried on at Haslar, and it is to be hoped that, by the alterations now suggested, the Admiralty will render the place more convenient than it now is.

Liffey, 51, screw steam-frigate, Captain G. W. Preedy, C.B., was cruising off Beyrout on the 23rd of September.

Lizard, 3, iron paddlewheel steam-vessel, 150 horse-power, Lieut-Commander E. E. Maunsell, has returned from Sheerness to Scotland and Berwick-upon-Tweed, where she has been engaged for the last three months protecting the fishing.

Marlborough, 131, screw three-decker, flag-ship of Vice-Admiral W. F. Martin, Captain W. H. Stewart, C.B., was cruising off Beyrout on the 23rd of September.

Megæra, 6, iron screw troop-ship, Commander Henderson, has completed her refit at Portsmouth, and is again reported ready for further service.

Neptune, 90, screw liner, Captain F. A. Campbell, was at Beyrout on the 23rd of September.

Orion, 91, screw liner, Captain J. J. B. E. Frere, was at Malta on the 6th inst. She had arrived from Marsala since our former advices.

Osborne, 1, paddlewheel steam-yacht, Master-Commander George H. K. Bower, has left Portsmouth for Antwerp, to be in attendance on the occasion of Her Majesty's crossing over from the Scheldt to Gravesend.

Partridge, screw gun-boat, at Plymouth. Steam has been got up on board this vessel to try her machinery.

Queen, 86, screw liner, Captain Charles F. Hillyar, arrived at Malta on the 3rd inst. from Tunis, and was under orders to proceed to Naples.

Racoon, 21, screw corvette, Captain W. C. Chamberlain, was at Beyrout on the 26th September last. On the 20th the officers of the ship gave a grand ball to the *élite* of the English and American inhabitants of Smyrna. Dancing was kept up with great spirit throughout the night. The ship left Beyrout on the 20th for Latakia, to join the Admiral. At the time of sailing the Racoon left at Beyrout two French line-of-battle ships, two troop-ships, a Turkish line-of-battle ship, the large Russian man-of-war the General Admiral, and several other small steam-vessels of war (foreign).

Rhadamanthus, paddle steam-vessel, Master-Commanding Sturdee, has arrived at Woolwich from Portsmouth to reload with a cargo of machinery for vessls fitting out at the western yards.

Rose, surveying cutter, having had defects made good, and having been newly rigged, was put out of the basin in Devonport dockyard on Saturday last.

Ruby, 51, screw, went out of Portsmouth harbour on Saturday last for trial of her boilers and engines.

St. George, 91, screw, Captain the Hon. F. Egerton, went into harbour at Devonport on Saturday last to make good her defects.

St. Jean d'Arc, 101, screw liner, Acting Captain J. D. M'Crea, entered Malta harbour on the 3rd inst. from a cruise off the island. This ship had been unusually sickly. Captain M'Crea has the ship in excellent order. She is nicknamed the "Happy Acre" throughout the fleet, and it is a matter of congratulation that so popular an officer as Captain Elliot is appointed to take command of her.

Supply, screw store-ship, Master-Commander Balliston, has left Plymouth with stores for the Mediterranean.

Sutlej, 51, screw, converted from a sailing frigate, steamed out of Portsmouth harbour on Saturday last, and proceeded to the trial ground in Stokes Bay to test her speed at the measured mile, under the official superintendence of Captain G. T. Gordon, commanding the steam-reserve at the port. The Sutlej has been fitted with engines of 500 horse-power (nominal) by Messrs. Maudslay, Field & Co. The ship drew only 17 feet 3 inches forward and 20 feet 3 inches aft, consequently she was in very light trim, and the immersion of her screw was incomplete by nine inches. A comparison of the results of her trial with that of the Immortalité, tested at Portsmouth on the 5th ult., proves, as had been anticipated from her graceful lines forward and aft to be highly favourable to the Sutlej, taking into consideration the fact of her being 100 horse-power less than the Immortalité. The latter ship realised on her trial trip a mean of 12·533 knots, at a draught of water of 21 feet forward, and 21 feet 10 inches aft. The Sutlej, in her trial on Saturday, used Griffiths' propeller, with a diameter of 17 feet 6 inches, and a pitch of 20 feet. The pressure of steam was 20lbs. on the gauge; vacuum, 23; revolutions of engines, maximum 72, mean 71. Six runs were made, the mean of which gave the ship a speed of 13·067 knots. The machinery and boilers worked perfectly, the latter furnishing an ample supply of steam. There was an entire absence of any raised body of water under the ship's bows when at full speed, and the trial was altogether as could be desired.

Tartar, 20, Captain J. M. Hayes, arrived on Saturday last at Spithead from Sheerness. Salutes were exchanged with flag-ship Victory.

Terrible, 21, steam-vessel, Captain F. H. Glasse, C.B., arrived at Beyrout from Salonica on the 20th September last.

Victor Emmanuel, 91, screw liner, Captain W. J. C. Clifford, C.B., was at Caiffa on the 23rd of September.

Warrior, iron steam-ram, building at Blackwall. The engines for this ship have been manufactured by Messrs. John Penn & Sons, and promise to be as fine a pair as were ever turned out of hand. They will be ready to be put on board the moment the ship is ready to receive them.

The following are the names of those officers whose deaths have been officially reported since 20th of June last:—*Flag-Officers on Reserved List:* Vice-Admiral Sir George R. B. Pechell, Bart., 1857; Rear-Admiral William F. Lapidge, 1857. *Flag-Officers on Retired List:* Vice-Admiral Isaac H. Morrison, 1856; Vice-Admiral Rowland Money, C.B., 1857; Vice-Admiral George Hewson, 1857; Rear-Admiral George Lloyd, 1855. *Captains:* Harry Eyres, C.B., 1841; Rundle B. Watson, C.B., 1842. *Captain on Reserved List* (F.G.): Thomas P. Dobree, 1854. *Captains on Retired List* (H.I.K.): James E. Huggins, 1852; Robert Ingram, 1856. *Captain on Retired List* (U.): Joseph F. Stirling, 1860. *Commander:* Edmund Webber, 1857. *Commander on Reserved List* (M.N.): Edward P. Fuge, 1857. *Commanders on Retired List of* 1816: John McDougall, 1844; Charles Beales, 1859. *Commander on Retired List of* 1830: Thomas Rawlins, 1853. *Commander of Greenwich Hospital:* Edward Garrett, 1809. *Commanders from Masters' List,* (Q.): John Town, 1846; Joseph N. King, 1857. *Lieutenants:* John B. Scriven, 1810; Lawrence Dennehy, 1824; Jacob Pitfield, 1824; James Pratt, 1825; William A. V. Royse, 1852; Richard P. Gresham, 1854; James W. L. Oakes, 1856. *Lieutenants on Reserved Half-Pay:* John A. Moore, 1815; Henry Reid, 1815; John Carthew, 1815; Edward G. Kirby, 1857. *Lieutenant of Greenwich Hospital:* Edward Wylde, 1814. *Masters:* Robert Knox, 1841; James Rusden, 1851; Mark Netten, 1856; Charles E. H. Farrant, 1858; Richard C. Drew, 1859; *Masters on Reserved List:* Edward Denison, 1804; John James, 1811. *Chaplain:* Rev. Thomas C. E. Warcup, 1851. *Naval Instructor:* Thomas Eastman, 1836. *Surgeons:* Howard R. Banks, 1843; John Sole, 1855. *Surgeons on Retired List:* William Evans, 1808; Henry Towsey, 1810; John L. Doolan, 1811; John Drew (*b*), 1815; Robert Maxwell, 1830; Salter Livesay, 1846. *Assistant-Surgeons:* William H. Carter, 1852; David Campbell, 1853; David P. Maclagen, 1859. *Paymasters:* Arthur G. Thomas, 1855; Octavius N. Spong, 1860. *Paymasters on Retired List:* John Elliot, 1804; James Dawe, 1832; John Lord, 1835. *Chief Engineer:* Robert M'Ewen, 1857. *Second Master:* Oscar Samson (acting). *Assistant-Paymasters:* Henry Tucker, 1850; Charles B. Sevecke, 1860. *Royal Marines:* Captain Thomas Moore, 1826. *Retired Captain:* Charles Miller, 1846. *Lieutenants on Reserved List:* Henry Elliot, 1805; Richard Couche, 1808.

The Navy Gazette.

ADMIRALTY, October 12th.

Notice is given that preparations are now being made for the intended distribution of the proceeds received and tonnage bounty awarded for the brig, name unknown, captured on the 16th July, 1859, by Her Majesty's ship Pluto and the cutter of Her Majesty's ship Vesuvius.

NOTICE TO MARINERS.

(No. 32).—Mediterranean.—Coast of Venice.—*Temporary discontinuance of Lights.*—The Maritime Inspector of Venice has given notice, that the lighting of the lighthouses on the Venetian Coast was discontinued on the 20th September, 1860, and will remain so until further orders.

West Coast of Italy.—*Fixed Variable Light at Civita Vecchia.*—The Minister of Commerce and Public Works at Rome has also given notice, that on and after the 10th of July, 1860, a new light would be exhibited from a lighthouse at Civita Vecchia. The light is stated to be a *fixed* variable *white* light, the *fixed* light being followed by a greater light, which gains its full splendour in four seconds and lasts throughout an interval of forty seconds; it is then succeeded by the lesser light as before. Being a light of varying brilliance and 120 feet above the level of the sea, the greater light will be visible at the distance of 19 miles, but the lesser light may not be seen so far. The document containing this information being deficient of certain other particulars required by seamen, farther notice of it is postponed until they are received.—By command of their Lordships, *John Washington,* Hydrographer, Hydrographic Office, Admiralty, London, 28th September, 1860. This Notice affects the following Admiralty Charts:—Plan of Civita Vecchia. No. 1882; Coast of Italy, sheets 2, No. 1490, and 3, No. 158; Mediterranean General, No. 2158. Also, Lights List, No. 133.

NOTICE TO MARINERS.

(No. 33.) South America—Coast of Brazil.—*Fixed Light at Rio Grande do Norte.*—The Secretary of State for the Marine Department at Rio de Janeiro has given notice, that the light exhibited from the light tower on the Fortress of Santos Reis Magos, at the bar of Rio Grande do Norte, has been improved. The light is a *fixed white* light, elevated about 43 feet above the level of the sea, and in clear weather should be seen from a distance of 12 miles The light tower is cylindrical, and is built on the platform of the above Fortress. Its position is given as lat. 5° 45′ S., long 35° 13′ 15″ West of Greenwich.—By command of their Lordships, *John Washington,* Hydrographer, Hydrographic Office, Admiralty, London, 8th October, 1860. This Notice affects the following Admiralty Charts:—South Atlantic, No. 2203; South America, Index Chart, No. 1800; East Coast, sheet 4, No. 522. Also South American Lights List, No. 2*.

NAVAL RETIREMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Like many who take in your paper, I feel assured we have in you an advocate. I would therefore call your attention to the late scheme of "naval retirement," as set forth in the last quarter's Navy List, particularly that part relating to the captains on the Reserved List, promoted in 1851; and I think, if I read the article right, you will agree with me that we have a grievance, as unfairly and unjustly dealt by, who, after our memorial to His Grace of Somerset, and Lord Clarence Paget's reply to the Member for Portsmouth, Sir J. Elphinstone, were led to expect otherwise. Lord Clarence is reported to have said when dealing with this subject, that Sir James, "were he in his place, would be glad to hear the reserved captains' prayer had been granted," or words to this effect. Now, sir, this memorial presented to the House by the Member for Portsmouth, be it remembered, was, that they might have the advantages of the active service in rise of pay and rank, with their more fortunate brethren, as their commissions were the same, and they were led to believe themselves entitled to. So far as those promoted in 1851, no stipulations were made otherwise, while those advanced by Sir James Graham were expected to give up all claims to Greenwich. By this recent order we are to be dealt with only as commanders. Look at this injustice! Many, and at least two-thirds of these officers, were by their services justly entitled to their rank on the active list, had they been fairly used. All to a man, I will venture to say, only accepted the offer to be placed on the reserved list, in good feeling to the Service, that younger men may advance. All these things considered, I cannot but believe we may still get some independent Member in his place to stand up for the justice of our claim, to be put on a par with our more fortunate brethren, and allowed to retire with the same advantages. Our best days have been devoted to the country's service, and, that our latter may be free from contumely and neglect. My only wonder is that men can be found in office to advocate so harsh a step as to offer the mere pittance of 3*d.* per diem, as has been in instances awarded officers on the reserved list of captains, by depriving them of their war services as midshipmen and coast-guard time; as once in three years they have been by these means brought within this scale of allowance, giving only this 3*d.*, while others are given the benefit of packets and guard-ship time, with an increase in proportion, making no allowance to those who have drudged for years on the coast of Africa and within the tropics, beyond their time, so served, in too many instances now suffering from effects of climate. It would be folly to compare the two servitudes; and yet Mr. Editor, there are men, by this recent arrangement, who have had more canvas spread over their heads, I mean absolute days and nights at sea, than half our admirals can boast of, who will be doomed to pass their few remaining days in almost want, or accept this poor pittance, a disgrace to their rank to do so. We would urge it on the Board; we would urge it on the country to rescind this order, so far as it relates to the reserved rank in particular. If your attention to this be worth your while, I feel assured you will oblige a deserving set of officers.—I am, &c.

Trafalgar.

STEAM-TRANSPORT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The repeated articles which have appeared in the ARMY AND NAVY GAZETTE in favour of a national fleet of steam-transports mark how strongly you advocate this scheme. I have no objection to it if from past experience it is found in all respects the best, and an inquiry before a parliamentary committee next session will get at the truth. I am certainly not prepared to accept it on the score of economy from Captain Eden's figures, for I proved in a letter to the *Times* some ten days ago that the data on which you argued lately relative to the comparative expenses of the Himalaya and Indiana were entirely fallacious.

In your publication of the 6th instant, you mix up the Conway with the Emigration and Transport Services in a most damaging medley. As for the mode of ventilation adopted by the Emigration Commissioners being dangerous to ships, can there be a more unanswerable argument than the fact, that out of 883 ships dispatched, within the last thirteen years, by these officials, only 1 has been lost, and that one, if there is any value in circumstantial evidence, from a collision in the ice. I might add my own experience, for the ships of the Black Ball Line have carried upwards of 60,000 emigrants to Australia during the last nine years, with quite as many openings in their decks, and have never thereby lost a life.

You seem to lean very strongly to Mr. Phillipps' evidence. Might I inquire the number of people he ever carried to Australia? I believe you will find his objections are simply theoretical. As there will be a public inquiry into the loss of the Conway, I shall not attempt to anticipate the result; but I am quite prepared to abide the verdict of the official tribunal; and I think it would have been more generous had you deferred your opinion until the investigation was held.—I am, &c., T. M. MACKAY.

[NOTE.—We have inserted the above letter, and would have given place this week, had we received it in time, to a communication from Mr. Phillipps, on the principle of affording a fair hearing to all sides; but we shall not fail to remark on the arguments which have been used by our correspondents. At present we shall only say, that the functions of the press would be reduced to those of a mere court of registration of official decisions, if the view expressed in the last sentence of the letter of our respected correspondent, Mr. Mackay, were to be adopted.—ED.]

THE MILITIA.

The Carnarvon wing, Royal Carnarvon and Anglesey Rifles, under command of Lieut.-Colonel J. MacDonald, was inspected on the 5th inst. at Carnarvon by Colonel Lord Frederick Paulet, C.B., Inspector of Militia. About 386 (or almost the whole quota of men) were on parade, exclusive of officers, staff, &c. After a minute inspection of the regiment by companies, a long course of field movements, with light infantry work, was performed under the direction of the inspecting officer, who afterwards examined the regimental and company books, armoury stores, &c. At the conclusion of the inspection, Lord F. Paulet expressed his great satisfaction at the efficiency, most creditable both to officers and men, with which the field-work was performed, as well as with the interior economy of the regiment; he also stated on parade that he would be able to make one of the most favourable reports possible of the general appearance and efficiency of the corps, and of the manner in which the men had mustered for training, nearly every man borne on the strength of the regiment being actually present. Two-thirds of the men have gone through a course of preliminary musketry instruction, under the Adjutant, Captain Nares, during the period of 27 days' training, which terminated on the 6th inst.

On the occasion of the head-quarters of the Royal Antrim Artillery Militia leaving Woolwich for Newport, Monmouthshire, on the 27th ult., the following General Order was issued by Major-General Sir Richard Dacres, commanding the garrison:—"The Major-General Commanding cannot allow the Royal Antrim Artillery Militia to leave this garrison without expressing to Lord Massereene, the officers, non-commissioned officers, and men, his high sense of their orderly conduct and soldier-like appearance since they have been in this command."

The Tipperary Artillery underwent a half-yearly inspection by Major-General Eyre at Sheerness yesterday week. The General expressed his entire satisfaction, and, as to the conduct of the men, stated that "good" was too weak a word, and that he should designate it as "exemplary." Two detachments of this regiment will leave Sheerness on Wednesday,—one consisting of 60 gunners, under Captain Sargint, for Tilbury Fort; the other, numbering 95 gunners, under Captain Sheppard, for Purfleet.

The Pembrokeshire Artillery are now out for 28 days' training under Lieut.-Colonel Owen. They are much below their strength, but are recruiting very rapidly, as the men appear to prefer a voluntary enlistment to being drawn under the new Militia Ballot Act.

The Hampshire Artillery left Pembroke Dock on Tuesday last, for Gosport, under the command of Colonel Burnaby. They numbered 17 officers, 302 men, 9 women, and 24 children. They are to be disembodied this week.

The Militia Gazette.

WAR OFFICE, PALL MALL, OCTOBER 9.

West York Rifle Regiment of Militia—Her Majesty has been pleased to accept the resignation of the commission held by Captain William Lewes.

5th Regiment of West York Militia—Her Majesty has been pleased to accept the resignation of the commission held by Major William Drake Hague.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the commission held by Ensign Richard Richards Carver in the Carmarthenshire Royal Rifle Regiment of Militia.

WAR OFFICE, PALL MALL, OCTOBER 12.

1st or Western Regiment of Norfolk Militia—Walter Stirling, Esq., late Lieutenant Coldstream Guards, to be Captain, vice Fountaine, resigned.

2nd Devon Regiment of Militia—Albert Praed Halifax to be Lieutenant.

1st Devon Regiment of Militia—Francis Bernard Shervington Beamish to be Lieutenant, vice Halifax, deceased.

VOLUNTEERS.

There has been raging—we believe it yet burns—a fierce controversy, between several gentlemen in reference to the origin of the Volunteer Movement; and assuredly it would be a proud position for any man, if he could prove he had struck out the idea, had developed it from its birth, and had seized it and put it beside him without aid, help, or suggestion from precursor or contemporary. We do not know how many rivals there are. Nine cities contended for the merit—with which none of them could have anything to do—of being the birthplace of Homer, who, if born in any of them, was born therein because his mother was in the place at the time. We do not know who originated the Volunteer Movement of 1800, but we shrewdly suspect that the parent bore a very strong likeness to the probable progenitor of the splendid corps which constitute a great fact for England in 1860. It was the sense of public danger from which sprung the armed committees of public safety in the former year; and depend on it, no mere excogitations in a closet, or sudden inspirations of an undiscovered truth, ever acted on the mind of any one man in reference to the desirableness of preparing for the worst, and of stirring up the English people to arms, in face of the dangers which were possible, if not probable, a year ago. Sir Duncan MacDougall, who seems to correspond with everyone about everything, and particularly with ministers of state, has appeared on the scene whereon many combatants have been figuring, and in a very curious letter claims for Mr. Bousfield, the active and energetic Lieut.-Colonel of a Liverpool Volunteer corps, the credit of leading Lord Derby to issue the Circular from which the success of the Volunteer movement resulted. But the ingenious Sir Duncan does not conceal the fact that he, Sir Duncan, had, in his own opinion, a good deal to do with the matter also. It appears that Mr. Bousfield's friends in Liverpool are engaged in getting up a substantial testimonial, which now amounts to nearly 1500*l*. They wrote to Sir D. MacDougall on September 29, and he sent them ten guineas and a letter to the Mayor of Liverpool, which, at the request of the committee, Sir Duncan consents to have published. Mr. Bousfield, who must unquestionably have had his heart in the matter, offered to form a Volunteer corps in 1857, but the offer was rejected by the Government. On 28th April, 1859, Sir Duncan MacDougall forwarded Mr. Bousfield's renewed offer to Colonel Peel, and expressed his belief that, if it were accepted, hundreds of thousands of Volunteers would enrol themselves; and Sir Duncan thinks that the result of his communication was a letter addressed to him from the War Department, on the 13th of May, 1859, informing him that "a Circular had been issued, informing Lord-Lieutenants of counties of the conditions on which the Queen's Government will accept the services of Volunteer corps." It was, says Sir Duncan, therefore, Lieut.-Colonel Bousfield's offer of service that led the Government of the Earl of Derby to issue the circular from which has resulted the success of the Volunteer movement. Where is the voice of "T?" where the thunder of the *Times?* Will Mr. Richards accept the challenge? Will Mr. Hans Busk permit the autocrat of 112 Eaton Square, to issue such a ukase in peace? There are, possibly, hundreds of others who can prove they said, thought, or wrote, early in the century, that a Volunteer movement would be a good thing, and the official pigeon-holes probably teem with papers on the subject. There is, besides, a letter in our issue of to-day which is not destitute of the merit of bearing on the discussion.

METROPOLITAN.

THE HON. ARTILLERY COMPANY.—A detachment of this body, under the command of Captain Field, instructor of musketry, and accompanied by Lieutenant Gopell, have just completed a period of eight days' rifle practice on the Essex coast, and returned to London. The spot selected was the quiet watering-place of Walton-on-the-Naze, on the most eastern part of the county, where a suitable practice-ground was placed at their disposal by Mr. J. Hicks, the sea-wall forming an excellent butt; and here, during the week there has been some very superior shooting. On their return, the gallant Volunteers marched from Walton to Colchester, a distance of 18 miles, and having dined together at one of the principal hotels, the journey to London was continued by train. Arrangements are in progress for the visit to Walton of a strong force of the Victoria Rifles, for a similar period of rifle-practice.

2ND (SOUTH) MIDDLESEX RIFLES.—The members of this large and important corps are fast returning to London. No less than eight of the members have been with Garibaldi, and three of them were in the late action of Capua. Lord Ranelagh recommences his Saturday drills the end of this month. In the meantime great activity prevails at Beaufort House. The butt, with its 22 targets, the finest thing in Europe, is in daily use. Upwards of 25 to 30 prizes are to be shot for in the months of November and December. A cadet corps is in the course of formation; and a new company, to be called the Experimental Service Company, is about to be formed, to be armed with Westley Richards's breech-loading rifle. The object of forming this company is to bring together gentlemen whose independent means will enable them to try and adopt the wants, suggestions, and improvements that have arisen out of the Volunteer movement, and thus be an example of what a company ought to be when fully prepared for active service. The uniform, whether Zouave or otherwise, will be left to the decision of the members. On Saturday, the 27th, at Beaufort House, there will be various experiments with breech-loading rifles, and electric telegraph targets. One company of 100 men are ordered to throw up a sand-bag battery, Captain Norton's late inventions, &c. The grounds of the South Middlesex are always open to inspection, and will well repay the visits of Volunteers and others.

9TH (WEST) MIDDLESEX RIFLES.—At a meeting of the council held on Wednesday evening, it was reported by Lord Radstock that Mrs. Sapsford of Queen Anne Street, had presented three magnificent battalion colours to the regiment. They are made and embroidered entirely by the donor, and are formed of red and black silk with the initials W.M.R., and a crown richly embroidered in gold, and a wreath of laurel worked in grey silk. The chairman in commenting on the excellent example now set, stated he had no doubt but the example would be followed by other ladies in the West Middlesex District, either in the shape of a Ladies' Prize in the forthcoming rifle contest, or the now popular presentation of silver bugles. It was resolved unanimously that the thanks of the council be written and presented to Mrs. Sapsford for her munificent gift. Mr. Bridgman presented a very handsome chased silver challenge cup, given by himself, his son, and Mr. Phillips, to be competed for. Mr. Compton (Major) also handed in a silver tankard for the members of the second company. The following rules were agreed to in reference to the prize meeting: 1st. That it commence on Tuesday, Nov. 26. The 8 company prizes of 5*l*. each, shall be competed for by members who have obtained 15 points in the first period of firing; ranges, 200 and 300 yards, 5 shots each range. The battalion prizes of 20*l*., and the silver medal of 10*l*. and bronze medal, and a 10*l*. prize given by T. Hughes, Esq., shall be competed for by the 30 men who make the greatest score in the Company Prizes—five shots each at 400, 500, and 600 yards. The Challenge Cup shall be shot for by the 12 men who make the highest score in firing for the Battalion Prizes—10 rounds at the 700 yards range at a target six feet square and two feet centre. The cup to become the property of any member who wins it three years in succession. For the Westley Richards rifle each company shall send in their 10 best runners to go through judging distance drill at five distances. The 24 men who make the highest score shall then fire five rounds at 300 and 400 yards range. Entrance fee for each prize 1*s*. All shooting for the above prizes shall be made with the long Enfield rifle with Government ammunition, and in Hythe position. Lord Radstock reported that he had nominated Sergeant Syers, who is at present qualifying for a musketry instruction at Hythe, to an ensigncy. The Council then examined several patterns of cadet uniform, and finally approved of a patrole jacket, trousers, and forage cap, supplied by Messrs. Silver, price 36*s*. complete, similar to the London Rifle Brigade Cadet Corps. A subscription for a Ladies' Prize is now open. Communications respecting the same to be addressed to Lieut. Marriner, Orderly Room, Seymour Place. The Council passed unanimous votes of thanks to the Hon. Architect and Hon. Solicitor to the corps for their services. The new orderly-room, Seymour-square, is now open from 11 till 4 o'clock for drill, bayonet exercise, &c. The inspection of the West Middlesex by Colonel McMurdo will take place on Saturday Nov. 10th. Further notice will be given.

28TH (LONDON IRISH) MIDDLESEX RIFLES.—There was no march out for drill exercise by the members of this corps on Saturday, in consequence of the announcement of the recent melancholy death by drowning in Clew Bay, on the western coast of Ireland, on Tuesday last, of Captain Richard de Freyne Jones, of the 1st company. The announcement of Captain Jones's death cast a sad gloom over those assembled at Burlington House. His kindly feelings and great personal worth, together with the extraordinary interest taken by him in the furtherance and welfare of the corps, made him a universal favourite in the regiment. By every one, from Colonel the Marquis of Donegal to the humblest man in the ranks, Captain Jones was held in the highest esteem. Associated with those who composed the regiment from its very origin, he felt the greatest pride in taking a part in securing its permanent existence, and he considered it an obligation to devote some hours every day to fit himself for the duties he had undertaken as captain in the regiment. It is only a few months back that he offered a prize medal to be shot for by the members of his company, and the shooting was to come off shortly after his return from Ireland. Captain Jones has left a young widow and two children to mourn his loss. He was a fond and affectionate husband, and a sincere friend, whose loss will be long deplored by all who had the pleasure of his acquaintance and friendship. In his own profession, as engineer, he was highly esteemed, and for some years past, though he has only just completed his 29th year, he discharged the duties of engineer to the London Gas Company, by the directors of which he was much respected. The following Regimental Orders relating to this sad event have been forwarded to us for insertion in these columns:—"Regimental Order, 6th Oct., 1860.—Lieut.-Colonel the Marquis of Donegal sincerely regrets having to announce to the corps the very melancholy intelligence he has just received of the death of one of its most valued and zealous officers, Captain Jones, No. 1 company, who, it appears, was drowned off Clew Bay, West of Ireland, on Tuesday last, when on his return from rifle shooting. In consequence of the above, and as a mark of respect to so highly-esteemed an officer, the general parade ordered for this afternoon is countermanded.—By order, T. Daubeney, Captain and Adjutant."—"Regimental Order, 8th Oct., 1860. Lieut.-Colonel the Marquis of Donegal cannot refrain from again expressing his deep and sincere regret, a feeling which he is confident is shared by every individual in the regiment, at the loss they have sustained in the death of Captain Jones, an officer who took so deep an interest in the prosperity of the corps, whose every exertion was used to promote its welfare and efficiency—who set an example to all others by endeavouring to make his company superior to all—and whose vacancy it will be difficult, if not impossible, to fill up.—By order, T. Daubeney, Captain and Adjutant." On Sunday, at one o'clock, the body of Captain Jones was, after much perseverance, recovered from the "tomb of the sea," being found immediately adjacent to the scene of the fearful tragedy; an inquest was held before Mr. John F. Bourke, and a respectable jury. On Tuesday, at two o'clock, the remains were conveyed to the family

Digitized by Google

burying-ground at Oughavale, accompanied by the band of the South Mayo Rifles and a party of the gallant corps, who paid the last tribute to the memory of the noble fellow who was a credit to his country and his mourning friends. As the splendid band heading the melancholy procession played at intervals the "Dead March in Saul" and the "Funeral Hymn," the numerous assembly scarce restrained the stifled sob and heaving sigh, for the three brave youths who were snatched off in the prime of life. The remains were carried to the grave by the non-commissioned officers of the Rifles, all under the command of Lieutenant Dodd, whose arrangements were most perfect and soldier-like. A preliminary meeting of the London Irish Rifle Volunteers was held on Thursday evening for the purpose of taking immediate steps to testify by a suitable memorial, the loss they have sustained by the death of their late companion, when a very handsome sum was subscribed on the spot.

29TH (NORTH) MIDDLESEX RIFLES.—A festival of the effectives of the above corps took place on Wednesday evening, for the purpose of celebrating the recent large accession of numbers, at the Victoria Tavern, Mornington Road, Camden Town. The secretary of the corps presided; and Captain Ross, captain-commanding, Lieutenant Porter, and other officers were present. After the usual loyal toasts were given, "The 29th (North) Middlesex Rifles, with the Health of its Commanding-Officer," was proposed, and enthusiastically responded to. Captain Ross, in returning thanks, referred to the gratifying fact that the regiment had now reached 600 men, and he believed that before Christmas they would number 1000. The estimation in which the corps was held could not be better exemplified than in the fact that the honour had been conferred upon it by his gallant friend Captain Wilkinson, of inviting a detachment of the 29th to keep the ground on Saturday week next on the occasion of the presentation of a silver bugle to the Highgate Rifles by a lady of very high distinction (Miss Burdett Coutts). He felt highly gratified at the accession of so good a company as Messrs. Brooks's, and the further accession consummated that day of the enrolment of the *employés* of the firm of Messrs. Hopkinson, the pianoforte manufacturers. "The First Three Companies, coupled with the Health of Lieutenant Porter;" "The Fourth Company (Brooks's), with the health of its present senior officer, Colour-Sergeant Spinks;" "The Fifth (Marylebone and St. John's Wood Company), and the Healths of its Founders, Messrs. Spencer, Turner, & Co., of Lisson Grove;" "The Sixth Company, and Messrs. Hopkinson" (responded to by Mr. Gowland), and other toasts, brought a pleasant evening to a close.

40TH (CENTRAL LONDON) MIDDLESEX RIFLES.—The members of this corps will assemble in Gray's-inn, on Sunday morning next, at ten o'clock, for church parade, the rector of St. George the Martyr, Queen-square, Bloomsbury, having kindly consented to preach a special sermon.

2ND TOWER HAMLETS RIFLES.—A meeting took place 9th October, at the Schoolroom, Upper Clapton, for the purpose of raising an additional company from amongst the inhabitants of Upper Clapton, Stamford Hill, and the adjoining neighbourhood. Mr. D. A. Gibbs, who took the chair, opened the proceedings by saying, that he thought that such an influential neighbourhood as Upper Clapton should furnish a company, composed of residents in the place, and he felt sure that it was only necessary to inform them of that project to secure its complete and permanent success. Mr. S. Pulley then moved, and Captain Lowry, the adjutant of the corps, seconded a resolution, which was carried unanimously, to the effect that it was expedient to form a company of Rifle Volunteers for Upper Clapton and its vicinity, to be attached to the 2nd Tower Hamlets Rifles, and to invite the co-operation of the residents in forwarding that object. Mr. Bateman moved and Mr. J. Parnell seconded a resolution, which was likewise carried *nem. con.*, to the effect that the gentlemen who had kindly agreed to constitute a committee be requested to continue their services. After votes of thanks to the Rev. C. J. Heathcote for the use of the schoolroom, to the chairman, and to Captain Lowry, the meeting terminated. Nearly forty gentlemen enrolled themselves as members during the evening. A company of the 2nd Tower Hamlets was present during the proceedings.

THE WORKMEN'S VOLUNTEER BRIGADE.—This corps, mustering nearly 1000 strong, assembled on Saturday evening last in the Guildhall, City of London, for drill practice and parade, and, considering the difficulties they have had to encounter in obtaining suitable places for drill, their marching and general deportment reflected much credit on the body. In the course of the evening Major Richards addressed the men and stated that Colonel Sir William De Bathe was present, and that that gallant officer had accepted the command of the 1st battalion, which announcement was received with great enthusiasm. Sir William then presented himself, and expressed his gratification at being selected to take charge of so fine a body of Volunteers. It had been his lot to serve under the illustrious Wellington in some of his glorious campaigns, and he therefore thought that he might be in some way qualified for the important post to which they had appointed him. It would be his pride to render the corps all the aid he could, and he had no doubt, from the proficiency they had shown, they would become equal to any Volunteer corps in the country. The gallant officer was loudly cheered during his address. The battalion then formed in marching order, and headed by their band, proceeded through the principal streets in the city to their head-quarters.

19TH (LAMBETH) SURREY RIFLES.—The members of this corps marched out on Saturday afternoon last, under the direction of their Major-Commandant; the course taken being Kennington, Brixton, Streatham, and Clapham, the band enlivening the districts through which they passed with martial music. The gallant Major (Mr. Roupell) in dismissing the men informed them that the rifle butt was now at their service at Streatham, and on Wednesday and Friday ball practice would take place. Drill takes place in the finely-lighted grounds of the battalion on Mondays and Thursdays, and on Saturday evenings battalion drill, on which occasions the band, which is now getting into excellent condition, attends. This corps is rapidly increasing in numbers. A large firm in the neighbourhood perceiving the interest taken in the movement by their workmen, have formed a company of 80 men in conjunction with the 19th Surrey; also an 8th company is now in a state of completion. The corps has recently adopted the lime light for the purpose of lighting up their drill-ground at Kennington. This ground, which is about 230 feet in length, and upwards of 100 in width, making an area of 2300 square feet, is lighted by four lamps, containing eight jets of lime light, consuming 60 feet of gas per hour at a maximum, and equal in illuminating power to 400 fish-tail gas lights, consuming at a maximum 2000 feet of gas.

ESSEX.

PLUMSTEAD VOLUNTEER ARTILLERY.—A band has just been attached to this corps, the members of which are now furnished with the cavalry sword, and are also to be supplied with the short artillery carbine.

GLOUCESTERSHIRE.

THE COTSWOLD RIFLES.—On Wednesday last this corps marched to the practice-ground at Southam to shoot for various prizes presented to the company. The day was miserably wet, and it was the general opinion that the shooting would be put off; but soon after nine o'clock Captain Swiney arrived at the station, and the order was given to start, and a little after ten o'clock the company left the station headed by their now capital band, playing the whole way, the rain falling in torrents, which continued nearly the whole day. The prizes to be competed for were a very beautiful silver goblet, presented by Mr. C. Andrews, of High Street; another very handsome silver goblet, presented by subscription; and two money prizes. The ranges were 200, 300, and 450 yards, the longest range that the ground would permit; five shots at each range. There were thirty-two competitors, who were divided into two subdivisions, the one under the command of Captain Swiney, and the other of Colour-Sergeant Philipps. The firing commenced at twelve o'clock, and terminated about three. The fortunate winners were Sergeant Shirer, 16 points, Corporal Packwood, 14 points, and Private Taylor, 14 points, and Private Darby, 14 points, the last three being ties. The places were given according to the points made at the longest range. The company are all very pleased at Sergeant Shirer's success, as, since the formation of the company in March last, in which he took a leading part, he has been most indefatigable in his exertions to forward the interests of the corps.

HAMPSHIRE.

PORTSMOUTH CIVIL SERVICE ARTILLERY VOLUNTEERS.—The senior master-gunner of the South-West District, an old Artillery officer of 24 years' standing, has been appointed adjutant to this corps. A notification has been received from the War Office, granting permission to the Civil Service Volunteers of the dockyard to take part in the review of the county Volunteers at Winchester on the 24th inst. About 230 men are expected to attend muster on that occasion. This appears but a small number for the dockyard establishment of the chief naval arsenal in England to turn out. In fact, it is so. But, by a simple arrangement on the part of the Government and the Admiralty, upwards of 2000 able-bodied men belonging to the yard might be readily armed, drilled, and equipped at a trifling expense, where it is evident that such a body of men is very much needed, especially when we remember that very extensive fortifications are in course of construction in the neighbourhood. The objection to the arrangement seems to be a dislike on the part of the Admiralty to interfere with the daily labour of the men belonging to the yard. But surely a necessity for some sort of arrangement will eventually force itself upon their lordships.

2ND HANTS ARTILLERY VOLUNTEERS.—This corps is under orders to proceed to Winchester to join in the county demonstration on the 24th inst. The men will be armed with carbines, in consequence of not being able to obtain field-pieces, there being none, even in the garrison town of Portsmouth, for their use.

5TH HANTS RIFLE VOLUNTEERS.—This corps is working hard, preparing for the great county gathering at Winchester, on the 24th inst., when the available Volunteer force of Hampshire will be reviewed by Major-General Lord W. Paulet, C.B., the Governor of Portsmouth, in the presence of the Marquis of Winchester, the Lord-Lieutenant of the county.

KENT.

CINQUE-PORTS ARTILLERY.—The head-quarters of the No. 1 Battery has been lately removed from the depôt in Mill Lane, Folkestone, to one of the houses in Fountain Street; the captain of the corps, Captain Kennicott, has thereupon arranged that the different detachments of the corps will avail themselves of the opportunity now afforded for the acquiring of carbine drill. From the favourable report given of the efficiency of the corps by the Inspector, Colonel Morris, an order has been received by Captain Kennicott from the Secretary of State for War that the smooth bore carbines served out to the corps will be exchanged for short rifle carbines on his requisition for such; this has given much satisfaction to the corps, as it will enable them to commence practice with ball cartridge, which they have not been enabled to accomplish with the smooth bore carbine.

12TH (DARTFORD) KENT RIFLES.—The members of this corps are just now placed in an awkward position. At a late inspection of the corps some dissatisfaction was expressed at its inefficiency, and this led to a requisition being signed by thirty-seven of the effective members, expressing their regret at the inefficiency and want of interest in the corps displayed by the officers, and the wish of the members to discuss, and if possible remove, the cause, and requesting the secretary to call a meeting of the committee to sanction a general meeting of the corps for the discussion of the matter. The secretary accordingly announced a meeting of the committee, when, after a warm discussion, the proposition for a general meeting was lost by the casting vote of the chairman. The effective members, however, feeling dissatisfied at this result, convened a meeting among themselves, which was accordingly held, and at which a determination was expressed not to remain any longer under their present officers. The result of the meeting has been that about fifty of the members have sent in their resignation, as also have the band. This result is the more to be regretted as the men had attained considerable proficiency in their drill.

WOOLWICH WORKING MEN'S RIFLES.—A public meeting is to be held at Woolwich to promote the formation of a working man's Volunteer corps. A number of members have already been obtained, and the uniform will consist of a Garibaldi blouse, black trousers, patent leather waist-belt and turban, the whole cost being fixed at 35*s*.

FAVERSHAM ARTILLERY.—The members of this corps are now busily employed in the construction of a new battery about four miles from the town, and which will afford protection for all points of the creek.

DOVER ARTILLERY.—The captain of the Dover Volunteer Artillery Corps has given directions for Mr. W. R. Mowll, one of the members of the corps, to be fined 5*s*. for insubordination, the circumstances under which the alleged infringement of military discipline took place being as follows:—It appears that a week or two since Mr. Mowll had a particular engagement at a certain hour on one of the compulsory drill evenings, and that prior to the muster he mentioned to his commanding officer that although he should be able to be present at the commencement, he should be obliged to leave before drill finished. It does not seem, from what can be gathered, that any objection was raised by Captain Wollarton at that time, but that on the evening in question, at the appointed hour, on Mr. Mowll applying for permission to retire, his application was refused, whereupon Mr. Mowll remarked that his engagement was so important that he must fulfil it any risk, and then left the drill-ground. For doing so he has been fined 5*s*., which, however, he declines to pay unless it is legally enforced.

LANCASHIRE.

ROCHDALE RIFLES.—The presentation of a bugle to this corps took place this day week at Belfield Hall, an ancient building near Rochdale. This corps has been brought into an efficient condition by Lieutenant Fishwick. Captain Fenton made it a point of duty to lead his men, who having been drawn up in front of the hall, in double line, with the band in their rear, Miss Phillippi, daughter of Mr. F. T. Phillippi, stepped from the Hall, and presented the bugle in a neat little address, in the course of which the young lady declared she thought one of the finest features of the volunteer movement was seeing men of all ranks standing shoulder to shoulder, impelled by a sense of duty, and a spirit similar to that which prevailed at Agincourt and Crecy, showing that the lion heart still exists. Captain Fenton acknowledged the gift, and at his call Bugler Scott stepped forward and blew a first blast. Mr. Phillippi and his father subsequently addressed the members of the corps, who were regaled with wine from the Belfield Hall cellars.

MIDDLESEX.

24TH (UXBRIDGE) MIDDLESEX RIFLES.—This corps met on Saturday last at Cowley House, the residence of the captain, to receive a set of drums and fifes presented to the corps at the cost of the Hon. Miss Georgina Irby, a descendant of the first Earl of Uxbridge, and sister of the present Lord Boston. The presentation was to have been made by Miss Irby in person, but to the great regret of all she was unavoidably absent, owing to the sudden death of a near relative. Mrs. Hilliard was deputed by Miss Irby to represent her, and in an appropriate address to the corps she presented the instruments, expressing the warm sympathy of the ladies generally in the movement, and Miss Irby's hope that the band might prove a source of enjoyment and encouragement in their loyal and patriotic undertaking. The meeting was also made the occasion of the distribution of prizes for which the members of the corps had contended on Thursday and Friday. Each man fired five rounds at the four ranges—150, 200, 250, and 300 yards. A challenge cup subscribed for by the corps was awarded to Private Rafferty, who made 32 points in the 20 rounds. Other prizes, given by the officers, were awarded to Nicholson, 28 points; Sherwin, 27 points; and W. Rayner, 26 points; two other men, Hallowes and Youens, made each 26 points, but in shooting off the tie Rayner won. Prizes were also awarded for the best score at each separate range. Murray made 8, at 300 yards; Phillips 9, at 250; Hallowes 9, at 200; and Corporal Woodbridge 9, at 150. The ladies of Uxbridge also gave two handsome cups for the greatest number of hits in the 20 rounds; these fell to the lot of Rafferty, 19 hits, and Youens, 18 hits. Nicholson tied Youens for the second ladies' prize, and nine other men made 17 hits each.

NOTTINGHAMSIHRE.

THE ROBIN HOOD VOLUNTEERS.—The first rifle contest has been held in this corps at the Nottingham rifle butts, in which the following Volunteers took part:—Eleven members of No. 1 company Robin Hood Rifles, two of No. 3 company, two of No. 4 company, ten of No. 5 company, four of No. 6 company, five of No. 7 company; also Lieutenant Philips, Stamford, and Corporal Goddard, 1st Leicestershire Rifles. Each member fired three rounds at 200, 250, and 300 yards. Subscription, 5*s*. each, which was divided into four prizes. Ties were shot off at 300 yards. Sergeant Simkins and Sergeant Henson made ties for the second prize. The following is the result:—Private Brownsword (No. 5 company), first prize, 15 points; Sergeant Simkins (No. 1 company), second prize, 12 points; Sergeant Henson (No. 7 company), third prize, 12 points; and Private Hedderley (No. 1 company), fourth prize, 11 points.

STAFFORDSHIRE.

12TH (BILSTON) STAFFORDSHIRE RIFLES.—This corps was on Tuesday afternoon presented with a standard, purchased for them by the ladies of Bilston. The ceremony took place in the drill-ground of the company, situated on the road to Willenhall, and was witnessed by a large number of ladies of Bilston, and several distinguished lay and clerical residents of the neighbourhood, as well as by a numerous concourse of the general public. The fair subscribers had gracefully selected Mrs. Bagnall, the wife of the captain of the company, to make the presentation. About fifty of the company mustered at two o'clock in the police yard, and proceeded thence to the place of presentation, under the command of their captain, and headed by the band. Captain Bagnall having received the standard, proceeded with it to the Rev. H. S. Fletcher, the Vicar of Bilston, who was upon the ground in his surplice. The reverend vicar then read the usual service of consecration. The prayers offered contained the following passage:—"We implore thy blessing on the standard which is presented this day by the beloved consort of Captain

Digitized by Google

Bagnall to the 12th corps of Staffordshire Volunteer Rifles, and with all lowliness of mind and humility of spirit we now consecrate it in Thy holy name to the cause of peace and happiness, truth and justice, religion and piety." The band then played the National Air, during which the colours were unfurled—the bugle horn surmounted by the Royal crown, and in its centre the Staffordshire knot, all in different colours, embroidered in silk on both sides, upon a green silk ground. A small Union Jack was in the staff corner of the standard, with the numerals XII. upon it, and "Staffordshire and Bilston Rifle Volunteers," was worked in the embroidery, which represented a ribbon, beneath the design. The standard cost about 22*l*. After firing several volleys with creditable regularity, and going through other evolutions, the Volunteers marched back into the town, and the company dispersed.

SUFFOLK.

13TH SUFFOLK RIFLES.—Having received from Captain Phillips an invitation to his residence at Barton, upwards of 100 members of the corps, including the officers, assembled at the Militia Barracks at twelve o'clock, and marched, preceded by the militia band, through the town, and out by the east gate. Arrived at Barton, the body halted on the lawn, and after giving the general salute, went through the marching past in quick time, manual and platoon exercise, and other drill. After this the whole piled arms, seated themselves on the ground in squads, and were speedily supplied by their non-commissioned officers with welcome refreshments, in the shape of meat pies and porter, which Captain Phillips had hospitably prepared for them, and conveyed to a marquee on the spot. The services of the commissariat having been thus well performed and greatly enjoyed, the corps, when all had been sufficiently rested, and some had tried their strength at jumping, racing, &c., again fell in, and were put by Captain M'Gregor, of the West Suffolk Militia, through a variety of manœuvres, for some of which, such as extending and skirmishing, the extent of the ground gave peculiar facilities. After some capital practice in light infantry drill and snapping caps the men were drawn up in column in front of the house, and Captain Wilson expressed on their behalf their hearty thanks to Captain Phillips for the pleasure they had received that afternoon through his kindnesss and hospitality. He also announced to them the handsome offer made by Lieutenant Partridge, of prizes to the amount of 10*l*. for ball practice, to be given in the following manner, viz.:—3*l*. and 2*l*, respectively, to the two Volunteers in each company who in the course of the target practice about to commence, shall make the greatest and next greatest aggregate number of points in their respective companies, provided that the shooting of each entitles him to be placed in the first class, the shooting to be with long Enfields, according to the Hythe rules, and to be open to all ranks; the ties to be shot off as decided by the commanding officer, to whom all questions must be referred for final decision. The 13th, before leaving Barton, gave three cheers for Captain Phillips, Captain Wilson, Lieutenant Partridge, and Captain M'Gregor, after which they set off for their homeward march, and arrived at the barracks about seven o'clock, where, before depositing their arms, Captain Phillips told them it had given him much pleasure to receive them at his residence, and he hoped they might enjoy many such afternoons. It is expected that the shooting butt will be completed in about three weeks, when ball practice in sections, according to the Government regulations, will at once commence.

SURREY.

5TH (REIGATE) SURREY RIFLES.—A very interesting match took place at Reigate on Friday week, between several members of this corps, who competed for prizes given by the Hon. W. Monson, M.P., the captain of the regiment, and other prizes. The prizes given by Captain Monson were a very handsome rifle, a silver cup, and a field-glass, and these were to be given to the three best shots, five rounds each, at 200 and 300 yards each. F. Blackstone won the rifle, making 14 points; F. Hughes, the cup, making 11 points; and R. Killick, the field-glass, making 9 points. The two best shots then competed for the blue ribbon of the day, namely, a purse containing twenty guineas, made and subscribed by the ladies of Reigate, five rounds at 500 yards. This was carried off by Sergeant Nicholls, who made five points. A great many of the inhabitants, among whom were a number of ladies, were present at the trial of skill, and the proceedings appeared to create very general interest.

Result of a competition for a challenge silver bugle between the companies of the 1st Gloucestershire (City of Bristol) Rifle Corps, September 26th and 27th, 1860; each company being represented by 1 officer, 1 sergeant, and 2 men, firing 20 rounds, in the third class; and 10 in file, 10 in volleys, and 10 skirmishing. Won by No. 3 company, whose figure of merit was 62·50.

Company.	3rd Class.	File.	Volley.	Skirmish.	Figure of Merit.
No. 3	26·75	15·75	11·00	9·00	62·50
No. 10	29·50	13·50	9·00	7·00	59·00
No. 4	25·75	12·00	6·75	9·50	54·00
No. 9	22·75	13·75	8·25	7·00	51·75
No. 6	21·00	10·00	12·75	7·75	51·50
No. 7	22·25	12·25	7·50	8·75	50·75
No. 1	21·50	11·50	8·25	8·50	49·75
No. 8	21·25	10·00	6·75	9·00	47·00
No. 5	17·75	11·25	6·00	4·00	39·00
No. 2*					
Averages	23·16	12·22	8·47	7·85	51·69

It will be seen by this return that in the 3rd class No. 10 company made each time the unprecedented average of 29·50. In skirmishing No. 4 company showed a pair of targets averaging 9·50 points per man; No. 8 company showing a single target which averaged 12·50 per man. This we believe has never been exceeded. The practices were conducted strictly in accordance with the Hythe regulations, under the superintendence of Captain M'Leod, 12th Regiment, who had kindly consented to act as umpire.

* Left blank in consequence of the absence of the officer.

A meeting of gentlemen interested in the formation of a Mounted Volunteer Corps for the west end of London was held on Tuesday at Willis's Rooms, Major J. F. Richardson, C.B., of the 8th Bengal Irregular Cavalry, in the chair. Among those present were Colonel Seymour, Messrs. Bowen May, E. Tattersall, W. Boyle, J. M. Garrard, Dymoke Green, &c. Letters were read from Colonel Douglas, Adjutant-General of Cavalry, regretting his inability to join the London Light Horse, as he held a commission in a Volunteer corps in his own county, but stating that he should recommend the corps to his friends; from Captain Wedderburn; and from Captain Alexander, Bengal Irregulars, offering to assist in the organisation of the corps in any way in his power. The chairman having read the minutes of the last meeting, said that the immediate object of the present was to decide upon the uniform to be adopted. He did not consider that at present it would be necessary to have a full dress, as it would be found to be very expensive, and he wished to accommodate the outlay required to the means of the poorest man among them. He would suggest, therefore, that the corps should first be organised, and then the question of the full dress could be decided. In answer to questions the chairman said that the arms proposed were swords and pistols, but that he thought that it would be advisable, perhaps, to have a few lances and carbines distributed among the non-commissioned officers of the regiment; the horses were to be from fifteen to sixteen hands high; hunting saddles were to be used, with wallets and straps, and the bridles of Nolan's pattern, with silver-plated buckles. It was then agreed that the uniform should consist of a loose blue jacket, with blue velvet facings and silver cord embroidery, pantaloon breeches of white Melton cloth, Napoleon riding boots of patent leather, plated hunting spurs, a blue forage cap with silver band and crown ornament, and without peak; and that the sword should be the light cavalry sword with scroll hilt, and the belts and pouch of Russia leather, with silver-plated ornaments. It was also agreed that the subscription should be for effectives two guineas per annum and one guinea entrance, and that honorary members should subscribe one guinea per annum, a donation of 10 guineas to constitute a life member. Thirty-six gentlemen have already enrolled themselves, and nearly 100 more have promised to join, and it was agreed to communicate with the Lord-Lieutenant (the Marquis of Salisbury) forthwith, offering their services to Her Majesty. A vote of thanks to the chairman concluded the proceedings.

HERTFORDSHIRE.—The volunteers of Hertfordshire have been invited by Lady Marian Alford to compete for prizes for rifle shooting at Ashridge Park, Berkhampstead. Her ladyship will afterwards entertain the Volunteers at a banquet, to be provided by Mr. Strange, of the Crystal Palace.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, OCTOBER 9.

1st Midlothian Coast Artillery Volunteers—Captain William Elliott, half-pay Royal Artillery, to be Adjutant.

16th Company of Cheshire Rifle Volunteers—Joseph St. John Yates, Gent., to be Ensign, vice Henry Sidney Armitstead, resigned. 25th Company—Joseph Compton, jun., Gent., to be Lieutenant, vice Ashton Marler Gardiner, resigned; Thomas Milne, Gent., to be Ensign, vice Robert Kershaw Gardiner, resigned. 32d Company—William Vigor Fox, Esq., to be Captain; Charles Frederick Bennett, M.D., to be Lieutenant; Thomas Draper, Gent., to be Ensign; William Brigham, Gent., to be Honorary Assistant-Surgeon.

11th Norfolk Rifle Volunteer Corps—James John Wynniatt, Esq., to be Lieutenant, vice Hollway, promoted; Hugh Robert Rump, Gent., to be Honorary Assistant-Surgeon; Randle Barwick Brereton, Clerk, to be Honory Chaplain.

West Essex Yeomanry Cavalry—Thomas Duff Cater, Gent., to be Lieutenant.

Leith Rifle Volunteer Corps—James Pringle to be Captain; John Hutchison to be Lieutenant; William Scott to be Ensign; John Henderson to be Assistant-Surgeon.

2d Company of Dorsetshire Artillery Volunteers—Uriah Perrin Brodribb, Esq., M.D., to be Honorary Assistant-Surgeon.

7th Company of Dorsetshire Rifle Volunteers—The Rev. Edward Harston, Clerk, M.A., to be Honorary Chaplain; William Henry Williams, Esq., M.D., to be Honorary Assistant-Surgeon.

3d Manchester or 40th Lancashire Rifle Volunteer Corps—Charles Durham, Gent., to be Ensign.

Memorandum—Her Majesty has been graciously pleased to accept the resignations of the commissions held by Captain Robert Munn, in the 4th Lancashire Rifle Volunteer Corps, and of Supernumerary Lieutenant Frank Harding Jewsbury, and Ensign Joseph Stephen Blair, in the 33d Lancashire Rifle Volunteer Corps.

7th Fife Artillery Volunteers—John Erskine Douglas Stewart, Esq., to be Second Lieutenant.

4th Fife Artillery Volunteers—Robert Bartholomew, M.D., to be Assistant-Surgeon.

4th Fife Mounted Rifle Volunteers—James Stenhouse, jun., Gent., to be Ensign.

9th Fife Artillery Volunteers—William John Normand, Esq., to be Captain; James Pye, Gent., to be First Lieutenant; Thomas M'Laren, Gent., to be Second Lieutenant.

1st Battalion Fife Rifle Volunteers—Sir Thomas Erskine, Bart., to be Lieutenant-Colonel.

The following appointment is substituted for that which appeared in the *Gazette* of the 2d of October inst.:—

8th Company of Leicestershire Rifle Volunteers—Percy Dicken, Esq., M.D., to be Honorary Assistant-Surgeon.

WAR OFFICE, PALL MALL, OCTOBER 12.

City of Edinburgh Rifle Volunteer Corps—William Hills, late Serjeant-Major, of the School of Musketry, Hythe, to be Adjutant.

1st Gloucestershire Artillery Volunteer Corps—William Mc Adam, Gent., to be Adjutant, from the 15th May, 1860.

3rd Battalion of Staffordshire Rifle Volunteers, 15th Company—The Reverend Samuel Franklin, Clerk, to be Honorary Chaplain.

5th Sussex Rifle Volunteer Corps—Granville Wells to be Lieutenant, vice Ramsden, resigned.

1st Gloucestershire Artillery Volunteer Corps—Adjutant William McAdam, to serve with the rank of Captain.

Worcestershire Rifle Volunteers—13th Company—The Reverend Robert Sarjeant to be Honorary Chaplain.

7th Durham Rifle Volunteers—William Robson, Gent., to be Ensign, vice Smales, deceased.

15th Durham Rifle Volunteers—George John Scurfield, Esq., to be Captain.

18th Devon Rifle Volunteers—Lewis Powell Madden to be Captain; Richard Hodges to be Lieutenant, vice Madden, promoted.

6th Devon Rifle Volunteers—Edward Bourchier Savile to be Captain-Commandant; John May Miller to be Captain; Richard Davie Gould to be Lieutenant; James Newman Woolmer to be Lieutenant; Henry Gribble to be Ensign; John Lovering Cotton to be Ensign.

2nd Devon Artillery Volunteers—John George Galloway Radford to be First Lieutenant, vice Ede, resigned.

1st Devon Administrative Brigade Artillery Volunteers—Edward Vivian to be Major.

3rd Devon Artillery Volunteers—William Henry Kingdon to be Second Lieutenant.

11th Devon Artillery Volunteers—William Pollard Murche to be Second Lieutenant.

1st Monmouthshire Artillery Volunteer Corps—Charles Lyne, Esq., to be Captain; John Phillpotts, Esq., to be Captain; James Brown, Gent., to be First Lieutenant; William Clark, Gent., to be First Lieutenant; William West, Gent., to be Second Lieutenant; James Henshaw Davis, Gent., to be Second Lieutenant.

Memorandum—Her Majesty has been pleased to approve of Captain Lyne bearing the title of Captain-Commandant.

1st Middlesex Artillery Volunteer Corps—John Samuel Erlam, Esq., to be Captain; Charles Wyndam, Gent., to be First Lieutenant; Charles Augustus Hanley, Gent., to be Second Lieutenant.

Memorandum—The Queen has been pleased to approve of Captain McGregor Croft bearing the title of Captain-Commandant in this Corps.

19th Middlesex Rifle Volunteer Corps—William Pollard Pattison, Gent., to be Ensign.

35th Middlesex Rifle Volunteer Corps—Edward Setchworth, Esq., to be Captain, vice Somerset, resigned.

39th Middlesex Rifle Volunteer Corps—William Blankley, Esq., to be Captain; Ensign John Milne to be Lieutenant; Henry Thomas Turney, Gent., to be Lieutenant; Thomas Cotter Gash, Gent., to be Ensign; William George Margetts, Gent., to be Ensign; Robert Rolfe, Gent., to be Ensign.

10th Lanarkshire Artillery Volunteer Corps—Ninian Bannatyne Stewart, Gent., to be First Lieutenant, vice Robert Lyall, resigned.

1st Lanarkshire Rifle Volunteer Corps—Captain Charles Hutchison Smith, to be Major, vice James Robertson, resigned.

19th Lanarkshire Rifle Volunteer Corps—In this Corps are now incorporated the 23rd, 24th, 28th, 36th, 41st, 51st, 67th, 74th, 80th, 81st, 83rd, 85th, 89th, and 91st Lanarkshire Rifle Volunteer Corps, the whole forming a Regiment of two Battalions; Major-General Duncan Alexander Cameron, C.B., Commanding the forces in Scotland, to be Honorary Colonel; David MacBrayne, Esq., to be Major; Frederick McCall, Gent., to be Supernumerary Lieutenant; Michael Jamieson, Gent., to be Supernumerary Lieutenant.

94th Lanarkshire Rifle Volunteer Corps (Douglas)—Thomas Rennie Scott, Esq., to be Captain; James Gillespie, Gent., to be Lieutenant; Archibald Dunlop Scott, Gent., to be Ensign.

11th Forfarshire Rifle Volunteer Corps—James Richard Haigh, Esq., to be Captain; David Balfour Ogilvy, Esq, to be Lieutenant.

1st Lancashire Engineer Volunteer Corps—James Newlands, Esq., to be Captain Commandant; James Alanson Picton, Esq., to be Captain; Christopher Obee Ellison, Esq., to be Captain; Arthur Forrester Orridge, Gent., to be First Lieutenant; Walter Devereux Whitty, Gent., to be First Lieutenant; John Evans, Gent., to be First Lieutenant; George Enoch Grayson, Gent., to be Second Lieutenant; Thomas Haigh the younger, Gent., to be Second Lieutenant; Charles Henry Beloe, Gent., to be Second Lieutenant.

3rd Battalion of Lancashire Rifle Volunteers—Robert Munn the younger, Esq., to be Major.

1st Lancashire Rifle Volunteer Corps—Edward Harpur, Gent., to be Ensign.

56th Lancashire Rifle Volunteer Corps—Robert Haukinson Cox, Esq., to be Captain.

77th Lancashire Rifle Volunteer Corps—John Knight, Esq., to be Captain; James Hallows, Gent., to be Lieutenant; Reginald Young, Gent., to be Ensign.

Memorandum—Her Majesty has been graciously pleased to accept the resignations of the Commissions held by First Lieutenant Robert McConnell in the 15th Lancashire Artillery Volunteer Corps, and of Lieutenant Samuel Blain Greenshields in the 19th Lancashire Rifle Volunteer Corps.

Memorandum—The 38th Corps (3rd Battalion) of the Kent Rifle Volunteers has been disbanded.

THE SALUTE TO VOLUNTEER OFFICERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The recent order that Volunteer officers shall be saluted by the regulars, naturally suggests the inquiry, Have the authorities power to compel Volunteer non-commissioned officers and privates—1st, to dress so as not to be mistaken for officers; 2nd, to salute the officers of the regulars?

To judge by appearances Volunteers are, in the matter of dress at all events, remarkably independent of control. One sees privates wearing long swords; sergeants, in defiance of Her Majesty's regulations, sporting gold lace chevrons; and an attempt is even being made—for the special edification, it must be presumed, of the uninitiated in general and servant-maids in particular—to introduce the wearing of prize-shooting medals on the left breast.

As long as the relation between the regulars and Volunteers was left, as it were, to find its own level, these vagaries of an exuberant patriotism might have been of little real importance; but the saluting order has raised questions which it may be difficult to answer, and may possibly lead to complications which had better, on all accounts, have been avoided.—Yours, &c. LET WELL ALONE.

THE VOLUNTEER MOVEMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Modesty and merit generally go together, and it may well be doubted whether a gentleman who advertises himself, day after day "as the well-known originator of the Volunteer Movement," does not *ipso facto* dispose of his own claims to that distinction. Still, persistent puffery does sometimes, to a certain extent, and with a certain class of persons, attain its objects; and it seems time that attention should be called to the circumstance, that the pretensions set up by Mr. Hans Busk are by no means justified by the facts of the case. On the contrary, it ought to be, if it is not, "well known" that long before Mr. Busk commenced the task of enlightening his fellow-countrymen on the benefit of Volunteering, the construction of rifles, and the art of war, various attempts had been made to get permission to start Rifle Corps.

To mention one instance: in 1854, Mr. Evelyn of Wotton (then one of the county members), in conjunction with Mr. M. F. Tupper, and the writer, were actively engaged in getting up a Rifle Corps, and had in fact purchased a number of rifles, when the scheme was promptly nipped in the bud by the Government of the day. With the getting up of the only two corps authorised at that time—the South Devon and the Victoria Rifles, Mr. Busk had nothing whatever to do.—I am, &c., ONE WHO KNOWS.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, MR. ARCHIBALD GRAHAM, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, OCTOBER 13, 1860.

If the article on "Our National Defences" in the last number of the *Westminster Review* was really written by Sir John Burgoyne, to whom it is generally attributed, it affords a curious study, both with reference to the line it takes, and the tone in which it is written. It begins with a series of remarks as to the freedom with which a strictly professional question has been discussed, especially by civilians "who know nothing about it;" and it might be described as a sermon to enforce the text, "There is after all nothing like leather." But the civilians have no sooner been thus put down for differing with the military, than the writer is obliged to take notice of the notorious differences of opinion which exist among the military themselves. In fact, we will venture to repeat, that the great differences of opinion are really traceable to the military, and not to civilians at all. When Lord Overstone said that the occupation of London "must never be," he did not presume to go into the question how it should be defended, and he only, after all, answered the questions put to him by the Naval and Military Commissions appointed by Her Majesty's Ministers. Moreover, the only specific view which may claim a distinctive civilian parentage is perhaps that of Mr. Fergusson as to the "perils of Portsmouth," which he agitated for so many years, while the military in office—including even "the Engineers"—seemed to be asleep; and this view of all others is that which has at last received the fullest share of attention both by the Royal Commissioners and the writer of the article in the *Westminster*.

But these differences of opinion among the military—which are very natural, and which, in our opinion, ought to be of the greatest use to those in authority, who must finally decide upon what the security of the nation is ultimately to rest—are regarded with great disfavour in the *Westminster Review*, especially as tending to distract the military authorities in deciding what should be done. Yet they are as nothing to the differences of opinion between Sir John Burgoyne and himself—if he be really the writer of the article,—differences, too, which have all been enunciated by him publicly within a very short period. Now, if the *tot homines quot sententiæ* is a source of difficulty to the authorities, how completely must they feel distracted if one of their principal advisers changes his opinions every few months!

We all remember Sir John's article in the *Cornhill Magazine* on "Our Volunteers," which contained opinions he shortly afterwards had to alter, and very frankly modified, and which we now find have faded away into very small points indeed in the article in the *Westminster Review*. In that article he defends the extensive fortifications to landward around Portsmouth; while his evidence before the Royal Commissioners as to the impossibility of holding the Portsdown lines with less than an army of 20,000 men, is still fresh in our recollection. If, then, this article is indeed written by him, it is to be regretted that he did not put his name openly to it, and explain upon what grounds his views have so materially changed. When doctors disagree it is at least of the greatest consequence that people should know who speaks, if we must be content with the *argumentum ad verecundiam* in lieu of logic. But if this be not a question for the general public and civilians, as well as for military men, let us ask, What has the *Cornhill Magazine*, or the *Westminster Review* to do with it?

We must pursue our criticism of the article on "Our National Defences," irrespective, then, of its reputed author, who, probably after all, will turn out to be a late Royal Commissioner who has somewhat changed his opinion as to the proper number of our regular troops. In every other respect it agrees with the Commissioners' Report, and that was certainly not in accordance with the evidence of Sir J. Burgoyne. The article advocates a greatly-increased army in the field as the sole feasible defence for the metropolis—meaning by that also, that to defend London is really to defend the kingdom. In this conclusion it will be observed that the writer, Lord Overstone, Colonel Jebb, Captain Fowke, and, perhaps, all civilians and military men are agreed. He, however, differs from the officers we have named as to the practicability of fortifying London; and is against the Shooter's Hill and Sydenham range of forts, as well as against preparations for defending the chalk ridge further off from the metropolis. He is, however, in favour of a thoroughly organised scheme for manœuvring the army that must defend London, by means of our network of railways and telegraphs, taking advantage of the natural conformation of the country, and extemporising earthworks, &c., against an advancing enemy; which is also advocated most strongly in an article on "England's Future Bulwarks," in the *Cornhill Magazine* for October. The army in the field, he thinks, ought to consist of at least 200,000 "good troops," in order to be able to resist the French, whom he supposes could land in very great force; "every fishing-boat being available" for carrying troops; and this motley fleet of transports he imagines are to run backwards and forwards for more, rather as if they had to cross the Thames at Battersea than the Channel at Dover. Two-thirds of these troops should be regular, and one-third, or perhaps a-half, militia. The Volunteers are at this point ignored! Mounted yeomanry or Volunteer artillery he also thinks would be scarcely worth their cost; but the pensioners—notwithstanding certain very well-known disqualifications for steadiness and sobriety of conduct—would be available probably within fortifications. The regulars therefore must be not less than 120,000 ("150,000 would be far better"), of whom 80,000 or 90,000 could take the field, and these numbers would secure us.

This increase of the Army is advocated notwithstanding the expense, which is so far in opposition to the Report of the Royal Commissioners; and the argument recently put forward by the *Times* on the other side is apparently intended to be answered, and probably is, satisfactorily. The writer justly says, that whatever may be the great aggregate expense of the Army, the pay of the officers and men is certainly small; and "this fact is put forward as an argument for an increase to the regular Army, because an addition to the *personnel* of the forces by no means carries with it a proportionate increase to the great aggregate of the military expenditure." The *Times*, it may be remembered, assumed that to double the *personnel* would double the army estimates.

The writer in the *Westminster Review* also says:—"The great Volunteer movement affords a new source of strength of a most promising nature." He repeats what has been frequently urged in this journal, that irregulars—meaning by that troops wanting in organisation—must always, *pro tanto*, be inferior to regular troops, and unable to cope with them. He does not notice, however, how steadily the Volunteers have been giving themselves to drill, which Sir John Burgoyne publicly noticed shortly after his first unfavourable opinion was expressed regarding them. He goes on to say that the most "serious defect in the Volunteers will be in the qualities of their officers and non-commissioned officers:" and this is doubtless a point well worthy of consideration. Many of the internecine squabbles among the Volunteers would have been impossible, if all the officers had been chosen from among gentlemen regularly trained as soldiers; and it was probably to this having been the general rule in the "Devil's own," that the great efficiency they have attained is to be attributed.

But of that hereafter. A good deal more requires to be said with reference to the Volunteer movement as it now developes itself.

The language used in another part of the paper with regard to the Volunteer corps is a little peculiar. It is said that they "are provokingly near being a most effective force." Why, "provokingly;" unless their offence is to have belied some off-hand under-estimates of their capabilities, put forth by certain eminent professional writers? "They could not leave their businesses and ordinary occupations, except when the crisis arrived." Government clerks, again, "would more injure than serve their country by leaving their desks to ramble over the country in search of a foe." Then it is said, "A force of essentially local Volunteers, raised in the immediate neighbourhood of our ports, and not to be removed from thence, has not yet been organised." We cannot agree with any of these "facts" or inferences. We apprehend every Volunteer corps is essentially local, and intended for local defence; and we are not aware that the neighbourhoods of our ports are behind any other districts throughout the country. The Government clerks, too, in London, would be like the other metropolitan corps, especially for the defence of London, and are not intended to go rambling over the country. And, although the writer pleads a little for "routine," we cannot imagine he would venture to say, that if an enemy was on the march for London, the Civil Service corps—which is a credit to themselves and their officers—had better, or indeed could possibly sit quietly, with their pens in their hands, instead of taking up their rifles! The Volunteers are doubtless intended as a last corps of reserve (for what is "the army in the field" of regulars and militia to be about?); but depend upon it, if a hostile foot ever touches our soil, and our reserves are called out, it will have become rather desperate work, and there will then at least be no question whether a man should be wielding his pen or yard-stick, or his rifle and sword.

The only other point in the article relates to the relative advantages of iron vessels, and ordinary fortifications, for attack and defence. It scarcely does justice, however, to the employment of iron vessels for defensive purposes, which ought at least to be equal to the same vessels brought against us; but it bears a striking testimony to the great importance of iron, as the necessary antidote to rifled ordnance, in the following words:—"There is little doubt that iron *revêtements* will eventually be provided for all the more vulnerable parts of a battery." This view, it will also be found, has been thrown out in the article already referred to in the last *Cornhill Magazine*. The *Times* has also now come to the conclusion that the days of wooden ships are numbered, and that iron-plated vessels must take their place. There is great consolation in knowing—whether the writer be Sir John Burgoyne or not—that the difficulties of coming up the Thames are shown to be so very great, and the means of defence so many and effective, that perhaps after all it may be safe to leave Woolwich where it is. But if not, we beg to ask, as we have asked before, what then is to become of the metropolis? We may spend millions upon fortifications, and millions upon iron-plated vessels; but if, after doing so, London may yet be taken, all this money will only be wasted; and we must add that if the organisation of our army in the field, in co-operation with our fleet and floating batteries, is not such as may be relied on to prevent a landing, it would be better and safer far to lay out all our money on fortifications

Digitized by Google

that will secure the capital. If we are partly to rely on ships, with an anticipation that they may be out of the way; partly on fortifications, which will leave hundreds of miles where thousands of soldiers can land without difficulty; and partly on an army in the field, not thoroughly organised, and not large enough for its work, we shall certainly remain in danger. Such a mixture of incomplete systems will be our ruin if invasion should be attempted, while it is the most ruinous now on the score of expense alone.

We have received of late numerous letters from naval officers complaining of the scheme of retirement which the present Board of Admiralty has carried into effect. The captains on the reserved list, to which they were promoted in 1851, appear to feel that they have been particularly hardly dealt with. This list consists of officers who served long and well, not only during the war, but subsequently, and whose advancement in the Service was retarded when political interest had more weight at the Admiralty than professional attainments. One of our correspondents says: "At least two-thirds of these officers were by their services justly entitled to their rank on the active list, but only accepted the offer to be placed on the reserved list in good feeling to the Service, that younger men might advance." Surely it would be worth while to reconsider the position of these officers, and to allow them to advance in seniority and in pay in the same manner as if they were on the active list. The cost to the country would be trifling, and the satisfaction which it would afford to the veterans, whose best days were devoted to its cause, would be an ample reward for the requisite disbursement.

Vice-Admiral Sir Houston Stewart, K.C.B., has been officially appointed to the command at Devonport, vacant by the resignation of Vice-Admiral Sir Arthur Fanshawe, K.C.B. Sir Houston Stewart is a very able and popular officer, and we have no doubt he will most efficiently discharge the responsible duties of Commander-in-Chief of one of the most important naval arsenals, though, as we said before, there will be some dissatisfaction on account of his good fortune.

We have reason to believe that Vice-Admiral Sir Charles Fremantle will resign the command of the Channel Squadron, and pending the appointment of his successor, Rear-Admiral Erskine will have charge of the port division, and Rear-Admiral R. F. Stopford the starboard division of the fleet.

A vacancy of an important character has just occurred at the steam branch of the Admiralty, in consequence of the death of Mr. Robert Hughes, Assistant-Engineer-in-Chief of the Navy. It is to be hoped that the Duke of Somerset will, in the present contemplated "reconstruction" of the Royal Navy, take care that the right man be selected to succeed the deceased gentleman.

The Channel Squadron is at present divided into two divisions. The starboard is still under the command of Vice-Admiral Sir Charles Fremantle at Devonport, and consists of the following ships: Royal Albert, 121; Donegal, 101; Aboukir, 90; Conqueror, 101; Centurion, 80. The Port division at Portsmouth, under the command of Rear-Admiral Erskine, is composed of the subjoined: Edgar, 91; Trafalgar, 90; Algiers, 91; Diadem, 32; Mersey, 40.

During the week a series of very interesting and successful experiments have been carried out, under the authority of the Government, at Plymouth, of Professor Way's electric light. We understand that the Right Honourable the Secretary for War and Earl de Grey had some short time since an opportunity of observing the simple manner in which this apparatus could be manipulated; Mr. Herbert ordered a staff of scientific officers to examine into its merits, and it is expected the report will be satisfactory.

There is a great man who has landed on the shores of England so gently that the land has not been conscious of the presence of one of her most distinguished soldiers and statesmen. We regret deeply to hear that the cause which led to General Sir James Outram's retirement from the Council Board at Calcutta still exists, to such an extent as to prevent his receiving the marks of public respect and private homage and affection which the distinguished services and the personal character of "the modern Bayard" have richly earned. We only give expression to the feelings of all who know either the man or his services, when we venture to say we hope the day will soon come when Sir James Outram will be restored to the full possession of his strength, and that he may enjoy for many years the honours he has won, in a field where honour is indeed hardly won.

The colonelcy of the 1st Battalion, Rifle Brigade is vacant by the death of Lieutenant-General Sir Harry Smith. Although his name is not exactly next on the list, Major-General John Cox will in all probability be the successor of Sir Harry. General Cox served from the beginning to the end of the Peninsular War with the regiment, then the "old 95th," and we doubt not that the wholesome principle of appointing officers to the command of regiments with which they have been honourably associated, and which was well exemplified in the recent appointments of Sir John Inglis to the 32nd, and Sir James Scarlett to the 5th Dragoon Guards, will not be departed from in this instance.

The following Army promotions will take place consequent upon the death of Lieut.-General Sir Harry Smith:—Major-General John Scott, Colonel of the 3rd Dragoon Guards, to be Lieut.-General; Colonel Frederick Horn, C.B., half-pay, 20th Regiment, commanding a Brigade at Malta, to be Major-General; Lieut.-Colonel F. G. Urquhart, 1st Royals, to be Colonel, and Major Dennis, 76th Regiment, to be Lieut.-Colonel.

As we led our readers to anticipate in our impression of the 22nd ult., Major-General Orlando Jones was last night gazetted to the colonelcy of the 73rd Regiment, vacant by the death of Sir Michael Creagh.

A contemporary had a statement last week to the effect that the 7th Dragoon Guards, 1st Royal Dragoons, Scots Greys, and Inniskilling Dragoons were about to be made Lancer regiments. As credulity upon subjects of the kind has reached a very high point, it may be advisable that we should say there is not the slightest foundation for the paragraph in question.

It is no disparagement to the majority of the military members of the House to say that their party feelings, strong prejudices, or personal incapacity, often deprive the Service of the force which it would gain if its representatives in the House were less eager as politicians, and more capable as men of business and speakers. Independently of any sympathy in his views, we regretted when Captain Vivian lost his seat, because an earnest man, who could express his thoughts in good English on military matters, and who knew something about them, and took interest in them, was for the time lost to the House. Except on the occasion of a "row," when there is a babel of tongues after the Estimates have been discussed, and when the Senior and Junior, and the Army and Navy, contribute their full quota of belligerents, we have rarely any discussion raised by military members on questions deeply affecting the profession, and, *à fortiori*, very deeply affecting the country. We do not now allude to veterans of rank, like Sir De Lacy Evans, who, in their wider political sympathies, never lose sight of the interests of the Service, or of what they conceive those interests to be—but to the younger members. We are, therefore, very much gratified to learn that Captain Edward Walter has presented himself to the electors of Reading as a candidate for the seat which was, it would be supposed, intended to be handed over, like an easy chair, from the late member to his relation. Captain Walter has shown his zeal for the Service by the interest he has taken in the maimed soldiers, who, mainly by his trouble, energy, and admirable management, have been enabled to earn their bread, and to perform very useful services to the public of London. Actuated solely by his desire to do good to his unfortunate comrades, Captain Walter has devoted much of his time to the formation and management of the Corps of Commissionaires, and that single work, accomplished as it has been, is a guarantee for the faithful performance of any duty he may seek to discharge. We do not deal with any politics, save those of the two Services, but we heartily wish Captain Walter success; and we are certain the electors of Reading, and the House of Commons, will have no reason to regret the result, if our wishes are gratified, at the same time that the interests of the Army will have gained an independent and intelligent advocate.

GENERAL GASCOIGNE.

The General Commanding the Forces in Ireland, Sir George Brown, in a very complimentary Order has marked his sense of the zeal and ability with which the Dublin division has been commanded by General Gascoigne, and as we can add nothing to the force of the testimony, or to the strength of the language, we reproduce the Order in question, with the simple remark, that we are satisfied the eulogy was as well deserved as it is heartily bestowed, and that the "just and judicious commander" will scarcely be less regretted than the "valued friend," in the garrison which has been deprived, by promotion, of General Gascoigne's firm hand and kindly heart.

"Adjutant-General's Office, Dublin,
"1st October, 1860.

"General Order.—Lieutenant-General Gascoigne having on this day relinquished the command of the Dublin division on promotion, the General Commanding the Forces in Ireland feels himself called upon thus publicly to record his sense of the admirable manner in which the lieutenant-general has fulfilled the important duties with which he has been entrusted during the last three years and a half.

"The proper control of, and the maintenance of discipline in a force averaging seventeen thousand men, has necessarily required a constant attention and sacrifice of leisure on the part of the officer commanding it; a sacrifice and devotion to duty which is not always sufficiently appreciated.

"Lieutenant-General Gascoigne has not only ruled wisely and well, but with such tact and kindliness, that Sir George Brown feels convinced that all those who have served in the Dublin division will feel with him, that they are losing a valued friend, as well as a just and judicious commander.

"By order of the General Commanding the Forces in Ireland. "J. S. Brownrigg, D.A.G."

The gallant officer was entertained by the Commander-in-Chief ere he departed, but it was not by any means the only banquet which was given to do him honour ere he left the country in which he made and keeps so many friends.

JAMES'S POWDER.

It would appear that our estimate of the value of the honourable and learned Member for Marylebone's evidence as to the battle of Santa Maria, and of his own importance and share in the struggle, was not by any means infelicitous. The special correspondent of the *Daily Telegraph*, who seems to have had a little more nerve and a larger experience of the vicissitudes of fight than Mr. Edwin James, thus alludes to the extraordinary correspondence and eccentric behaviour of the great unaccredited ambassador of the English people to Garibaldi, who has returned at least with the credit of Horace, if not with any other reputation, from the unpleasant neighbourhood of Neapolitan cavalry and war's alarms, to deliver his poor prisoners at Brighton, who ought to pray to Santa Maria di Capua at every revolution of their mill; and we prolong the quotation inasmuch as at the conclusion it denounces with painful truth the miserable filibusterism which has neither the merit of courage, nationality, patriotism, or devotion, and which is bringing the name of some of our countrymen into contempt. It were better even to fight as hardly as the Irish Brigade—to have at least 3 killed and a doubtful 10 wounded out of 600, under a "dreadful fire" in a "treacherous attack," than to exhibit the eccentricity of swash-buckler delirium tremens in the Toledo. It may not be out of place to remark for Mr. Edwin James's instruction, that without acting the part of frightened Fouquier Joinvilles and running away to denounce run-away soldiers, the correspondents of the press, whom he set out to supersede, have remained in the front, where, indeed, a valued friend of ours is a General, commanding a brigade of Garabaldi's most forward division. Another, M. Arrivabene, has died in the cause of the country he loved so well, and for which he fought with sword and pen, alike fearlessly and nobly. Listen to our friend:—

Naples, Oct. 5th.

I open this to say that we in Naples have just received the *Times* of September 29, in which we find a letter, which, if I had met with it in another paper, I should have considered as a hoax. It is said to be from the pen of Mr. Edwin James, and is dated Santa Maria, September 21, two days after the battle, when I imagine the learned gentleman was comfortably settled in his hotel at Naples, for nothing short of most decided love of discomfort could keep a man at Santa Maria, a little village abounding in fleas, where there is no food or rest. This letter is headed the "Reverse of Capua," and is indeed the reverse of several other things. I must congratulate the writer, whoever he may be, on his merits as a composer. Of the whole story, I willingly say, "E ben trovato," and great allowance must be made for the feelings of youth under fire; but the writer is, I think, unduly influenced by those sensations. I would call to his mind that much may be done between twelve o'clock and seven p.m., when the sun does not set before the latter hour. I had the pleasure of meeting the learned M.P. (whom I knew by sight), as he returned, like Monckton Milnes's hero, from "wandering to the mill," and I can assure you that had he turned again, to speak technically, to his "proper front," he would have found that the "wild flight of officers," was entirely stopped. I suppose it had met the "retiring ebb," to which the writer of the letter so aptly refers; at least, I went up with several regiments who were advancing, and with good heart and spirit, though they knew they were fighting with muskets *versus* guns, cavalry, and stone walls, a fact that seems to have escaped the "correspondent of the *Times*," which we must in no way confound with the "*Times* correspondent." That cavalry and artillery should be terrible to young troops—especially to mountaineers like the Calabrese—is not a new thing. I would recommend the perusal of "1745," by Lord Mahon, an entertaining and instructive book, price 1*s.* 6*d.* "Garibaldi was far from the scene." Generals do not usually lead forlorn hopes or appear in the van of an attack. I have reason to know that Garibaldi was all day within range of his enemy's guns. I am not so sure that when they were burying those dead that it was "the troops" that the "panic seized;" and if the Sicilian officers in the cart shouted "Cavalry is coming—we shall all perish," the cry must have fallen echoless. I for one do not hesitate to say that I can't believe Mr. Edwin James, M.P., ever wrote that he "did not request as a personal favour, but he certainly did suggest, that 'certain private soldiers' should be marched out and shot." I am sure no Englishman would have done so, much less a lawyer, accustomed to weigh evidence, who if he had made one inquiry must have known that any hesitation in troops that occurred on the 19th certainly did not originate in the "men." To quote the Neapolitan proverb, "The fish always begins to smell at the head." It was so then. One word more. The writer of the letter gives advice to Giuseppe Garibaldi on the construction of his army! He says that no step has been made to organise his *matériel*. Is this so? I think not. He says officers from England have volunteered to lead his troops, but they remain unemployed and are lounging in the cafés. I will appeal to any one in Naples to say if they do not think that "the café" was the best place for a number of men, *soi-disant* soldiers, who have infested Naples for the last three weeks, to the disgrace of the name and manners of an Englishman. All these fellows call themselves on "a general's staff," till the word "staff" is a jest and byeword. All these—many, doubtless, spirited youths, and abounding in practical jokes—were willing to "take a command"—I quote literally; but while General Garibaldi has Bixio, Milvitz, Türr, Eber, Peard, I, for one, think him justified in not giving a command to any erratic unknown Englishman—be his name Nokes or Styles, Pickwick or Johnson. Giuseppe Garibaldi may be no lawyer, but I pledge you my word that I believe, in a military matter, he would give good advice even to a silk gown. In speaking thus of the English who have come here, I beg most distinctly to state that they are entirely different from the "Volunteers" who are daily expected, and who, to judge from the commanding officer and working-staff already in Naples, will consist of a regular

Digitized by Google

body of plucky fellows come out to fight for a good cause, who volunteered like Englishmen and will fight like men, and are not to be confounded with the dreary swaggerers who infest the cafés, and under fictitious titles disgrace the "red shirt" which Garibaldi has made classical. Be it remembered, also, that there are other gallant English already here—far removed from this unsatisfactory gang—witness the names of Windham, Dowling, Jervis, and several more, whose names ought to be inscribed in the "Ore Alieno," of which I fear the other class is but too covetous.

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From our own Correspondent.]

Naples, 6th October, 1860.—The news of a general action having taken place on the 1st inst. reached Naples the same evening, but there was little further known than the fact of a cannonade having been heard in the direction of Capua, and the currency of a vague rumour to serve as a foundation, and with *matériel* of this sort a victory might as easily be claimed as a defeat admitted. Next day, however, the matter was put beyond all doubt by the appearance of a proclamation from Garibaldi himself, dated 1st October, announcing a victory along the whole line. This was soon followed by another from General Sirtori to the Secretary-General in Naples, conveyed by telegraph from the front, and arriving at 11·30 a.m. Its contents were as follows: "We have conquered on the whole line, a column of the royal troops detached from the main body (*isolati*) is near Caserta; we hope to make them all prisoners. Finally comes a telegram from General Türr to the Minister of War at Naples, asking for ammunition for six-pounder howitzers—those taken from the enemy on the preceding day—and communicating intelligence of an engagement at S. Tammaro on the morning of the 2nd inst., and the capture of prisoners. Notwithstanding the publicity given to these authoritative notifications, which were posted up on all the walls, there were some in Naples who expressed doubt as to the certainty of the general action, and still more of its having proved a victory on the side of Garibaldi's forces; but the arrival of numbers of wounded by train proved the reality of the first, and of prisoners from Caserta established a belief in the latter; nor was the incredulity itself left altogether unaccounted for by the discovery of a reactionary plot, which was to have broken out in case the fortune of war should have favoured the cause of Francis II. Several arrests have been made, so that the most prominent of the sympathisers are at present secured from further participation in the restoration of a king whose territory grows narrower daily. The arrival of the wounded by train from Caserta on Tuesday, the 2nd, necessitated the government to resort to the justifiable expedient of pressing into the public service all carriages, cabs, and other vehicles, public or private, for the conveyance of the poor fellows from the terminus to the city hospitals. Some were borne on stretchers through the streets; and the sight of their youth and evident suffering excited the most lively pity. Wednesday seems to have been devoted to the duty of sending the prisoners of war in by train. On their arrival at Naples, they were marched, under a strong escort, to the castles, the officers in front, and the men following. As often as a train arrived from Caserta, a fresh batch of prisoners was forwarded to Naples. The number of the dead was roughly estimated at about 3000, both sides taken collectively. All the Piedmontese troops in Naples were moved out to Caserta, and the National Guard took sole charge of the city. Such was the state of affairs up till Wednesday morning, when some detailed account of the fight was attainable. Lieut.-Colonel Sprovieri and Colonel Corao were the first to fall; and their death seemed, instead of disheartening their followers, to have inspired them with greater fury. The fight continued at different points until 4·45 p.m., when it ceased. The engagement was general along the whole line, and, although Garibaldi commanded in person, Bixio, Millitz, Eber, and the other generals, had each a separate *rôle* to sustain. Garibaldi, as usual, is said to have had hair-breadth escapes and wonderful adventures. A musket ball passed through the leg of his trowsers; a grape-shot carried away one of his spurs, killing the charger on which he was mounted; a second horse was also killed under him before the close of the day. The superior officers all set a good example of personal bravery, as well as of good generalship; and, when this is the case, the inferiors and the men fight well. It would be invidious to mention the names of some where all fought well. The number of wounded is great; and amongst the officers the name of Colonel Dunn is returned as having received a gunshot wound in the leg. Several English sailors on leave from the Renown were present at the front, and of course to remain idle under such circumstances was more than could be expected from them; so, seeing two guns deserted by the enemy, the tars resolved that, although the attempt would be made under fire, yet that it was quite possible to capture these guns. In consequence of this conclusion, one of their party was deputed to make the requisite proposal to one of Garibaldi's officers; so Jack, making his way with that inimitable rolling gait peculiar to the true blue-jacket, and touching his hat, made some such speech as, "If you please, sir, me and my messmates will go out and bring in them there two guns, if so be as you gives us permission to go for them." The requisite permission being freely given, out rushed the tars to the performance of a work so congenial to them, and, with a sailor's luck, they were able under a heavy fire to replace the wheels on the gun carriages, to limber up, and run out with the guns as if it was the finest sport in the world. They also did good service at the advance post, and one seaman on French leave from the Scylla, a gunner's mate, served two guns that were in position, alternately. The loss to the Garibaldians in dead is slight compared with the great number of wounded. The enemy's loss is great, and their cavalry almost cut to pieces. On the morning of the 3rd, a sortie was made by the Neapolitans for the purpose of relieving the isolated column to which I have before alluded, but was unsuccessful. The column in question was surrounded by Garibaldi, Bixio, and Brigadier Lacchi. It is said that the prisoners taken will be sent hence to Genoa, to be incorporated with the Italian Army. At least 3000 have arrived already from Caserta, and some of those now in St. Elmo once formed part of its garrison.

The most important government changes, grants of pensions, &c., all fade into insignificance in comparison with the particulars of the late struggle; but still time is found to provide for those who lose their lives for the common cause. Amongst the notices of pensions was one for the mother of Agesilao Milano of 30 ducats a month, and a dowry of 2000 ducats to each of his sisters. Now, as this Milano was the man who attempted the life of King Ferdinand, stepping out of the line on parade, and courting every publicity, and for which offence he was executed, the announcement of the gift of a pension in his case was rather startling, as setting a sort of premium upon assassination. On inquiry, however, it was found not to have emanated from Garibaldi at all, but to owe its origin to Bertani, whose connection with the government has ceased. Nothing could be less in accordance with the lofty character of Garibaldi than to reward one who, how great soever his provocation—and it was great—should have attempted the life of another. The fact is, Garibaldi's name is much too freely used; and as many of the Bourbon party desirous of a reaction are still in Naples, and many of them very forward, it became their plan, as extremes often meet, to join the Mazzinists in calling out for a republic; hence the memory of Milano was dragged from the grave, he was pronounced a martyr, portraits of him put side by side with the heroes of the present movement, and finally it was declared that a pension had been granted to his surviving relatives. The drift of this was to identify Garibaldi with red republicanism in the minds of the public, to disgust moderate people here, so that they might desire the return of the King of Naples, and at the same time shake the confidence of Europe in Garibaldi, and forfeit for him their sympathy. To judge by the recent articles in some English papers, they have not been altogether unsuccessful, and whilst good people in England are deploring the existence of supposed differences and misunderstandings between Garibaldi and the Sardinians, the troops of both are fighting side by side at Santa Maria, and Garibaldi announces by public proclamation that the troops of Cialdini have entered Neapolitan territory, and that in a few days his own followers will have an opportunity of grasping the hands of their victorious brethren. Whatever purpose it may serve to represent Garibaldi as republican in feeling, or so weak as to become the dupe of Mazzini, it is untrue, as a more constitutional or loyal mind does not exist than that of Garibaldi, who, from first to last, placed the name of the King of Sardinia at the head of the Italian movement, and now the appointment of the Marquis of Pallavicini Trivulzio, who has arrived from Turin, to the office of Pro-Dictator, is a guarantee that no serious difference of opinion exists between the Dictator of central and southern Italy and the King of northern Italy, and it seems the latter sends his own nominee to be appointed to the second post in the realm. Mazzini has got notice to quit Naples, the reason assigned being that both England and France were incensed at his presence, and the popular cause was, in consequence, losing their sympathy. Under these circumstances, it was suggested to him, if he really loved his country, to absent himself from it. This step is said to have been amongst the first official acts of the Pro-Dictator Pallavicini, and was, report says, accompanied by an intimation to the effect that, in case of its not being complied with, more forcible means would be used. News from Ancona of the 1st inst. announces Lamoricière's surrender of himself as prisoner of war to Admiral Persano, commander-in-chief of the Sardinian fleet there. The barge of the admiral conveyed the illustrious soldier on board the flag-ship, where he was received with all the honours of war. The admiral placed his own cabin at the service of the general, who expects to proceed without delay to Genoa. A telegraph from Paris of the 1st inst. announces that the French government will not prevent the Sardinian army from going to Naples for the purpose of concluding the annexation, nor will diplomatic relations be interrupted, save in case of a Sardinian attack on Venice. Admiral Persano's arrival at Turin, where Count Cavour received him at the railway station, is also announced here by telegraphic message; and the telegraph from Ancona, date 5th of October, makes known that the King of Sardinia has assumed the command of the army in person, and published the following proclamation:—"Soldiers! I take the command. It has cost me too much (*mi costava troppo*) not to find myself first wherever danger is." It is expected that the deputation from Naples to the King of Sardinia will leave this city for Ancona immediately, and that the purport of their mission is to request the king's presence in Naples without delay for the final accomplishment of annexation. These comprise the whole amount of public news up to this, the moment of posting my letter.

Iron-Plated Frigates.—A vessel of immense proportions in the course of building upon Messrs. Palmer Brothers' extensive works at Jarrow is attracting a great deal of attention from persons passing up and down the Tyne in the packet-boats between Shields and Newcastle. The vessel is the iron-plated ram frigate Defiance, building under contract for our Government. She is making most satisfactory progress; and is intended to carry 36 heavy Armstrong guns. Her iron casing will be 4½ inches thick on the outside. Next that will be 20 inches of timber, and inside that the iron framing of the ship, which will be as strong as any already used for the largest-sized vessels in the merchant-service. Her deck-beams are made of Butterby's patent beam-iron, and the decks to be laid thereon will be of iron. The vessel will have water-tight wing-passages, with water-tight doors, so that in case a shot should be driven through the immense sides of the vessel men may pass through the doors into the compartment, and plug up the hole. Failing to do that, they can close the doors and cut the chamber off from the other parts of the ship, keeping the water within it. The stern post of the ship will be one of the largest, possibly the largest forging ever made in this or any other country. The stem of the vessel will also be of enormous strength, and will, in addition, be fortified with plating, so that the ship may run any timber-built ship down with impunity. With the exception of the ends, which have been kept back by the difficulty in forging such a mass of iron as that necessary for the stem and stern, the whole is plated. Many of the armour plates are on the premises. Feathering and grooving those plates will be commenced at once.

GENERAL PEEL ON MILITARY AFFAIRS.

Last week, at the Huntingdonshire Agricultural Association, General Peel made some noticeable remarks upon naval and military matters, in returning thanks for the Army. He said—The compliment that you have just paid to the army and navy and the volunteers includes some 600,000 individuals. That branch of it to which I have the honour to belong, and for which it is now my duty to return thanks, namely, Her Majesty's regular army, comprises alone, with the magnificent addition which has just been made to it of the local European army of India, no less than 250,000 men. The volunteers, the pensioners, the militia, and the yeomanry swell the number to 500,000, and if we add our gallant sailors and the royal marines—than which there is not a finer body of men in the world—the total number will reach at least 600,000, all of whom are prepared to defend the possessions of Her Majesty. And yet, gentlemen, we are told that we are not a military nation. For the purposes of aggression I trust we may never be. I sincerely hope that we shall never be induced to interfere with the affairs of other nations, and I trust, at all events, that we shall never go to war for an idea. But for the purposes of defence I hope we may ever be found a very military nation, and that it will be seen that upon that point we entertain some very strong ideas, which we are prepared to fight for if necessary. One of those ideas I take to be this—that if a foreign foe were ever to be allowed to land in this country, we have an idea that he would never be allowed to go back again. In carrying out that idea I am perfectly certain that the regular army would receive every assistance from all those other branches of the Service which I have just mentioned. I have not, however, the slightest idea that such a contingency will ever arise. The Volunteer movement has now become a great and established fact, and I trust that it will long continue to be so. I trust that those who have come forward with so much spirit will not only continue their own services, but do all in their power to encourage others to follow their example. This has been truly a voluntary movement. I give the Government every credit for the assistance and encouragement they have afforded to it—an assistance and encouragement greater than I was able to afford to it, because the rifles were not in existence when I was in office, though I have the gratification of knowing that they were all ordered by me. But you may depend upon it, the movement would never have assumed the magnitude it has done if it were not for the exertions of individuals in different localities. You all know in this county how much you are indebted to the noble duke in the chair and to others for the corps which now do you so much credit, and though it would be invidious to mention the names of individuals, it is impossible not to admit that Lord Elcho and other young noblemen who came forward to form the corps which they now so worthily command, are entitled to the thanks of the country. The establishment of the National Rifle Association was also a most praiseworthy object, and I am glad to see that the plan of offering prizes for competition is rapidly extending throughout the whole country. At the same time I hope I may be allowed to say a word to the Volunteers in reference to these prize meetings. Let no man be discouraged because he has failed to obtain a prize. If you cannot obtain the accuracy necessary to enable you to secure good prizes, do not let it dishearten you for a moment, or induce you to think of withdrawing from the corps. You may depend upon it that there are very good soldiers who are very indifferent shots. To fire at a bull's-eye and at a battalion are two very different things. No great battle was ever won by the dexterity of individuals, but by the steadiness and valour of the masses, and the confidence that each places in the other. Those are the means by which great results are attained. Perhaps, as I was for 16 months responsible for the security of the country from attack, inasmuch as the Minister for War, whoever he may be, is responsible to the country for its security, it will not be out of place to mention one fact which makes me think that this Volunteer movement is of far greater consequence than many persons imagine. It is admitted by everybody that the great security for the defence of the country must always rest upon our maritime superiority. It is imagined by many that our navy ought not only to be equal to that of any other country, but equal to that of all other countries combined, and that if it be not so we must always maintain in the country a large military force, and that without the Volunteers we should not have such a force. Now, it is somewhat disheartening that after all the exertions we have made during the last two years, and the money we have lavished upon the navy, to say that a great doubt has arisen whether the ships we have built and the money we have expended have not been thrown away. It is now supposed that a new war-vessel—the iron-cased frigate, has been established and that it will render almost all the exertions we have made and the money we have spent useless. Upon this subject I may state an opinion which within the last eight days was given to me by one to whose judgment with respect to projectiles I attach great importance—I mean Sir William Armstrong. He told me that he considers this question as merely one of naval architecture, and that if you can produce iron-cased vessels attaining anything like the same speed and as seaworthy as the ordinary men-of-war, no other vessel will have the slightest chance against them. If this be true, and I do not doubt it for a moment, what will be the consequence? Why, the entire reconstruction of our Navy. To give you an idea of the expense which would attend such a reconstruction allow me to inform you that two vessels which were ordered by Lord Derby's Government, and which are now in the course of construction, will cost no less than a million of money, 500,000*l.* each. But whatever the cost may be this country cannot afford to be behind any other either with regard to the superiority of its ships or of weapons of defence generally. I perfectly believe that we are at least equal in point of soldiers and sailors, and in the name of the former I beg to return you my thanks for the honour you have done them in drinking their healths.

Another Arrival of Timber for the Navy.—The Olga Maria, Captain Reedman, has arrived in the Medway from Dantzic, with a full cargo of oak plank and timber for the Royal dockyard at Chatham.

INSPECTION OF THE SOUTH-WESTERN DISTRICT.

Major-General Lord William Paulet, C.B., has been making his biannual inspection of the South-western District during the last fortnight; and on this occasion his attention has been particularly directed to the augmentation of the defences recommended by the Royal Committee, and sanctioned by the late parliamentary votes. Accompanied by Colonel Somerset, C.B., and Colonel Thackwell, his Assistant Quartermaster and Adjutant-General, by Colonel Gordon, C.B., and Colonel Dunlop, C.B., commanding the Royal Engineers and Royal Artillery, and of other artillery and engineer officers, he proceeded on the 6th inst. in the Sprightly, Master-Commander Allen, to inspect the Needles passage, and the forts which guard it. The defence of this, the western entrance of Portsmouth harbour, occupied much consideration at the hands of the Commissioners, who, after receiving evidence on the impracticability of booming the passage on account of the strength of the tide running through, finally recommended that additional redoubts and batteries should be added to those already existing. At Hurst Castle, which the general first visited, the guns were trailed on their racers to the extreme angles of their ranges, and the calibres of the pieces carefully compared with the length of the various channels they are intended to rake. The principal addition to be made here consists in case-mating the heavy batteries on the west of the spit. The contracts are taken up, and it is expected the work will be immediately commenced. The Sprightly then steamed across the Channel, and landed the general at Cliff End fort, as it is called, but which really is nothing more than a brick four-decker, built on a rock at the point where the cliff approaches nearest to the opposite shore. Above, a mud redoubt prevents it being taken in reverse, and the guns of the brick ship sweep the channel between Hurst and the Wight, as well as the long flat sand called Colwell, and Totland Bays. Although the channel here is little more than 1400 yards across, yet remembering the speed at which a man-of-war can now pass at flood-tide, the Committee recommended additional batteries to be built on each side of this redoubt, at a height of 130 feet above the sea level. Heavy batteries are also to be placed at Hatherwood Point and at the old light tower on the Needles cliff; but as the one is 240 feet and the other 450 feet above the sea, it is very questionable whether any advantage can be hereby gained, the more so as vessels can pass at a distance of 2000 yards; and if even they approach nearer, it only entails in an increased ratio the notorious uncertainty of a plunging fire. A fort of a larger size is also to be built, about half a mile inland from Cliff End, which will contain the men to serve these batteries and guard the road to Newport and Ryde in the event of an enterprising enemy effecting by a successful dash a landing on the sands of the adjacent bays. From Cliff End the general proceeded to Fort Victoria at Sconce Point, an erection which, if it cannot be said to be the pride of Englishmen, is at any rate the wonder of all foreigners entering Southampton waters. In each of these forts he narrowly inspected the magazines and shell-rooms, inquiring into the number of rounds ready for immediate service, and examining the state of the guns, carriages, fuses, borers, bits, bursters, and all other artillery "plant." From Victoria he proceeded across the peninsula to the little fort at Freshwater Gate, which, cut out of the solid chalk on the top of the cliff, commands the little bight which forms this extremity of the valley of the Yar. Here the 68-pounders were manned, and fire opened with diaphragm shell on the perpendicular chalk cliffs. It has, however, been asserted that these heavy guns on the sea face are somewhat misplaced, as, although they might oblige an enemy's frigates to keep at a respectful distance—of little consequence in itself—yet they could not prevent their boats from stealing under the high cliffs, and landing under the western corner of the bay, where even the flanking howitzers could do them little harm. In truth, all batteries or forts which guard a landing-place should have a cross-fire, and if another small chalk redoubt were placed on the opposite Down, it would sweep the cliffs below the present fort, and at the same time guard the head of the muddy Yar, where the road crosses from Cliff End to Newport, and thus render the large fort before alluded to superfluous. The general concluded his tour of inspection by visiting Yarmouth Castle, a remnant of the old Tudor days of Henry VIII. A small body of artillerymen still garrison it, but as its use has been superseded by Victoria and Cliff End forts, its batteries will be dismantled and the guns removed. His lordship returned to Portsmouth late the same night, apparently satisfied with the result of his inspection.

We are informed that the shipwright department at Woolwich, under the superintendence of Mr. Turner, has completed the preparation and laying down the blocks to receive the keel of the 91-gun ship, Caledonia, to be constructed under the shed from which the Anson was launched last month. The Caledonia will be of nearly similar dimensions; her length between perpendiculars is to be 244 feet, and her armament to consist of 56 32-pounders, one 68-pounder, and 34 8-inch guns.

The Lords of the Admiralty have given directions for an extension of the Royal Marine barracks at Chatham, towards the dockyard, in order that additional quarters for the officers and men may be erected in that direction. The new buildings will necessitate the taking in of a portion of the dockyard, including the official residence of the master ropemaker, which will be required to be taken down, and also a part of the private garden belonging to the Captain-Superintendent.

The Lords of the Admiralty have determined upon the construction of an iron screw tank-vessel, to be employed in supplying water to the fleet at Spithead, &c. The vessel will be 300 horse-power, and tenders for her construction have been invited from several eminent shipbuilding and engineering firms.

A number of 40-pounder Armstrong guns, after being proved at the Government practice range, have been forwarded to various home stations, and also for the service of the coast brigade of Royal Artillery. The utmost activity now prevails at the gun factory department of Woolwich Arsenal, in the manufacture of heavy rifled ordnance, consisting of 80 and 100-pounder Armstrong guns, intended for the naval service.

GENERAL ORDERS.

The following General Order relative to the granting of leave of absence to officers and furloughs to soldiers, has been issued from the Horse Guards by direction of the Duke of Cambridge:—

"His Royal Highness the General Commanding-in-Chief is pleased to approve of general officers commanding districts and divisions in Great Britain, and officers commanding in garrisons not included in any military district, granting leave of absence to officers, and furloughs to non-commissioned officers and soldiers, under the following regulations and restrictions, viz.:—

"1. Leave of absence granted under this order to officers may commence as soon as the half-yearly inspection shall have been made. Furloughs granted to non-commissioned officers and soldiers may commence from the 1st of the next month.

"2. These indulgences are to terminate on the 10th of March next, when, agreeably to Her Majesty's regulations, all officers and soldiers are to be present with their respective regiments and depôts.

"3. One field officer, one half of the captains, and one half of the subaltern officers are always to be present.

"4. No officer (except in the performance of duty, or for the purpose of joining his regiment) is to quit the United Kingdom without having first received Her Majesty's special permission, according to the regulation on that head.

"5. Officers employed on the recruiting service or upon the Staff of the army are not to be included in the number hereby fixed for the constant duty of the regiment or depôt.

"6. The applications for leave for regimental paymasters and medical officers are to continue to be made in the mode prescribed in the regulations and orders for the Army.

"7. In cases of short leave of absence being requested by adjutants, ridingmasters, quartermasters, or veterinary surgeons of regiments, it will be necessary that a special report be made as to the mode in which their duties are to be performed during their absence, and that the commanding officer is satisfied.

"8. The proportion of non-commissioned officers, trumpeters, drummers, and private men to whom furloughs may be granted is not to exceed 20 per battery of Horse and Field Artillery, or 10 per troop battery of garrison Artillery or company. Commanding officers of regiments returning from India may exercise a liberal discretion in granting furloughs to soldiers who come home with their corps.

"When corps are now stationed in garrisons or military districts the officers commanding are at liberty to use their discretion in granting the indulgence of leave of absence under the foregoing restrictions to the officers and soldiers under their command, reporting the same to the Adjutant-General.

"His Royal Highness expects that the general and other officers who are empowered to grant leave of absence under the provisions of this order will strictly confine that grant to the proportion of officers herein specified.

"By command of His Royal Highness the General Commanding-in-Chief,
"JAMES YORKE SCARLETT, Adjt.-Gen."

The following Circular Memorandum to the Army, dated October 2, 1860, has been issued from the Horse Guards by order of the Duke of Cambridge:

"His Royal Highness the General Commanding-in-Chief notifies, for the information and guidance of the Army with reference to the exemption from the payment of tolls, that it appears by a communication received from the War Office, that the Secretary of State for the Home Department has been requested to cause the magistrates generally to be informed that the meaning and intention of the words 'on duty,' introduced in the 71st clause of the Mutiny Act, are to exempt officers driving or riding, whether in private vehicles or not, if on duty. Also, that in considering the Mutiny Act for the ensuing year, steps will be taken to remove all ambiguity in the clause.

"By command,
"JAMES YORKE SCARLETT, Adjutant-General."

TRIAL OF LIFE-BOATS.— On Monday some interesting trials were made, in the canal at Limehouse, with two life-boats which the National Life-boat Institution is about to send to Aldborough, Suffolk, and to Margate, Kent. The trials were made in the presence of Captain Ryder, R.N., Mr. Henry Wilberforce, Captain Ward, R.N., inspector of life-boats to the institution; Mr. George Ryder, Richard Mr. Lewis, the Messrs. Forrestt, life-boat builders, and many other persons. The life-boat for Aldborough is 39 feet long, and rows 14 oars. She is a very powerful boat, and apparently capable of successfully contending with any seas. She underwent the usual experiments on those occasions of self-righting and self-ejecting the water she shipped. It required 31 men to stand on one gunwale, or side of the boat, before it was brought to the water's edge, thus showing her great stability, and how difficult it would be to upset her. The Margate life-boat, which was the munificent gift of Miss Burdett Coutts, and which she had named the Angela and Hannah, is 36 feet long, and rows seven oars single banked. She underwent her trials in a very satisfactory manner. She was afterwards tried on her new transporting carriage, which answered admirably. It was built by Mr. Robinson, of Camden Town. Messrs. Forrestt have about a dozen life-boats in different stages of building. Some are nearly ready to be sent to Buckie and Thurso, in Scotland, Portrush in Ireland, St. Ives in Cornwall, and other places. Most of the boats are the gift of benevolent persons. The large life-boat for Llandudno, near Liverpool, was called the Sisters' Memorial, being the gift of two sisters resident in Liverpool, in memory of a departed sister.

A GOOD EXAMPLE.—The Captain and wardroom officers of Her Majesty's ship St. Jean d'Acre, have forwarded through Lieutenant Mc Hardy, R.A., 4*l.* in aid of the funds of the Royal National Life-Boat Institution. We trust that this laudable example in support of so good a cause will be followed in many of Her Majesty's ships, for who better than officers of the Royal and mercantile navies can appreciate the value of a life-boat when on a lee-shore? The Life-Boat Institution has now upwards of 100 life-boats under its charge; and to keep up this large life-saving fleet —the importance of which cannot be overrated on the shore of a country like England—requires a large permanent annual income—averaging 40*l.* a year on each boat.

NAVAL ENGINEERS.

[The subjoined letter refers to so valuable a class of officers, that, although longer than prescribed by the rule which we have laid down for ordinary correspondence, we have great pleasure in giving it insertion in our columns.]

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I have watched with much interest the struggle of the Naval Engineers against their anomalous position amongst the defenders of our country, more especially the Navy; and whilst I own the propriety of their doing the best they can for themselves, I feel convinced that the attempt is looked upon at head-quarters simply as a very natural occurrence, which does not require present attention. This idea is strengthened by the fact that all correspondence, proposals, and complaints (with the exception of the valuable but not over-ready help given them by the Press, in the way of articles, and without which they cannot expect much progress) have hitherto emanated from themselves, and have not met with that cordial support from the tax-paying and grumbling community at home which they might reasonably have expected.

I am a landsman, and have no more interest in the Navy than any other Englishman; but I know how utterly powerless our Navy would be without its present 1200 unappreciated engineers. Now in 1822 a steam navy was a new thing, "taken on trial," and the engineers' fate was of course dependent on that of the steam system; this latter has now been long looked upon as a thing certain and indispensable, and improvements and extensions have been made in it every day. Not so with the engineers—their condition has not improved with that of their engines; the few half-educated men who were taken on at first have indeed disappeared, and a much superior class of officers has succeeded them. The great sore, and the one that calls for immediate attention, is, that this moral and intellectual improvement has not been adequately recognised by the Admiralty. When steam was only a tentative sort of thing, they could but expect little notice; but that state ceased many years ago, and I can't see why the honour and rank bestowed on engines should so far have exceeded that given to engineers, without whom the machinery is only so much ballast. A naval engineer now ranks with, "but after," a master. Well; supposing that in one ship the masters were removed by accident while on a foreign station, and in another ship all the engineers were lost, also on a foreign station, which ship, do you think, would be in the worse plight? Most certainly that without its engineers. Then why not let the rank be equal to the value?

In the French navy, where they manage things better, they find it expedient for the chief engineer to rank with a captain of a line-of-battle ship; while in our own, the Navy of which we are so proud (and in some respects justly), he ranks with, "but after," a master. Then, again, the third-class assistant; with our wary neighbours he is considered equal to a midshipman of the line and to a lieutenant of the Army; whilst behind our wooden walls the incipient chief has virtually no rank at all, no cabin, no nothing, and to eat with him is an abomination to gun-room officers. These, the engineers, are men who have passed very strict examinations in a great variety of subjects, from mechanical drawing to quadratic equations; and, after the examination, they are entitled to no rank at all. In good sooth, it is to be wished that the Admiralty would study official equations now and then.

The proposal for a reform, given in one of your numbers, which I presume will be accepted as satisfactory by the persecuted ones, contains much matter for consideration, and were it not for fear of trespassing too much on your space, I should like to consider each clause separately. I gather from it, however, that a young gentleman, having passed an examination in arithmetic as far as decimals, writing English from dictation, and having qualified himself to be a peripatetic "History of the Steam-Engine, with Copious Notes," and being able to make mechanical drawings, will receive from a grateful country, when appointed to a ship and on a foreign station, the sum of 127*l.* 8*s.* per annum! This sum is subject to large deductions when he is not wanted, and this must last for a period of four years; then, after proving his further acquirement of knowledge of a fearful array of ologies and ometries, he may, if lucky, become an assistant-engineer at the age of 25. If luck still follow him, he may be a chief at 29 years of age, with a salary (if working hard away from home, perhaps from his wife and children) of 273*l.* This he may enjoy until he is 35 years old! Then he may have 309*l.* 8*s.* per annum by an uninterrupted series of hard work and unusual luck, until he is 40; from this time, until he attains the mature age of 45, he may have 345*l.* 16*s.*, after which he may have—by working for it of course—400*l.* 8*s.* until he is 50, when, if he is not discharged as unfit for service, he may have 455*l.* for an indefinite period, having served 29 years in all. Or, after he has served eight years as chief (16 years from entry), he may, if he can, qualify himself to act as inspector of machinery at a salary of 455*l.*; but, how many of these inspectors are wanted in the Navy? I see in 1858 there was one appointed, and since 1854 there have been six appointed in all.

Now, considering the extra hardships and actual risk attending the profession, what provision can an engineer make for a family out of the foregoing salaries, even supposing he attains the post of chief engineer at 50, with a salary of 455*l.* per annum? On land the prospect would be tolerable, but on sea there should be very much more margin left for contingencies to make the thing even bearable. The scheme is too moderate and too modest for my notions; but, if the engineers are satisfied with it, I should think there can be no doubt as to the ultimate, and not very remote, adoption of it, by the Admiralty. I feel sure that were any one lord, or other high official, to give the matter half-an-hour's serious and unbiassed consideration, he would be so thoroughly convinced that their last grant in February was worse than nothing, that his convictions would be forthwith so forcibly audibly, and well-expressed in council as to ensure the passing of the scale in question, or perhaps even of a more liberal one. I am sure that your assistance will not be withheld from a cause which you evidently feel to be a good one.
—I am, &c.,
PERSEUS.

THE CAMP AT CHALONS-SUR-MARNE IN 1860.

[By an Austrian Officer.]

(Translated for The Army and Navy Gazette from the *Osterreichische Militärische Zeitschrift*).

In the French army, where the fundamental principle of all peace-manœuvres is to organise them so as to represent as nearly as possible the various conditions of actual war, long marches, and camps on a large scale must necessarily play an important part. For some years such a part has fallen upon the camp at Chalons.

Whilst I leave apart those political considerations which doubtless had something to do with the French Emperor's resolution to turn the plain near Chalons into a large exercise camp, in describing the said camp I shall simply take into view the military points which are interesting enough to warrant a detailed description.

From Chalons in a north-easterly direction there is a railway, about 30 kilomètres in length, which leads to Petit-Mourmelon, a small village, which, with the exception of large store-houses for the railway service, and a few recently erected inns, counts but few houses. From this hamlet, in an easterly direction, the front of the so-called Camp of Chalons extends as far as Grand-Mourmelon, a distance of about five kilomètres. Grand-Mourmelon is a larger place than the first-named village; it boasts of a church and a castle with a fine park; but it consisted chiefly of miserable cottages until the establishments arose which have to provide for the comforts, wants, and luxuries of the camp. At present these establishments have increased in such number that whole streets have been formed. These houses are, without exception, shops, wine-houses, inns, and places of amusement; and the life which is visible there during the months the camp is assembled, dies off as soon as the tents are struck and the bugles sound the departure of the troops.

Before I enter into the details of the camp, I will first give its preliminary composition, according to the division of the troops. I say preliminary, for it is more than probable that in the course of the summer and autumn the troops actually in camp may be changed, at least in part, as with a view to combine the camp manœuvres with the long exercise marches, the troops are mutually relieved. It was thus decided that a large portion of the Imperial Guards should proceed to the camp at the time the Emperor was to take up his quarters there, which was fixed for the commencement of August; but as political considerations influence such matters, this has not as yet taken place, and the original programme has not been carried out.

The troops of the Camp at Chalons form a combined corps under the chief command of Marshal M'Mahon. His general staff consists of—Brigadier-General Lebrun, chief of the general staff; Brigadier-General Rochebuet, chief of the artillery; Captain Weynaud, chief of the engineers; a military intendant as chief of the administrative service; Captain Trouselle of the Gendarmerie, Grand Prevost and head of the safety department.

The troops are divided into 3 Divisions of Infantry, and 1 Division of Cavalry.

The 1st Division of Infantry is commanded by General D'Autemarre d'Ervillé. It consists of the brigades:

1. *O'Farell, with the 6th and 10th regiment of infantry, and the 7th battalion of Chasseurs.*

2. De Laveaucoupet, with the 2nd and 23rd regiments of infantry, the 1st and 2nd battery of the 9th horse artillery, and the 3rd company of the 1st battalion of the 1st regiment of engineers.

The 2nd Division of Infantry is under the command of General Marulaz, and comprises the brigades:

1. O'Neill De Clonard, with the 5th and 13th regiments of infantry, and the 19th battalion of Chasseurs.

2. Chalou, with the 20th and 42nd regiments of infantry, the 1st and 2nd battery of the 6th regiment of horse artillery, and the 6th company of the 2nd battalion of the 3rd regiment of engineers.

The 3rd Division of Infantry is commanded by General Walsin-Esterhazy with the brigades:

1. (Brigadier not appointed), with the 44th and 52nd regiments of infantry, and the 13th battalion of Chasseurs.

2. Douay, with the 85th and 97th regiments of infantry, the 1st mounted, and 2nd foot battery of the 8th regiment of artillery, and 1 company of engineers.

The Cavalry Division consists of the brigades:

1. Dalmas de la Pérouze, with the 1st and 5th regiments of Hussars.

2. Vernon, with the 4th and 7th regiments of Chasseurs-à-Cheval, and the 1st mounted battery of the 17th regiment of artillery.

It is well known that the manœuvring unity of the French army is the division. This compact system of organisation prevents splitting, and from the fact that the general of division has complete command over the division batteries, which are only administratively connected with the 2nd brigade, it renders it possible for him to throw a heavy force into the balance. The Chasseurs, also, who are set down as forming part of the 1st brigade, do not belong exclusively to that brigade, but must be looked upon as advanced troops of the whole division, and are actually employed as such. The introduction of Chasseurs is of recent date in the French army, and their want was less felt than in any other army; for, where the whole infantry in its spirit and mode of fighting, bears the stamp of light troops, the introduction of a special branch was rather a piece of military caprice than a necessity. Moreover, the French Chasseurs, although called *troupes d'élite*, have never distinguished themselves by any particular performances which, with all due acknowledgment of the Austrian infantry, has been the case with our Jägers. The Chasseurs de Vincennes, for whom normal rifle galleries and gymnastics are provided, are better armed, better marksmen, and better climbers, perhaps, than the infantry of the line; but the whole spirit and character of the troops bear no marked difference from those of the line, as they are all subject more or less to the same drill.

After this little discursion I will now conclude the numeration of the troops and establishments which are concentrated in the camp, and then come to the description of the camp itself.

The camp contains in reserves and parks:—The 1st and 2nd battery of the 13th regiment, horse artillery. The 2nd mounted battery of the 17th regiment. A division of artillery workmen. The 5th company of the 2nd battalion of the 1st regiment of engineers. The 5th company of the 4th squadron; and the 1st company of the 5th squadron of the military train. I do not enumerate the hospital and medical staff here. For preserving order in the camp there is a detachment of the 23rd legion of gendarmerie.

The conformation of the ground where the camp is placed is the same as prevails in the Champagne country, and consists of a chalky lime soil which dries very speedily, even after the heaviest fall of rain; a few hours of warm sunshine and all traces of wet disappear. Of vegetation there is little, as all the ground is trodden bare.

There is no running stream near the camp, which must be looked upon as a drawback, as it does away with the opportunity of swimming the horses. For the men there is excellent and abundant drinking water from numerous pumps; the water for the horses is conveyed through a wooden aqueduct of running water right through the centre of the camp. This aqueduct, which also serves as a trough, takes in the greater part of a small rivulet, which runs almost parallel with the front of the camp, and divides the camp, as it were, into two halves; the banks of this rivulet are low and often under water. Here there is vegetation enough, bushes and trees, which grow thicker towards the village of Grand-Mourmelon, and end in a shady grove, where the speculative genius of the wine shop owners has succeeded in making an agreeable place of amusement. The line of the stream is the deepest line of the camp; from it in a southerly direction (almost in a straight line to the front) the ground rises gradually to an elevated plateau, where, amongst a number of booths, is situated the so-called Pavillon de l'Empereur, with newly planted trees round it. The camp chapel is also here, where high mass is performed. The said booths, which are made of wood, with slated roofs, are roomy enough, and form the quarters of the cavalry, of the Emperor, adjutants, staff, &c., and there is also stabling for horses. Between this pavilion and the camp front lies the regular manœuvre or parade ground; a broad plain, wherein 30,000 men, which I saw reviewed there, scarcely make any show.

From the Emperor's pavilion, roads, more or less macadamised, diverge in various directions; one of the main roads leads almost in a direct line to the middle of the left wing of the camp, another to the centre of the camp. These roads are not yet quite completed, and men are still employed working at them. To the north the ground rises somewhat more abruptly, with a hill here and there, without however losing its character of undulating ground.

The communication between Petit- and Grand-Mourmelon, the two wings of the camp, is kept up by a good road, which, starting from Petit-Mourmelon,—which, as regards the camp line towards Grand-Mourmelon, lies only a little in the rear,—has a gradual descent, crosses the stream, and continues in an easterly direction almost parallel with the stream and line of camp.

The front line of the camp retrogrades in the centre, so that its advancing wings run into a broad angle. The camp itself is, as already stated, cut into two halves by the rivulet. The upper space is occupied by the infantry, the cavalry in first line, then the park of artillery and engineers in second line. The lower space is set apart for magazines, military train, barracks, hospitals, &c. Of the upper camp I will endeavour to give a more detailed description. On both wings are pitched the tents of the Chasseurs and infantry of the line. The tent rows of the infantry consist of five tents in two lines, and about twenty-five to thirty yards from each other. They form the first tent line of the camp, and have advanced tents for sentries.

Close to the infantry tents a hut-camp is now being formed. Some 120 huts have already been erected, and the main street through them is called Rue de Solferino.

Close upon the hut camp come the four cavalry regiments which form the centre of the first camp-line. The cavalry tents, which are of circular form, are divided on the same plan as those of the infantry. Each of these tents holds six men, so that the double row of tents comprises sixty men—that is to say, half a squadron. A strong rope is run the whole length of the street of tents, with a strap for attaching each horse by the fore-foot. This is all that is adopted to secure the horses.

The four regiments of light cavalry actually quartered here are mounted on Arab stallions. They are first-rate regiments, and have served in Algeria.

The French soldier is fond of amusements. The great rendezvous for dances and open air concerts is at Grand-Mourmelon.

At nightfall the *retraite* is beaten, then the lamps are lit on the high beacons which mark the front line of the camp; and the noise of men on horse, or foot, or cabriolet, returning from some place of amusement, begins anew.

The Official Navy List.—The October number of the *Navy List* published "By Authority," is now before us, and although some of the inaccuracies existing in the July list, which we took the trouble to point out, have been remedied, yet there still remains a sufficient quantity of blunders. We made the experiment, and at page 189 we found that the Ruby gun-boat was numbered 692. The next vessel was the Sandfly, numbered 695. Then from the Skylark, numbered 702, there is a jump to the Snap, 704. Again, the Violet has the figure 707 before it, and the next gun-boat to it is the Watchful, with 730 prefixed to it. We made another trial, and the leaves fell back to page 179. We there found the Southampton, a 50-gun frigate, and the Sparrow, a new screw steam gun-vessel, without any number, and a ship deficient between the Spartan and Speedwell, and one between the Sphinx and Spiteful. The Seringapatam coal depôt, at the Cape of Good Hope, is retained in the list of ships in commission, instead of being placed in that of vessels used for harbour service. She is not, however, honoured with a number, nor is the Sealark immediately above her better distinguished. At page 11 we are informed that we have 25 vice-admirals on the retired list, but on counting them up we can only discover 21; the other 4 unfortunate old officers cannot be found at present, but it is to be hoped they will turn up between this and the 1st of January. We have said enough to attract attention; and if the next number be not more accurate than the present, we would seriously suggest that means be taken to remedy the evil.

Prize Shooting at Hastings.—The beautiful little valley near Hastings, known as Ecclesbourne Glen, has been the scene of a rifle match, or rather a series of rifle matches on a large scale. The contest was chiefly among the members of the Cinque Ports Corps, but others joined in the competition for some of the prizes. The first prize was a Lancaster rifle, value 10 guineas, which was won by Mr. Webb, who scored 15 points in ten shots at 200 and 300 yards. Mr. Crake and Messrs. Penhall and Hildred gained 14 points each; and in shooting off the tie for the second prize (a silver medal) and the third prize (a bronze medal) Mr. Hildred won the second and Mr. Penhall the third prize. A contest then took place between 12 members of the 1st Company of Cinque Port Rifles (Hastings) and 12 members of the 3rd Company (Rye), ranges 200 and 300 yards, 10 shots at each distance, when the Hastings Company proved victorious, making 119 points to the Rye Company's 115. A prize cup was also shot for, value 17 guineas, and a second prize of five guineas, which, after a close contest of four shots at 300 and one at 400 yards, resulted in Mr. Webb winning the cup and Mr. C. Brittenden the guineas. The Countess of Waldegrave presented the prizes. There was an immense assemblage of persons to witness the shooting.

Newton Rifle Prize Shooting.—The meeting for the shooting for the prizes offered by the Devon County Volunteer Association was opened at Newton on Tuesday; Earl Fortescue, Lord-Lieutenant of the county, presiding at the inauguration. On the slope adjoining the road from Newton are erected tents for the council, and for the refreshment of visitors, and a temporary office for the secretaries; and on the opposite side of the valley, amidst the furze in the glades of the hills are placed the targets for carrying out the firing, with earthen mounds for the protection of the markers. About noon, the Lord-Lieutenant having arrived at the station, a procession was formed, consisting of an advanced guard of two troops of the Devon Yeomanry, under the command of the Earl of Devon and Captain W. J. Watts. Several carriages accompanied the procession—one containing the Lord-Lieutenant, and another the Grand Duke Michael of Russia. The streets were gaily decorated with flags, evergreens, and triumphal arches—one of the latter bearing in prominent letters the motto, "Defence, not Defiance." Along the sides of the streets in several places young fir-trees were planted for the occasion. At the station, long lines of flags were also suspended, and the new platforms, which are under completion, were promptly cleared and arranged for the reception of the Volunteers by their energetic builder Mr. Matcham, who deserves much credit for the rapid progress he is making in the extensive alterations and additions to this station. On the arrival of the procession on the ground the troops formed in an extended line along the valley facing the council tent, the Lord-Lieutenant and a large party occupying that tent. An address was presented by the Earl of Devon, the chairman of the council of the Devon Volunteer Association, to the Lord-Lieutenant, thanking his lordship for his kind assistance and countenance in support of the efforts of the Association. Earl Fortescue replied, eulogising the objects of the Association, and then declared the meeting opened. The troops then marched by, and were shortly afterwards dismissed to the amusements of the day. The shooting began about three o'clock.

Sham Fight on the Norfok Coast.—Yesterday week a novel affair took place at Cromer, on the Norfolk coast, in the shape of an invasion by a supposed hostile force, who were attacked by another party of Volunteers. The Volunteers comprising the "enemy" were the 2nd Norwich Company, under the command of Captain Patteson, 73 strong; the Cromer Company, 40 strong, under the command of Captain Lord Suffield; and the Fakenham Company, 60 strong, under the command of Lieutenant Hammond, Captain Patteson, having the general command. The defending force was composed as follows: the Stalham Company, 30 strong, commanded by Captain Cubitt; the Aylsham Company, 67 strong, commanded Captain Scott; and 20 gentlemen on horseback, commanded by Captain Chapman, of the 1st Bengal Cavalry, and presumed to represent an irregular troop of horse. Captain C. Buxton, M.P., who wore the uniform of one of the corps raised in connection with the brewery of Truman, Hanbury, Buxton, and Co., directed the movements of the defending party. It was taken for granted that the "enemy" had effected a landing; some crab-boats provided for this purpose not having been put into requisition as the sea was rather rough. The defenders were posted on the Lighthouse cliff, and commenced a brisk fusillade against the "enemy," upon whom, however, they did not succeed in making much impression, and after a short interval the order was given to fall back. The "enemy" scrambled up the cliff in excellent style, and gradually drove their opponents before them. The latter, however, soon took up some fresh positions, and some animated skirmishing followed, in which the mounted irregulars took part, the "enemy" by degrees finding their way into the town, where it is to be presumed they surrendered at discretion. As 36 rounds of ammunition were served out per man, some idea may be formed of the continued firing with which the ears of the spectators were assailed. Some of the firing was carried on at disagreeably close quarters, from behind hedges, or any favourable shelter, and one member of the Norwich company was slightly wounded in the forehead with a cartridge. The whole affair passed off with much spirit. The "engagement" concluded with a dinner given by Captain Buxton, M.P., in a marquee near the Hotel de Paris. About 300 Volunteers sat down. The hon. and gallant host presided, being supported by Captain Lord Suffield, Captain Windham, R.N., Captain King, R.N., Captain Micklethwaite, Adjutant of the Norwich battalion of Volunteers, Lieutenant Windham (Norfolk Militia), Mr. J. Gurney Hoare, and the Volunteer officers who took part in the proceedings of the day. Several members of the Victoria Rifles and Oxford and Cambridge corps were also present. Lord Suffield, in complimentary terms, proposed the health of the hon. and gallant chairman, thanking him for the munificent hospitality with which he had entertained the party. The toast was drunk with enthusiastic cheers, and the chairman acknowledged the toast in appropriate terms. Several other toasts were given in the course of the proceedings, which passed off very agreeably and successfully.

REVIEW ON NAZING COMMON.—The following is the programme of the review to be held this day on Nazing Common. The Volunteer brigade will consist of the following: Artillery.—West Essex Yeomanry, 6 guns, 6 field-guns; the Hon. Artillery Company, 2 guns Horse Artillery; and 2 field-guns; swivel guns in position, 4. Cavalry.—About 200. Infantry.—The Hon. Artillery Company, Major Robinson; 1st (Victoria) Middlesex Rifles, Major Whitehead; 33rd (Tottenham) Middlesex Rifles, Captain Goss; 2nd Tower Hamlets Rifles, Colonel Walker; 4th Tower Hamlets Rifles, Captain Bale; Enfield Rifles, Captain Monro; Cheshunt Rifles, Captain Goodliffe; Bishops-Stortford Rifles, Ensign Nash; 7th (Rochford) Essex Rifles, Captain Tawke; 8th (Eastern Counties) Essex Rifles, Major Love. It is proposed that a signal gun shall be fired at half-past 1 o'clock p.m., as a signal for all troops to fall in, and at a quarter before 2, two guns, when the parade line is to be formed to receive Major-General Robert Wood at 2 p.m. After inspection of ranks, the whole to march past twice, and infantry to wheel into line on the original ground, when an enemy will be shown on the left flank. The supposed right wing of the enemy coming marching from the direction of Epping, which will be routed by the artillery and cavalry, when the enemy will attack with their centre and left. The 1st and 3rd brigade will advance supported by a half battery of guns each, form lines, and repulse the enemy, supported by the 2nd brigade, as a reserve, with a half battery of three guns; on all ammunition being expended, a new line to be formed, when the whole will advance in parade order and salute.

ROYAL NATIONAL LIFE-BOAT INSTITUTION.—A meeting of this institution was held on Thursday week at its house, John Street, Adelphi; Thomas Chapman, Esq., F.R.S., presiding. Mr. Lewis, the Secretary, read the minutes of the previous meeting. A report was read of the services of the Northumberland prize life-boat, belonging to the Ramsgate harbour trustees, in conjunction with their steam-tug, early on the morning of the 25th, ult., in rescuing at great risk of life the crew of nine men from the barque Linda, of Whitby, and thirteen men from the Hanoverian barque Ariel, of Gottenberg, wrecked on the North Sand Head of the Goodwin sands during a heavy gale of wind on the night of the 24th ult. The Ramsgate life-boat is built on the same principle as the boats of the National Life-boat Institution. She will self-right if upset, and will self-eject immediately any seas she may ship, as was often proved during the stormy night and morning in question, when she had to cross the Goodwin in shallow water and in terrific seas. The coxswain of the life-boat on landing at Ramsgate said he was certain that some of her planking had been shaken owing to the heavy thumping the boat had received while crossing the sands; but upon examination it was found that she had sustained no injury. Since she has been on this important station she has been instrumental in saving 110 shipwrecked sailors from a watery grave. Her crew will be rewarded by the harbour commissioners, in addition to receiving salvage for their intrepid and important services. A reward of 4*l.* was voted to the crew of the Dundalk life-boat, belonging to the National Life-boat Institution, for putting off and rendering important services to the fishing-smack John James, of the Isle of Man, which in a heavy sea and a thick fog had stranded on Dundalk Bar on the 18th ult. The life-boat was reported to have behaved very well on the occasion. A reward of 16*l.* was also voted to the crew of the lugger Diana, of Deal, and the silver medal of the Institution to Thomas Trott, one of her crew, for their gallant and prompt services in putting off and saving, at considerable risk of life, the crew of ten men of the Norwegian brig Poseidon, which during a heavy gale of wind had sunk on the Goodwin Sands very early on the morning of the 25th ult. The rigging of the ship having got foul of the lugger's mast must have caused the upsetting of the latter, had not Thomas Trott instantaneously jumped on board the wreck and cut away the gear. A reward of 14*l.* was likewise given to the crew of a Pakefield yawl for putting off recently, in the night, and rescuing, at much risk of life, and after repeated attempts, the crew of four men, of the schooner Adam Young, of North Shields, which, during a strong gale of wind and thick weather, with rain, had recently sunk on the Holm Sand on the Suffolk coast. Various other rewards were also voted for saving lives from shipwrecks. It will thus be seen that, even during the heavy gales of the last few weeks about 40 of our fellow-creatures have been literally snatched by life-boats and shore-boats from an appalling death by shipwreck. It is impossible to over-estimate the value of such services as these; but they are properly appreciated by the poor men themselves, and by many who, in the absence of these laudable services, would to-day be widows and orphans. The Committee expressed their sympathy with the family of the late Mr. Herbert Ingram, M.P., proprietor of the *Illustrated London News*. He was a warm friend of the life-boat cause, to which he had for many years past rendered important service, through the medium of his well-conducted journal. One of the most dangerous parts of the English coast is his native county, Lincolnshire. We should be glad to see on it a life-boat, to be called the "Herbert Ingram," in memory of one of the most industrious and generous men of the county. During the past month the Society had forwarded life-boats to New Quay, in Cornwall; Banff and North Berwick, in Scotland; Tyrella, in Dundrum Bay; and Newbiggin, in Northumberland; the last-named to replace a life-boat which had become unfit for service. It was stated that the Institution had expended during the present year upwards of 7500*l.* on new life-boat establishments, and the maintenance of its previously formed stations in a state of efficiency. As the demands on its limited funds continue to be unusually heavy, the support of the public is urgently requested, otherwise the Institution will be compelled to sell out a portion of its small funded capital. Payments amounting to 1027*l.* having been made on various life-boat establishments, the proceedings closed.

The following are the names of officers removed from the list of the Royal Navy since last June:—*Lieutenants:* Robert Deane (resigned), 1851; the Hon. Maurice R. Wingfield (resigned), 1859; Charles R. Macdonell (name removed), 1859; Philip J. Patrickson (name removed), 1860; the Hon. Frederick J. Boyle (dismissed), 1858. *Assistant-Surgeon:* Robert Murphy (dismissed), 1854. *Assistant-Paymaster:* Joseph F. Allen (dismissed), 1858.

Obituary.

We regret to announce the fact that the long illness of Sir Harry Smith terminated fatally yesterday morning, at five minutes before eight, at his residence in Eaton Place West. We quote from *Hart's Army List* the following account of the distinguished officer's services:—Sir Harry Smith served with the Rifle Brigade at the siege, storm, and taking of Monte Video, under Sir S. Auchmuty, and at the assault upon Buenos Ayres, under Brigadier-General Craufurd. Employed with the troops in Spain, under Sir John Moore, from the battle of Vimiera to the embarkation of the troops at Corunna. Embarked for the Peninsula under Major-General Robert Craufurd in 1809; was seriously wounded in the action upon the bridge of Coa, near Almeida. Commanded a company in the pursuit of Massena from the Lines of Lisbon; at the actions of Redhina, Condeixa, and Foz d'Arouce. Appointed Brigade-Major to the 2nd Light Brigade in the Light Division, and was present in the action of Sabugal, battle of Fuentes d'Onor, siege and storm of Ciudad Rodrigo, siege and storm of Badajoz, battles of Salamanca and Vittoria, attack of the heights of Vera and passage of the Bidassoa, battle of Sarre, attack upon the position of St. Jean de Luz and heights of Arcanguez, battle of Orthes, affair at Tarbes, and battle of Toulouse. Appointed Assistant Adjutant-General to the troops under Major-General Ross destined against Washington, and was present at the battle of Bladensburg and destruction of Washington. Brought home despatches, and went out again immediately under Sir Edward Pakenham, and was present at the attack upon the enemy's lines near New Orleans. After the death of Sir Edward he was appointed Military Secretary to Sir John Lambert, commanding the army, and was present at the siege and taking of Fort Bowyer, Appointed Assistant-Quartermaster-General to the 6th Division of the army under the Duke of Wellington, and was present at the Battle of Waterloo. In 1828 he was appointed Deputy Quartermaster-General at the Cape of Good Hope, and commanded a division under Sir Benjamin D'Urban throughout the operations against the Kaffir tribes in 1834 and 1835. In 1840 he proceeded to the East Indies as Adjutant-General, and was nominated a K.C.B. for the action of Maharajpore, in which battle he was present as Adjutant-General; and for his distinguished services in the campaign on the Sutlej and brilliant victory over the Sikhs at Aliwal, he was nominated a G.C.B., and afterwards created a baronet. Finally, as Governor and Commander-in-Chief at the Cape of Good Hope, he attacked and defeated the Rebel Boers at Boem Plaats, 29th August, 1848. Sir Harry has received the war medal and twelve clasps.

News has been received of the decease of Major-General Sir Henry George Roberts, K.C.B., of the Bombay army, which happened a few days since at his residence, Hazeldine House, near Redmarley, Worcestershire, in the 61st year of his age. The deceased general was the second son of the late Mr. W. Roberts, of Gloucester, and was born in 1800. He entered the military service of the East India Company in 1818, on the Bombay establishment, and attained the rank of Major-General in 1854; he was also colonel of the 21st Regiment of Native Infantry. He married, in 1838, Julia Maria, daughter of the Rev. Robert Raikes, rector of Longhope, Gloucestershire, by whom he has left a family to lament his loss.

Lieut.-Colonel James Spence, C.B., late of Her Majesty's 31st Regiment, who died at Bath on Monday last, entered the Army at an early age, and had seen much service. He was present with his regiment in the action of Stuola, near Genoa, on the 13th of April, 1814, and in the subsequent attacks upon the city of Genoa until its surrender, and also at the surrender of Corsica in the same year. In 1815 he served with the Army in Naples. In 1825 he was present at the burning of the ship Kent, in the Bay of Biscay, on the 1st of March. He commanded the 31st Regiment throughout the campaign on the Sutlej, for which he received the war medal and three clasps; at the battles of Moodkee (soon after its commencement), Ferozeshah (for which he was appointed a Companion of the Bath), Buddiwal, and Aliwal, and the 1st Brigade of Sir Harry Smith's division at the battle of Sobraon, and was one of only five officers out of thirty who escaped being wounded in all these actions. At Ferozeshah and at Sobraon he had his horse shot under him.

We have to announce the death of Lieutenant Benjamin Peyton Sadler, R.N., which occurred at Clifton on Thursday week, in the 61st year of his age. The deceased entered the Navy in July, 1811, as first-class volunteer, on board the Stork, 18, employed on the Irish station. He became midshipman in June, 1813, and from January, 1814, to April, 1815, served on the coast of North America, and was present at the capture of the United States ship President. After he had been about three years attached at Portsmouth and the East Indies, he was promoted May 25, 1818, to the rank of lieutenant. From 1818 to 1826 he was employed for periods of about three years each in ships on the Irish and Jamaica stations, since which time he has not been afloat.

We have also to record the death of Staff-Surgeon Harvey Morris, R.N., who died at his residence, Wickham Villa, Newcross, on Thursday week. He obtained the rank of surgeon, July 20, 1838, and from the following September until 1843 served in the Racer, 16, on the North America and West India station; and from February, 1855, until 1858, served in the Impregnable, 104, flag-ship at Devonport.

We have to record the demise of Admiral Charles Gordon, C.B., brother of the late Admiral Henry Gordon, who died on the 3rd instant, at his residence at Bath, aged 79. The venerable deceased was educated at the Royal Naval Academy, and entered the service as midshipman, in June, 1796. For three years he was signal officer to Admiral the Hon. Wm. Cornwallis, in command of the Channel fleet. At the close of that service he was appointed to the command of the St. Lucia, sloop, off Antigua, until May, 1807, when, we believe, he had the misfortune to be captured. The gallant admiral was afterwards appointed to the Caroline, 36, one of the squadron employed in the destruction, during November, 1809, of more than eighty piratical vessels at Ras-al-Kyma, and other ports in the Persian Gulf, rendering the most effectual assistance to his senior officer, Captain Wainwright. He was next appointed to the command of the Ceylon, adopted Indiaman of 40 guns, in which vessel he fought, in September, 1810, a gallant night action off the Isle of France with the French ships Venus, 44 guns, and Victor, 16 guns. Captain Gordon was among the wounded, and owing to his ship being disabled by the enemy he was compelled to surrender. The Ceylon was, however, retaken the same day by the Boadicea and the Otter brig. Captain Gordon and his crew were afterwards honourably acquitted by a court-martial of all blame. Since then the gallant deceased has been on half-pay. In 1840 he was made a Companion of the Order of the Bath. The late admiral's commissions bore date as follows:—Lieutenant, March 11, 1803; commander, May 20, 1806; captain, December 21, 1807; rear-admiral, November 23, 1841; vice-admiral, December 17, 1852; and admiral, January 20, 1858. Admiral Gordon was on the list of admirals which the Admiralty call "reserved half-pay." The term would imply that these officers form a reserve in case the number of active officers should require to be recruited. This reserve is but a sham; it is no reserve at all, it simply occupies a few pages in the Navy List, on which, when officers once find their names, they may bid adieu to all further solid advancement in the service. The term should at once be abolished, and officers should be told in plain English that they are "retired" and not "reserved." The present Board of Admiralty have to their credit distinctly told the service that officers who come under the terms of the Order of Council of the 1st of August, 1860, are "retired now and for ever."

We regret to announce the death of Vice-Admiral (on the retired list) the Earl of Leven and Melville, which took place on Monday last, at his residence, Melville House, in his 75th year. The deceased, David Leslie-Melville, was son of the 7th earl, by the daughter of Mr. John Thornton of London, and was born in London on June 22, 1785. He succeeded to the title on the death of his father on the 22nd of February 1820., as 8th Earl of Leven and 7th Ear of Melville. In 1824 he married the daughter of Sir Archibald Campbell. He entered the Royal Navy at an early age, and commanded a boat at the capture and destruction of a convoy in the Bay of Rosas in 1809, and became a vice-admiral in 1858. The deceased nobleman was one of the representative peers of Scotland, and a deputy-lieutenant of the county of Fife. The 1st Earl of Melville was a distinguished Minister in the time of William III., and the 1st Earl of Leven was an eminent Republican General.

On Friday week, Mr. Robert Duncan, mariner, died at Southampton, aged 93. He was present as a seaman at Admiral Lord Howe's victory over the French fleet, "the glorious 1st of June," 1794.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ASHTON—October 1, at Dresden, the wife of Major J. T. Ashton, late of Madras Horse Artillery, of a son.

BILLS—September 15, at Chatham, the wife of Mr. J. W. Bills, Chief Engineer, H.M.S. Thunderbolt, of a daughter.

MONTRESOR—September 30, at Denne Hill, Kent, the wife of Lieut.-Colonel Montresor, Grenadier Guards, of a daughter.

WEST—September 29, at 8, Berkeley Terrace, Plymouth, the wife of Captain W. H. H. West, R.M., of a son.

MARRIAGES.

BELL—RENDELL—September 28, at Kingston Church, Mr. Joseph Bell, to Emma, daughter of Mr. Henry Rendell, R.N., of Prince George's Street, Portsea.

BUCKLAND—HAVERFIELD—October 2, at St. Mary's, Woolwich, the Rev. S. Buckland, to Isabella Elizabeth, daughter of the late Captain Haverfield, R.N.

CLEVELAND—BARROW—September 11, at St. Thomas's Cathedral, Bombay, by the Rev. F. J. Spring, Henry Cleveland, Esq., to Effie Magdalene, eldest daughter of Major Barrow, Commandant Marine Battalion.

JAMESON—BRIAN—At St. Mary's, Islington, Thomas Jameson, Esq., of Egremont, Dublin, to Jane Sarah, youngest surviving daughter of the late Robert Brian, Esq., M.D., R.N., of St. Mary's Road, Canonbury.

OVERLAND ROUTE.

COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., VIA EGYPT.

THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne and Sydney, by the steamers leaving Southampton on the 20th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

EDINBURGH, Twice a Week, from Irongate Wharf, Tower. Fares:—Saloon, 25*s.*; fore cabin, 15*s.*; deck, 10*s.* Return Tickets, available a month, 37*s.* 6*d.* and 22*s.* 6*d.* The cheapest and quickest sea route is by the splendid new STEAMSHIPS of the London and Edinburgh Shipping Company, sailing every Wednesday and Saturday at Ten, morning. Apply at the Spread Eagle, Regent Circus, W.; or at Irongate Wharf, E., to David Thomson, wharfinger. Passengers by these vessels going beyond Edinburgh will have the advantage of being in time for the first trains on Monday and Friday mornings to all parts of Scotland.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

INDIA, CHINA, AND AUSTRALIA.—OVERLAND ROUTE.—Officers and Civilians returning from Furlough, or joining on first appointment, can secure their passage through Messrs. WHEATLEY & CO. (late Waghorn), West End Office, 23, Regent Street, Waterloo Place, S.W., and be thus spared the inconvenience, delay, and trouble of going to the City. Handbooks on application. Baggage collected and shipped at a through charge. Insurances effected. Files of the latest news in the Reading-room.

ARMY, NAVY, AND COLONIAL AGENCY.—From and after 1st January, 1861, Messrs. W. R. LOOKER & Co. offer the services of their Agency to Officers and Members of the above Services at a fixed charge of ONE GUINEA per annum.

A detailed prospectus forwarded on application. 12, Pall Mall East, London, S.W.

MESSRS. A. K. KING AND COMPANY, ARMY & GENERAL COMMISSION AGENTS, 41, OLD COURT HOUSE STREET, CALCUTTA.

TO OFFICERS, REGIMENTAL MESSES, &c.

MESSRS. SAUNDERS, OTLEY, & CO., East India Army Agents, 50, Conduit Street, Hanover Square, W., draw and remit Pay, Pensions, Dividends, &c., and transact every description of Financial Business. They purchase and forward Miscellaneous Supplies, and ship them to Officers, Regiments, and Messes in India and the Colonies. Letters and Parcels received and forwarded.—SAUNDERS, OTLEY, & Co., East India, Army, & Colonial Agents, 50, Conduit St., Hanover Square, London, W.

MESSRS. ADDISON & CO., ARMY AGENTS, 11, WATERLOO PLACE, PALL MALL, S.W. Exchanges negociated.

Pecuniary accommodation afforded o officers on full pay, on their notes of hand only, at a few hours' notice. Applications by letter promptly attended to.

Every description of army business transacted.

REMITTANCES TO INDIA AND AUSTRALIA.—The undersigned GRANT DRAFTS and LETTERS OF CREDIT on Calcutta, Madras, Bombay, Melbourne, and Sydney, at the exchange of the day. Rupee Paper and Interest Bills negociated.—GRINDLAY & Co., East India Army Agents, 55, Parliament Street, S.W.

HUNTERS AND CHARGERS, &c., &c.—TALLY HO!—Gentlemen requiring MOUNTS for the coming season will study their pecuniary and personal safety by sending address and postage for October Number of ROYAL BRITISH & FOREIGN HORSE REGISTER, in which will be found advertised some noted flyers in the stables of noblemen and private gentlemen declining hunting, &c. Wanted for sale immediately, sound horses of all kinds. Many applications for young, well-bred horses, likely to make hunters. Address, the Secretary, Horse Bazaar, 76, Berners Street, Oxford Street, London, W. Some troop chargers and young high-bred horses, suited for officers' chargers, on sale, 50 per cent. under ordinary prices.

THE EXMOOR PONIES, COBS, AND GALLOWAYS.—The ANNUAL SALE of SIXTY EXMOOR PONIES, the property of F. W. Knight, Esq., M.P., and TWENTY-FIVE COBS and GALLOWAYS, the property of Mr. Robert Smith, will take place (as usual) at Bampton Pony Fair, on Thursday, October 25.—Catalogues will be prepared one month prior to the sale, and every information given by Mr. SMITH, Emmett's Grange, Southmolton.—Sept., 1860.

M. M. KEANE, late Secretary of Royal Northern Yacht Club, at the request of several yachting friends, has established himself in West Cowes, Isle of Wight, as AGENT for the BUYING and SELLING of YACHTS, and as SUPERINTENDENT of their building, lengthening, and repairing; as also for marine insurance thereon. In support of his ability to fulfil these duties properly, and in respect of his being held worthy of confidence as regards integrity, he begs leave to state he holds testimonials of service speaking to these qualifications and others of a similar nature, which can at any time be shown if required. Any sale of yachts effected in conjunction with secretaries of royal yacht clubs or yacht agents generally. The commission to be considered as divisional. And, at the risk of appearing self interested, M. Keane feels bound to point out to the various owners of yachts in the far-off parts of Great Britain and Ireland the greatly increased prospect of both a speedy and satisfactory sale of their vessels if laid up in such a splendid yacht rendezvous as Cowes, so easily approachable from London and the whole south of England. Owners of yachts placing them in M. Keane's charge, at Cowes, for sale, after their crews have moored them, will have simply to pay a charge of 1*s.* per day as compensation for their safe keeping until sold; damage from fire and violence of weather or collision, M. Keane not being responsible for, these being necessarily covered by insurance; but security for the price of any yacht placed in his hands for sale can be fully given if demanded, or advance in cash on proposed amount of sale.

Be pleased to address Captain M. KEANE, No. 10, Bath Road, West Cowes, Isle of Wight.

TERMS OF AGENCY for the Buying and Selling of Yachts:—Up to 1000*l.*, 2 per cent.; from 1000*l.* to 2000*l.*, 1½ per cent.; from 2000*l.* upwards, 1½ per cent. For constant superintendence on the building a new yacht, of Class A 1, 2 per cent.; this to include designs for interior accommodation, &c. For constant superintendence on the repairing or lengthening a yacht, if amounting to the sum of 200*l.*, 3 per cent.; and, if amounting to 300*l.*, 400*l.*, or 500*l.* or upwards, 2 per cent. Any expenses incurred by agent in advertising yachts for sale or purchase, at the desire of owners, or in forwarding telegrams, as also such travelling expenses as may be incurred at owners' request, to be defrayed by such owners.

SILVER CORNOPEAN (by DISTIN) TO BE SOLD, a bargain. To be seen at Messrs. ROWLANDS & FRAZER'S, 146, Regent Street, W.

MILITARY BAND INSTRUMENTS.—JOHN KOHLER, Military Musical Instrument Manufacturer to Her Majesty's Army and Navy, and Her Majesty's Indian Army, the Royal Militia, and the Volunteer Forces of Great Britain, 35, Henrietta Street, Covent Garden, London, W.C. THE GORGET SHIRT, Jos. FRYER & Co., Patentees. 6 for 42s. Next door to the Haymarket Theatre, S.W.

MAPPINS' TABLE CUTLERY.—SEASON 1860.

CAUTION.—MAPPIN BROTHERS beg to advise their customers and correspondents that they have only one establishment in London, viz., at London Bridge, and they hope that their friends will be careful to address them in full, either Mappin Brothers, London Bridge, London, E.C.; or Mappin Brothers, Queen's Cutlery Works, Sheffield. Established in Sheffield, A.D. 1810. None are genuine without their corporate mark, the "Sun," granted to their father by the Cutlers' Company of Sheffield, June 26, 1835.

Messrs. MAPPINS' Table Knives still maintain their unrivalled superiority; all their Blades being their own Sheffield Manufacture, are of the very first quality, with secure Ivory Handles, which do not come Loose in Hot Water; and the difference in price is occasioned solely by the superior quality and thickness of the Ivory Handles.

	Ordinary Quality. £ s. d.	Medium Quality. £ s. d.	Best Quality. £ s. d.
Two Dozen full-size Table Knives, Ivory Handles	2 4 0	3 6 0	4 12 0

MANUFACTORY, QUEEN'S CUTLERY WORKS, SHEFFIELD.

DAVIESON'S EVERLASTING TEETH.

THE LATEST DISCOVERY.

MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth. Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 449, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

THE QUARTERLY REVIEW, No. CCXVI., is published this day. CONTENTS:—

I. The Empire of Brazil.
II. Deaconesses.
III. Public Schools.
IV. Wills and Willmaking.
V. George Eliot's Novels.
VI. Arrest of the Five Members by Charles I.
VII. Iron Sides and Wooden Walls.
VIII. Competitive Examinations.

[COPY.]

"Ordnance Select Committee, Royal Arsenal, Woolwich, April 17th, 1860.

"Sir,—Since I last addressed you on the subject of your Waterproof Cartridges, I have to inform you that 60 of them have been exposed in an atmosphere saturated with moisture, at a temperature of 90 degrees, for a fortnight. The result has been favourable, as far as this test is concerned, to their Waterproof qualities.

"I have, therefore, to request you will be good enough to state, for the information of the Committee, the nature of the lubrication you employ; whether it is in any way connected with the Waterproof properties of the Cartridge, and whether, in the event of their being adopted, the Service lubrication, which is wax, might not be employed.

"I have the honour to be, Sir,
"Your obedient Servant,
"J. H. LEFROY, Colonel, R.A.

☞ *It is particularly requested that applications for copies of the* ARMY AND NAVY GAZETTE, &c., *and Advertisements, should* NOT *be sent to the Editor, but to the Publisher,* MR. ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

WE are accustomed to read in every newspaper free criticisms of the "official" mode of judging of things, and of doing business, with the usual taunts of "routine, and red tape, and circumlocution." What the "authorities" do has thus become to mean the worst mode of doing business, or, rather, as it is called, "how not to do it." No doubt this bad character has, in a measure, been earned, and is often deserved; but, still there must be a limit to this mode of talking. If public writers do not proceed upon the homely principle of sometimes "giving the devil his due," but adopt, once for all, the less just precept, "give a dog a bad name, and hang him;"—if they do not discriminate between what is well done and what is bungled, not only will their censure fail to operate beneficially upon men in office, and the conduct of public affairs, but it may come in time to be reckoned as praise. That we ought to have the best men in the public service is true. But still we cannot hope that no failures can ever occur in administrating the complicated affairs of the State machine: and we ought to keep in mind that no such severe test as that applied to men in office, is ever brought against the management of commercial undertakings, which are too often assumed to be governed by absolute wisdom and infallible judgment. There is an optimist exaggeration in favour of mercantile management, as there is the pessimist view of official administration. The numerous mercantile frauds of the last two or three years have only the single Exchequer bill forgeries — on a much smaller scale, and most clearly exceptional—to match them on the part of officials. We will not adduce the Crystal Palace as a commercial failure; but what would have been said if an undertaking so ruinously grand as the building of the Great Eastern had been undertaken by Government? And who can deny that the defects in the gun-boats built for the Russian war are much more discreditable to the private ship-builders in whose yards they were "scamped," than to the public department which failed to find an adequate amount of superintendence to detect such frauds? In making this allusion to the gun-boat scandal, we recognise with the greatest pleasure the general faithfulness with which Mr. Laird and the majority of the contractors fulfilled their contracts. But in doing so we cannot help observing that the fact at once takes away all real excuse from the few contractors in whose yards green timber was allowed to be used, and short bolts to be driven. We also think that those inspectors who observed and in some cases checked these evils, utterly failed in their duty—according to our idea of what their proper duty was—in not reporting to headquarters that men had dared to drag unseasoned timber through the mud to cover its defects. By failing to do so, in fact, the inspectors allowed the Admiralty Department itself to be hauled through a considerable amount of dirt. We do not adopt the *Saturday Review's* theory of what such inspection ought to be; namely, that the form of weekly report by the inspectors ought to have contained a column "to specify whether the materials used were sound or worthless;" because, as we think, no worthless materials ought to have been allowed by the inspectors to be used in building the vessels. Our learned contemporary is great in scholastic matters, obscurely grand upon politics, and "superfine" upon morals and social propriety; but, of late especially, he has not been quite up to the mark in reference to the branches of mechanical science which relate to shipbuilding and projectiles. If the Admiralty had had a form to specify how far the gun-boats were built of sound timber, or of worthless materials, we apprehend no censure of the press would have been sharper against such a manifest sanction of the use of green and sappy timber, than that of the *Saturday Review* itself. Instead, then, of considering an inspector to be merely a recorder of how the work he is inspecting is done—we consider his especial duty to be, to see that it is always and only done properly; but inasmuch as he cannot always see every inch of timber used, and every bolt or nail driven, we think it the more incumbent upon him to take serious notice of the least attempt at fraud; and that the contractors, moreover, should be also held responsible for the quality of the work. The inspector ought not to be considered as relieving the contractor in any degree, but only as being present on the part of Government as an additional security that the public will be well served. We should not have had the press teaching the Board of Admiralty that it was now about time to think of building at least as many invulnerable vessels as the French, if Sir Baldwin Walker had not infinitely more on hand than any one man or any three men could do with any credit; nor should it have been left to the press in October, after a month's discussion, to grope its way from wall-sided vessels at last to recommend to the Admiralty to try another form of iron-clad frigate more effectual for resisting shot, in accordance with actual experiments made by officers under the Admiralty in August last, and the results of which had doubtless been officially reported to their lordships and the Comptroller of the Navy long before the additional vessels—wall-sided, like the Warrior — were recently ordered to be laid down. We trust that the Comptroller of the Navy will not be afraid to order the building of iron-clad vessels, protected over-head, and without masts, because the naval critic in the *Saturday Review* thinks they would be "like logs in the water," if so built. When a sailing vessel's masts "went by the board" in a storm, it has been a stock phrase for describing her condition, and then very true, that she had become "like a log upon the water," without stability, and driven hither and thither by the waves; but it is ridiculous to apply this to a vessel moved by steam power. Her oscillations may be somewhat slower (like the slower vibrations from the greater length of a pendulum), but they will also be somewhat greater. We notice this at present, not with the view of discussing the point scientifically (and by the way this has been done very effectively by Captain Gardiner Fishbourne, R.N., in more than one able lecture published in the Journal of the Royal United Service Institution), but because it is of consequence to call attention to antiquated and erroneous opinions. This observation in the *Saturday Review* occurs in the last number, in which Mr. Hans Busk is severely taken to task for somewhat loosely describing the progressive increase of velocity arising from continuous force applied to a moving body as "a force that increases progressively." In the same article we also find the following very rare specimen of sharp practice in criticism, which does not however seem to us to have hit very truly: "Mr. Busk, in happy ignorance of the law of the composition of rotatory velocities, assumes that the effect of resistance would be the same on a bullet that does rotate, and on an arrow that does not!" What has become of the feathers on the shaft of the arrow?

But to resume our more general reflections upon public departments, we must refer to the letter of Mr. Mackay in last week's GAZETTE, in which he says that he "proved" in a letter to the *Times*, that the data on which Captain Eden's evidence was founded relative to the comparative expense of the Himalaya and Indiana, were entirely fallacious. We think Mr. Mackay proved nothing of the sort in his letter to the *Times;* and if the letter had been sent to this journal we should have pointed out that the fallacy was all his own. His argument was that the Himalaya and Perseverance could carry more than 1400 troops—the number they conveyed to Malta on the occasion in question—when the Indiana conveyed 350 at a rate 3½ times greater than the cost in the Government transports. Mr. Mackay assumed that the two troop-ships had no other freight than the troops they then conveyed —just as illogically as if any one had said that his vessel, the Conway, only sailed with some 400 women and children, when she had coals, and other stores besides, amounting to no less than 759 tons. Mr. Phillipps also wrote to us to impugn the data in the comparison of the relative expense of these vessels, on the ground that wear and tear and seamen's wages were not included in the estimate produced by Captain Eden before the Transport Committee. But this criticism is equally wrong, and we must express our surprise that men of business of great reputation should be so completely out in a matter where it was so very easy to be right. The estimate is plainly given in detail in the Blue Book; in which, also, Mr. Mackay will find other estimates based upon facts, and proving the same thing, independently of the freight actually paid for the Indiana, and the space available for troops in the Himalaya and Perseverance. Mr. Mackay also blames us for making much of Mr. Phillipps' evidence, when, on the contrary, we really did not imagine that what he certainly did venture to prophesy as regards the danger of cutting up the decks of vessels, would be so soon in a measure proved by the fate of the Conway. We shall not now go further into the case of that vessel till the result of the official inquiry is known; but we may observe that after the vessel was rejected by the Indian department she had a new main mast put into her, with the various yards and spars; and it must be plain to everybody, that if these were necessary in the middle of July, before the Emigration Commissioners accepted her, they must surely have been equally wanted only one or two weeks before, when offered to the Indian Council by Messrs. Baines, or Mr. Mackay, on their behalf. As a Service journal, while we do not shrink from freely criticising "officials," or public departments, when necessary, at any time, we consider we have equally a duty to perform in criticising their critics when at fault; and Mr. Mackay must excuse us if we are perfectly free in judging his firm, especially when their proceedings affect the public service and the safety of the wives and children of our troops.

The members of the Royal Commission appointed to inquire into the state of the Royal Dockyards assembled, on the 16th inst., as previously announced would be the case in this journal, and on Thursday and yesterday Sir Baldwin Walker, the Comptroller of the Navy, was examined. It is expected that the evidence tendered by some of the officials will differ very much from that offered by others, but we question if the result will be in any way profitable to the public.

We are informed that at a Cabinet Council held a few days since at St. Cloud, at which the Emperor presided, it was resolved that important works should be immediately commenced, to strengthen the fortifications of Cherbourg and Algiers, and likewise that a number of steel-cased frigates should be constructed on the model of La Gloire. Admiral Hamelin, Vice-Admiral Bouet-Willaumez, and Rear-Admiral Dupony spoke in favour of these measures. There is a report current in naval circles in this country that La Gloire has proved a failure, and that during her late experimental trip to Algiers she was very nearly foundering. The decision at which the government of Louis Napoleon has arrived does not, however, support the statement.

THE ARMY.

6th Dragoon Guards. A Board of Examination assembled at Aldershot, at the mess of the 9th Lancers, at 11 a.m., on Tuesday the 16th instant, for the purpose of examining and reporting upon Cornets Fryer and Dakin, as to their qualifications for promotion to the rank of lieutenant.

7th Hussars. Lieutenant and Adjutant Mould goes out by the White Eagle on Thursday next to join the service troops in India.

9th Lancers. This distinguished regiment was inspected by the Duke of Cambridge on Wednesday the 10th inst. at Aldershot. Each troop according to seniority came into the riding school, and was most minutely inspected. The duke was delighted with the appearance of the men and horses, and told Colonel Little "that he commanded a splendid-looking regiment." The 9th landed in England on the 1st of October, 1859, after a long career of most brilliant services in India.

13th Light Dragoons.—The officers, whose case was alluded to in exaggerated terms by our respected contemporary, the *Scotsman*, have been reinstated in the club; but General Cameron is holding an inquiry into the circumstances which led to the publicity given to the affair, and there is no doubt he will do justice.

Royal Artillery. The Deputy-Adjutant-General, Col. C. Bingham, has issued a General Regimental Order, in which the following changes, &c., of the Royal Artillery are announced:—Major G. T. Field to be Deputy-Assistant-Adjutant-General to the Royal Artillery on the staff at Woolwich, vice Captain Freeth, whose period of staff service has expired. Major Field will assume the duties of his appointment on the 1st proximo, when Captain Freeth will join his battery in the 1st Brigade. Second Captain F. G. Ravenhill to be Assistant-Adjutant-General to the Royal Artillery in the Bengal Presidency, vice Calvert, who resigns that appointment only. Second Captain O. H. A. Nicolls to be Aide-de-camp to Major-General O'Brien, commanding the troops in Ceylon. The following removals of batteries have been ordered:—Major Arbuthnot's K battery, Horse Brigade, from Aldershot to Dorchester; Major Green's No. 5 battery, 9th brigade, from Aldershot to Exeter. The exchange of batteries ordered between Second Captain W. L. Yonge and Second Captain F. G. E. Warren has been cancelled. An exchange of batteries has been ordered between Captain and Brevet-Major D. S. Greene, of the 1st Brigade, and Captain G. H. Colomb, of the 9th Brigade. Paymaster Graham is posted to the 9th Brigade, and Surgeon Bone, M.D., to the 13th Brigade. When men are sent home from foreign stations, the paymaster, or officer acting as such, is invariably to send a No. 1 report to the officer or non-commissioned officer in charge of the party, and a duplicate thereof by post to the Paymaster, 2nd Division, Depot Brigade, in order that no delay may occur in adjusting the men's accounts on their arrival. A detachment arrived at Woolwich on Saturday from Sheerness.

Royal Engineers. The 35th company under the command of Captain J. E. Cornes, marched from the South Camp Aldershot, to North Camp Station, Aldershot, at 7·15 a.m. on the 16th inst., and proceeded by the 8·10 a.m. to Chatham. The A troop, Royal Engineer Train, marched from Aldershot on Tuesday 16th instant, to Guildford, *en route* to Chatham, and the dismounted portion of the troop marched from the South Camp at 7·15 a.m. on Thursday, the 18th inst., and proceeded by the 8·10 a.m. train to Chatham. The 33rd (Capt. Lempriere's) Company of Royal Engineers was inspected on Monday at Brompton Barracks by Colonel H. D. Harness, C.B., director of the Royal Engineer establishment, prior to its departure for Aldershot Camp, where it arrived on Tuesday. Major-General Eyre has forwarded an order to Colonel Harness directing him to announce to the officers and men of the Royal Engineers his complete satisfaction with the state of the corps on the occasion of the half-yearly inspection. The whole of the staff belonging to the deputy-adjutant-general's office, at the head-quarters of the Royal Engineers' establishment, at Brompton, is to be removed to Whitehall Gardens. Some of the clerks have already left, and Colonel J. W. Gordon, C.B., Deputy-Adjutant-General, and Colonel Edward Stanton, C.B., Assistant-Adjutant-General, will both leave in the course of a few days, as soon as the books and documents connected with the corps are packed up and sent to London.

1st Regiment, 1st battalion. Captain White has leave of absence from his depôt at Colchester until December 31st.

6th Regiment, 1st battalion. Captain R. Thompson and Lieutenants Kelson and Whyte have leave of absence to the end of the year.

8th Regiment. The 1st battalion was this week officially inspected on the parade ground in the rear of their barracks at Gosport by Major-General Lord W. Paulet, C.B., commanding the South-Western District. His lordship on arriving on the ground, was received with the customary honours. After passing along the lines and minutely inspecting the men, the regiment passed in slow and quick time in a remarkably steady and soldier-like manner, then closed to quarter distance, when his lordship addressed the regiment in the following terms:—"I had the pleasure, immediately before you left this country for India, of being quartered in this same garrison with you, as I then commanded the 68th Light Infantry. You were then equal to any regiment in the Service; in fact you were one of the smartest in every way, as any one must have observed who had seen you. You always have borne a good name in those days, and since then you have, if possible, acquired a better one. Since your arrival from India you have given me no trouble whatever, and I trust that it may continue so. I am aware that a great many of you have brought home sums of money from India which I hope you will spend in a proper manner, neither getting drunk yourselves, nor making your comrades drunk. Treat the latter if you like, but do so in a right way, and stop when you have given them enough. I have great respect for this regiment, and am glad to see it again in the manner I now do." His lordship then dismissed the regiment from parade, and visited them at their dinners, afterwards inspecting their kits, the hospital, school-room, and barrack rooms, and regimental accounts, &c., with the whole of which he expressed his entire satisfaction. The conduct of the men of this distinguished regiment since they have been quartered in the garrison on their arrival home from India has won for them the esteem and respect of all with whom they have come in contact.

37th Regiment. Captain Luxmore and Ensign Holton have leave of absence until the end of the year.

38th Regiment. Brevet-Major Vance, Lieutenant Bicknell, and Ensign Skinner, have leave of absence from Colchester Camp till the 31st of December.

44th Regiment. Ensign Walsh is about to proceed to Landguard Fort, Harwich, to relieve Ensign Michell of the 66th, who will return to the Camp. Captain Fleming and Ensign Overton have leave of absence to the end of the year.

Royal Marines. On Wednesday morning, Captain J. Stewart, First Lieutenant G. W. T. Hemmans, and Second Lieutenant E. M. Messiter, with 100 non-commissioned officers and men of the Royal Marine Light Infantry, and the band and colours of the division, proceeded to Gravesend to serve as a guard of honour on the occasion of the disembarkation of Her Majesty at the Terrace Pier.

54th Regiment. Lieutenant Wood and Ensign O'Brien have leave of absence from their depôt at Colchester till the 31st of December.

56th Regiment. Captain Eccles, Lieutenant Gubbins, Ensign Wood, Ensign Burnett have leave of absence to the end of the year.

66th Regiment. Captain Walker and Ensign Addison will be absent on leave from Colchester Camp till December 31st.

88th Regiment. Ensign Bowen has leave of absence from his depôt in Colchester Camp till the 31st of December.

91st Regiment. Ensign Robert B. Wesley, in charge of detachments from the 3rd Depôt Battalion, at Brompton has proceeded to Eastbourne, where the men, consisting of drafts of non-commissioned officers and men of the 1st battalion 19th Regiment, 51st (King's Own) Light Infantry, and 75th and 91st Regiments, will undergo a course of instruction in rifle firing at long ranges previously to embarking for India.

9th Depôt Battalion. Major Westhead, on the staff of this battalion, in command of Landguard Fort, has been granted leave of absence from that station till the 31st of December.

10 Depôt Battalion. Staff Quarter-Master Anderson has leave of absence from the present time to 30th of November.

The following Circular has been issued:—"War Office, October 9.—Questions having arisen as to the extent to which the beds of soldiers, who may be temporarily absent from their barrack-rooms, shall be occupied by other soldiers, who may, for want of barrack accommodation, be necessarily in the receipt of lodging money, Mr. Secretary Herbert has decided that in future the beds of men who may be in hospital, in cells, or on short furlough, not exceeding a fortnight, shall be considered as occupied, and consequently not available for the accommodation of other soldiers. Barrack-masters will be guided by this in certifying claims for lodging money, and in preparing the monthly occupation returns.—B. Hawes."

The *Friend of India* publishes a general order issued by the Commander-in-Chief, directing every officer who applies for leave to Europe to send in with his application a statement of his services, and a detailed history of his whole official life, with a declaration that he has never been the subject of a court-martial, or, if so, giving the facts of the case. According to the Calcutta *Englishman* the order was issued in obedience to instructions from England. The authorities there wish an authentic record of the services of each officer, that they may be able to meet applications for employment.

As some misunderstanding has arisen at Woolwich with reference to the duties required of the Deputy-Inspectors General of the Royal Artillery Infirmary, and his position on the staff, Major-General Sir Richard Dacres, K.C.B., commanding at Woolwich, has issued a garrison order, desiring it to be clearly understood that the position of the Deputy Inspector-General is precisely the same as that laid down at page 42 in the code of "Medical Regulations" for principal medical officers in a general hospital.

The military invalids from Corfu, Malta, and Gibraltar, who reached Portsmouth in the screw steamer Himalaya, Captain J. Seccombe, arrived at Fort Pitt Hospital, Chatham, on Thursday afternoon, in charge of Lieutenant D. B. Moriarty, 2nd battalion 6th Regiment. The number of invalid troops who reached Chatham was 105 non-commissioned officers and men. No death occurred among the troops on board during the voyage. On their arrival at Fort Pitt yesterday afternoon the invalids were medically inspected by the staff at that establishment, when 27 non-commissioned officers and men were taken into hospital for medical treatment, and the remainder forwarded to the invalid establishment, St. Mary's.

Nominal returns of men who were employed in the Field Works at Cæsar's Hill, under the Royal Engineer Department, are required to be sent to the Assistant-Quarter-Master-General's Office for signature, to enable the men to receive the 4*d.* a day allowed for wear and tear of clothing.

The garrison of Marseilles is about to be reinforced by two battalions of the 12th Regiment of Infantry and by two squadrons of the 6th Hussars.

Lieut.-General Sir J. F. Love, Inspector-General of Infantry, has decided that officers shall take their leave of absence, and non-commissioned officers and men receive their furloughs, from the 1st of November, without waiting for his annual inspection.

It appears from some correspondence read at the last meeting of the Great Yarmouth Town Council that the Government propose to take four acres of land for the proposed batteries at the mouth of that harbour. Accommodation is to be provided in connection with the batteries for 100 men.

His Royal Highness the General Commanding-in-Chief having directed that in future lieutenants of the Royal Artillery shall, before being promoted to the rank of captain, undergo an examination as to their qualifications, in the same manner as laid down in the "Queen's Regulations and Orders for the Army," page 71, paragraph 30, the same is notified for general information and guidance. The subjects on which the officers will be examined, in addition to those enumerated in the regulations referred to, will be chiefly of a professional nature, and a programme is in the course of preparation which will be published when complete. The examination will commence on the 1st of April, 1861, with the then thirty senior lieutenants, and will continue from time to time with every officer as he becomes the thirtieth from the top of the list of lieutenants.

A company of artillery has arrived at Landguard Fort, Harwich, for the purpose of practically testing the qualifications of a new canon-ball, manufactured by Messrs. Ransomes and Sons, of Ipswich.

A party of sick and disabled troops belonging to various regiments at Aldershot Camp arrived at Fort Pitt Hospital, Chatham, on Tuesday evening, for medical treatment at that establishment. Notwithstanding the exceedingly unfavourable state of the weather, the troops in camp are generally healthy, and there is comparatively little sickness existing among the men of the several corps.

LANDGUARD FORT.—In consequence of the continuance of bad weather, the encampment formed upon the shore near Landguard Fort, has been broken up, and all the soldiers who cannot be accommodated in the fort, have been recalled to the Colchester Camp. The tents were erected in the month of June, and from that time drafts of men have been periodically sent down from Colchester Camp for rifle practice, under a well-organised staff of rifle instructors, the command of the encampment having been ably sustained by Major Westhead.

ARMY HOSPITAL CORPS.—Another draft is ordered for China. The draft proceeds to Southampton, to embark in the mail steam packet, their route being overland to Hong Kong. An order has also been received at the head-quarters at Brompton, from the War Office, for the Army Hospital Corps to discontinue recruiting or receiving volunteers.

THE DEVONSHIRE RIFLE CONTEST.—The *Exeter Gazette* publishes in its second edition of Saturday the following results of the rifle contest held at Newton Abbot during the week:—The 100*l.* prize was carried off on Friday by Sergeant Gulston, of the 12th Regiment of Foot, who made 7 points at 700 yards, and 3 at 900 yards. Private Honnsell, Dorset Volunteers, made 1 point at 700 yards, and 5 at 900 yards. Lieutenant Richardson, Royal Artillery, 3 at 700 yards, and 3 at 900 yards. Sergeant-Major Park, 2 at 700 yards, and 4 at 900 yards. Sergeant Hook, 3rd D.R.V., is expected to win the challenge cup.

REWARD FOR GOOD CONDUCT.—The following extract from the Good Conduct Regulations, published for general information throughout the Army, has been circulated:—"A reward for good conduct is granted under the following rules:—Every soldier having served three years, provided his name shall not have been entered in the regimental defaulters' book at least two years immediately preceding his claim, is to receive 1*d.* per day; after eight years, having been uninterruptedly in the receipt of 1*d.* a day for two years preceding his claim, he will receive 2*d.* per day; after 13 years, in like manner, he will receive 3*d.* per day; after 16 years, 4*d.*; after 23 years' service, 5*d.* per day; and after 28 years, 6*d.* per day. All soldiers who shall have completed 16 years' service, and whose names have not been entered in the regimental defaulters' book for the last 14 years preceding his claim, may receive the rates of good conduct pay after 16, 21, and 26 years respectively.

TROOPS FROM INDIA.—The head-quarters at the invalid depot, St. Mary's Barracks, have received notification that the ship Tudor, having on board 106 invalids and limited service men belonging to regiments in Bengal, from Calcutta, may be expected daily at Gravesend.

THE WIDOW OF SIR HARRY SMITH.—In the obituary notices of the late gallant general which have appeared, it has been briefly mentioned that Sir Harry Smith married a Portuguese lady. A most romantic story is told of the manner in which he became acquainted with that lady. After one of the actions in the Peninsula, in or about 1813, a Spanish officer of high rank and great gallantry, with whom Sir Harry happened to have a slight acquaintance, was found mortally wounded on the field. He lived for two or three days, and while in the hospital, to which Sir Harry had him conveyed, he sent for his wife, to whom he had been married only a few weeks, and who was a Spanish beauty of between 15 and 16 years old. The dying officer entrusted the lady to his gallant English friend, with a request that he would see to her welfare. How well he discharged the confidence thus reposed in him was shown by the fact that no sooner was the war in Spain at an end than he made the Donna Susanna de Leon Mrs. Colonel Smith. The marriage was never blessed with issue. The gallant general has left a brother and a sister to lament his loss. His remains were interred yesterday at Whittlesea, very privately, but it was not possible to prevent the Volunteers and others joining to do honour to his memory.

SHORNCLIFF CAMP.

On Friday the 12th inst. the officers of the 16th Regiment gave a variety of prizes. Several capital races, some excellent high jumping, and a variety of sports, such as wheelbarrow races run blindfolded, running in sacks, jingling, took place, affording much amusement to the spectators. Lieutenant Toogood, R.A., won a handsome hunting whip in the officers' hurdle race, and Lieutenant Le Feuvre, 16th, won the officers' flat race; Lieutenant Sheringham, second, and Dr. Kehoe, third. Private Berry, 16th, won several of the foot races for privates, including one 300 yards in full marching order, with rifle and kit complete. The officers gave a luncheon to the visitors after the races, and wound up by a ball in the evening. On Saturday evening the non-commissioned officers, by permission of the Lieut.-Colonel commanding, opened their winter evening parties in the new reading-room, to which a large number of the non-commissioned officers of the other regiments in the camp were specially invited. Several of the officers joined the party, and danced in several sets of quadrilles.

The non-commissioned officers of the 1st battalion 16th Regiment, on Monday last, assembled in the new reading-room for the purpose of dining and presenting a testimonial to Sergeant and Bandmaster George Carr, who has completed his service and is leaving the regiment. The testimonial consisted of an elegant silver cup, purchased by subscription amongst the sergeants of the battalion, and bore the follow-

Digitized by Google

ing inscription :—"Presented to Bandmaster George Carr by his brother non-commissioned officers of the 1st battalion 16th Regiment, as a mark of the esteem and respect in which he was held by them, after a service of 28 years." The presentation was made by Sergeant-Major Ramsden, who, in the name of his brother non-commissioned officers, expressed the regret they felt at his leaving the regiment, and the hope that success would attend him in his future career, to which Sergeant Carr made a suitable reply.

A general court-martial assembled in the officers' mess room of the B range on Thursday last, of which Lieut.-Colonel Carey, 2nd battalion 18th Regiment, was president; Major Gamble, deputy-judge-advocate; and Captain G. B. Atkinson, 17th Regiment, prosecutor; for the purpose of trying two private soldiers of the 2nd battalion 17th Regiment, on the following charges :—Private S. Darkley, for desertion, and attempting to strike Major M'Kinstry, of the 17th Regiment; and Private Watson, for breaking out of camp, and for striking Surgeon Clutterbuck whilst under medical inspection. The finding will not be made known until approved of by the Commander-in-Chief.

Brigadier-General Garvock, half-pay unattached, has taken command of the 2nd Infantry Brigade, vice Major-General W. Freke Williams, K.H., retired from ill-health.

The half-yearly inspection of the Infantry Brigade was held by Brigadier Garvock, who expressed the satisfaction he felt in being able to report on the very efficient state in which he found each of the three regiments inspected, the first battalion of the 16th and the second battalions of the 17th and 18th regiments.

The six companies of the 18th Regiment, stationed at Deal, marched into camp and joined head-quarters on Friday last, and took up their quarters in the B range, lately occupied as a temporary hospital during the extensive repairs which have been carried out at the General Hospital, more particularly in the drainage.

Ten invalids of the 2nd battalion, 25th Regiment, and five invalids of the 29th Regiment, proceeded by the 10·34 a.m. train on Tuesday last the 16th instant, from the North Camp Station, Aldershot, *vid* London Bridge to Chatham.

COLCHESTER CAMP.

The command of this camp will shortly be surrendered by Major-General Blucher Wood to Colonel the Hon. Alexander Gordon, who has paid a visit to the garrison, and made the necessary arrangements previous to formally taking command, on or about the 1st of November. It has not yet transpired to the command of what station General Wood will be removed. His Royal Highness the Commander-in-Chief has approved of the recommendation of General Wood, Commandant of this garrison, and granted leave of absence to Brigade-Major Cooch until the 17th December. Captain Craster, of the 38th Regiment, will be acting Brigade-Major during his absence. The Hon. Col. Gordon will assume the command on the 1st of November, and has visited the camp to make the preliminary preparations to succeed General Wood. In consequence of the camp being infested with rats, orders have been issued to lay poisoned food about the ground, and the troops are cautioned not to touch it. These troublesome creatures have by some means effected an entrance beneath the floor of the huts, and their extirpation seems almost impossible.

The Army Gazette.

WAR OFFICE, PALL MALL, October 16.

1st Regiment of Dragoons—Captain James Ainslie to be Major by purchase, vice Michael Stocks, who retires; Lieutenant Walter Balfe to be Captain, by purchase, vice Ainslie; Cornet William Lawrence Gentyman to be Lieutenant, by purchase, vice Balfe.

2nd Dragoons—Thomas Jessop, Gent., to be Cornet, by purchase, vice Herbert, who has retired.

10th Light Dragoons—Captain Edward Levett to be Major, by purchase, vice Richard Plane Smith, who retires; Lieutenant Esdaile Lovell to be Captain, by purchase, vice Levett; Cornet Thomas Rees Williams Bulkeley to be Lieutenant, by purchase, vice Lovell; Honourable John Cecil Russell, from the 11th Light Dragoons, to be Cornet, vice Bulkeley.

Military Train—Captain Charles B. Wynne, from the 90th Foot, to be Captain, vice Henry Richmond Hoghton Gale, who exchanges.

Grenadier Guards—Ensign Charles James Herbert, from the Rifle Brigade, to be Ensign and Lieutenant, by purchase, vice Bridges, promoted.

4th Foot—Ensign William W. Madden to be Lieutenant, by purchase, vice Leeson, who retires.

5th Foot—John King Dooner, Gent., to be Ensign, by purchase, vice Fiddes, promoted.

9th Foot—Ensign Richard Fitzgerald King to be Lieutenant, without purchase, vice Henzell, superseded for being absent without leave; Lieutenant Edward Lutwyche England to be Adjutant, vice Bird, promoted to an unattached company.

13th Foot—Ensign Charles Henry Stevenson to be Lieutenant, without purchase, vice Theobald, deceased; Ensign George Augustus Hollis to be Lieutenant, without purchase, vice Bryant, promoted.

17th Foot—Staff Assistant-Surgeon Joseph Henry Thomas King to be Assistant-Surgeon, vice Cameron, appointed to the Staff.

30th Foot—Lieutenant Edward Dorrien Newbolt to be Instructor of Musketry, vice Lieutenant Le Mesurier, who resigned that appointment.

35th Foot—Lieutenant and Adjutant Henry Williams to be Captain, without purchase, vice Baxter, deceased; Donald James Gordon Stewart, Gent., to be Ensign, without purchase, in succession to Lieutenant Williams.

37th Foot—Ensign William James Hall to be Adjutant, vice Lieutenant William Bolton, who resigns that appointment.

44th Foot—The second Christian name of Ensign Blunt is "Lawen," and not "Seaman," as stated in the *Gazette* of the 21st September, 1860.

60th Foot—Ensign Rodney Stuart Riddell to be Lieutenant, by purchase, vice Crozier, who retires.

84th Foot—Lieutenant Robert Frederick Martin to be Captain, by purchase, vice Charles Wylde Sherlock, who retires; Ensign Norman Magnus M'Leod to be Lieutenant, by purchase, vice Martin; Ensign Henry Smith Andrews, from the 12th Foot, to be Ensign, vice M'Leod.

89th Foot—Staff Assistant-Surgeon Alexander Watt Beveridge, M.D., to be Assistant-Surgeon, vice M'Master, appointed to the Royal Dragoons.

90th Foot—Captain Henry Richmond Hoghton Gale, from the Military Train, to be Captain, vice Charles B. Wynne, who exchanges.

Rifle Brigade—Anthony Cope, Gent., to be Ensign, by purchase, vice Herbert, appointed to the Grenadier Guards.

1 West India Regiment—Ensign Robert Straker Turten to be Lieutenant, vice Lieutenant George William Reade, who resigns that appointment.

DEPOT BATTALION.

Major Charles Carew de Morel to be Lieutenant-Colonel, by purchase, vice Brevet-Colonel James Wells Armstrong, retired on half-pay.

UNATTACHED.

Captain and Brevet Lieutenant-Colonel Charles Spalding S. Evans Gordon, from the 23d Foot, to be Major, without purchase.

MEDICAL DEPARTMENT.

Assistant-Surgeon John M'Leod Cameron, M.B., from the 27th Foot, to be Staff-Surgeon, vice Bradshaw, to be placed upon half-pay.

TARGET PRACTICE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The Regimental Returns show the following average number of points and classification per cent. of men at target practice on 30th September, 1860.

Regiments.	Average Points. 1st Period.	File Firing.	Volley Firing.	Skirmishing.	Figure of Merit. Battalion.	Best Company.	Average Points. 2nd Period, 2nd Class.	3rd Period, 1st Class.	Final Classification of Men Per Cent. 3rd Class.	2nd Class.	1st Class.	Marksmen, Per Cent.
32nd Regiment	17·39	11·53	8·90	5·41	42·29	46·74	8·50	*	9	60	31	11
55th Regiment	18·01	10·54	8·04	5·64	43·13	46·04	9·24	6·31	7	49	44	3

Captain W. H. Rowland's Company, 55th Regiment, shows the highest Figure of merit, viz., 46·04.

* Not practised.

By Order,

(Signed) J. W. ARMSTRONG, A.A.G.

THE BOMBAY CAVALRY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I have heard that orders have been dispatched to India to convert the Bombay (Regular) Cavalry into Irregulars forthwith, each regiment to have six officers. As I also hear that it is not in contemplation to raise any European cavalry for service in India, I feel quite at a loss to conceive how it is proposed to employ the remaining officers of these regiments.—I am, &c.,

AN INDIAN OFFICER.

[NOTE.—The information which our correspondent has received is not altogether correct, and it is probable the year will have closed ere any decisive steps shall have been carried into effect. In reference to the organisation of the Indian Army, vested interests will always be safe.—ED.]

INVASION OF YORKSHIRE BY THE DUTCH.

At the East Riding sessions, held at Beverley, on Tuesday, a most unwarrantable invasion of the east coast by a party of 700 Dutchmen was brought to light. After the reading of the report of the chief constable (Colonel Layard), Mr. Barton, one of the magistrates, said he had listened with great attention to the report, but he was very much surprised to find that there was no mention in it of a recent invasion of the Yorkshire coast by Dutchmen. He was informed that on Sunday week a body of upwards of 700 Dutchmen landed in their vessels at the village of Kilnsea, near Spurn Point. They demanded food, and the villagers being very much frightened were compelled to supply them with it. Afterwards, however, they conducted themselves in a very riotous manner, and commenced what he believed to be a most unprovoked attack upon one of the villagers. The incumbent of the parish was passing to church at the time, and he was compelled to interfere in order to prevent bloodshed. Having done considerable damage in the village, the men again embarked in their vessels, and set out for sea. Colonel Layard said he believed the statement of Mr. Barton was substantially correct. Last Sunday week 75 dutch fishing vessels, having on board ten men each, landed at Kilnsea, and demanded food and vegetables of the inhabitants, in exchange for their herrings and fish. Many of the Dutchmen went to the village public-house, but as soon as the bells began to ring for church the landlord requested them to leave, as he wished to close his house. This some of the men refused to do, and a disturbance then took place. The windows of the house were broken, and an attack was made upon one of the villagers. The incumbent, as has been stated, had to interfere, as he was proceeding to church, in order to prevent serious injury being committed by the Dutchmen. He believed it had been the custom of these Dutchmen to exchange their herrings and fish for the bread of the villagers on the coast. On the present occasion the coast guardsmen stationed at Kilnsea were present during the disturbance, but they could scarcely interfere, inasmuch as their number was so very small compared with that of the 700 Dutchmen. The subject then dropped. Our Hull correspondent was subsequently informed that those Dutchmen paid a visit to Bridlington, along with a number of French fishermen. There were upwards of 300 foreign vessels in Bridlington Bay at one time. The foreigners went to church at Bridlington, but they conducted themselves in a very peaceable manner. In Bridlington, however, the greatest excitement and interest was awakened by the visit of so large a number of continental fishermen.

THE NAVY.

ADMIRALTY, October 16.

PROMOTION.

Lieutenant to be Commander on the Retired List—John O'Reilly (1828), who entered the service in March, 1812.

APPOINTMENTS.

Lieutenants—Cornwallis W. Martin, George R. Bell, J. W. O. Grady, E. E. Richards, R. F. Broadrick, J. H. M. Calcraft, W. F. Gregory, G. R. Keene, W. G. H. Morgan, G. M. F. Molesworth, T. C. Cholmeley, and R. H. Thompson, to the Marlborough, additional, for disposal; John Brasier Creagh (who was rewarded with the Crimean medal, the foreign orders of Knight of the Legion of Honour, and the Medjidie of the 5th class, and promoted from mate of the St. Jean d'Acre, 101, screw, for his valuable service in the Black Sea fleet throughout the Russian war) to be additional of the Royal Albert, 121, flag ship, Channel squadron; T. D. Williams to Marlborough, for disposal.

Secretaries—Arthur Jones, to Sir Houston Stewart; Henry Perry, to Vice Admiral Johnstone; Charles A. Pritchard, to Admiral Stopford.

Surgeons—Lewis Carmichael Urquhart, M.D., to the Conqueror, 101, screw, Channel squadron; John H. Carruthers to the Formidable.

Paymasters—James C. Meagher to the Desperate; Edward C. Tuomine (additional) to the Cumberland.

Mates—N. S. F. Digby to the Emerald; J. S. Eaton to the Edgar; and Robert S. Hunt to the Spiteful.

Acting Assistant-Surgeons — Robert Harding to the Miranda; Wm. Johnston to the Victory; C. H. Reeson to the Nile.

Midshipmen—John E. Pringle to the Forte, 51, flag-ship at the Cape of Good Hope; A. J. W. Musgrave to the Miranda, 15, screw-sloop, at Sheerness; Thomas V. Williams to the St. Jean d'Acre; Francis Mason to the Emerald; J. C. Burnett to the Tartar; A. L. Trevor to the Edgar; S. H. Rickman to the Hannibal; R. H. Hammond to the Victor Emmanuel; Edward Day to the Trafalgar; C. S. W. Willis and J. R. Marsden to the Diadem; F. J. J. Eliott to the Spiteful; E. L. Trafford to the Doris; C. J. Doxat and C. R. Smith to the Marlborough.

Master-Assistants—John W. H. Allen to the Mersey; Richard O. Jones and Arthur Douglas to the Bacchante; W. Scriven to the Himalaya.

Clerks—Henry J. Ray, Assistant Paymaster, to be Secretary's Clerk to the Victory; Francis A. Carter to be Clerk to the Hogue.

First-class Assistant Engineer — William Stacey to the Mersey, 40, Channel squadron.

Acting Third-class Assistant-Engineers—William Rowley and E. H. Willey to the Indus, 78, guard-ship at Devonport, as supernumeraries.

Acorn, 12, sailing sloop, Commander R. B. Pearse, was at Amoy on the 21st of August.

Actæon, 26, sailing frigate, Commander John Ward (b), was at Pehtang on the 13th of August.

Adventure, 2, screw troop ship, Commander E. Lacy, was in the gulf of Pecheli when the last mail was dispatched.

Alecto, 5, paddle-wheel steam-sloop, Commander Henry J. Raby, V.C., left Fernando Po on a cruise on the 29th of August. The Alecto had captured a slaver off the Cameroons on the 17th of August.

Algerine, 1, screw gun-vessel, Lieutenant-Commander William Arthur, was at Ningpo on the 18th of August.

Archer, 13, screw steam-corvette, Captain F. A. B. Crawfurd, was at St. Paul de Loanda on the 15th of August, all well, and was shortly to leave for St. Helena, to recruit the health of the ship's company, and for Ascension to refit. The weather this year appears to be very extraordinary in all parts of the world, for by letters from the Archer, the ship's company in 8 degrees south latitude, found it so cool, in fact cold to them, that they were glad to wear cloth clothing, and sleep in blankets at night. The slave trade is described to be very thriving, and the American men of war very successful in capturing their countrymen. As the law stands, the Britishers cannot touch a *bonâ fide* American, though full of slaves.

Banterer, 1, screw steam-gun-boat, Lieut.-Commander H. P. Knevitt, was in the Gulf of Pecheli by the latest accounts.

Beagle, 4, screw gun-vessel, Commander E. Hay, was in the gulf of Pecheli by the last advices.

Black Eagle, paddle-wheel steam-yacht, Master-Commander John E. Petley, returned to her moorings at Woolwich on Thursday, from service with the Royal squadron.

Brisk, 16, screw corvette, Captain Algernon F. De Horsey, with the flag of Rear-Admiral Sir H. Keppel on board, captured off Johanna, on the 10th of August, a fine slave vessel named the Manuela, of 700 tons, with 800 slaves on board.

Bouncer, 2, screw steam-gun-boat, Lieut.-Commander A. R. Owen, was in the Gulf of Pecheli by the latest advices.

Bustard, 2, screw steam-gun-boat, Lieut.-Commander F. W. Hallowes, was in the Gulf of Pecheli by the latest accounts.

Cadmus, 21, screw steam-corvette, Captain Henry S. Hillyar, C.B., was at Carthagena on the 24th of September.

Cambrian, 40, sailing frigate, Captain J. J. MacCleverty, C.B., was at Pehtang on the 13th of August.

Camilla, 16, sailing sloop, Commander G. T. Colville, was at Shanghai on the 18th of August.

Centaur, 6, paddle steam-sloop, Commander E. D. D. Aplin, was in the gulf of Pecheli by the latest accounts.

Chesapeake, 51, screw frigate flag-ship of Vice-Admiral Hope, Captain G. O. Willes, was in the gulf of Pecheli according to the last accounts.

Clown, 1, screw steam gun-boat, Lieutenant-Commander W. F. Lee, was in the Canton River on the 26th of August.

Cockatrice, screw gun-boat, is preparing for commission in the basin at Woolwich.

Cockchafer, 1, screw steam gun-boat, Lieutenant-Commander H. L. Holder, was at Hong Kong on the 26th of August.

Coromandel, 5, paddle steam-vessel, tender to Chesapeake, was in the gulf of Pecheli by last advices.

Cossack, 20, screw corvette, Captain Richard Moorman, arrived at Barbadoes on the 20th of September, in 28 days, from Halifax, North America, and was there on the 26th.

Digitized by Google

Cruizer, 17, screw steam-sloop, Commander John Bythesea, V.C., was in the gulf of Pecheli by the last advices.

Curlew, 9, screw steam-sloop, Commander Shaw, left Plymouth Sound yesterday week, under steam, for Rio Janeiro.

Cyclops, 6, paddle steam-sloop, Captain William J. S. Pullen, has been ordered home from the East Indies. She was at Trincomalee on the 12th of September, having arrived there from completing a survey of the harbour at Point de Galle.

Dee, 4, steam-vessel, Master-Commander T. C. Pullen, arrived at Portsmouth on Wednesday morning from Plymouth.

Diadem, 32, screw frigate, Captain James Cockburn, was placed in No. 8 dock at Portsmouth, on Wednesday afternoon, for repairs.

Donegal, 101, screw liner, Captain Henry Broadhead, left Hamoaze yesterday week under steam, and went into Plymouth Sound, where, on Saturday, she received her powder.

Dove, 1, screw-gun-boat tender to Actæon, Lieut.-Commander J. Bullock, was in the Gulf of Pecheli by the last advices.

Drake, 1, screw steam-gun-boat, Lieut.-Commander A. R. Blane, was in the Gulf of Pecheli by the last accounts.

Driver, 6, paddle-wheel steam-sloop, having undergone a thorough repair, is now ready for the pendant at Woolwich.

Duke of Wellington, 131, screw, steamed out of Portsmouth harbour on Wednesday morning, in charge of Captain G. T. Gordon, of the steam reserve, to make a trial of her machinery, previously to being docked for the examination and cleansing of her copper. It is rumoured that she will be commissioned to receive the flag of Vice-Admiral W. Fanshawe Martin, Commander-in-Chief of the Mediterranean fleet, and take the place of the Marlborough. The latter vessel, however, has not been in commission three years until February next.

Emerald, 51, screw-frigate, Captain Arthur Cumming. The men of this ship during her late stay in the Scheldt, gave the Belgian authorities some little trouble. On one occasion about two hundred seamen from her and from the Firebrand had leave, and according to the *Précurseur d'Anvers*, public order in the good old city of Antwerp was very much disturbed by their presence. A row broke out in a drinking shop, in consequence of a seaman, maddened we presume by the influence of the bad liquor, beginning to break the furniture of the place. The police were called in, and after an ineffectual attempt to overpower the man, who is described by our foreign contemporary as a perfect Hercules, it was found necessary to appeal to the military for assistance. The result was that at length the unfortunate fellow was carried off on a stretcher, having received in the *mêlée* some severe injuries. During the rest of the evening, it is stated that the sailors were either fighting among themselves or with the townsmen. Several of the former were again badly wounded; twelve were arrested by the police, and the following morning five of these were taken to the house of correction. The remainder of the men who had not returned to their duty were sought for by the local police, who were aided in their efforts by the officers of the ships to which the culprits belonged.

Encounter, 14, screw steam-ship, Captain Roderick Dew, was in the gulf of Pecheli by the last accounts.

Esk, 20, screw corvette, Captain Sir Robert J. Le M. M'Clure, was at Hong Kong on the 26th of August.

Excellent, gunnery-ship, at Portsmouth, Captain R. S. Hewlett, C.B., having completed her outfit and shipped her stores and armament in the steam basin, has moved out and taken up her moorings off the north part of the dockyard.

Firm, 1, screw steam-gun-boat, Lieut.-Commander W. R. Boulton, was in the Gulf of Pecheli by latest advices.

Flamer, 2, screw-gun-boat, Lieut.-Commander H. M. Bingham, was in the Gulf of Pecheli by the latest advices.

Forester, 2, serew-gun-boat, Lieut.-Commander A. J. Innes, was in the Gulf of Pecheli by the last accounts.

Foxhound, 4, screw, Commander Alfred Mitchell, having completed her repairs, was undocked at Portsmouth on Wednesday afternoon.

Furious, 16, paddle steam-frigate, Captain Oliver J. Jones, was in the gulf of Pecheli by the last accounts.

Fury, 6, paddle steam-sloop, Commander (acting) J. C. Wilson, was in the gulf of Pecheli by the last advices.

Gorgon, 6, paddle-wheel steam-sloop, B. C. T. Pim, got up steam in the basin at Portsmouth on Monday last to try her machinery. She has received a thorough overhaul in both hull and machinery, and her upper deck has received new planking throughout.

Gladiator, 6, paddle steam-sloop, Commander H. D. Hickley, had, previous to her trip to New Orleans with the remnant of the wretched Walker's filibustering force, towed the Cuba schooner, tender to the Imaum, from Port Royal to Honduras. The Cuba was laden with coals, &c., for the use of Her Majesty's screw steam-sloop Icarus, Commander Nowell Salmon, V.C. By a late arrival from America we hear that Commander Hickley had been exposed to an unwarrantable attack, made upon him in New Orleans by an admirer of Walker. It is stated that he had been knocked down on the 29th of September in the public room of an hotel, and that the occurrence had created considerable excitement. In reference to the gross insult offered to Commander Hickley, a New Orleans paper remarks: "Captain Hickley, after the outrage, respectfully declined the proffered protection of the city authorities, and retired to his ship, stating that after what had occurred he believed his ship was the safest place for him. We much regret that this thing has taken place in our midst; for there are other things to show that Captain Hickley is a gallant officer and a humane and kind-hearted man. The mercantile and shipping community may remember a circumstance which occurred about a year ago. Her Majesty's steamer Gladiator, Captain Hickley, fell in with an American vessel, the St. Mary, dismasted and totally disabled. Captain Hickley boarded her in his own boat, in a heavy sea, to tender what assistance he could. His aid was gladly accepted, and he towed the wrecked vessel to the harbour of St. Thomas, distant some 800 miles. For this the captain refused any compensation, and his gallant conduct was, we understand, recognised in a most marked manner by the New York Board of Underwriters."

Grasshopper, 2, screw steam gun-boat, Lieut.-Commander John C. Tucker, was at Hong Kong on the 26th of August.

Hardy, 2, screw steam gun-boat; Lieut.-Commander A. G. Bogle, was at Hong Kong on the 26th of August.

Haughty, 2, screw steam gun-boat, Lieut.-Commander George D. Broad, was at Hong Kong on the 26th of August.

Havock, 2, screw steam gun-boat, Lieut.-Commander Charles Fairholme, was in the Gulf of Pecheli by the last accounts.

Herald, 8, surveying-vessel, Captain Henry M. Denham, had, by the last accounts from Australia, left the colonies for England, *viâ* Batavia.

Hesper, 2, screw steam storeship, Master-Commander W. H. Harris, was at Shanghai on the 18th of August.

Highflyer, 21, screw corvette, Captain W. A. J. Heath (acting), was in the Canton river on the 26th of August.

Himalaya, iron screw troop-ship, Captain John Seccombe, arrived at Portsmouth on Tuesday from Malta and Gibraltar, with the Persian ambassador on board, and military and naval invalids. The Himalaya, as usual, has not allowed the grass to grow under her since she last left England.

Hydra, 6, paddlewheel steam-sloop, Commander Richard V. Hamilton, was at Grenada on the 24th of September.

Imaum, 72, Commodore Hugh Dunlop, Captain Samuel Morrish, was in Port Royal harbour on the 24th of September.

Imperieuse, 51, screw frigate flag-ship of Rear-Admiral Jones, C.B., Captain Rerhibort Maguire, was in the gulf of Pecheli by the last advices.

Inflexible, 6, paddle steam-sloop, Commander G. A. C. Booker, was in the Gulf of Pecheli by the last advices.

Insolent, 2, screw gun-boat, was in the Gulf of Pecheli by last accounts.

Janus, 1, screw gun-boat, Lieut.-Commander D. G. Davidson, was in the Gulf of Pecheli by the last accounts.

Kestrel, 1, screw steam gun-boat, Lieut.-Commander C. D. Robinson, was at Shanghai on the 18th of August. This gun-boat had a short time previously made a cruise with a party of military on board, said to be composed of French and English troops. She fell in with some junks which were taken for pirates, and which she attacked and destroyed. Several men on board the Kestrel, including the commander, were severely wounded, and the chief engineer was mortally wounded by the blowing up of one of the junks which had been boarded. He died afterwards at Ningpo. It was subsequently discovered that these junks were trading vessels, and had been assailed on erroneous information.

Landrail, 5, screw gun-vessel, Commander Martin, discharged her powder at Spithead on Tuesday, and went into Portsmouth harbour.

Leven, 1, screw gun-vessel, Lieut.-Commander Hudson, was in the Gulf of Pecheli by the last accounts.

Liverpool, 51, screw steam-frigate, was launched on Tuesday afternoon from Deptford dockyard; and, although the weather was very unfavourable, the attendance was very large. The preparations made by the captain-superintendent of the yard were in every way satisfactory; stands were erected at the bows for members of the Admiralty and naval and military officers who accepted the invitations to attend, and stages were also erected for the general visitors who might obtain tickets. In addition to these, the public were admitted to choose the best spots they could to obtain a view of the interesting ceremony. The hour appointed for the launch was two o'clock; and, all preliminaries having been arranged, the dog-shores were knocked away, and in a few seconds the magnificent vessel glided easily and gracefully down the ways. This was one of the most successful launches that has taken place for some time past; the vessel showed an inclination to start before the word was received, and on the signal being given she ran down the ways in a most admirable manner, and two hydraulic rams placed at the bows were not even called into requisition. The vessel, which is of great length, was then taken up by the tug, and amidst loud cheers and the playing of the National Anthem by the band of the Deptford Dockyard Volunteer Rifles, was towed to Sheerness to have her engines fitted. The following are her dimensions:—Length between perpendiculars, 250 feet; ditto, over all, 284 feet 9 inches; extreme breadth, 52 feet; depth of hold, 19 feet 2 inches; burden in tons, 3027 40-94; horse-power, 600. The armament is as follows:—Main deck, 30 8-inch guns 9 feet long, weighing 65 cwt.; upper deck, 20 32-pounders 9 feet 6 inches long, and 58 cwt.; and 1 68-pounder pivot, 10 feet long, and weighing 95 cwt. She has been about two years building, and is one of the finest additions which have been made to the navy of England for many years past.

Lynx, 4, screw steam gun-vessel, Lieutenant and Commander Henry Berkeley, was at Sierra Leone on the 20th of September. This vessel has been ordered home.

Lyra, 9, screw steam-sloop, Commander R. B. Oldfield, captured a slave vessel, name unknown, of 350 tons, on the 8th of August.

Magicienne, 16, paddle steam-frigate, Captain John E. Commerell, V.C., was in the Gulf of Pecheli by the last accounts.

Nimrod, 6, screw steam-sloop, Commander R. J. Wynniatt, was at Shanghai on the 18th of August. This sloop is ordered home.

Odin, 16, paddle steam-frigate, Captain Lord John Hay, C.B., was in the Gulf of Pecheli by the last accounts.

Opussum, 2, screw gun-boat, Lieut.-Commander G. D. Bevan, was in the Gulf of Pecheli by the last accounts.

Pantaloon, 11, screw steam-sloop, at Devonport, was taken into dock on Monday to be coppered.

Pearl, 21, screw steam-corvette, Captain John Borlase, C.B., was in the Gulf of Pecheli by the latest advices.

Perseverance, 2, iron screw steam-troop-ship, Commander Edward R. Power, arrived at Port Royal, Jamaica, on the 17th of Sptember, from Honduras, with a detachment of the 2nd West India Regiment.

Pioneer, 6, screw steam-sloop, Commander H. A. Reilly, was at Shanghai on the 18th of August.

Porcupine, 3, paddle-wheel steam-surveying vessel, Captain Henry C. Otter, was at Loch Maddy on the 5th inst. It appears that the Porcupine has for some time past been engaged in taking soundings off St. Kilda, and being caught there in the hurricane of the 2nd and 3rd, had what seems to have been a narrow escape from destruction. On the island itself the effects of the storm were appalling, and most disastrous for the unfortunate inhabitants. Every house has been unroofed, and the scanty crops blown into the sea, so that the poor people have nothing now to depend upon, except a few potatoes and salted birds. Captain Otter expresses a hope that charitable people in the south will enable him, on his return to St. Kilda, about the end of this month, to carry with him some means of relieving the distress which must otherwise ensue from the loss of the crop, and other ravages of the storm.

Prometheus, 5, paddle-wheel steam-sloop, Commander Sidmouth S. Skipwith, left Sierra Leone on the 20th of September, having in tow the screw steamer Cleopatra, the latter vessel having broken her main shaft.

Racer, 11, screw steam-sloop, Commander Algernon M'L. Lyons, was at Greytown (Mosquito) on the 18th of September.

Ranger, 5, screw steam gun-vessel, Commander H. R. Wratislaw, left Fernando Po on the 29th of August for the southern division of the station.

Renard, 4, screw steam-sloop, Commander J. G. Goodenough, was in the Gulf of Pecheli by the last accounts.

Retribution, 28, paddle steam-frigate, Commodore Harry E. Edgell, was at Trincomalee on the 11th of September, to which place she had just returned from Madras. She was to sail for England a few days subsequent to our advices. The following is an extract of a letter from an officer on board. "We are rather in a queer state; the commander, acting-lieutenant, and mate, are all sick, as well as some forty-six men, but we hope a change of climate will put all to rights. Dr. McSweney has just joined from England; he describes the heat as so great in the Red Sea that they lost three passengers from sheer exhaustion. The last has been the most sickly season ever known in India. We have just left Madras, where cholera and fever are carrying off both Europeans and natives. We have struck our upper-deck guns below, and hope to make a good passage, and to be at Spithead before Christmas.

Rhadamanthus, 4, paddle-wheel steam-vessel, Master-Commander F. R. Sturdee, arrived at Woolwich on Sunday from Plymouth, with the effects of Vice-Admiral Sir Charles Fremantle, who has relinquished the command of the Channel Fleet.

Ringdove, 4, screw steam-sloop, Commander R. G. Craigie, was in the Gulf of Pecheli by the last advices.

Rosario, 11, screw steam-sloop, 150 horse-power, was successfully launched on Wednesday afternoon at Deptford dockyard, under the direction of Mr. Fincham, master shipwright. Several thousands of spectators attended, and ample accommodation to witness the launch was afforded on platforms erected at the bow and sides of the vessel. The band of the Dockyard Volunteer Rifles was stationed in an orchestra, and by invitation of Captain-Superintendent Buckle about 1000 children from the charity schools of the district were present to view the proceedings. The ceremony of christening was performed by Miss Warde, daughter of Lieut.-Colonel Warde, staff-officer of Pensioners, and, all being ready, the string was cut with a mallet and chisel in the usual way, and the vessel quickly glided from the building slip into the Thames amidst the repeated cheers of the assembled multitude. After launching, the vessel was towed to Woolwich dockyard, where she will receive her machinery, and be completed for service. The dimensions are—Length between the perpendiculars, 160 feet; breadth, 34 feet; and depth in hold, 15 feet. At the termination of the proceedings, the school children present were provided with refreshments by the liberality of Captain, Superintendent Buckle.

Sampson, 6, paddle steam-sloop, Captain G. S. Hand, C.B., was in the Gulf of Pecheli by the last accounts.

Scout, 21, screw steam-corvette, Captain John Corbet, was in the Gulf of Pecheli by the last accounts.

Sharpshooter, 8, iron screw steam-vessel, Lieutenant and Commander Charles Gibbons, left St. Paul de Loanda on the 15th August, leaving there the United States ship of war Niagara, having on board the Japanese embassy *en route* for Japan. The Niagara called at St. Paul de Loanda for coals and water.

Simoom, 8, screw steam troop-shoop, Commander J. M. Cooke, was in the Gulf of Pecheli by the latest accounts.

Slaney, 1, screw gun-vessel, was in the Gulf of Pecheli by the latest advices.

Snake, 4, screw steam gun-vessel, Commander Henry Harvey, was at Shanghai on the 18th of August.

Snap, 2, screw gun-boat, Lieut.-Commander W. O. Butler, was, by the last accounts, in the Gulf of Pecheli.

Sparrowhawk, 4, screw steam-sloop, Commander J. C. Byng, was in the Gulf of Pecheli by the last advices.

Sphinx, 6, paddle steam-sloop, Commander G. F. Day, V.C., was in the Gulf of Pecheli by the latest accounts.

Spitfire, 3, paddle steam-vessel, has been ordered home from the west coast of Africa.

Starling, 2, screw steam gun-boat, Lieut.-Commander James H. Whitshed, was at Hong Kong on the 26th of September.

Staunch, 2, screw steam gun-boat, Lieut.-Commander E. J. Pollard, was in the Canton river on the 26th of August.

Triton, 3, iron paddlewheel steam-vessel, Lieutenant and Commander R. H. Burton, was at Lagos on the 12th of September. This vessel has been ordered home.

Urgent, 6, screw steam-troop-ship, Commander H. W. Hire, was in the Gulf of Pecheli by the last accounts.

Victoria and Albert, Royal yacht, Captain the Hon. J. Denman, arrived at Gravesend on Wednesday afternoon with Her Majesty the Queen, the Prince Consort, and the Princess Alice. The yacht has returned to her moorings in Portsmouth harbour.

Vivid, paddle-wheel steam-yacht, Master-Commander H. W. Allen, returned on Thursday to her moorings at Woolwich from service with the Royal squadron.

Vulcan, 6, screw steam-troop-ship, Commander A. C. Strode, was in the Gulf of Pecheli by the latest advices.

Watchful, 1, screw gun-boat, Lieut.-Commander F. W. Inglefield, was in the Gulf of Pecheli by the last advices.

Weazel, 1, screw steam gun-boat, Lieut.-Commander William Howorth, was at Hong Kong on the 26th of August.

Woodcock, 1, screw gun-boat, Lieut.-Commander G. S. Bosanquet, was in the Gulf of Pecheli by the latest advices.

ROYAL NAVAL BENEVOLENT SOCIETY.—On Monday a quarterly court of the governors of this charity was held at the Thatched House Tavern, St. James s, for the purpose of receiving the report and statement of accounts, and also to vote certain grants. Lord Colchester occupied the chair. The secretary read the minutes of the previous meeting, which were confirmed. He then read the statement of accounts for the quarter ending September 30. It showed the balance in hand on the 1st of July was 455*l.* 17*s.* 8*d.*; received for annual subscriptions, 38*l.* 4*s.*; and interest on invested property, 553*l.* 15*s.*; making a total of 1047*l.* 16*s.* 8*d.* The contra side showed—grants, 469*l.*; office rent, salaries, printing, and other disbursements, 98*l.* 15*s.* 2*d.*; leaving a balance of 480*l.* 1*s.* 6*d.* The amount of stock in the Three per Cent. Consols was 36,916*l.* 14*s.* 8*d.* The secretary informed the governors that the late Rev. F. Cooke had left a legacy to the society (supposed to be over 10,000*l.*) contingent on his brothers and sisters dying without children. He had been informed there were five in the family, that they were all married, but none of them had any children. The board then voted various sums of money, amounting in the aggregate to 350*l.*, in grants; and, after some routine business, a vote of thanks was passed to the chairman, and the meeting separated.

A naval court-martial assembled yesterday week on board the Formidable, 84, in the Medway, for the trial of Private James Crosbie, Royal Marines, serving on board the Formidable, on the following charges:—"1. For that he, the said James Crosbie, being in actual service and full pay in Her Majesty's fleet, and private Royal Marine serving on board Her Majesty's ship Formidable, was, on or about the 2nd day of October, 1860, drunk on board the said ship while on guard. 2. For that he, the said James Crosbie, did, on or about the 2nd day of October, 1860, make use of threatening language to Lieutenant George Augustus Brine, of the said ship, while in the execution of his duty, by saying, 'I'll give it you, old Channel Fleet, directly,' or words to that effect, at the same time attempting to draw his bayonet. 3. For that he, the said James Crosbie, did, on or about the 2nd day of October, 1860, on the quarter-deck of the said ship, strike Sergeant William Harney, Royal Marines, his superior officer." The court was composed of the following members, viz.—Vice-Admiral W. J. Hope Johnstone, Commander-in-Chief at the Nore, president; Captain C. Wise, Southampton, 50; Captain C. F. Schomberg, Cumberland, 70; Commander R. Studdert, Wellesley, 72; and Commander O. Malcolm C. Read, Cumberland, 70. Mr. G. H. Knight, of the firm of Essell, Knight, & Arnold, solicitors, Rochester, officiated as Deputy Judge-Advocate. The prisoner, who bears the character of being one of the worst men in Her Majesty's service, conducted himself so violently that when before the court he had to be kept handcuffed the whole time, and during his trial attempted to break away from the custody of the master-at-arms. He pleaded "Guilty" to the first and third charges, and "Not guilty" to the second. The several witnesses having been examined in support of the prosecution, the prisoner was asked if he wished any time allowed him to prepare his defence, but he sullenly replied that he had no defence to make. The court was then cleared to enable the members to agree to their finding, in which they were engaged nearly two hours. On the re-opening of the court the sentence was read by the Deputy Judge-Advocate, the prisoner being found guilty of all the charges, with the exception of attempting to draw his bayonet. The court sentenced him to be reduced to the second-class, to receive 50 lashes on board the Formidable, and to be imprisoned in Maidstone gaol, with hard labour, for six months; and at the end of that period to be dismissed Her Majesty's service. The prisoner has been tried by court-martial no less than seven times.

THE CONWAY.—Her Majesty's Emigration Commissioners chartered on the 8th inst. the Chatsworth, 1037 tons, belonging to Messrs. James Baines and Co., of Liverpool, to sail from Birkenhead about the 20th inst., at 13*l.* 9*s.* 3*d.* per statute adult; to proceed to Madeira to embark and carry on to Calcutta the passengers landed in that island from the Conway.

Vice-Admiral Bruce, the commander-in-chief at Portsmouth, will preside at the general annual meeting of the Royal Seamen and Marines Orphan School and Female Orphan Home, which will be held at the Queen's Rooms, Portsea, on Monday, October 22nd, next.

ROYAL HUMANE SOCIETY.—At the monthly meeting of the Committee of this Institution, held on the 17th inst., —T. E. Baker, Esq., Treasurer, in the chair,—a number of cases of various persons who, at the risk of their own lives, have rescued others from drowning, were brought under notice and rewarded; amongst them were the following:—On the 16th July last, H.M.S. Cadmus, when proceeding under steam, at the rate of eight knots, on her passage to Port Royal, George Mitchell, boy (2nd class), accidentally fell overboard, when Mr. W. W. Anderson, Master's-Assistant, immediately jumped overboard, swam to his assistance, and saved him. Mr. Anderson also saved three seamen by jumping overboard at sea on the 13th and 15th June, 1860. Recommended to the next General Court for Silver Medal.—At Spithead, on the 4th September, 1860, Private M'Kimmings, while attempting to close the sash of one of the stern-ports of the troop-ship Clara, fell into the sea; fortunately the splash attracted the attention of some persons on board. Ensign Chute, of the 8th Regiment, and Private Quigley jumped overboard from off the ship's poop, a distance of 18 feet from the water. The tide was running strong, and long before the quarter-boat could be lowered the three swimmers were swept astern and lost sight of by those on board. The drowning man was first seen by Quigley, but Ensign Chute, who was nearest him, reached him first, and pushed a life-buoy towards him, but the man, who could not swim, was already too exhausted to cling to it. Ensign Chute then seized the body, and, assisted by Private Quigley, managed to support it until picked up by the boat, at a distance of about 300 yards from the ship. Recommended to the next General Court for Silver Medal to each.—The Rev. S. M. Dill, D.D., for having, by swimming, saved a lunatic who attempted suicide by jumping into the sea at Portstewart, Coleraine, on the 14th September, 1860. Recommended to next General Court for Silver Medal.—Donald Urquhart saved four persons whose boat upset in the Kyle of Sutherland, on the 19th August, 1860. Recommended to the next General Court for Silver Medal. The other rewards given comprised seven bronze medals, the thanks of the Society on vellum, and pecuniary rewards amounting to 5*l.* 10*s.*; and after the dispatch of various other business, the meeting adjourned.

Lieutenant W. F. Robinson, R.N. (1841), has been promoted to the rank of Commander, on the retired list.

LIGHTS IN THE ADRIATIC.—In reference to the statement which has appeared to the effect that the lights had been extinguished in the Adriatic, we are enabled to state that the Austrian Government has issued an order by which they have been re-established.

The Narcissus, 51, screw steam-frigate, is ordered to be brought forward and completed for the reception of a flag-officer.

The Navy Gazette.

ADMIRALTY, 12TH OCTOBER, 1860.

Corps of Royal Marines—Gentleman Cadet Henry John Lawrence Norcock to be Second Lieutenant; Gentleman Cadet Samuel Hamilton Bunce Northcote to be Second Lieutenant; Gentleman Cadet Thomas Delves Broughton to be Second Lieutenant; Gentleman Cadet Joseph Edward McNeale to be Second Lieutenant; Gentleman Cadet Jasper Nicolls Harrison to be Second Lieutenant; Gentleman Cadet James Lindsay Maccall to be Second Lieutenant; Gentleman Cadet Charles Morton Barham to be Second Lieutenant; Gentleman Cadet Somers Reginald Lewis to be Second Lieutenant; Gentleman Cadet Edward Thicknesse Richards to be Second Lieutenant; Gentleman Cadet William Frederick Mcllwaine to be Second Lieutenant.

NOTICE TO MARINERS.

(No. 34.) England.—South-East Coast.—Dover Strait.—*Revolving Light near Varne Shoal.*—The Corporation of the Trinity House of London has given notice (in pursuance of their advertisement, dated the 24th February last), that a light vessel has been placed near the west end of the Varne Shoal, in Dover Strait, and that a light is now exhibited therefrom, and will be so continued from sunset to sunrise. The light is a *quick revolving red* light, elevated 38 feet above the level of the sea, and should be seen in clear weather from a distance of about 10 miles. The light-vessel carries a ball at her masthead by day, and lies in 16 fathoms at low water springs, with Dungeness lighthouse bearing W. by N. ¼ N. distant 11¾ miles; Folkstone Church North (westerly), 9 miles; South Foreland high lighthouse N.E. ¾ N. 12½ miles; N.E. Varne buoy, N.E. by E. ¼ E. 5 miles; and Cape Gris Nez lighthouse S.E. ¼ E 12½ miles. Also, that the *red beacon* buoy, heretofore lying near the Varne Shoal has been removed to the north-eastward, and marked N.E. Varne. This buoy now lies in 13 fathoms at low water, with Dungeness lighthouse bearing West (northerly) distant 16 miles; Folkstone Church, N.W. ¾ N. 8 miles; South Foreland high lighthouse, N.N.E. 8 miles; Cape Gris Nez lighthouse S.S.E. ¼ E. 11¾ miles; and the Varne light-vessel S.W. by W. ½ W. 5 miles. The Bearings are Magnetic. Variations 20° 45′ West in 1860. By command of their Lordships, *John Washington*, Hydrographer, Hydrographic Office, Admiralty, London, 9th October, 1860. This Notice affects the following Admiralty Charts:—English Channel, No. 2675A; England, South Coast, Sheets 6 and 7, Nos. 2452, 1895; North Sea, Sheet 1, No. 1406; and France, North Coast, Sheet 14, No. 2610. Also, Channel Pilot, Part 2, page 175; and British Islands Lights List, No. 51*.

THE MILITIA.

The Anglesey wing of the Royal Carnarvonshire and Anglesey Rifles assembled at the head-quarters Beaumaris, under the temporary command of Captain Pearse, adjutant of the corps, on the 15th inst., for the purpose of receiving 27 days' exercise and instruction. The Inspector of Militia, Colonel Lord F. Paulet, C.B., has notified his intention of inspecting the corps on the 6th November, by which time it is expected the present strength of volunteers will have been considerably increased.

The Hampshire Artillery was finally disembodied on the 15th after having served exactly 2 years, during which time they gave, in 1859, 43 volunteers to the Marines, in September last 39 to the Royal Artillery, and on the days of disembodiment 27 more to the Royal Artillery, and 12 or 13 to the Marines, most of whom will go into the Artillery corps, and 5 to the Light Dragoons, making in all near 126 approved men all good artillerymen. The corps maintained a very high state of discipline to the last. Each man on being disembodied received a gratuity of 14 days' pay, so that when finally settled with they got on the average 25*s.* to 35*s.* per man.

The Militia Gazette.

WAR OFFICE, PALL MALL, OCTOBER 16.

76th, or Highland Light Infantry Regiment of Militia—D. D. M. M'Leod to be Lieutenant.

1st Durham Regiment of Militia—Captain John Haverfield to be Major; Lieutenant William Chaytor to be Captain, vice Fairless, resigned.

5th or Royal Elthorne Infantry Regiment of Middlesex Militia—Adjutant Antony Delacombe Bell to serve with the rank of Captain; Ensign Aubrey Howard James to be Lieutenant, vice Blake, resigned.

Memoranda—The Queen has been graciously pleased to accept the resignation of the commission held in this regiment by Lieutenant John Richard Blake.

4th or Royal South Middlesex Regiment of Militia—The Queen has been graciously pleased to accept the resignation of the commission held in this regiment by Captain George Barrington Godbold.

[The following appointments are substituted for those which appeared in the *Gazette* of the 28th of September last.]

3d Regiment of the Duke of Lancaster's Own Militia—John Hargreaves, Gent., to be Lieutenant; Charles Birch, Gent., to be Lieutenant.

WAR OFFICE, PALL MALL, OCTOBER 19.

Royal South Gloucester Light Infantry Regiment of Militia—Lieutenant John Robert Fenn to be Captain, vice Millett, resigned.

Essex Rifles Militia—Captain Frederick William Kirby to be Major.

Memorandum.—2nd or Edmonton Royal Rifle Regiment of Middlesex Militia—The Queen has been graciously pleased to accept the resignation of the Commission held in this Regiment by Lieutenant Charles Lennox Peel.

4th Regiment of West York Militia—Ensign Eustace W. Roxby to be Lieutenant; Ensign John Henry Steere Harrison to be Lieutenant; Ensign John Parkinson to be Lieutenant; Henry Alcock, Jun., Gent., to be Lieutenant.

West Kent Light Infantry Regiment of Militia—Charles Gustavus Whittaker the younger, Gent., to be Lieutenant, vice Popplewell promoted; Peter William West to be Lieutenant.

Great excitement has been occasioned at Coldingham, Berwickshire, by an unlooked-for revelation which may lead to the clearing up of the murder in Queen's Park, Edinburgh, in August last; and circumstances have arisen which may fix the murder upon an individual named Woolthorpe, a dissipated Yorkshire tailor, who left Coldingham for the purpose of witnessing the review, and who, according to the confession of a companion to whom he revealed the secret, was thrown into the company of the unfortunate girl, and murdered her for the sake of a small sum of money which she had in her possession.

VOLUNTEERS.

[We have received from Sir Duncan MacDougall and from Mr. A. Richards two long letters, which we are obliged to hold over for a more favourable opportunity of publication, convinced that the matters therein expressed and advocated will not lose by the delay which, on our part, is involuntary.]

METROPOLITAN.

1ST (VICTORIA) MIDDLESEX RIFLES.—A numerously attended full dress parade of this regiment took place at the head-quarters, Kilburn, on Wednesday last: six companies under command of Major Whitehead marched thence for St. John's Wood Barracks, where after a march of 7 or 8 miles they lodged arms. Previous to dismissing, the major addressed a few appropriate remarks to the men, expressing his hope that they would by their constant and punctual attention to their duties during the coming winter, make up for the inactivity rendered compulsory by the unpropitious weather for out-door drill of the past summer and autumn. He gave notice that during the winter months the parades would be held in the Riding School, St. John's Wood; on Wednesday evenings at 7, (bugle sounding punctually at that hour,) when he himself would take command of the batallion, and there would not for the present be any squad drill on that evening: but that on Mondays at 7 and Saturdays at 4 the Adjutant (Capt. Trew) would take command, on which occasion there would be in addition to the usual company and positon drill, bayonet exercise, &c., squad drill for recruits and cadets, as also every day in the week at Kilburn from 9 till nightfall. On Thursday, a firing party of 40 men attended at Kilburn, and, though it was a most unpropitious day for the object in view both from the very high wind and heavy rain, proceeded under command of the Adjutant to Harrow for a day's practice at the long ranges, permission having been kindly granted by Capt. Templar. We understand there was some very good shooting, among others by Capts. Greenhill, Trew, and Collins, Lieut. Sanders, and Messrs. Gedge, Fuller, Baddeley, &c.

2ND (SPOTTISWOODE'S) CITY RIFLES.—This corps, under Captain-Commandant G. A. Spottiswoode, assembled on Saturday last, October 13, at the drill ground, New Bridge-street, Blackfriars, and proceeded to Gray's-inn square, where it was inspected by Major Nelson. The corps subsequently marched to head-quarters, preceded by its band, composed entirely of Volunteers.

4TH (NORTH) MIDDLESEX RIFLES.—On Saturday evening this corps, commanded by the Right Hon. Lord Truro, and headed by the drums and fifes of the Foot Guards, marched out. Notwithstanding the unsettled state of the weather, they proceeded along Islington, Stoke Newington, Kingsland, Stamford-hill, to Tottenham turnpike, returning by the Seven Sisters'-road, through Highbury to head-quarters, where his lordship, who appeared much pleased, complimented the men on their behaviour and soldierly performance. On Thursday, the 11th inst., an instrumental concert was given by the band of this corps at the Myddleton Hall, Islington, on which occasion many of the leading inhabitants of the district, and several eminent musical professors were present. The attendance of the latter may be ascribed to the circumstance that this fine band is composed exclusively of the *élite* of the instrumentalists of London, who have been brought together through the exertions of Lord Truro the commandant of the 4th Middlesex Rifles, to form for the National Volunteer Force a complete and thoroughly efficient band, whose services may be available for all specia occasions, such as grand reviews, &c. The success, in a musical sense, that has already attended Lord Truro's spirited undertaking is most satisfactory, as evinced by the performance of the band at the concert. The overtures, "Guillaume Tell" and "Oberon," as well as the operatic selections, &c., were played with a precision and a correctness of intonation attainable only by bands consisting entirely of finished instrumentalists. The conductor of the band, Mr. E. Hanson, has exhibited great musical judgment in the composition of the band, which numbers more than 50, and which will soon afford the London public an opportunity of deciding whether the praise bestowed on it is deserved.

9TH (WEST) MIDDLESEX RIFLES.—A school of arms for instruction in broadsword exercise fencing, bayonet exercise, &c., has been started in connection with this corps, under the patronage of Lieut.-Colonel Lord Radstock and the officers of the regiment, at the new Orderly Rooms, 70, Seymour Place, Bryanstone Square. First-class instructors will be engaged. The expenses will be covered by a small quarterly subscription from members who wish to join. The foils, masks, pads, single-sticks, &c., are provided from a fund raised for the purpose by the officers and honorary members. The rooms will be open daily from 11 o'clock until 4, and from 6 to 10 o'clock during the winter months. A large reading-room is also attached, which will be well supplied with periodicals, &c. Lord Radstock has provided at his own cost a complete military library for the use of members. The following permanent alterations have been made in the hours of drill. The commanding-officer's parade for field-exercise will take place for the future every Saturday: muster at Lords' Cricket Ground at 4 p.m. The adjutant's parade will be held every Tuesday at 7 p.m., at St. John's Wood Barracks. Company drill for Nos. 1, 2, and 4, at St. John's Wood Barracks, on Thursdays at 7 p.m.; and for Nos. 3, 6, and 8, at Allen's Riding-School, on Wednesdays at 7 p.m., and on Mondays and Thursdays at the same hour at Portman Barracks. No. 5 Company drill twice in the week at University College, and No. 7, or the Primrose Hill Company, at Haverstock Hill. The Cadets drill on Wednesdays and Saturdays at Allen's Riding-School. Musketry instruction in classes, daily. The practice-ground, Wormwood Scrubbs, is also open every day to members who have passed through the musketry course. The inspection by Colonel McMurdo will take place November 10th, and the prize meeting, November 20th. On the latter occasion a number of prizes of considerable value—medals, money, challenge-cup, and a rifle—will be offered for competition.

22ND (QUEEN'S WESTMINSTERS) MIDDLESEX RIFLES.—An interesting ceremony in connection with the Queen's cadet corps was witnessed at Carlton Ride on Saturday evening last by a numerous assemblage, when prizes to the value of 20*l.* were distributed. The winners were the successful competitors in various athletic games, instituted to promote the health, strength, and enjoyment of the juveniles. The contests took place at the Crystal Palace some weeks since. Mrs. Cross, of New-street, Spring-gardens, who has taken the greatest interest in the formation of this corps, now numbering nearly ninety effective members, gave out the prizes with a short address to each lad.

87TH (BLOOMSBURY) MIDDLESEX RIFLES.—This corps is rapidly increasing in numbers, having recently received into its ranks an entire company from the establishment of Messrs. Feetham and Co., of Oxford Street, and a considerable force from that of Messrs. Strode. Target practice at long and short ranges has for some time been carried on constantly by the members, who are to contend this month in a match for a gold challenge medal and two silver medals, the property of the corps.

1ST SURREY ARTILLERY. — This newly-formed corps, whose head-quarters are at the Lambeth Institution, Lambeth Road, marched out on Saturday last, accompanied by the fifes and drums of the Scots Fusilier Guards band, and by their soldier-like bearing, set off by an admirable uniform, showed themselves to be a very picturesque, as they are likely to become a most useful accession to the patriotic movement now making such triumphant progress throughout the land. The 1st Surrey is the only artillery corps in the county of Surrey, and is the 55th artillery corps in Great Britain.

DEVONSHIRE.

11TH (NORTH) DEVONSHIRE RIFLES.—The second battalion was inspected on Southsea Common, Portsmouth, on Saturday. Owing to the state of the weather the proceedings were of a very limited character.

EDINBURGHSHIRE.

CITY OF EDINBURGH ARTILLERY.—On Saturday last the City of Edinburgh Artillery paraded at Leith Fort for the purpose of receiving their newly-appointed lieut.-colonel, Captain Maconochie Welwood.

ESSEX.

NORTH ESSEX (BORDERERS) RIFLES.—This corps, in the northern extremity of the county, has just made choice of the following officers:—The Hon. C. C. Neville, Captain-Commandant; Captain Henry Byng, R.N., Lieutenant; Captain Lane, R.A., Ensign; A. N. Jones, Esq., Surgeon; and the Rev. J. L. Oldham, Chaplain. The uniform is a dark grey, with black and red braid, and black accoutrements.

COLCHESTER RIFLES.—A match has just been concluded between two elevens of this corps, in which the merits of the short and long Enfields were tested. The firing consisted of five rounds each at 300, 600. and 900 yards' distance, and the total number of points made was, long rifles, 72 points, short, 75—in favour of short rifles, 3 points. On Thursday afternoon this corps had a march into the country to the village of Ardleigh, accompanied by their officers, where they went through a variety of evolutions, and returned home early in the afternoon.

1ST ESSEX ARTILLERY.—This corps was officially inspected at Harwich on Friday week, by Colonel Gibbons, R.A., Colonel-Commandant of Artillery in the Eastern District. The men who have been regularly trained to large gun exercise at the redoubt, Harwich, were put through their trial with a 32-pounder in position, and at the close of the inspection were entertained at a cold collation given by Major Bowness, commandant, and Lieutenants Daniells and Barker.

HAMPSHIRE.

3RD (LYMINGTON) HAMPSHIRE RIFLES. — This corps, which is justly considered to be one of the best drilled companies in the county, has received orders to hold itself in readiness for the 24th of October, on which day a grand review of the whole regiment, 1700 strong, will take place at Winchester, when we flatter ourselves that No. 3 will do their duty in gallant style, and in all probability they will be selected to skirmish, a post of honour that requires every attention to be paid to the proper performance of its duties.

3RD (PORTSMOUTH CIVIL SERVICE) HAMPSHIRE ARTILLERY.—The following promotions have taken place in the above corps, bearing date the 12th instant: 1st Company—Gunners—J. Brooks, G. Blundell, J. M. M'Diarmid, J. Mason, and J. Lee, to be Bombadiers. 2nd Company—Gunners—G. Loutet, C. Richards, and J. Purkiss, to be Bombadiers. 3rd Company — Gunners — J. Purkiss, J. Richardson, and E. Burke, to be Bombadiers. 4th Company—Gunners—R. James, H. Simmonds, and J. Knight, to be Bombadiers.

HUNTINGDONSHIRE.

THE 1ST (DUKE OF MANCHESTER'S) HUNTINGDON MOUNTED RIFLES.—This corps was inspected at Kimbolton Castle, on the 15th, by the Earl of Sandwich. Lord-Lieutenant of the county of Huntingdon, and Colonel McMurdo, C.B., Inspector-General of Volunteers. Notwithstanding a pouring rain, the corps mustered strong, only 14 effective members being absent. They fell in at first in cloaks, but as the weather showed a tendency to improve, they were taken off and rolled and strapped on to the saddles. The two troops were formed as squadrons in rank entire, the 1st squadron led by Lieutenant R. W. Arkwright, with Lieutenant G. O. Newton and Ensign F. Day as troop leaders. The 2nd squadron was commanded by Captain F. Polhill Turner; the troops into which it was divided, by Ensign Crew Alston and W. H. Baynes, Esq. (Sergeant)—the whole under the command of the Duke of Manchester. When the Lord-Lieutenant and Colonel McMurdo came on the ground they were received in the usual manner. The parade movements and sword-exercise were then performed according to the Cavalry Regulations. The corps was then moved out into the more open part of the park, in column of troops from the left. When they arrived on suitable ground they "formed line on the leading troop, half right back." They advanced between two clumps of trees, and "changed front half right." They then advanced by threes from the right of squadrons, formed line on the move, and charged, afterwards retiring by alternate squadrons at the suggestion of Colonel McMurdo. When the line was reformed, it was again advanced. They were moved on to some better ground by the advance in column of troops from the left, passing through a gate by files from the left of troops. The troops were reformed, and then wheeled into line. The "sword exercise" and "pursuing practice" were now performed at the gallop, also at the request of Colonel McMurdo, who rode among the men, the better to judge of their efficiency. The corps then retired in column of troops from the right at the trot, and afterwards at the gallop, to the original parade ground, where they wheeled into line without halting or even slackening the pace. The whole of the movements were performed surprisingly well, considering the constitution of the corps, and the short time they have been formed, but the last movement was perfect; the troop distances, squadron interval, and the covering of the pivot files, were found to have been maintained with mathematical exactitude, and the dressing had not to be corrected. The line then advanced in review order, and, having saluted were addressed by the Lord-Lieutenant, and afterwards by Colonel McMurdo, in terms extremely flattering to the corps, its officers, and its commander. Lunch was provided for the members of the corps by the Duke of Manchester in the great hall of the castle. Volunteers of other corps in uniform on the ground were also invited. After lunch the corps were addressed by their most justly popular commander. In returning thanks for the toast of his health, which had been proposed by Captain Polhill Turner, and most enthusiastically received, his Grace impressed upon the Volunteers the necessity of continued exertions, in order to attain that high degree of efficiency which he wished them to possess, and reminded them that their drills, and even the inspection, was not for mere display, but was a matter of duty. That the object with which military bodies were formed was not for show and amusement, but to face the enemy. That, they could only do so effectually when skilled in the use of their weapons, and that they could only attain skill by perseverance, and maintain it by constant practice.

LANARKSHIRE.

85TH LANARKSHIRE RIFLES.—On Saturday last the members of this company were sworn in by Sheriff Strathern in the drill hall, Glasgow. The 51st (Press) Company Lanarkshire Rifles were present as a guard of honour to the sheriff, under the command of Captain Crawford. They were drawn up in military order at the entrance to the hall, and saluted the sheriff in thorough soldierlike style on his entering the hall. The youthful members of a cadet corps at present in course of formation in connection with the battalion were in attendance during the proceedings. The oath of allegiance having been administered in due form, Sheriff Strathern addressed the company. He congratulated them upon having consummated by the oath of allegiance that patriotic profession they had assumed in taking up arms, and concluded a very appropriate and patriotic speech by stating that the Government would be cheaply served if they clothed and armed the Volunteers free of cost.

LANCASHIRE.

THE LIVERPOOL IRISH RIFLES.—On Tuesday evening the members of the 64th company of Rifle Volunteers, better known as the Irish Rifles, were sworn in at the Corn Exchange, Liverpool, by Lieutenant-Colonel Gladstone, whose battalion, the 2nd, the Irish Rifles have lately joined. The officers present were Captain Plunkett, commanding, Lieutenant Powell, and Ensign Bidwell. After the oaths had been administered in the usual form, Lieutenant-Colonel Gladstone briefly addressed the men. He urged upon them, first, the necessity of thoroughly learning their drill, and afterwards making themselves familiar with the use of the rifle. A great deal had been said about the number of Volunteers. They had about 140,000 or 150,000; but they were not satisfied with this. They wanted to see some half a million enrolled, and then there was no fear of their country and their homes. Their motto was "Defence, not defiance." After the swearing in had been completed, the corps marched to their quarters in Devon Street, and there at an excellent supper the men were entertained by the officers.

WORSLEY RIFLES.—This corps was on Saturday presented with a handsome silver bugle, in Worsley Park, the seat of the Earl of Ellesmere. The 3rd Manchester Regiment, numbering about 500, and commanded by Lieut.-Colonel Egerton, M.P., assisted on the occasion, proceeding to Patricroft by train, and marching thence to the park. After a variety of field evolutions had been performed with considerable skill, three sides of a square were formed, and Captain Topp then stood forward. The Countess of Ellesmere, in presenting the bugle, said she did it as a mark of her sympathy with the loyalty and patriotism which had induced the Volunteers to enrol themselves in defence of their Queen and country. Confident as she felt that they would always be ready to obey its call, she devotedly trusted that it might never summon them to more arduous duties than those in which they had just been engaged.

LIVERPOOL VOLUNTEER PRESS GUARD.—A numerous and influential meeting of newspaper proprietors, printers, and others connected with the literary and practical departments of the printing, engraving, and lithographic trades of Liverpool, was held on Saturday evening, in one of the law courts, St. George's Hall, to consider the propriety of forming a Volunteer corps or guard. The Mayor presided, and resolutions in favour of the organisation having been adopted, the details as to uniform and other matters were confided to a committee.

SUFFOLK.

BUNGAY RIFLES.—Colonel Adair has presented 100*l.* to the funds of this corps. An artillery company, formed at Walton, has just been organised, and throughout Suffolk the interest in the movement is well sustained.

SURREY.

9TH (RICHMOND) SURREY RIFLES.—This corps finished on Saturday last a contest for a medal and silver challenge cup on their range on East Sheen-common. The distances fired were 300, 500, and 600 yards; but owing to the cold and blowing weather during the week the scores were but small; one of the unsuccessful competitors had made in private practice the preceding week 19 points in the same ranges, but for the cup the highest score was only 11, made by Captain Ommanney, Private Hertslet scoring 10 points for the second place. The cup is of silver, handsomely chased, of nearly 25*l.* value, bearing the names of the donors, who are honorary members, and it is to be annually shot for by the effective members of the corps, a medal being given each year. After the firing was concluded the cup and medal were presented to Captain Ommanney by Mr. E. Penrhyn, one of the donors, in the presence of the corps and of many ladies and gentlemen, who had assembled to witness the proceedings.

SUSSEX.

ST. JOHN'S COLLEGE, HURSTPIERPOINT.—A cadet rifle corps, already 120 in number, has been recently formed of the boys receiving their education at the Hurstpierpoint College, in Sussex; and Friday week may be said to have been its inaugural day, and first appearance in public. The site of the proceedings was the quadrangle in front of the college, and after they had gone through various evolutions, Mrs. Campion, of Donny Park, in the neighbourhood, presented the corps with a set of colours. The flag was of scarlet silk, with the crown and V. R., and the following appropriate inscription:—"Exultatio juvenum. fortitudo eorum." The company, comprising many members of the various corps of Sussex Volunteers, afterwards lunched in the College Refectory, by invitation of Dr. Lowe, the head master of the college.

YORKSHIRE.

7TH (WEST) YORK RIFLES.—The colonelcy of this corps having been offered to Captain Markham, of Becca Hall, the gallant officer has intimated his willingness to accept the appointment, and the pleasure it will afford him to devote himself to the regiment, with the hope of making it one of the best in the north of England. The selection is one which will afford general satisfaction, Captain Markham having served in the Crimea, and won deserved laurels for his bravery. We understand that Major Armitage and Captain Horsfall have withdrawn their resignations for a month. The shooting for the prize rifles was resumed on Thursday, at the 200 yards range. The scoring was about an average of the first day, the crack shots being again at fault, and making only low scores. The shooting concluded about five o'clock.

HALLAMSHIRE RIFLES.—This corps had on Monday the honour of receiving six cast-steel side drums, the gift of Charles Atkinson, Esq., the ex-mayor of Sheffield, at the hands of Lady Fitzwilliam. The corps having marched up to the front of Wentworth House in line, and given a general salute, Lady Fitzwilliam proceeded to make the presentation, which was briefly acknowledged by Mr. Overend. Mr. Atkinson expressed his obligations to Lady Fitzwilliam for making the presentation, and his hope that the drums would long remain in the possession of the corps without ever sounding in the ears of an enemy. He was sure, however, that if called upon to meet an invader, the Hallamshire Rifles would show that they were "Sheffield made both haft and blade."

CLERKENWELL WORKING MEN'S INSTITUTE.—On Monday evening the Rev. R. Maguire, M.A., incumbent of the parish, gave a lecture in the parochial school-rooms, Amwell Street, Clerkenwell, in aid of the funds of the above institute. The subject chosen by the Rev. gentleman was the "Volunteer Movement, treated politically, physically, and socially." There was a numerous audience, among which were a large number of riflemen of various corps. Major Colvill, commandant of the 39th (Middlesex) Rifle Corps, occupied the chair, and was supported by Captain Blankley, Lieutenant Poley, Lieutenant Hislop, and Ensigns Rolfe and Margets, and the Rev. Messrs. Herbert and Tindal. The chairman, in introducing the lecturer, said he need not commend the lecturer or the subject, as they were well aware that they had no desire to be annexed to France. They loved their Queen and Government, and were prepared to risk their lives if necessary. Their corps continued to progress, and they now numbered between 500 and 600, and he hoped it would go on increasing. The rev. lecturer, after a few preliminary remarks, observed that although the battle of Waterloo was a bloody one, it obtained for us a 40 years' peace. He then proceeded to refer to the incidents that had occurred during the war in the Crimea, from which he passed on to the rumours that had sprung up about an invasion from France. Our coasts were defenceless, while Cherbourg rose in dangerous proximity, and the French navy was fast approaching the strength of our own. Having taken a rapid view of the present position of European nations, he said there was but one man who could unravel the "entangled skein" of politics, and that man was Garibaldi. That great man had introduced a new system of warfare, so merciful that the peace party would do well to imitate it, for that fine general was more kind to his enemies than many of the peace party were to their creditors and workpeople. To the peace party he would say that if they had any faith in their power of suasion, why did they not send a deputation to the late King of Naples and induce him to empty the dungeons of the wretched prisoners he tortured there? If they had done so they would have saved Garibaldi the trouble of doing that work, but they had neglected their duty if there was any efficacy in it, and they had now no right to say a word against warfare. Europe was at this moment bristling with arms, and it was time that England should have a breastwork for her defence, and that breastwork must be the breasts of her brave sons. He explained the reason why he and the commandant had ordered that the band should not procede the corps to church on Sunday, which was that it was likely to cause complaint of an appearance of disturbing the Sabbath, and might bring the movement into disrepute. This would be wrong, for socially it was most important. It was for the defence of society; it was ornamental and useful; it occupied their leisure time, and obtained an able ally in the early closing movement. They had obtained the Saturday half-holiday in the west-end of London, and the movement was now progressing satisfactorily in the south and east of London. He believed when that was achieved they would be able to obtain national holidays for the working classes. Referring to the colours that had been presented to other regiments, he informed them that Captain Berdoe was about to present a pair of colours to the 39th Middlesex Rifles, and he recommended that the ladies should present them with silver bugles, and form a fund for prizes. The rev. gentleman, at the conclusion, was greeted with vociferous cheering.

A VOLUNTEER BRIGADE. — The review at Nairn on Saturday, the 13th instant, proved highly instructive, although the weather was unpropitious. An encampment

Digitized by Google

was formed on the brow of the hill in the centre of the common, with tents collected from the neighbourhood, and sentries and outlying picquets posted in all accessible directions, thus showing to the newly-formed Volunteers how a camp, town, or village is to be protected in the event of an enemy being actually in the field. From 1 to 2 o'clock the various corps marched on to the ground, with their bands, amounting altogether, of all arms, to about 2000 men, with 13 guns, viz. :—*Artillery*—The Honourable the Artillery Company, 2 Horse Artillery guns, Captain Jay, and 2 Foot, Lieutenant Richard Dawes; West Essex Artillery, 6 field 6-pounder guns, Captains Edenborough and G. Palmer; in position representing an enemy, 3 swivel guns. *Cavalry*—3 troops of the West Essex Yeomanry Cavalry, Major Watlington, M.P.; and a detachment of the Uxbridge Yeomanry Cavalry, who kept the ground in a very efficient manner. *Infantry*.—The Hon. the Artillery Company, under the command of Majors Robinson and Snell; 2nd Tower Hamlets Rifles, Lieut.-Col. Walker; 33rd (Tottenham) Middlesex, Captain Goss; 41st (Enfield) Middlesex, Captain Munro; 11th (Cheshunt) Hertfordshire, Captain Goodliffe; 6th (Bishops-Stortford) Hertfordshire, Ensign Nash; 1st (Victoria) Middlesex Rifles, Major Whitehead; 8th (Eastern Counties) Essex, Major Love. Lieut.-Colonel Palmer, as the senior Volunteer officer on the ground, commanded. The whole were officially inspected by Major-General Robert Wood, and several other officers from the camp at Colchester, Colonel Dixon, of the Royal Artillery, Major Gore, Captain Onslow, &c. The troops marched past in quick time twice; and notwithstanding the unfavourable weather, the original programme was carried out by the artillery, supported by the cavalry and the 2nd Tower Hamlets, and more especially by the 33rd Middlesex, under Captain Goss, whose manner of manœuvring his men excited much attention. The troops looked remarkably well, and made a great sensation in thus assembling under considerable difficulties, and when they arrived upon the ground their officers showed great promptness and intelligence in taking up the positions to which they were directed by Lieutenant-Colonel Ibbetson, one of the inspecting officers of Volunteers. A very brisk fire was kept up for a considerable time, when one of the enemy's batteries was stormed by the 33rd Middlesex, led by Colonel Dixon, and the colour carried off. A very large number of spectators were upon the ground.

LORD CLYDE AND THE EDINBURGH ARTILLERY VOLUNTEERS.—In reply to a letter addressed to him by the secretary of No. 8 Company City of Edinburgh Artillery Volunteers, General Lord Clyde has consented, as the following letter shows, to be enrolled as an Honorary Member. —"London, August 4.—General Lord Clyde presents his compliments to Mr. Macmillan, and will be happy to be enrolled as an honorary member in the Company of Artillery Volunteers, to which he is secretary.—Donald Macmillan, Esq., 36, Barony Street, Edinburgh, N.B."

IRREGULAR MOUNTED RIFLES.—(An Extract from a Letter from Martin F. Tupper, Esq., of Albury, Surrey.)—"And now that my old hobby of 'Volunteer Riflemen Everywhere' has come to be a great national fact,—now that every one of Tom Wydewake's recommendations has been universally adopted, [see my sixpennorth at Routledge's, with Rifle matter in it from sixteen years old to one] —now that through this wholesome movement we stand out before the world a manly, sensible, loyal, and united people, not yet effete in spite of the mean treasons of B—— & C——,—there remains yet one part of our defensive wisdom, that seems to me to call for an expansion; as thus: we want more Cavalry Volunteers. The difficulties of this part of the movement are very great, if the idea of troops and regiments of charging horse is too ambitiously entertained: neither money, men, nor horses are to be found on any large scale locally: we cannot hope to get more than a few picked men here and there, willing to mount and arm and equip themselves properly, and capable of cross-country outpost service. So, what I have to propose is this: let every corps encourage a few such mounted volunteers to be attached to it—the more the better,—uniformed (with riding differences) as their special corps, and subject to it rules and officers. Their horses must be trained to stand fire, and carry a spring tether at the saddle,—which should also have holsters for a revolver and the day's commmissariat, a waterproof cloak, and a bag of oats: the chief arm a breech-loading carbine: duties, those of the outpost, and the aide-de-camp: place in marching, van, flanks, or rear, according to circumstance: at a review, perhaps as a small squad in the rear. Now, this sort of Bashibazouk patriotism combined with good riding and no marching drill, (albeit I would have some proper instruction too,) would be very acceptable to many of our hunting-men, to young squires, who would fain have been officers, but are privates, and to old squires, with plenty of wind for the saddle, but no stomach for the march. There are very few corps that could not furnish a dozen such willing cavaliers; and the aggregated dozens would amount, all over the country, to a very fair figure of Volunteer cavalry. It would be hopeless to find large local masses irrespectively of such collected units; for it is no joke, financially, to raise a troop of horse,—and, except in gentlemen's stables, neither animals nor men are easily to be seen fit for such a service. Thus, then, I throw out crudely for your consideration, this substitute for regular cavalry; let every corps encourage for itself a squad of mounted riflemen for outpost service. And, if you think the idea a good one, by all means make it known."

THE ROYAL NATIONAL RIFLES.—On Monday evening a public meeting was held in the Great Hall of the Whittington Club, Arundel-street, Strand, for the purpose of promoting the success of the Royal National Rifles. Sir J. V. Shelley, M.P., occupied the chair, and the room was crowded. The chairman, in opening the proceedings, said it would be a waste of time for him to enter into any defence of the Volunteer movement. A year ago it might have been necessary for him to have made such a defence, but now the country was fully alive to the necessity of showing other nations that Englishmen were determined to defend their hearths and homes from all hostile attacks. That was now an established fact. Wherever they turned they would see that at all meetings and dinners where the Army and Navy were toasted, that the health of the Volunteers was also added, and heartily responded to. One result of the movement was that they heard no more of the flourishes and the bombast of the French colonels who had thought it worth their while to talk of invading this country. The colonels had thought us a nation of shopkeepers, but now they found we were well armed with weapons, and that we knew right well how to use them. So, without alluding to any particular part of the world, he might say the foreigner had found we had adopted the motto of the Scotch thistle, "The less I am touched the better." As chairman it was his duty to say that the meeting was called to support the Royal National Rifles, now in the course of formation. He had not hitherto taken any part in the movement in London, as he believed that it was his first duty to assist the movement in the county in which his property was situated. He said that to exonerate himself from the charge of popularity-hunting in appearing before them, but in helping the movement in town he was just doing again what he had before done in the country. His experience had convinced him that if the movement was to be permanent, it must be composed of all classes of Her Majesty's subjects. He thought it a sine quâ non to success that the expenses should be such that no class would be prevented from joining. He had had some correspondence on this question with Lord Elcho, who had found fault with the proposal to enlist artisans. Lord Elcho had a great fear of the jarring of classes. His lordship had proposed that artisan companies wearing a different dress, should be formed; but he (the chairman) was averse to such an arrangement. It was said that they desired only to enrol artisans, and none else; but, on the contrary, they wished that all classes should join, and the expense would be such as would not cause any one to inconvenience themselves; in that way the movement was most likely to be permanent. They were, however, much obliged to Lord Elcho for the interest he had taken in the movement. Large sums of money had been voted for national defence; but without going into the question, he had been struck by one thing—namely, that the metropolis, as far as such expense was concerned, would remain undefended. It was therefore the more necessary that London should exert itself to increase the number of Volunteers. Five companies of the corps had already been formed, and other two companies were being formed. The Lord-Lieutenant had not yet given his sanction, on the ground, it was believed, that they had not completed their numbers; but that was likely soon to take place, and then there could be no doubt that his lordship would give his sanction to the National Rifles. It was most satisfactory to know that Lord Elcho had established the Metropolitan Rifles on exactly the same principles and terms which the National Rifles had adopted. —Mr. Berkeley, M.P., said there was nothing in history like the springing to arms spontaneously of so peaceable a body as trading Englishmen. It was, however, extraordinary that the movement had not taken place before. It was extraordinary that the words of the Duke of Wellington, recommending this country to stand on the defensive against an aggressive foe, had been disregarded. But at last the people had begun to reflect on the possibility that an enemy might be thrown on the shores of the kingdom. They had begun to reflect that an undisciplined body of the best men could not contend against a disciplined body of the weakest men in existence. They had been startled by the proceedings of the French Emperor, who had had some 600,000 neat roving gentlemen ready to follow out his bidding. Seeing this, and also what had taken place in naval affairs, through the introduction of the steam-engine, Englishmen had come to look at the matter seriously, and they had determined that their homes should be defended against the spoiler. He was one of the first who had pressed the movement on the attention of the Government. He had hoped that the Government would have treated this movement very differently from what it had done. He thought the least thing the Government could have done was to have found uniform, arms, and ammunition. Had such a course been adopted they would not have heard anything about the separation of classes by the breeches pocket reasoning; but, on the contrary, they would have seen all classes standing shoulder to shoulder. That appeared to be the great desideratum. Few men knew more about the working classes than he did. He was always prepared to stand by the fustian jacket, for he knew well the broad cloth could take care of itself. He begged to move "That this meeting considers it highly desirable to encourage the formation of rifle corps throughout the country; that it views the movement as one in every respect as national; and is of opinion that it should embrace every class of her Majesty's subjects." Mr. Walter seconded the resolution, which was carried with acclamation. A resolution, asserting that the Royal National Rifles offered peculiar advantages to all classes, and pledging the meeting to support the corps, was next moved by Mr. Bertolaci, seconded by Mr. Bradford, and carried with great enthusiasm. Mr. J. R. L. Walmisley, in moving that a committee be appointed to collect subscriptions, said the annual subscription was to be 10*s*. 6*d*., and the uniform and accoutrements were not to exceed 3*l*. 6*s*. The motion was seconded and adopted. The ordinary compliment to the chairman brought the proceedings to a termination.

SUDDEN DEATH OF A VOLUNTEER IN AN OMNIBUS.—On Monday evening, shortly before eight o'clock, Mr. John Donovan, a corporal in the 5th Company of the 20th Middlesex, got into an omnibus at the Britannia, Camden Town to proceed to Portland Place. The omnibus started, and had only reached Pratt Street, when a gentleman sitting next to him observed him suddenly sinking. He called to the conductor to stop, and Mr. Donovan was taken out and conveyed into Mr. New's Surgery, in High Street, where he was seen by a medical gentleman named Croft, who was passing, and pronounced life extinct. The unfortunate man, who resided in Hamilton Street, was single, and about 38 years of age. He was much respected by his colleagues. Spasmodic affection of the heart is the supposed cause of death.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, OCTOBER 16.

Kent Rifle Volunteers—37th Corps—Augustus Ruxton, Gent. (late Captain-Commandant 6th Westmoreland Rifle Volunteers), to be Adjutant from the 31st of July, 1860.

2d Company of Banffshire Artillery Volunteers (Banff)—Second Lieutenant James Sellar to be First Lieutenant, vice Walker, resigned; Robert Garland, Esq., to be Second Lieutenant, vice Sellar, promoted.

4th Company of Banffshire Artillery Volunteers (Portsoy)—James Moir, Esq., to be Captain; Alexander Allan, Esq., to be First Lieutenant; John Murray, Esq., to be Second Lieutenant.

3d Company of Banffshire Rifle Volunteers (Aberlour)—Robert Jones, Esq., to be Captain; Charles Grant, Esq., to be Lieutenant; William MacKenzie, Esq., to be Ensign; James Gerrard, Esq., to be Honorary Assistant-Surgeon.

2d Hampshire Rifle Volunteer Corps—Robert Goodenough Bassett, Esq., Gent., to be Captain.

6th Hampshire Rifle Volunteer Corps—Ensign Horatio Compigné to be Lieutenant, vice Purvis, promoted; Henry Edward Cooke, Gent., to be Ensign, vice Compigné, promoted.

7th Hampshire Rifle Volunteer Corps—Lewis Conran, Esq., to be Captain.

14th Hampshire Rifle Volunteer Corps—Ensign William Clement Drake Esdaile to be Lieutenant; Walter Williams, Gent., to be Ensign.

Kent Rifle Volunteers—37th Corps—Augustus Ruxton, Adjutant of the 37th Corps, to serve with the rank of Captain.

1st Battalion, 3d Corps—Frederick John Turner, Gent., to be Ensign, vice Barnett, promoted.

1st Battalion, 26th Corps—Ensign George Rowe to be Lieutenant, vice Smith, resigned; Herbert Whomes, Gent., to be Ensign, vice Rowe, promoted.

2d Battalion, 11th Corps—Frederick Lubbock, Gent., to be Captain, vice Montagu Lubbock, resigned.

4th Battalion, 5th Corps—Ensign Herbert Tritton Sankey to be Lieutenant, vice Austen, resigned; William Deey Furley, Gent., to be Ensign, vice Sankey, promoted.

4th Battalion, 16th Corps—Lieutenant William Frederick Baring to be Captain, vice Dyke, appointed Lieutenant-Colonel of the battalion; Ensign William Whitehead Gascoyne to be Lieutenant, vice Baring, promoted; Richard Knight, Gent., to be Ensign, vice Gascoyne, promoted.

21 Monmouthshire Rifle Volunteer Corps—Edward Enoch Tucker, Gent., to be Ensign.

Memorandum—The notice which appeared in the *Gazette* of the 28th of September last of a commission to Henry Tothill was an error, that gentleman having been previously commissioned.

1st Glocestershire Artillery Volunteer Corps—Second Lieutenant Henry Lucas Bean to be First Lieutenant; Edward James, Gent., to be First Lieutenant; John Henry Hirst, Gent., to be Second Lieutenant.

Memorandum—The 7th, 10th, 13th, and 14th Companies of Glocestershire Rifle Volunteers have been amalgamated into one corps, which is numbered the 7th in the county of Glocester.

2d Berks Rifle Volunteers—Lieutenant Samuel Thomas George Evans to be Captain; James Ellison to be Lieutenant, vice Evans, promoted; Captain the Hon. Alexander Leslie Melville Hore Ruthven to bear the title of Captain Commandant.

2d Sussex Artillery Volunteer Corps—Robert Vaile Skinner to be Honorary Assistant-Surgeon.

17th Sussex Rifle Volunteer Corps—The Rev. A. Eden to be Honorary Chaplain.

18th Sussex Rifle Volunteer Corps—Mr. Frederick Morgan to be Honorary Assistant-Surgeon.

19th Sussex Rifle Volunteer Corps—Freeman Frederic Thomas, Esq., to be Lieutenant.

4th Peeblesshire Rifle Volunteers—Charles Alexander, Esq., to be Captain; James Thom to be Lieutenant; William Sanderson to be Ensign.

4th Aberdeenshire Rifle Volunteer Corps—Robert Ogilvie Farquharson to be Captain; Harry Leith Lumsden Morrison to be Lieutenant, vice Leith, resigned; Farquharson Taylor Garden to be Ensign, vice Wilson, resigned; Charles Shaw to be Honorary Assistant-Surgeon.

15th Aberdeenshire Rifle Volunteer Corps—William Cosmo Gordon to be Captain; James Mackie to be Lieutenant; James Wilson to be Ensign; Alexander Fiddes Greig to be Honorary Assistant-Surgeon.

16th Aberdeenshire Rifle Volunteer Corps—James Hay Chalmers to be Captain; James Lickly Manson to be Lieutenant; James Wilson, M.D., to be Honorary Assistant-Surgeon.

3d Durham Rifle Volunteers—Lieutenant Christopher Thomas Potts to be Captain; Martin Warner, Gent., to be Lieutenant.

Worcestershire Rifle Volunteers—6th Company—Thomas Moore, Esq., to be Ensign.

4th Derbyshire Rifle Volunteers—James Sherwin Clarke, Gent., to be Ensign, vice Lewis, resigned.

1st Company of Surrey Artillery Volunteers—John Henry Great Rex, Gent., to be First Lieutenant; John Holliday Brown, Gent., to be Second Lieutenant; Dr. William Bachelor, M.D., to be Honorary Assistant-Surgeon.

[The following appointment is substituted for that which appeared in the *Gazette* of the 12th of October inst.]

35th Middlesex Rifle Volunteer Corps—Edward Letchworth, Esq., to be Captain, vice Somerset, resigned.

Memoranda—The Queen has been graciously pleased to accept the resignation of the commission held by Captain William Purey Cust, in the 4th Hertfordshire Rifle Volunteers.

The Queen has been graciously pleased to accept the resignation of the commission held by Adjutant Richard Arcaibald Farquharson in the South Herts Yeomanry Cavalry.

WAR OFFICE, PALL MALL, OCTOBER 19.

1st Oxfordshire Rifle Volunteer Corps—William Frederick Foxcroft Jones, Esq. (lately of the Wiltshire Militia, and the 52nd Regiment of Foot), to be Adjutant, from 21st August, 1860.

1st Battalion Warwickshire Rifle Volunteers—Peter McInnis, late Lieutenant of the 44th Regiment of Foot, to be Adjutant, from 25th July, 1860.

1st Corps of Northumberland Artillery Volunteers—Andrew Sulie, Esq., to be Captain; Second Lieutenant Cuthbert John Laws to be First Lieutenant, vice Pilter, promoted; David Ramsay Ramsay, Gent., to be First Lieutenant; William Allen, Gent., to be Second Lieutenant.

Lincombe or 17th Somerset Company of Volunteer Rifle Corps—George Brusafield Hodges, Gent., to be Ensign, vice Falkner, resigned.

7th Company of Northamptonshire Volunteer Rifle Corps—George Hobson Burnham, Gent., to be Lieutenant; William Charles Trotman, Gent., to be Ensign.

5th Rifle Volunteers—Charles Gibson Taylor, Esq., to be Assistant-Surgeon; the Reverend Abel John Ram to be Honorary Chaplain.

16th Rifle Volunteers—James Hardy, Esq., to be Lieutenant; Joseph Yellowby Watson, Esq. to be Ensign.

2nd Hampshire Rifle Volunteer Corps—Oswald James Augustus Grimston, Esq., to be Lieutenant-Colonel, vice Grimes, resigned.

21st Lancashire Artillery Volunteer Corps—James Paley, Gent., to be First Lieutenant; Richard Gibson Threlfall, Gent., to be Second Lieutenant.

19th Lancashire Rifle Volunteer Corps—Ensign Hugh Perkins to be Lieutenant, vice Greenshields, resigned.

Memorandum—Lancashire Artillery Volunteers—The 8th Corps, consisting of five Companies, has been separated from the 1st Brigade, and is now an independent Corps; the 1st Brigade being consequently reduced to seven Companies and one section, is entitled to a Staff consisting of one Lieutenant-Colonel and one Adjutant only.

Memorandum—2nd Manchester or 40th Lancashire Rifle Volunteers—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Major Robert Adeane Barlow in this Corps.

1st Middlesex Artillery Volunteer Corps—William Marshall, Gent., to be Assistant-Surgeon.

40th Middlesex Rifle Volunteer Corps—Lieutenant William Fell Woods to be Captain.

2nd West Riding of Yorkshire Artillery Volunteers (Bradford) William Clarke, Gent., to be First Lieutenant.

Kent Artillery Volunteers—10th Corps—Second Lieutenant William Rees to be First Lieutenant, vice Pym, resigned; George Thomas Jelley, Gent., to be Second Lieutenant, vice Rees, promoted.

1st Edinburgh City Artillery Volunteer Corps—First Lieutenant William Henry to be Captain.

2nd Pembrokeshire Rifle Volunteer Corps—Charles Vaughan Simmons Bennett, Gent., to be Assistant Honorary Surgeon.

7th Cornwall Artillery Volunteer Corps—William Smith to be Second Lieutenant.

Memoranda—8th Cornwall Rifle Volunteer Corps—Lieutenant Francis Gilbert Enys has been permitted to resign his Commission; Ensign William Henry Lanyon has been permitted to resign his Commission.

14th Cornwall Rifle Volunteer Corps—Lieutenant William Gostwyck Gard has been permitted to resign his Commission; Ensign John Michael Sellers, M.D., has been permitted to resign his Commission.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

MONEY ADVANCED on BILLS, PROMISSORY NOTES, POST-OBIT BONDS, or other securities, and at 5 per cent., on property derived under wills or settlements, without publicity or delay. Confidential applications may be addressed to Mr. Morris, Solicitor, 11, Beaufort Buildings, Strand, opposite Exeter Hall, W.C.

NOTICES TO CORRESPONDENTS.

An Anxious Soldier is informed that the term of his enlistment has nothing to do with the punishment for his offence. An argument on a writ of *habeas corpus* would scarcely serve him.

Dinapore.—There is a probability that the regiment you have named will be sent home in an early relief, but as yet nothing has been decided positively so far as our information goes.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, OCTOBER 20, 1860.

There is an uneasy feeling in the minds of those interested in the permanence and efficiency of the Volunteer movement, composed we hope of the large mass of the intelligent population of Great Britain, which expresses itself in the formula, that the Volunteers are approaching the second phase of their existence, or that a trying crisis is coming, which will test very severely the strength of the elements that form one of the most wonderful developments of national sentiment ever exhibited to the world. The fever flush has passed away, and it has been feared a morbid lassitude would supervene and lead to fatal results. Stimulated by the warm approbation of the Queen and by her personal interest and favour, cheered by the voices of their fellow-countrymen, supported by the highest in the land, and borne along triumphantly by the great billow of popular favour, the movement was at the outset marvellously rapid in its progress, and the obstructions, impediments, and resistance timidly offered to its course, were overwhelmed and submerged by the depth and strength of the wave. But the rocks and quicksands lie below, and if the ebb should ever take place, their influence will not be unfelt.

At the present moment there is no sign of a re-action; but at the same time there is no appearance of progress, and the number of the Volunteer force is considerably short of that which the most moderate calculations assigned to its permanent effective. Let us be very thankful for what we have got, because it is sound, honest, lasting material. It is something more than a magnificent cadre; it is a vigorous, recognised arm of the national defence, in which there is tremendous bone and sinew, with some less useful adipose matters, to be got rid of by training. One hundred thousand Volunteers must not be spoken of as if they were so many regular soldiers, because it is quite uncertain what number of them would be available, first for concentration in any one spot, and secondly for concerted movements in the field. But wherever they may be, they will be of incalculable value if the danger ever comes upon us. Now, whilst we admit, with the greatest pride and satisfaction, the high condition of considerable bodies of the Volunteers, and the fixity of tenure they have established in the country, let us point out a few chinks in their suit of defensive armour, in the hope that they may be closed up ere the dreadful note of preparation shall be sounded.

The nonsense with which we were flooded at one time respecting the advantages of armed undrilled rabblement; erroneously supposed to be the same as irregular troops; over drilled disciplined regulars, has been talked, written, and forgotten. There are many of our Volunteers who have been out to see Garibaldi's army, a very extraordinary Volunteer force, in which has been absorbed an immense proportion of regular soldiery of all nations—the drilled modern condottieri of freedom. They no doubt will have observed at Caserta, or Santa Maria di Capua—if they did not join Mr. Edwin James in his retrograde movement to bring the runaway patriots to justice—how even the despised Neapolitans, confessedly the worst of regular armies, were able to make formidable demonstrations against Garibaldi, and to check him decisively before Capua, although he is now the possessor of an abundant and powerful artillery; nor is it to be overlooked that at this instant Messina, isolated as it is, holds out for the King of Naples. These facts are very instructive But in our desire to become efficient, we must not encroach upon the domain of the regular Army, nor must we forget the first principle of Volunteering and the spirit of the movement. We believe it to be quite impossible, even if it were desirable, to make all Volunteer corps as efficient and thoroughly drilled as regular battalions, and the attempt to do so can only have the result of doing injury to the movement. The amount of time—which with many Volunteers, particularly in towns, means money—given to drill, parade, and marching, constitutes a large sacrifice *ará patriæ*. The willing horse needs not the spur, and he assuredly should not be spurred to death. One corps may be so constituted that its members can afford to attend largely and regularly to their duties, and thereby arrive at the proficiency of any regiment in the Service; but it is evident that such cases must be exceptional. Can there be compulsory parades, drills, and marchings? Certainly not; for there can be no compulsion exercised on a large scale on a body, the essence of which is the voluntary principle. A glance at any newspaper will prove what an earnestness there is among the Volunteers, and how rapidly the practice of rifle-shooting is extending throughout the kingdom. Challenge cups, purses, bugles, rifles, medals, are offered largely and liberally, and competed for with genuine enthusiasm. In all honesty we are however compelled to notice the fact—and it is one of the most important of all facts connected with the Volunteers—that in one necessary and indispensable element of permanent success and efficiency, they begin to exhibit unequivocal signs of weakness. The men attend with praiseworthy regularity, although of course the per centage of absences at all the parades and marchings out asked of them is large enough in most corps. But the officers! What is to be said on that point? The gentlemen who accepted commissions must have been well aware that without attendance on their men, without qualifying for the discharge of their duties, they were doing positive mischief in taking parts for which they were unfit, and for which they had no desire to become fit in any way. Their dresses and accoutrements should remind them that they have broken the pledge which in most cases was implied to be taken on their part when they sought for the rank of officers. The outcry from the men and from commanding officers is so great, that the Government has been compelled to take notice of the matter, and steps will be taken very speedily to call on those gentlemen who hold the position of officers in Volunteer corps, and who are returned as absent or inefficient, to give an explanation of their conduct, and if they cannot satisfy the authorities that they had reasonable excuses, it is possible they may be required to resign their commissions. Without good and active officers the corps lose half their value. At the same time there are obvious and great dangers in Government interference. Many of the foremost men in the Volunteer movement have not been at all conspicuous for their attention to their duties as officers; in fact, they have given up to the movement itself what was meant for the benefit of their individual companies.

We continue to receive many communications upon the subject of the expenses of officers in Cavalry regiments, and the consequent difficulty in providing the proper complement of subalterns. We have more than once stated in these columns that the military authorities were thoroughly in earnest in their intention to make a sweeping reform in this respect. The alteration in the prices of commissions, and the new regulations as to the supply of chargers from the troop horses, were but the beginning of the new system; but although Mr. Herbert, in his published letter to the Treasury, stated as much distinctly, there appears to be a reluctance on the part of some of the officers to surrender whatever *prestige* may have resulted from a large and useless expenditure of money, and the alteration of "tone" which Mr. Herbert wishes to bring about will not be effected without obstructions. We recently inserted complaints that the Duke of Cambridge's order respecting the supply of chargers to young officers was sought to be practically set aside by certain commanding officers, and the matter has come before the authorities. A Circular has been sent out calling for returns upon the subject, and it will be followed by very effective measures for causing the Duke of Cambridge's order to be carried out fully and without reservation. The rule in some regiments which obliges an officer to pay for wine, whether he drinks it or not, is pretty certain to be abolished; and after a short time we anticipate that the conventional expenses of a cavalry officer will be brought down to something like those which suffice for the proper maintenance of an infantry man, whose position as a gentleman is, generally speaking, quite equal to that of his mounted brother-in-arms.

In drawing attention to the extraordinary and unfortunate position of the 2nd Life Guards, we feel bound to say that we have been informed that one of the reasons for the entire absence of cornets, is the examination which has recently proved fatal to the military aspirations of no less than four young gentlemen who had accepted commissions in this regiment. The public has a right to know this; but it has also a right to know what influence has brought the regiment to a position so pitiable as compared with the rest of the Army. In our previous remarks we spoke of the manner in which the regiment is commanded, as one of the possible causes. We did so mainly on the strength of common *rumour*; but common rumour may in this, as in other instances, be nothing better than a common storyteller. It is desirable, however, that the truth, whatever it is, should be known. If Colonel Martyn be what he ought to be, a courteous and efficient commanding officer, careful of the interests of those under him, devoted to his regiment, and the friend of his officers, he deserves every sympathy for a misfortune which arises from no fault of his. If, on the contrary, he does not possess some share of those very desirable qualities in a commanding-officer, all consideration for him individually should give way to the reputation and efficiency of such a corps as a regiment of the Household Cavalry. Clearly, apart from the examination, there is something wrong about the regiment. Let the cause be ascertained and remedied. We cannot afford to have a corps of the Queen's Guards in the position of a once plague-stricken ship, for which no seaman can be induced to enter.

It gives us unaffected pain to allude to a subject painful enough in its nature, because it affects the reputation of a distinguished officer whose gallantry had made him a man of mark in the profession, and whose social qualities had secured for him the regards

Digitized by Google

of many friends. But it would be a dereliction of duty to be silent in reference to that subject because it is painful to the feelings of individuals to speak of it. If the story be untrue or exaggerated, it will put a stop to a gross public scandal everywhere spoken of, if the slanderers are refuted.

We have recently heard a great deal of the New Articles of War and Naval Discipline Act of 1860. They are to work wonders in Her Majesty's ships, when they come into operation on the 1st of April. We have been obliged to enter so many "blackguards" from the shore, while the quarter-deck law was so gentle and gentlemanly, and flogging was so disliked by the public, that it became absolutely neccessary to do something to restore good order and stem the tide of laxity in the fleet—to raise the *morale* of the common sailor to the level of the tone which distinguishes the officers in Her Majesty's Service. That this high tone was endeavoured to be kept up, we see from the awards of courts-martial from time to time, sentencing a few exceptional officers to reprimand, degradation, or dismissal from the Service, for drunkenness, and other minor immoralities, "unbecoming the character of officers and gentlemen." With officers of high character to carry out the new code, the naval service must be greatly benefited.

The following is one of the clauses in the Naval Discipline Act of 1860, to which we have not thought it necessary previously to advert:—

"All persons subject to this Act who are guilty of profane oaths, cursings, execrations, drunkenness, uncleanness, or other scandalous actions, in derogation of God's honour and corruption of good manners, shall be dismissed from Her Majesty's Service, or suffer such other punishment as is hereinafter mentioned."

Perhaps those who have lately read in the newspapers that Rear-Admiral the Honourable Sir Henry Keppel, K.C.B., who was appointed Commander-in-Chief at the Cape of Good Hope only some six months ago, is already about to be recalled, or transferred rather, according to other accounts, to another command, may imagine that till the 1st of April next there is no law under which a scandalous action, in corruption of good manners, in violation of the laws of hospitality and of social honour, attributed in clubs and in the streets to that very distinguished officer, can be adequately punished. But this is a mistake. The above clause of the Duke of Somerset's Naval Discipline Act exists *verbatim* in the old Acts of Parliament, which are still in force. If the gross delinquency to which we now publicly refer (as the details are in everybody's mouth) really took place, and is allowed to remain as a stigma on the pennants of England, it must be remembered that it is not because the Board of Admiralty are unable to do otherwise. This is not a case in which it may be said, "Oh, we cannot take into consideration a man's private character, while he does his public duty faithfully." Even this doctrine is very questionable, when private character becomes well known. With so long a list of unemployed flag-officers, even private character might be regarded, at least as much as private connections, or titles, or political influence, as a motive for selection. But we waive these considerations for the present, because they do not apply. The offence we speak of was not private. It was perpetrated, it is true, against the private honour of an English gentleman, who had the misfortune in a public capacity to be the guest of—we shall not shrink from saying, on the hypothesis that the charge is well-founded—a dishonourable British Admiral; but as the relative position in which the two parties were placed arose out of their official and public status, we must claim on behalf of the governors of our colonies, of our ambassadors, and other functionaries, who, in the course of their public duties, are liable to be placed in similar positions as the guests of naval officers in vessels carrying the flag of England, protection against such wrongs as occurred on board the Forte. Besides, the offence was public in another sense. It was coarsely committed; and it is almost to be regretted that the interference of the officers of the ship prevented that summary vengeance, which even the law allows, when the greatest injury a man can suffer is inflicted before his eyes.

If drunkenness and scandalous actions be proper grounds for dismissal from the Service, as we occasionally see they are regarded in the case of subordinate officers, what shall we say of a man in the highest position who cannot, or will not, observe even decency in regard to time, or place, or person, in the gratification of his passions? The press is often eloquent on the subject of the law's inequality as regards the rich and poor, when mere fines are occasionally awarded for gross offences. We beg to assure the authorities that we should be regarded by the Service at large—by those in whose hands the honour of their country, as well as of their neighbours' wives is safe—as very cravens, if we shrunk on the present occasion from demanding the same impartial enforcement of the laws for the discipline and good government of the Navy, against an offender of rank as against subordinate officers or common seamen. The public remember some years since the scandal occasioned by the discovery of immoral practices in one or two convict ships. We blush to think the conduct of a Rear-Admiral on board Her Majesty's flagship Forte has recalled such scandals to mind. The stain must be wiped out. The honourable K.C.B. must be replaced by a man of honour. If the same offence had been notoriously committed, and brought home to a common sailor against a messmate, he would have been discharged to the shore in disgrace, with the corner of his certificate (which is, as it were, his decoration) cut off.

One of the dangers to discipline which was said by Queen's (or King's) officers to be inherent in the composition of the armies of that Company which ruled India—first, by charter absolutely, and then by Act of Parliament vicariously, and in trust, as it appears, for the Crown—was want of obedience, or, in other words, lax discipline so far as the superior authorities were concerned. It was said, when amalgamation came upon the empire as an irresistible demon breathing flames of fire on the heads of departments, on traditions, and public offices, that the evils of Indian life would be as great in case of the Imperial as they had been as regarded the local regiments. Our semi-despotic state in India gives the world greater facilities for knowing what we are doing in military matters than are afforded to us by the kindly action of the War Office or of the Horse Guards. Making every allowance for the change of circumstances and scene, it is rather startling to read such a paragraph as follows in General Orders of the British Army:—

Adjt.-Gen.'s Office, H.M.'s British Forces, Hd. Qrs., Calcutta, Aug. 20, *No.* 118.—It having been brought to the notice of H.E. the C. in. C. that the regiments as follows: [2nd. drag. gds., 6th drag. gds., 7th drag. gds., 7th hussars, 5th, 6th, 13th, 20th, 23rd, 24th 27th, 34th, 35th, 37th, 42nd, 48th, 70th, 71st, 73rd, 79th, 80th, 81st, 82nd, 89th, 92nd, 93rd, 94th, 97th, 98th regts. of foot, 2nd batt. rifle brig., 3rd batt., rifle brig.] have failed to comply with the circular letter from the military secretary's office, dated July 18, 1834; officers commanding these corps are requested to forward immediately to the military secretary to the C. in C. the documents therein called for, viz., muster rolls, casualty lists, family remittances, and account of the assets of deceased officers and men, and to be more punctual in the transmission of these returns for the future.

Here are 31 regiments which have neglected to do what they knew they ought to do. But the Commander-in-Chief does not venture to talk of the officers who are responsible; he speaks of corps as if corporations could act without officers. If there was a threat, which would be carried out, of suspension from rupees as command money, there would be a good deal more alacrity in obeying orders. Whatever shortcomings may be evinced in that Order, we cannot but congratulate the Commander-in-Chief on the sense and spirit of the following Order, though we deeply regret it should have been necessary to issue it.

PROTECTION OF NATIVES FROM MALTREATMENT.

Adjt.-Gen.'s Office, Simla, Aug. 24.—The commissary-general having brought to the notice of the C. in C. a recent case of maltreatment of an old and respectable servant of the State, attached to a regiment as commissariat-gomashtah, upon whom corporal punishment was summarily inflicted for the non-performance of a task erroneously imposed upon him, H. E. calls upon commanding officers and superior local authorities to prevent such unjustifiable treatment of departmental servants attached as agents to corps.

It must be obvious that no men of respectability will undertake to fill these situations if they are to be subjected to degrading punishment, and the treatment of menials, at the caprice of the regimental officers with whom their duties bring them in contact; and the C. in C. warns officers concerned that they will in future be held responsible for any such unbecoming conduct.

H. E. expects that officers commanding stations will afford their protection to the classes under reference, and invariably bring to notice all instances of harsh and improper behaviour towards them.

Hæ tibi erunt artes—parcere subjectis—debellare superbos."

Mr. Arthur Jones, who since last June has been officiating as Secretary to Vice-Admiral J. Hope Johnstone, Commander-in-Chief at the Nore, has resigned this appointment, and has accepted a similar office under Vice-Admiral Sir Houston Stewart, K.C.B., the new Commander-in-Chief at Devonport.

It has been found very difficult to obtain the proper muster rolls of the Volunteer force from the various Clerks of Lieutenancy; the returns, which ought to have been made in accordance with the Act in August last, are not yet complete, and the War Office are taking steps to secure attention to this matter. The total number of Volunteers is understood to be under 130,000.

Major Roney, Depôt Battalion, is to be Assistant-Inspector of Volunteers, vice Major Eager, who is to be Assistant-Adjutant-General in Tasmania. Major Roney's division will be Wales.

Mr. Henry Perry, Paymaster (1856), lately serving as secretary's clerk at Portsmouth, has been selected by Vice-Admiral J. Hope Johnstone to perform the duties of his secretary, vice Mr. Arthur Jones, removed to Devonport.

Vice-Admiral Sir Houston Stewart, K.C.B., the new Commander-in-Chief at Devonport, arrived there on Monday last.

Lieut.-General Sir James Outram is so far restored to health that he is able to leave Brighton for the moment. It is the earnest hope of all his friends—and they are many—and of all his admirers—and they are all who ever served under his command, or have been brought into contact with him—that he may soon be sufficiently recovered to receive the congratulations and honours which are his due.

The King of the Belgians was so greatly impressed by the Volunteer Review in Hyde Park, that he has thought fit to inquire whether the elements of a similar movement may not exist in Belgium; and it is understood that he has applied, through the proper channels, to the War Office to ascertain by what organisation the result he witnessed was produced.

The whiskericide order at Aldershot must be looked at calmly as a matter of H.M. Regulations *v.* razors. There is no question about the precise formula. The Duke laid it down long ago, and "hair," as a military matter, is taken notice of in every European army.

We are glad to learn that in one camp at all events the remarks in the ARMY AND NAVY GAZETTE, which were only the utterance of many voices, have been heard so far that steps have been taken to give permanent covers to the stables, and protect at least the horses from inconveniences and injuries to which they ought not to have been exposed.

The *Moniteur de la Flotte* states that the Minister of Marine has issued an order to the effect, that in future no further bronze screws shall be supplied to French men-of-war, but all screws shall be manufactured of cast or forged iron.

RETIRED CAPTAINS AND SUBALTERNS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As a very great favour, I ask your powerful assistance towards obtaining the favourable consideration of the authorities, for the position of captains and subalterns who have, or may sell out, after a period of LONG and honourable service.

Some of us have served ten, fifteen, and even twenty years, on full pay! And yet, on retiring from the service, we find ourselves deprived of all rank, and our past services forgotten.

Many of the retired captains have served eighteen or twenty years; and there is actually one retired subaltern who has served fifteen years on full pay, mostly in India! Yet we do not possess any certificate from the authorities of our long and honourable service.

Of course we all wear a moustache, and many of us (I at all events) possess affectionate and glorious letters from our late commanding officers, showing how our mess-mates held us in a far higher estimation than we had imagined. But we have no right to rank of any kind to mark our past services. Many of us have wasted the best part of our lives in her Majesty's service, in the East or West Indies, or in China; and when our inclinations or affairs necessitated our retirement, we found ourselves considered by the authorities in the light of mere military outcasts, deprived of all *right* to rank, and the privilege of wearing our uniform at Court.

Surely, Mr. Editor, it could not possibly injure the service to allow honorary rank of captain on retirement to all officers who have served ten years on full pay! It really would be a great boon, and a well-deserved one; I am quite sure the public would never object. We see every day captains and majors in the Militia manufactured out of lawyers, doctors, and respectable graziers! And in the Army we behold honorary majors and captains constructed of paymasters and quartermasters.

Under such circumstances I ask you, sir, and with the most profound respect I also venture to ask the Right Hon. the Secretary for War, Is it right to withhold an honorary retiring rank from an old soldier? That very meritorious officer, the quartermaster (whose very laudable care of certain articles of clothing entitles him to military honours) is secured the honorary rank of captain on retirement. The paymaster (a warrior, of course), becomes a major without retiring at all! Surely we, who have spent our time in the ranks, have as good a claim as these!

I have the honour to enclose you my card as a pledge of my good faith; but as I object to publicity, I request you will be so kind as to suppress my name, and allow me to subscribe myself CONSTANS.

COOLNESS IN HOT WEATHER.—The following incident of the late engagement on the Volturno is given by the Italian journals:—"A soldier who had his kepi knocked off by a cannon-ball, exclaimed, 'What rudeness! Do you want me to go bareheaded in such broiling weather as this?' and so saying, he tied his handkerchief round his head, and continued firing."

TRANSPORT SERVICE.

The promoters of the schemes for inducing seamen to join the Naval Volunteer and Reserve Forces deserve very great credit for the laudable attempts which they have made to provide men for our fleets in time of war, or on any sudden emergency. The first of these plans has now been some years before the public; and, however desirous we are to believe that it has been successful, we must reluctantly arrive at an opposite conclusion. The latter, however, has been scarcely long enough in operation to realise all that was promised to us by those who devoted time, energy, and no small amount of experience acquired in the Naval Service to devise ways and means by which our sea-faring population might be induced to come forward and assure us that in our hour of need we might rely upon a supply of sailors, not certainly regular men-of-war's men, but stout, hardy fellows, somewhat accustomed to discipline, and not altogether strange to great gun and small arms drill. We have reason to believe that several thousand of such men will have enrolled their names by the end of the year, but we question if the money devoted to the development of this scheme would not have been laid out to greater advantage for the public if it had been applied to the building and equipping, as far as it would go, steam transports. We should not only then have the men immediately at command, but we should possess the ships. The men would not be new to a man-of-war, but, on the contrary, they would be as valuable as if their whole time had been passed in a regular cruiser, and we could, without much difficulty, draft at least two-thirds of the crews of each vessel to fill up vacancies in the fleet, or to form cadres for fresh commissioned ships. The great bulk, however, of the money which we might depend upon for possessing more Himalayas must be diverted from the amounts which otherwise would annually be spent upon the hire of mercantile transports. When we once have the vessels we can make certain of possessing a body of valuable sailors, such as we should look for in vain from any other quarter. It is stated that we must make up our minds to the annual conveyance to and from India, of no less than 20,000 men. We should, therefore, want, for this service alone, at least eight ships of the size of the Himalaya, which appears to us about the most convenient that has as yet been hit upon. We have besides to provide for our Mediterranean, West India, and North American reliefs, in addition to those for all our minor stations, such as the Cape of Good Hope, Ceylon, Mauritius, our Australian colonies, &c.

We have dwelt so frequently upon the subject as almost to exhaust it; and it afforded us great satisfaction when, in our last week's impression, we announced the fact that the Admiralty had resolved to carry into execution a scheme for the formation of a transport service. This plan will, doubtless, meet with opponents, but we have no fear of any serious obstruction being offered to its adoption; although we are very anxious indeed that fair play and a full hearing should be given to all who have anything to say against it.

THE NAVAL STRENGTH OF FRANCE AND ENGLAND.

The equilibrium of the naval strength of France and England is made the subject of discussion in an article in the October number of the *Révue des Deux Mondes*, by M. Louis Reybaud (de l'Institut). The data are taken from our own military and naval statistics, and from French official sources. M. Reybaud deplores the rivalry which actually exists between the two nations on either side of the Channel, and regards the question as a financial as well as a naval one. The longest purse will finally obtain the superiority. Is France justified in keeping up a fleet equal to that of England? The situation of the two empires, very justly observes M. Reybaud, is not the same. Whilst England has but one issue, and runs risk only on the sea-side, France has to act and guard by land as well as by sea. Betrayed by the sea, England is, if not lost, at least disarmed. The Continental fortune of France survives disasters suffered at sea. French arms may have one theatre less without losing anything of their prestige. As regards England, her navy is her chief concern, whilst with France it is an accessory.

"We do not wish," says M. Reyband, "to overlook the serious motives which allow a belief in the duration of a good understanding between England and France; but, nevertheless, the symptoms which show themselves on either side of the Channel, denote that the long period of *entente* is about to be replaced by one not exactly of hostility, but of coolness. Comradeship on the battle-field has not done away with the prejudices of race." After these preliminaries, M. Reybaud examines into the condition of the two navies. We quote his own words:—

"In the session which has just closed, the English Government studied to maintain a certain alarm in the public mind with a view to a plan of defence, which Parliament in a calmer mood would with difficulty have acceded to. The object was to fortify the coast, and to prove that 300 millions francs devoted to that purpose was not too heavy a sacrifice for a country which in less than five years spent nearly 600 millions francs for its floating defences. The task was a difficult one, but the premier succeeded; the millions were voted. Amongst other motives brought forward as urgent, the condition of our Navy was one. Nothing is looked upon with so jealous an eye in England as our Navy. The premier did not fail to represent the development of the power of England as the consequence of the development of ours. Lord Clarence Paget came to the support by leaving out ten ships in his enumeration. These fictions are not thought unworthy to get a grant from Parliament. Very exact details have recently been published of the relative state of the armaments of France and England.* With the aid of those documents and those furnished by the Navy List of July 1, 1860, the actual condition of the two navies can be accurately given.

"In ships of war the English had then afloat 63 line-of-battle ships, and 41 screw frigates; we had 35 line-of-battle ships, and 38 screw-frigates; the difference is 28 ships and 3 frigates in their favour. This is, as nearly as possible, the proportion we stated last year. It is true the Admiralty made a great and costly effort to gain this advance. At a recent period the two navies balanced each other; equal in number, we were, however, superior in quality. The maritime *fêtes* at Cherbourg made England look closer into her resources. An investigation took place, and it was discovered that of the 50 screw-ships on the Admiralty list, 20 only were fit for active service. We had then 29 afloat, or ready to be launched. England had only 34 frigates; we had 46. So stood matters in 1858; the advantage was clearly on our side. A decree, moreover, of 1857 granted a credit of 170,000,000 francs on 10 budgets up to 1867 for new constructions, which are to bring up our fighting fleet to 40 ships of the line and 50 screw frigates. These facts made England ponder. In this distribution of forces she beheld a great public danger, and spared nothing to avoid it. Her awakening gave the measure of her activity and power. At the end of 1858 4 sailing ships had been transformed; in 1859, 6 new ships of the line were afloat; two steam-rams with blindage had been ordered from private companies; 5 new frigates and some accessory vessels completed this renewal of *matériel*. Never had such activity been displayed. According to the official returns presented to Parliament the new constructions comprised in the course of the two last years 46,284 tons, of which 20,210 for ships of the line, 21,608 for frigates. The orders for steam-engines amounted to 16,730 horse-power. In 1860-1861 there will have to be added to the above figures 13,216 tons for ships of the line, 13,500 tons for frigates, 4781 tons for corvettes, 8,045 for smaller vessels, and additional 12,800 horse-power of steam. It appears that succeeding cabinets urge on instead of slackening the impulse, and it is clear that however reasonable at first, the development of the English force commences to assume a character of exaggeration.

"And what were we doing all this time? Did we reply to this effort of the rival navy by a corresponding effort? A glance at the official returns will show that we did not push reprisals very far. We adhered strictly to the dispositions of the decree of 1857, prepared in 1855 by a committee, and fixing with the annual credits the proportions of our effective strength. Not one ship, not one million was added to that law which adjourns to ten years the complete establishment of our forces. To the 30 new or transformed ships which England set afloat in twenty-six months, we only opposed five or six of the same size. At three different times England asked for 200 millions for navy estimates, whilst we never went beyond the 17 millions annually granted for our navy.

"Money, after all," continues M. Reybaud, "is the essential term of the problem of naval superiority. Since a first-class ship costs five millions (200 000*l.*), and an iron-sheeted frigate six millions (240,000*l.*), and that these machines of war cannot move under a cost of from 3000 to 5000 francs per diem, the part to be played on the seas is according to the sums expended. The riches and credit of a state have much to say to it. It is a financial as well as a military duel; does it suit us to fight it out? Are we to oppose millions to millions? Are we to give to our Navy an equivalent, or nearly so, of the magnificent dotation which we give to the army? To every vessel constructed in England are we to reply by putting another vessel on the stocks? The question thus put resolves itself. Our resources, however abundant they may be, have limits, and it would be a sorry game to place them all on the hazards of war. It would be temerity to strive by force of money to assume the empire of the seas over a people who, by their commerce and industry, levy contributions on every country of the globe. Do what we will it is always in England's power to be a-head of us. The proportion may vary, but it will remain what England deems it prudent and useful that it should be."

M. Reybaud then advocates that in default of numerical strength, quality must be cultivated. This naturally leads to the "Iron-cased ships."

"It has been deemed expedient," says M. Reybaud, "to make our ships invulnerable. Will these *frégates cuirassées*, or steam-rams, as the English call them, respond to what is expected from them? We have only two afloat—La Normandie and La Gloire. There are four others on the stocks. These vary from 900 to 1000 horse-power, and are to carry from 36 to 40 guns of the heaviest calibre. The English have only 4; 2 afloat, the Warrior and the Black Prince, each of 6000 tons and 1250 horse-power, armed with 36 guns; 2 others of lesser dimensions are under construction. How comes it that England does not keep pace with us? She has but 4 iron-cased ships, whilst we have 6. Does she entertain doubts of their efficiency? Recent experiments have shown that Armstrong and Whitworth guns can send projectiles through iron plates 4 inches in thickness. Firing on shore, however, at a fixed object is different from firing at sea at a moving object, and a cuirass, with all its defects, is still a cuirass. Should it only turn off one-third of the shots fired against it, it would still maintain an enormous advantage over an adversary not armed like itself."

The relative strength of the crews of the rival Navies is thus given:—

"The manning of the English fleet is now on a war-footing. In 1836 its effective strength was 17,500 men; in 1859 it was 37,000; in 1860 it is 40,000; in 1861 it will be 58 000 men. To this must be added 18,000 marines, giving a total of 84,000 men afloat. This is about three times the effective strength of the crews of the French Navy."

Respecting La Gloire, M. Reybaud observes:—

"The attention of the English Admiralty must naturally be attracted to the trials with La Gloire. The frigate carries its heavy metal armour with ease; neither its nautical qualities, speed, or the regularity of its movements have been affected. In a calm sea she cuts through the water like a knife; in a heavy sea she can go from eleven to thirteen knots. The severity of her lines, the mass of iron that covers her, the height of her batteries, the calibre of her guns, give some idea of her power. Should these results remain after a long trial, it must be expected that our neighbours will not remain indifferent. We shall then have nothing but iron-cased fleets; the ships will act by their mass as well as by their artillery. It may then happen that the problem, settled as regards the resistance of the armour, will turn to those capacities which alone insure duration of service. To hold the sea longer, larger vessels will be required, and a nearer calculation will have to be made between the outlay made and the work accomplished. A vessel 225 metres in length, like the Great Eastern, would only burn one gramme of coal to convey a given weight to a fixed distance, whilst a vessel of 22·50 metres would burn a kilogramme to do the same service. Moreover the smaller vessel could only carry fuel for a few hours' navigation; the big ship could carry it for months. Thus Mr. Brunel's dream of giants of the seas would be realised. The effect of changes is to engender changes. Whatever innovations may take place now or in future, our neighbours will adapt their means of defence to maintain their advantages. It would be folly to suppose that they would be tired by continual changes, and reduced by surprises and discoveries."

M. Reybaud concludes as follows:

"One last reflection presents itself. It is an old axiom that to prevent war, the best way is to prepare for it. Never, in that case, had the world greater reason for counting upon a long repose. On every side there is the din of armament; in the dock-yards, foundries, arsenals—thousands of hands are busy at work making weapons of war; the coasts bristle with defences, the ships are getting in their full complement of men, inventions succeed each other to increase the energy of destruction. Are we to behold this spectacle with confidence and look upon it as a guarantee of peace? We may at least be allowed to entertain a doubt. This fever of preparation imposes heavy charges upon the countries which are infected *by it; with whatever* resignation they may support it, a re-action must take place.

"Perhaps, on looking closely into it, they will come to the conclusion that peace thus understood is less a blessing than a sacrifice, and that, everything considered, war would be more economical. Ever-increasing expenses and armaments carried to excess may lead to that. Governments should be on their guard; having carried along public opinion, it is possible that, in its turn, public opinion may drag them along, and that they will no longer be able to control this military movement and taste, from not having better regulated their march and more carefully superintended their initiative."

* *Budgets de la Marine en France et en Angleterre.*

WARRANT OFFICERS OF THE NAVY.

[The following is a copy of a petition which gives utterance to the wants and wishes of a most valuable class of men whose influence in the British Navy, in its successful administration and in its organisation, can scarcely be exaggerated. The prayer of the petitioners deserves the most serious attention, and we believe they are at present receiving from the Admiralty the consideration they deserve. At present we rest satisfied with placing before the country the statement of the feelings and expectations of the body to which we have referred.]

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF THE ADMIRALTY.

The humble petition of the Gunners, Boatswains, and Carpenters of the Royal Navy,

HUMBLY SHOWETH,—That while your petitioners are truly grateful for the recent concessions made to them, they would with all humility submit to your lordships the grievances under which they still labour, and suggest such proposals, as would, if granted by your lordships, satisfy the claims of the warrant officers, and stimulate the seamen of the Royal Navy to aspire to that rank and position.

1st. The present position of warrant officers is not such as to command the respect due to the performance of their very responsible duties, and we beg especially to point out that the rank and position of warrant officers of the first class is no higher than that of those who are just warranted, so that there is no progressive rank, whatever the length of service, after once having attained the grade of warrant officer. We would therefore suggest that the following rank and position be granted to warrant officers, viz.:—

1st class warrant officers to rank with but after masters
2nd do. do. do. masters
3rd do. do. do. 2nd masters.

And that a relative army rank be granted them.

2nd. The warrant officers are the only class in the Navy who are required to serve on a reduced scale of pay, i.e., "Harbour Service Pay." The position of warrant officers when in charge of ships in ordinary is equally responsible, and their duties frequently as arduous as when serving at sea, they having to keep regular watch day and night, and being responsible for the whole safety of the ship and stores.

Digitized by Google

We beg to remark, that the engineers, petty officers, and seamen serving under their orders are on full pay, and count their whole time so served for increase of pension, while the warrant officers are serving on reduced pay and count only three years for one.

We would therefore suggest that the present "sea-pay," be the standing pay of warrant officers, and that that of warrant officers of the first class be increased 5*l.* a-year until it reaches 150*l.*; but that warrant officers serving in ships in commission, or first-class reserve, should receive in addition to their pay as "store money":—

First class	£30	a year
Second class...	25	,,
Third class	20	,,

which would constitute the difference between "sea," and "harbour pay."

3rd. The present regulation as regards "widows' pensions," grants to the widow of a warrant officer of one year's standing, a pension of 25*l.* a-year, and no higher one to the widow of a warrant officer of thirty years' standing. We therefore suggest the following scale for widows' pensions, viz. :—

Widow of a warrant officer under 5 years standing	£25	a-yr.	
,, ,, ,, over 5 & under 10 yrs.	30	,,	
,, ,, ,, 10 ,, 15 yrs.	35	,,	
,, ,, ,, 15 ,, 20 yrs.	40	,,	
,, ,, ,, over 20 yrs.	45	,,	

4th. When a warrant officer is wounded or hurt, at present he is placed on the "Harbour Duty List," upon reduced pay and time, and all promotion ceases. We would therefore suggest that warrant officers who are rendered unfit for active service at sea, by wounds or hurts received in the Service, should be granted a pension according to their relative rank in the Service (*vide Art.* 1), and that the promotion of officers so pensioned, be continued by seniority.

5th. Promotion to the rank of warrant officer at present is frequently the cause of years of debt and misfortune to him, from the expense of his first outfit, as very few have the immediate means of meeting so heavy an expense, and they consequently are obliged to have recourse to an agent for pecuniary assistance; and we can adduce several instances of first-class warrant officers of long standing, who have never been able to clear themselves of the debt which their promotion to the rank of warrant officer entailed upon them.

We would therefore submit that the sum of 15*l.* at present allowed, is totally insufficient for the cost of an officer's outfit; and with regard to the commission and consequent 100*l.* for an outfit, *vide* Admiralty Circular, June 14th, 1853, as no warrant officer has yet been deemed eligible for this distinction (although five have been decorated with the Victoria Cross, for "distinguished acts of gallantry and daring in the Service"), we would cheerfully waive all claim to such promotion, and consider the rank of warrant officer, as in reality it is, the highest attainable to seamen in the Service, but at the same time render it more worthy of aspiring to.

6th. The whole time served as seaman and petty officer at present is lost on accepting a warrant, and there is no remuneration for such service, and although their lordships have been pleased to permit warrant officers to retire at the age of 60, without medical survey, so small and uncertain is the present scale of retirement, that they are compelled to serve on for their livelihood, until forced to retire by old age and infirmity.

Every class in the Service counts either whole or part time served in a subordinate grade, for retirement in the rank they may attain, and we would therefore suggest, that half the time served as petty officer and able seaman should count for retirement as warrant officers' time, and that warrant officers be permitted to retire at the age of 55 on the following scale, viz. :—

Warrant officers of 20 years' standing ...	6*s.*	per day.	
,, 25 ,, ...	7*s.*	,,	
,, 30 ,, ...	8*s.*	,,	
,, 35 ,, ...	10*s.*	,,	

and that the honorary rank of lieutenant be granted to them on such retirement.

Should any warrant officer be invalided as unfit for service before completing 20 years' service, he should be granted a pension of not less than 2*s.* 6*d.*, or more than 5*s.* a day.

7th. That the position of Chief Officer of the Coast-Guard be open to first-class warrant officers, with their relative rank of master.

8th. That a presentation to the Upper School at Greenwich be granted to one son of a warrant officer, on his reaching the required age.

9th. That warrant officers be admitted to the benefits of Greenwich Hospital, both as resident officers, and out pensioners.

10th. That boatswains be exempted from inflicting corporal punishment.

11th. That no warrant officer be dismissed the Service without trial by court-martial.

12th. And your petitioners would beg most respectfully to point out the position of warrant officers, with regard to messing, &c., the only place they have now to mess in or retire to being the cabin in which they sleep, and they would consider it a great boon were a mess place allotted to them in ships of the line and large frigates, in addition to their cabin, where they might be able to enjoy mutual intercourse and society.

And your petitioners, as in duty bound, will ever pray.

Signed on behalf of the warrant officers of the Royal Navy,

James Cooper, Thomas H. Howels, Richard Spry, Henry Williams.	Gunners.
George Webber, James Bolt, John Dowrick, Colin Grant.	Boatswains.
Stephen Moore, Henry Hoar, Richard Earl, Michael Pascoe.	Carpenters.

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From our own Correspondent.]

Naples, 13th October, 1860.—The coming of the King of Sardinia, or, as his admirers love to call him by anticipation, the King of Italy, is the all-absorbing topic in Naples at present; and, to judge by the preparations, it is considered as of far greater consequence than the fall of Capua—an event as yet *in futuro*. The municipality has voted a sum of 120,000 ducats (equivalent to twenty thousand pounds) to defray the expense of erecting triumphal arches, decorations, public illuminations, &c., on the arrival of the king. The more sanguine fix Monday next, the 15th inst., as the precise day on which he may be expected; others, however, give him two or three days' grace, to allow for the accidents and delays of the road. All seem satisfied that it will occur on some day in next week; and no little excitement pervades all classes of a people essentially royalist in anticipation of the arrival of a monarch, whom the newspapers, and even the poorer people, already call "*Il nostro Re.*" The dubious import of the term "*Il Re*" is thus got rid of, and it is amusing to remark the care taken to distinguish between the Bourbon and the king elect. Should there be any mention of the word king in conversation, it is at once asked which king you mean? By the Neapolitans themselves all ambiguity is avoided by calling the King of Naples "Francesco," and the King of Sardinia "Vittorio Emmanuele" or "*Il Re galantuomo.*" Meanwhile, the existing government of Naples issues its proclamation, signed by the Pro-Dictator, Pallavicini, annulling all diplomatic and consular appointments so called Neapolitan in foreign countries, at the same time praying the king, Victor Emmanuel, to give the necessary orders to his representatives in foreign countries to take charge of the interests of the inhabitants of southern Italy as of the northern parts of the same kingdom. The administration of Pallavicino seems to inspire universal confidence and security, and to have already imposed silence upon dissenting politicians, if not permanently put a stop to dissensions. His proclamations up to this date have all met with general approbation, and all must allow that they are terse and vigorous, of which the following may serve as a specimen:—"Citizens,—In the name of the Dictator I promise you a splendid future; I promise to these noble provinces, Victor Emmanuel reigning, order with liberty. And that signifies, O citizens, impartial administration of justice, the base of every civil government; careful re-organisation of the army and fleet; increase and better organisation of the National Guard; schools for the people; railways; encouragement of every sort to agriculture, to commerce, to industry, to the arts, to letters, and to sciences; respect to religion and to its ministers, wherever they be in truth the apostles of Christ, and not those of the Bourbon. But, above all, the new government will promote unity—the supreme want of Italy."

Then follows an exhortation to unity, and advice to arm, these constituting the components of the oriflamme and national palladium. The proclamation finally summing up with the usual "Viva Garibaldi! Viva il Re galantuomo! Viva L'Italia!" adds to the cry of "Italia Una," the term indivisible, and closes all with a new war-cry of "l'Italia degl' Italiani!" The appearance of the proclamation, of which with the exception of a few lines the above is a translation *in extenso*, was well received, and taken as a fair earnest of a wise and strenuous administration, than which nothing is now more needed in all the southern part of the kingdom.

The general vote regarding annexation is to be taken on the 21st inst., both in Naples and Sicily, and all men who have completed the age of 21 years, and are of sound mind and free of offence in the eyes of the law, are at liberty to vote. There is no doubt entertained as to the result; the "ayes" will have it with a vast majority. Meantime, the internal state of the kingdom is undergoing a thorough reform; old functionaries are made to retire gracefully and contentedly with pensions, the just reward of former services, whilst their places are being filled with younger and more vigorous successors; pensions are also granted to the surviving relatives of martyrs in the cause of Italian liberty. Remuneration to the amount of 450,000 francs is decreed payable from the public treasury of Naples to Raffaele Rubattino & Co., for loss sustained by the illegal capture and detention of the Cagliari; also the sum of 750,000 for the loss of the steamers Lombardo and Piemonte in May last, at the time of "the first and auspicious expedition to Sicily." This sum takes into consideration not only the value of the vessels in question, but the loss sustained by the owners in being deprived since May last of the revenue that would have arisen from the use of their vessels, they being without a remuneration to enable them to purchase others, as well as the loss sustained by the officers and seamen, whose effects were plundered or destroyed, and is granted not only as an indemnity, but to re-assure the commercial confidence of the country; of the latter sum, three-fourths are charged upon the treasury of Naples, and one-fourth upon that of Sicily. Several fresh military appointments have been made, amongst which the most important are those of Lieut.-General Roberto Desaguet to be commandant of the National Guards in the provinces, and General the Marquis Ottavio Topputi to be commandant of the National Guards in the city and province of Naples, vice General Mariano d'Ayala, called to other duties. The only remarkable decree of repression is that declaring all assemblies, whether called club (*sic*) or circoli, having a political scope as forbidden by law, adding that the offenders against the said decree will be prosecuted under provisions of the penal code now in existence. Of Garibaldi, personally, little more can be known than that having commanded in person in the late attack of the 1st inst., he is still at the front, reviewing, organising, and manœuvring his troops; his habits are as simple as ever, he is as easy of access as before, and seems to rest but little; he personally inspects every point of the position, and inspires courage amongst his followers everywhere.

Admiral Persano, now promoted to Vice-Admiral, arrived in the Bay of Naples on the 9th inst., his flag flying on board the ex-Borbone, lately belonging to the King of Naples, but now called Il Garibaldi. With the admiral came 2500 Sardinian soldiers, comprising cavalry as well as artillery and infantry; the transport conveying them was towed in, and the men landed without delay. The fortifications at the front have now assumed an aspect very different from that presented by them on the 1st of October; the number and size of the guns have been greatly increased, and siege guns, 36-pounders, are now in position. On the left of the railway another battery has been erected. Engineers are at work day and night at St. Angelo. An engagement took place on the 8th inst., but not of an important nature, the Garibaldians captured four guns. The prisoners—Bavarian troops, principally—taken on the 1st inst., have since been sent to Genoa. Rumour says, a brother of the king was taken on that occasion, and is now in the Castel d'Uovo; if such be the case, his rank is kept secret, all that is certainly known being that he is a prisoner of distinction. Garibaldi has published an address directed to the citizens of Molise, who were attacked and plundered in the foray of Saturday, 29th ult.; and, as it gives a good idea of his style as well as his purpose for the future, I translate it verbatim:

"To the Citizens of Molise.—Glory to the valorous! to the brave! who know how to defend their homes, their wives and children, from the wolf. Glory to the brave sons of Molise. They fought and conquered at Isernia. Eternal shame to those populations that fled at the approach of the depredator, and that abandoned all. When they return to their houses, their wives should spit in their faces, and refuse to touch the cowards. Italians! When you decide on fighting you conquer; and when you will have decided on fighting all the oppressive strangers who desolate your country with one pretext or another, they will not await your coming. Then to arms, manly inhabitants of the Peninsula! To arms! You have four months to accustom yourselves to a warrior life. The fifth! .... The month of March '61 will certainly echo the hymn of victory and regeneration throughout all the Italian land.

"G. Garibaldi."

Yesterday, the 12th instant, the whole city was in commotion, owing to a report of Pallavicino's resignation. Vast crowds of people traversed the streets, and were not satisfied until they learned that the report was unture. They then assembled outside the Palazzo D'Angri, and lustily cheered Garibaldi, who had just arrived from Caserta; and, after sundry vivas for Victor Emmanuel, for "Italia Una," &c., made their way through the Strada Toledo to the Palazzo della Foresteria, where the meetings of council are held, cheering Pallavicino loudly. Everyone carried a card with the letters "SI" (yes) in front of his hat, signifying his wish for annexation. A telegraphic message from Farini at Grottammare, announced to the Sardinian Minister, Villamarina, the arrival of the king at that place, and his purpose of entering the Neapolitan dominions on Sunday (to-morrow), and praying him to hasten to meet him as quickly as possible. The publication of this dispatch has given universal satisfaction. My next letter will, in all probability, contain an account of his triumphal entry into Naples; and as it is uncertain which of the royal palaces he will occupy, they are all being put in readiness for his arrival, and Alexander Dumas has, in consequence, received "notice to quit" that of Chiatamone. The *Independent*—Dumas' newspaper—has at length appeared, and has of course taken the only tone endurable at Naples, the out-and-out praise of Garibaldi, who seems, were it possible, now more than ever the idol of the people. Whilst I write the cheers and vivas of the crowds carrying banners, who are thronging the square opposite the Palazzo della Foresteria is almost deafening. The Minister of the Interior, Conforti, eloquently addressed the crowd this morning, and Palavicino also, requesting them to disperse quietly. Since then I have been engaged in writing the last twenty lines; and now, as the noise seems increasing, and everyone is moving towards the Palazzo della Foresteria, I must. Garibaldi has addressed the multitude from the balcony of the above-named palace; and as I reached the spot in time to hear all he said, I shall give you a brief epitome of it:—"There are some who have spread untrue rumours in Naples, disturbing the minds of the people. They are the same who advised immediate annexation of Sicily, to impede me in the work of freeing Italy; the same who prevented my muskets leaving Milan; and they are the same who prevented my coming last year with 25,000 men to combat your enemies. Despotism has its eye upon us; it wishes to spread the impression that Naples is in a state of anarchy, and to malign this brave population. Listen to no rumours, no false reports. If any real cause of discontent exists, come to me—come to me. Select your own deputation. It does not need to have a marquis or a prince as one of its members. Come to me—you have confidence in me. A report of the king's coming reached this city yesterday—to-day it has been confirmed. I this day received a letter from our king. His troops entered the kingdom of Naples on the 10th inst.; that he has followed his army, to put himself at the head of it, and will soon be here, when all disorder and dissension will cease, and we shall have Italy free, in spite of those who dislike it." During this speech the Dictator had frequently to pause, owing to the bursts of applause with which the various parts of his address were received; and at its close the cheering was renewed more loudly than ever. Garibaldi looked remarkably well, and wore a low-crowned wide-awake hat all the time he was speaking; and over the usual red shirt a loose cloak of light gray cloth, lined with red and black plaid. In speaking he threw the sides of the cloak back over his shoulders, so that it left his arms free. He did not use very much gesticulation, saving which difference his manner not only reminded me but several others of Gavazzi's style; his voice, however, is more musical, and of greater compass. The whole character and vigour of the man were visible as he warmed with the full feeling of the sentiments he uttered. I have seen Garibaldi frequently, but never to such advantage. I have had the honour of conversing with him, and heard his sweet, low, calm voice, but now see how wonderfully different he is when excited. The scene I have just now beheld would be the one above all others for a stranger to have seen in beholding Garibaldi for the first time. And now I must hasten to post the letter ere the mail goes.

A number of the most intelligent of the Sappers and Miners of the Royal Engineers have been selected from among the companies at head-quarters, Chatham, to proceed to Australia, for employment at the Royal Mint at Sydney.

PROGRESS OF THE WARRIOR IRON-CLAD FRIGATE.

[From our own Correspondent.]

The completion of the Warrior is being pushed forward with as much activity as possible, and it is expected to be ready for launching in the month of December. With the exception of a small portion of the stern, the whole of the hull of the ship is completed. The girders for the decks are in position, and a greater part of the flooring is laid. In the engine-room the foundations for the engines, furnaces, and boilers are finished. The armour-plates require an immense amount of time for their manufacture and preparation, as they are formed of hammered and not of rolled iron, and are to be dove-tailed one into the other. At the experiments which were made some months since on the plates supplied by the builders of the ship, and which were attached to the side of the Sirius for testing from the guns of the Excellent, the resisting power of the plates was found to be highly satisfactory. At the ordinary range the shot failed to penetrate the plates; they were arranged on the dove-tail principle, and formed entirely of scrap iron, built up, and hammered. Plates of the description required—15 feet in length, 3 feet in breadth, and 4½ inches in thickness—are not formed without great trouble, and the process is, moreover, an exceedingly slow one. Each plate is made up of masses of iron, which are heated in the fire, and welded and incorporated piece by piece with steam hammers until the requisite dimensions are obtained. The plates have then to be planed on the surfaces and edges, moulded into shape, and grooved upon each side, so that the plates may fit one into the other. More than half of the plates are finished, and in a few days a commencement will be made of placing them in position. The teak covering of 18 inches thick on the broadsides of the ship is nearly all fixed. The fighting and iron-clad surface of the ship extends for 210 feet in length and 27 in depth, is five feet beneath the water-load line, presenting a surface on each side of 5670 square feet of iron 4½ inches in thickness. Behind this there are the two tiers of teak timber, each of nine inches square, one laid longitudinally and the other vertically over the iron hull of the ship, the skin of which is five-eights of an inch in thickness, and inside this again there is another surface of teak lining. The stern-post is one of the heaviest pieces of forged iron that have been made at the Thames works; it is one piece, and its weight is 43 tons; its height is 42 feet; thickness, 8 inches; and breadth 18 inches. The keel-plate is 1¼ inches in thickness, and from this the iron ribs of the ship's side spring. These ribs are of wrought-iron, made in joints of five feet in length by two deep, and securely bolted together. The ribs are forty-four inches apart, except at those parts where the sides are pierced for the port-holes, and in those parts the ribs equal in distance the most of the port-holes, viz., 3 feet 10 inches. At the bows and stern of the ship the iron used in the construction is of the ordinary thickness; but it is rendered of immense strength by a complete network of iron compartments, 27 in number, formed by the crossing and intersecting of plates of iron four-eighths of an inch thick. Any one or more of these compartments may be injured or pierced by shot without endangering the safety of the ship, and even if the whole of the bow and stern, which extends beyond the armour-covered surface were knocked away, the centre itself would still form an immense water-tight compartment in which the guns could be worked, and which could be for almost all practical purposes invulnerable. The engines are to be of 1250 horse-power, and their weight with boilers 950 tons. Her stowage for coal will be about 1000 tons, and her total weight including armament and stores will be upwards of 9000 tons. The speed expected is 14 knots, and there appears no reason to suppose that this rate may not be attained. The lines of the Warrior are remarkably fine and clean, and seem in every way suited for a fast ship. Her dimensions are 420 feet, over all, 380 feet between the perpendiculars, extreme breadth 58 feet, extreme depth 42 feet, tonnage 6100. She will be rigged as an 80-gun ship. The original intention of building the Warrior as a "ram" to run down other ships, and of disguising her real character by some artistic figure-head and false bows, has been abandoned. The notion that the ship will be a most expensive one is by no means well founded. The contract for building her has been taken at about 40*l.* per ton, or about the same cost per ton as an ordinary timber-built 80-gun ship, constructed in the Government dockyards. The engines will cost at the rate of 60*l.* to every horse-power, or, no more than engines of the same power supplied to any other ship. The armament, which will consist of Armstrong heavy guns, will cost no more than other guns of the same description. For its size, power, and durability, the Warrior will really be the cheapest ship in Her Majesty's Navy. Being of iron, she may fairly be expected to outlive La Gloire, or any of the French iron-plated frigates, which are merely old ships, covered with iron. The quality of the work, and of the material used in the Warrior, is assured by the constant superintendence of four Government inspectors; two of these are specially charged with the iron, and one with the timber portions of the work; the fourth has a general superintendence over the whole, and the disclosures relative to the "green wood" of the gun-boats appear to have made these gentlemen unusually lively and attentive to their duties.

ANGULAR IRON-CASED FRIGATES.

[Extract from the *Times*, Tuesday, Oct. 16, 1860.]

Some months ago our naval intelligence recorded with considerable detail the results of experiments made by Captain Hewlett, of the Excellent, in order to test the shot-proof powers of a butt constructed by Mr. Jones, a Liverpool shipbuilder, upon principles which he proposed applying to the construction of invulnerable men-of-war, and which for that purpose he had covered by a patent. The butt, it may be recollected, represented a portion of a ship's side sloped from the water-line upwards at an angle of 52 degrees, and faced with plates of iron three inches thick. So successful were these experiments that one of the plates took 17 shots on a space of 5 feet by 2½ feet before any part of it was removed, and then the iron was not effectually penetrated, nor the woodwork behind it much injured. After this trial, yielding as it did results quite unparalleled, the next step for the patentee to take was to demonstrate in the usual way, by working drawings and models, that his plan was a perfectly practical one for ships of war, and capable of being combined in them with the other indispensable requirements of stability—fighting room on deck, moderate draught of water, stowage accommodations for engines and coals as well as the crew, and, above all, high velocity. Mr. Jones has accordingly produced two models with corresponding drawings, which leave no room for doubt in any mind of ordinary intelligence upon any of these points. Impressed with the importance of the subject, we have examined it with the greatest care, and we feel satisfied that the kind of mail-clad man-of-war which he proposes, will be practically invulnerable, and that his plan possesses decisive advantages over that which the Admiralty are at present carrying out. To make this clear let us take the largest of Mr. Jones's models, that of a frigate 350 feet long, 63 feet beam, 32½ feet in depth, of 6600 tons builders' measurement, intended to carry upwards of 50 rifled guns of heaviest calibre upon her fighting deck, to be propelled by engines of 1200 horses, and to have a draught of 20 feet. It is quite a moderate calculation that such a ship ought to do 14 knots an hour. She would, therefore, have the speed, and being able to carry coal for 10 days' consumption, might be made independent of sails and top gear, which must prove an immense obstruction and source of danger in any naval warfare waged under the new conditions imposed upon us by steam and rifled cannon and iron armour. Imagine a fleet of frigates of this class, rising only 12 feet above the water, and with plated sides sloping inwards from stem to stern, at an angle of 50 deg., long and low, painted it might be to elude observation, sweeping through the sea at an immense pace—a pace beyond that of the Royal Albert and Duke of Wellington, and yet able to go close alongside of these wooden sea-castles and receive with comparative impunity at least, if not absolute indifference, all the hammering they could inflict. If we want to insure our maritime power against any enemy, it would seem prudent to have some vessels of this description. The "Warrior" class are open to many serious objections. To get the requisite amount of displacement the depth of draught is 27 feet, the breadth of beam and the heavy-plated perpendicular sides seem much less favourable to stability than the corresponding conditions of the plan proposed by Mr. Jones. Then it cannot be doubted that the Whitworth 80-pounder can drive a flat-fronted homogeneous shot through wrought-iron plates in a vertical position, with even a wooden scantling of 22 inches behind them. Above all, the structural details of the design upon which the Warrior is built seem unnecessarily complicated. There are certain positions in which she could be raked by the fire of an enemy, when such ships as the Gloire would escape uninjured. She is not only a steamer but a sailing vessel—a combination which we cannot help thinking unadvisable from the very moment that practical invulnerability is secured; and to navigate and fight her a very large crew will be required instead of one of moderate strength. What is required is to be able to strike the greatest possible blow upon the sea with the smallest possible risk to the lives of our brave sailors. Our wooden walls no longer help us to a solution of that problem; but if we can get at it by the aid of steam and iron, and fail to do so, we deserve to lose our naval supremacy.

Proposed Foresters' Rifle Corps.—It has been considered by many members of the Ancient Order of Foresters that the Volunteer Rifle movement might be taken up by the members of this society. One district alone in the metropolis (the London United) comprises more than 250 places of meeting, termed courts. The number of members in the whole order is nearly 200,000. The first meeting for enrolling members will be held next Monday night, in St. Clement's Court-house, Carey-street, Lincoln's-inn-fields. It is proposed that the uniform of the corps shall be the far-famed Lincoln green, trimmed with black, and a shako with a small plume of feathers. The cost of the uniform and accoutrements not to exceed 3*l.* 10*s.*, which it is proposed shall be paid by instalments, and the annual subscription to be 10*s.* 6*d.*, without any entrance fee. It is expected that at least 100,000 members will at once come forth and join the movement.

The Volunteer Movement and the Roman Catholic Clergy.—On Sunday last the Rev. Father Conway, of Oldham, preached a sermon in St. Anthony's Chapel, Liverpool. In the course of the sermon the rev. gentleman severely censured the conduct of the Emperor of the French, and doubted very much the assumed friendliness of that monarch to this country. He (Mr. Conway), however, congratulated this country on the Volunteer movement, and the organisation of such a body of men; and he felt confident that whenever the nation required the assistance of the Volunteers, or religion their co-operation, they would be ready to afford it. With such an organisation the people of this country had nothing to fear; and he felt great satisfaction in this reflection, because he firmly believed that the priesthood in this country, with the exception of those visiting gaols and workhouses, enjoyed more real freedom than in any other country at the present day.

THE MEDITERRANEAN.

Malta, 13th October, 1860.—H.M.'s troop-ship Himalaya sailed on the 6th instant for Gibraltar and England, having on board His Excellency Mirza Jaffer Khan, Persian Ambassador to the Court of St. James, and his suite; and 262 naval and military invalids.

H.M.S. Queen and Orion left this port on the 6th inst., the former for Naples, and the latter for Marsala. The Queen having broken her main yard on her way, returned on the 11th from Messina. The corvette Argus entered our port from Girgenti on the 10th inst.

Admiral H. T. Codrington, C.B., accompanied by Dr. A. Armstrong, Deputy-Inspector-General of Hospitals, and Mr. W. Ladd, Master-Shipwright of the Naval Yard, has minutely surveyed H.M.'s ship St. Jean D'Acre, in order to ascertain, if possible, the cause of the sickness which has so suddenly made its appearance among the ship's company. After they had examined every part of the vessel by boring her timbers in several places, they came to the conclusion that the illness cannot be accounted for.

H.M.S. Exmouth is daily expected at Malta; she will be relieved at Candia by H.M.S. Cæsar, at present at Beyrout. H.M.S. Melpemone is still at Corfu. The Agamemnon expects to winter at Naples. Also, the Victor Emmanuel, Neptune, Liffey, and Assurance are at Beyrout.

THE WAR IN NEW ZEALAND.

(From the *Sydney Morning Herald* of August 22.)

By the intercolonial mail steamer Lord Ashley we have papers from Taranaki (New Plymouth) to the 21st of July. The previous dates were to the 30th of June.

There had been no renewal of hostilities, but both parties were actively engaged in preparations for the coming—and, it is generally believed, final—struggle with the insurgents. It seems evident, however, that no movement of any importance will take place till after the arrival of Major-General Pratt, who has, doubtless, reached the seat of war ere this time.

Since the engagement on the 27th of June, Major Nelson, of the 40th, has not let the enemy repose at his ease, but has "kept pitching a shell in among the occupants of the Pah every now and then at uncertain intervals. Natives, adds the *Cross*, cannot bear harassing; they have strength under excitement, but little physical endurance. They cannot do without rest; they must have time allowed to recruit their strength. If this mode of annoyance be steadily continued, they will either quit the Pah, or fall sick of sheer vexation. This expression will sound strange to people at a distance; but not so to those who are acquainted with the idiosyncrasy of the race."

Limerick.—During the Munster Fair week the officers in garrison intend to give an amateur theatrical entertainment under the patronage of Colonel Barton, C.B., and the day selected is the anniversary of the Battle of Balaklava. There will be no doubt a good attendance in the Theatre Royal, for some of the amateurs have more than a local reputation, and there is a very *attractive programme* for the visitors.

Soldiers' Institute, Woolwich.—We regret to learn that this excellent institute, established in Frances Street about three years ago, for the non-commissioned officers and privates of this garrison upon the payment of the very small subscription of a penny per week, is about to be closed for want of funds, but we trust we have been misinformed; for surely in the town there are officers and civilians who have the moral, intellectual, and spiritual well-being of the British soldier sufficiently at heart to induce them to render the required aid for keeping open so desirable a place for the soldiers' resort in their leisure hours. The institute, which has a reading-room with newspapers and periodicals, a library, smoking-rooms, with refreshments at cost prices, such as coffee, tea, bread and butter, ginger-beer, &c., games, drawing and writing materials at cost prices, lecture and class-rooms, and which is open from 11 in the morning till 10 at night, has proved of great service to many of the men who have availed themselves of its privileges. We hear that the gallant General, Sir Richard Dacres, commandant of the garrison, who has recently paid a visit to the institute, has expressed himself in the most approving terms; and we earnestly hope that some means will be at once devised for aiding the committee, so as to prevent its doors being closed against the soldiers, who highly appreciate as a great boon the advantages which the institution offers to them.—*Kentish Independent.*

The Great Gun at Southsea Castle.—A working party of the Royal Artillery is at present employed in removing this enormous piece of ordnance from between the western seven-gun battery and the castle. It was placed in its present position at considerable expense about eighteen months ago; and it is now said that the gun is required for further experimental practice. The gun is 16 ft. 6 n. long from breech loop to muzzle; its base circumference 11 ft. 4 in.; muzzle circumference 7 ft. 1¼ in.; bore diameter 1 ft. 1 in.; thickness of metal at breech, 1 ft. 10 in.; ditto at muzzle, 7¼ in., and it weighs 22 tons. Weight of carriage, 3 tons 2 cwt.; weight of platform, 4 tons; weight of shot, 336 lbs.; weight of service charge of powder, 78 lbs.

The commodious range of buildings which has been for some time in progress at Brompton Barracks, Chatham, to be used as the mess-room for the officers of the Royal and Indian Engineers, is now completed, and will be opened on the 26th inst., on which occasion a grand banquet will be given by the officers, followed by a theatrical entertainment. The new mess-room, from its extensive size, will dine nearly 250 persons. The entire expense of the erection has been defrayed by the Government.

One of the French officers who took part in the recent battle between the Papal and Piedmontese troops relates a singular incident:—Captain de Charette found himself engaged in conflict with swords with a Piedmontese officer, and wounded him. On seeing his adversary fall, M. de Charette bent over him, and the Piedmontese officer was only able to press his hand and expire. They recognised each other at that supreme moment as old acquaintances, having been fellow pupils at the Military College of Turin.

INSUBORDINATION.

Deputy Judge-Advocates-General have lately been doing a thriving business. Whether or not the contagion has been wafted by unlucky winds from sea to shore, where, like any other epidemic, moral or physical, it must have its fling, we are unable to say; but rumour, trumpet-tongued, from camp and garrison, assures us too painfully that the foul disease of insubordination is among us, and must at once be checked. Cases have lately occurred in Shorncliff, Dover, Portsmouth, Aldershot, and other places, where officers and non-commissioned officers have been struck and grievously hurt when in the strict discharge of their duty; where the madmen who so violated the rules of discipline had received no provocation whatever. But the worst case which has come to our notice lately is the ruffianly assault upon Colonel Cooper, commanding the 45th regiment at Aldershot. This officer was the district visitor of the military prison in the camp. While going his round in the prison he was informed by the warder that two of the prisoners wished to speak to him. Accordingly he went to them, and addressing the prisoners who were engaged at hard labour, asked "who wanted to speak to him?" whereupon, like a flash of lightning, two men turned round, one of whom struck him in the eye, and the other in the breast, inflicting savage and serious blows, observing, "That is all we want," and immediately resumed their work. So severe was the blow in the eye that the sight was for some time in jeopardy. The men belonged to some other regiment, and were perfectly unknown to this officer.

The questions naturally arise: 1st. To what can we attribute the growth of this complaint? and, 2ndly, what means can we adopt for its eradication? To the first of the questions we are almost at a loss to reply, for in no instance has any grievance been alleged against the officers assailed; yet we have a grave suspicion that the secret of the matter lies in the ill-judged remission of punishment awarded to notorious offenders. It is said that some of these men who have received sentences of penal servitude have been set at large with tickets of leave, and have been seen in the neighbourhood of camps and garrisons boasting loudly of their exploits, and enjoying the profits of some low yet lucrative trade. We cannot imagine anything more calculated to upset the slight hold which discipline, however strict, obtains over the minds of naturally ill-conducted men, or more fraught with evil to the well-being of the Service.

Where the remedy is to come from is almost equally perplexing; and although the Articles of War provide the severest punishments for insubordination, it is hardly probable that the sentence of death, although awarded in all due solemnity by courts-martial, will be carried into effect in this country in the time of peace. Yet we are by no means sure but that one example may be necessary for the safety and discipline of the Service, however terrible its infliction and severe to the public mind might be its shock. We call to remembrance how in the East the Commander-in-Chief was obliged by stern necessity to enforce the last penalty of the law, to check the frequent assault upon officers by men who sought transportation as a means of reaching the newly discovered gold-diggings. And again, we have not forgotten the case which occurred in 1852, when the late General Conyers commanded in Corfu, where several non-commissioned officers having been struck down on parade, he warned the men that he would carry the sentence of the law into execution on the next offender. Unhappily he soon had cause to uphold the firmness of his decision, for a non-commissioned officer being again knocked down, and the court-martial having sentenced the prisoner to death, the soldiers of the garrison were summoned one day to dig the grave of one of their comrades on the opposite island of Vido; when, in the prime of youth, and in the presence of detachments of all the regiments, as fine a young man as ever entered the British ranks was ignominiously laid in his last resting-place. This terrible example produced its effect; and deep as was the universal regret, as well as that of the gallant general himself, at the stern necessity which obliged him to vindicate the majesty of the law, the sound wisdom of his decision was soon apparent.

But leaving this momentous phase of the question to be settled by those who are responsible for the discipline of the Army, we maintain that it ought to be a well-grounded fact in the mind of every soldier, that not a day of a sentence of penal servitude can be on any account whatever recalled. At any rate, if men so sentenced are ever permitted to revisit their former scenes or re-appear before their comrades, it should not be enjoying the blessings of liberty, but as prisoners in chains, working in the public service in camp or garrison, when their presence may have a salutary effect upon that small portion of ill-conducted men who are to be found in all regiments, to the great detriment of the larger body of their comrades. For, although we know that the whole tone of the Service is now sound, and that the greatest difference exists between insubordination and mutiny, we are also warned of how great a fire a little spark may kindle, and how often it has happened, as well as in armies, among societies, that an evil disposed man has dragged many of his less strong-minded comrades after him to ruin and misery. We repeat, that acts of insubordination, accompanied by violence, are crimes of the gravest nature, and require the gravest attention at the hands of the authorities.

THE BATTLE OF VOLTURNO.—It was no unfitting spot for the closing act of such a struggle. The prize of victory—that fair city of Naples itself—was almost in sight of the combatants. Close at hand, and on one edge of the battle-field, is the splendid palace of Caserta, in which the ancestor of the young king had held royal state for more than a century past. It is the masterpiece of Vanvitelli, and amongst the most magnificent of royal palaces in Europe. Those who have visited the spot will remember the gardens with the cascades, and how the cascades are so arranged as to represent quaint combinations of statues and mystical emblems. The forests of ilex behind the palace swarm with game, and herein it was that the ancestors of the young king—being themselves Kings of Naples—used to take their pastime, and divert themselves with the slaughter of wild animals, when the affairs of state no longer claimed their attention. Francis II. all but played his last throw for empire in his own park.—*Once a Week.*

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BASSANO—October 10, at Belmont, Douglas, Isle of Man, the wife of Lieut.-Colonel Alfred Bassano, 32nd Light Infantry, of a son.
BURDEN—October 3, at Malta, the wife of George Burden, Esq., 23rd R. W. Fusiliers, of a daughter.
CARTWRIGHT—October 9, at Kineton, the wife of Colonel Cartwright, of a son.
CAVAYE—October 6, at Edinburgh, the wife of Major-General Cavaye, of a son.
CHRISTIE—October 14, at 2, Princes Terrace, Hyde Park, the wife of Colonel John Christie, of H.M.'s Indian Army, of a daughter.
CROWE—October 13, at Ennis, Ireland, the wife of Captain Carlisle Crowe, Bombay Horse Artillery, of a daughter.
HAMOND—October 15, at Ashurst Lodge, East Grinstead, the wife of Captain Hamond, of a son.
HEATH—October 14, at Downpatrick, the wife of Captain A. H. Heath, H.M.'s Bengal Artillery, of a son.
LAWRIE—October 16, at Maidstone, the wife of Major Lawrie, Adjutant 3rd Battalion Kent Rifle Volunteers, of a son.

WYNNE—October 11, at the house of his uncle, Frederick Davies, Esq., No. 19, Upper Gower Street, Lowry William, posthumous son of the late Lieutenant L. W. M. Wynne, R.A., aged 16 years and 8 months.

AN ARTILLERY COMPANY FOR ETRURIA.—On Friday evening a public meeting was held at the National School-room, Etruria, for the purpose of furthering a project very recently set on foot for the establishment of a Volunteer artillery company in that thriving and important suburb of Hanley. The meeting was numerously attended, and was characterised by much spirit and earnestness. Mr. E. Keeling (an Etruscan volunteer of the invasion-panic period in the early part of the present century) presided, and opened the meeting with a brief history of the project they had in view in holding that meeting. At the close of the chairman's address the following resolution was moved by Mr. H. Cartledge, seconded by Mr. J. Bromley, supported by Mr. W. H. Yates (Hanley), and carried unanimously:—"That this meeting having received with great satisfaction the report of the deputation of their interview with W. S. Roden, Esq., of Etruria Hall, hereby fully recognise his appointment as captain of the Etruria Volunteer Artillery Company."

LONDON TEMPERANCE RIFLE CORPS.—On Monday evening a numerous meeting was held in the St. John's Hall, Corporation Row, Clerkenwell, with a view to enlist the sympathies and support of tectotallers in that district on behalf of the Volunteer movement, the object contemplated being the completion of a London temperance rifle corps. Mr. F. Gough, secretary to the corps, presided, and expressed himself strongly in favour of the Volunteer movement, and stated that his temperance brethren had offered their services as Volunteers to Her Majesty, and he had no doubt they would be graciously accepted.

MUTUAL BRANCH.

Assurers on the Bonus system are entitled, after five years, to participate in nine-tenths, *or* 90 per cent., of the profits.

The profit assigned to each policy can be added to the sum assured, applied in reduction of the annual premium, or be received in cash.

At the first division a return of 20 per cent. in cash on the premiums paid was declared; this will allow a reversionary increase, varying, according to age, from 66 to 28 per cent. *on the premiums*, or from 5 to 15 per cent. on the sum assured.

One-half of the "Whole Term" Premium may remain on credit for seven years, or one-third of the premium may remain for life as a debt upon the policy at 5 per cent., or may be paid off at any time without notice.

Claims paid in one month after proofs have been approved.

Loans upon approved security.

No charge for Policy Stamps.

Medical Attendants paid for their reports.

Persons may, in time of peace, proceed to or reside in any part of Europe or British North America without extra charge.

No extra charge for the Militia, Volunteer Rifles, or Artillery Corps on Home Service.

The Medical Officers attend every day, at a quarter before Two o'clock. E. BATES, Resident Director.

and to Gravesend, Strood, and Maidstone, at very low fares.

An EXCURSION to LONDON from nearly all stations on the main line and branches on the 21st and 28th OCTOBER.

October, 1860. C. W. EBORALL, General Manager.

M. M. KEANE, late Secretary of Royal Northern Yacht Club, at the request of several yachting friends, has established himself in West Cowes, Isle of Wight, as AGENT for the BUYING and SELLING of YACHTS, and as SUPERINTENDENT of their building, lengthening, and repairing; as also for marine insurance thereon. In support of his ability to fulfil these duties properly, and in respect of his being held worthy of confidence as regards integrity, he begs leave to state he holds testimonials of service speaking to these qualifications and others of a similar nature, which can at any time be shown if required. Any sale of yachts effected in conjunction with secretaries of royal yacht clubs or yacht agents generally. The commission to be considered as divisional. And, at the risk of appearing self interested, M. Keane feels bound to point out to the various owners of yachts in the far-off parts of Great Britain and Ireland the greatly increased prospect of both a speedy and satisfactory sale of their vessels if laid up in such a splendid yacht rendezvous as Cowes, so easily approachable from London and the whole south of England. Owners of yachts placing them in M. Keane's charge, at Cowes, for sale, after their crews have moored them, will have simply to pay a charge of 1*s.* per day as compensation for their safe keeping until sold; damage from fire and violence of weather or collision, M. Keane not being responsible for, these being necessarily covered by insurance; but security for the price of any yacht placed in his hands for sale can be fully given if demanded, or advance in cash on proposed amount of sale.

Be pleased to address Captain M. KEANE, No. 10, Bath Road, West Cowes, Isle of Wight.

TERMS OF AGENCY for the Buying and Selling of Yachts:—Up to 1000*l.*, 2 per cent.; from 1000*l.* to 2000*l.*, 1½ per cent.; from 2000*l.* upwards, 1½ per cent. For constant superintendence on the building a new yacht, of Class A 1, 2 per cent.; this to include designs for interior accommodation, &c. For constant superintendence on the repairing or lengthening a yacht, if amounting to the sum of 200*l.*, 3 per cent.; and, if amounting to 300*l.*, 400*l.*, or 500*l.* or upwards, 2 per cent. Any expenses incurred by agent in advertising yachts for sale or purchase, at the desire of owners, or in forwarding telegrams, as also such travelling expenses as may be incurred at owners' request, to be defrayed by such owners.

NATIONAL EXHIBITION OF DOGS.—The first great EXHIBITION of SPORTING and other DOGS will be held at the Repository of Messrs. Bretherton & Harrison, Cheapside, Birmingham, on Monday and Tuesday, the 3rd and 4th of December next, the first and second days of the Cattle and Poultry Show. The entries will close on November 1st. Certificates of entry, price lists, and regulations, with the rules of the society, may be had on application to the Honorary Secretary.

F. BURDETT, Honorary Secretary.

Edgbaston, Birmingham, October 6, 1860.

HUNTERS AND CHARGERS, &c., &c.—TALLY HO!—Gentlemen requiring MOUNTS for the coming season will study their pecuniary and personal safety by sending address and postage for October Number of ROYAL BRITISH & FOREIGN HORSE REGISTER, in which will be found advertised some noted flyers in the stables of noblemen and private gentlemen declining hunting, &c. Wanted for sale immediately, sound horses of all kinds. Many applications for young, well-bred horses, likely to make hunters. Address, the Secretary, Horse Register, 70, Berners Street, Oxford Street, London, W. Some broke chargers and young high-bred horses, suited for officers' chargers, on sale, 50 per cent. under ordinary prices.

THE EXMOOR PONIES, COBS, AND GALLOWAYS.—The ANNUAL SALE of SIXTY EXMOOR PONIES, the property of F. W. Knight, Esq., M.P., and TWENTY-FIVE COBS and GALLOWAYS, the property of Mr. Robert Smith, will take place (as usual) at Bampton Pony Fair, on Thursday, October 25.—Catalogues will be prepared one month prior to the sale, and every information given by Mr. SMITH, Emmett's Grange, Southmolton.—Sept., 1860.

INDIA, CHINA, AND AUSTRALIA—OVERLAND ROUTE.—Officers and Civilians returning from Furlough, or joining on first appointment, can secure their passage through Messrs. WHEATLEY & CO. (late Wagborn), West End Office, 23, Regent Street, Waterloo Place, S.W., and be thus spared the inconvenience, delay, and trouble of going to the City. Handbooks on application. Baggage collected and shipped at a through charge. Insurances effected. Files of the latest news in the Reading-room.

ARMY, NAVY, AND COLONIAL AGENCY.—From and after 1st January, 1861, Messrs. W. R. LOOKER & Co. offer the services of their Agency to Officers and Members of the above Services at a fixed charge of ONE GUINEA per annum.

A detailed prospectus forwarded on application, 12, Pall Mall East, London, S.W.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, and General Agents for the *Improved Horse Hair Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

and Sold by all respectable Chemists throughout the Empire.

NERVO-ARTERIAL ESSENCE, prepared only by Dr. WM. BATCHELOUR, M.R.C.S.E. 1835, and M.L.A.C. 1834. It strengthens the vitality of the whole system without reaction, and speedily removes nervous complaints. In bottles, at 2*s.* 9*d.*, 4*s.* 6*d.*, 11*s.*, and 33*s.*, at Goodyer's, 31, Regent Street, W.; Butler & Crispe's, 4, Cheapside, E.C.; Sutton & Co., Bow Churchyard, E.C.; Barclay & Sons, Farringdon Street, E.C.: 12, Finsbury Place South, City, E.C., and all Chemists.

RUPTURES. — HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage 1*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

NAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous Balmic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; SANGER, 150, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KEATING, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.

EVANS & LESCHER, London, Patentees.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 4, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, Deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, also giving a beautiful and clear complexion. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.*; Ointment, per pot, 1*s.* 1½*d.*, and 2*s.* 9*d.*; Essence, per bottle, 4*s.* 6*d.*, 11*s.*, or bottle containing four times that quantity, 33*s.* Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 78, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Gratis, or post free for one stamp, of all Agents, and 1, Newman Street, W., Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINES, containing instructions for the cure of every ailment incidental to man, woman, or child.

A Physician and Member of the Royal College of Surgeons, England (Registered under the New Medical Act), attends daily to give advice, without fee, to those purchasing Buchan's Medicines.

KERR & Co., "Proprietors," Worcester, successors to Messrs. Flight, Barr, & Co., and Messrs. Chamberlain & Co.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

GARDNERS' £2 2*s.* DINNER SERVICES complete, best quality. A large selection of patterns of the choicest description. Breakfast, Dessert, Tea, and Toilet Services, at the lowest possible prices. Cut Wines, 3*s.* 6*d.* per dozen; Cut Quart Decanters, 7*s.* 6*d.* per pair.—H. & J. GARDNER (by appointment to Her Majesty, the Board of Green Cloth, Lords of the Treasury, Admiralty, Office of Works, Customs, and the other Government Offices), 453 and 63, Strand, Charing Cross, W.C. Established 108 years. Engravings free by post.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

DAVIESON'S EVERLASTING TEETH.

THE LATEST DISCOVERY.

MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth. Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 449, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

BATTLE OF BALACLAVA.—The ANNUAL DINNER will take place at the London Tavern, Bishopsgate Street, on THURSDAY, 25th OCTOBER, 1860, at 7·30 P.M. Officers intending to dine are requested to notify the same to Messrs. Chater & Co.

Major GEORGE, 4th Light Dragoons, Hon. Sec.

SLIGO MILITIA.—To Non-Commissioned Officers about to be Discharged from the Line.—VACANCIES on the Staff of the Sligo Rifles for ONE PAYMASTER-SERGEANT and TWO COLOUR-SERGEANTS. Applications with testimonials to be addressed to Captain STRONGE, Adjutant, Sligo.

CAVAN MILITIA.—To Non-Commissioned Officers about to be Discharged from the Line.—Vacancies on the Staff of the Cavan Regiment of Militia, one PAYMASTER SERGEANT, one COLOUR SERGEANT, one DRUM MAJOR. Applications, with testimonials, to be addressed to Captain GOSSELIN, Adjutant, Cavan.

WANTED, a MESSMAN for the 29th Regiment. Application to be made to the Mess President, 29th Regiment, North Camp, Aldershot.

APARTMENTS TO LET, in that desirable locality, 11, Green Street, near Hyde Park, W.—Mrs. WEBBER, having completed an extensive alteration, can offer superior accommodation, with the advantages of a well-regulated house and good servants, either to one large family or two small ones.

STAFF EXAMINATIONS. — Twenty-four Officers have already joined the Military College of Sunbury this year, to read either for the Staff College, or for direct appointment on the Staff. Apply to Captain LENDY, Sunbury, S.W.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

ARMY EXAMINATIONS.—Candidates for the Artillery, Line, and Cavalry, are rapidly and efficiently prepared at an establishment, the pupils of which have, within the last two years, come out eight times first, five times second, and three times third on the list. Apply to Captain LENDY, Sunbury, S.W.

MILITARY EXAMINATIONS.—Gentlemen who are about entering Her Majesty's Service are rapidly and successfully prepared for the various examinations by a gentleman who occupies a large mansion in the county of Suffolk, where every accommodation for study is afforded. The most qualified and experienced masters that can be obtained reside in the house. There is a park and every convenience in his extensive grounds for their recreation, &c. The principal being a married man, gentlemen are received and treated as officers and gentlemen. Apply to LL.D., 42, Cambridge Terrace, Hyde Park, W.

MILITARY EDUCATION. — A Military Engineer, of great experience in the scientific branch of the War Department, PREPARES PUPILS for all Military Examinations very successfully, and, owing to his practical experience, affords, especially to those preparing for the Staff, Engineers, or Artillery, such an opportunity as they are not likely to meet elsewhere.—Address DELTA, ARMY & NAVY GAZETTE office.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hassell, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to OSWALD HUNTER, Esq., The Cedars, Putney, S.W.

ARTILLERY EXAMINATIONS. — Candidates for the Competitive Examinations are individually prepared at an establishment which receives six pupils only for that branch of the Service. Four resident professors. Apply to X., care of Messrs. PARKER, 445, Strand, W.C.

NAVAL CADETS.—Of the 57 who passed at the Royal Naval College the 11th September, 49 were under the new regulations; 12 of these 49 were prepared at NORTH GROVE HOUSE, SOUTHSEA—viz., Messrs. Turner, Boyes, Harding, Congreve, Dickens, Herring, Claremont, Cruttwell, Bromley, Clements, Lowe, King. Mr. Daubeny passed from North Grove House under the old system.—W. BELL, Chaplain; A. BURROW, Chaplain and Naval Instructor; W. JOHNSON, Naval Instructor.

NAVAL AND MARINE CADETS, ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives PUPILS for the Royal Navy, Army, Woolwich, and Addiscombe. NINE out of ELEVEN of Mr. Knight's Pupils PASSED at the Royal Naval College, 12th June, 1860, taking 1st, 2nd, 3rd, 6th, 7th, 11th, 11th, 17th, 19th places in the respective divisions of 99 candidates, of whom 62 passed and 37 failed.—St. Mary's Hall, Southsea, Hants.

ROYAL NAVAL ACADEMY.—Of the many pupils prepared at the Academy conducted by MR. C. F. COOPER, R.N., not one has failed to pass, and eight have taken 1st, 2nd, and 3rd places at the Royal Naval College.—Address, Beresford Place Southsea.

NAVAL CADETS, MARINE CADETS, ETC.

EASTMAN'S ROYAL NAVAL ESTABLISHMENT,
EASTERN PARADE, SOUTHSEA.

357 Gentlemen have passed from this Establishment as Naval Cadets, and more than 200 as Marine Cadets, &c.

At the last Examination, FIRST, SECOND, THIRD, FOURTH, FIFTH, and SIXTH Places were taken by Pupils in different classes.

Pupils receive a Classical and sound General Education, and careful preparation for Naval Examinations.

Applications to be addressed to the Head Master, Mr. G. EASTCOTT SPICKERNELL. Prospectuses and other information may be had at Messrs. Booth's Library, 307, Regent Street, W.

BECKENHAM, NEAR LONDON.—TEN BOYS carefully PREPARED for the PUBLIC SCHOOLS by the Rev. LLOYD PHILLIPS, B.A. (late Secretary to the Editorial Department of the British and Foreign Bible Society). Inclusive Terms: Eighty Guineas and a Hundred Guineas. References: the Rev. W. Marsh, D.D., Beddington Rectory, near Croydon; the Rev. F. Chalmers, B.D., Beckenham Rectory, near London, and the parents of pupils.

BARON KOLLER, assisted by a Graduate in Mathematical honours of high repute, and by the most distinguished Professors, continues to READ with Officers for the Staff College, and PREPARES Gentlemen entering the Army for Examinations, at his residence, Dawson Villa, 6, Dawson Place, Bayswater, W.

WOOLWICH, THE LINE, INDIAN, CIVIL SERVICE, &c.—A Graduate, of much success in preparing pupils for the above Examinations, has a few VACANCIES. Terms, including board, and tuition in the Classics, Mathematics, French, German, Fortification, &c., 5 guineas per month.—Address A. B. C., Messrs. Gilbert's, Copthall Buildings, E.C.

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

IN the numerous articles we have deemed it our duty to write on the subject of the Transport Service of the country, we never for a moment supposed it to be necessary to dwell on the manifest advantages of steamers over sailing vessels, or imagined there could be a question that all Government troop-ships at any rate should be propelled by steam, even though sailing vessels might very properly be occasionally hired to convey troops or stores to and from places abroad. The very strong evidence given by all the witnesses in favour of the Himalaya as a pattern troop-ship seemed to settle the question; unless, indeed, we are fated to illustrate the saying, "How not to do it," by ever fresh instances of failure—and this time, not merely by failing to find out what is best, but, after having found it, by deliberately choosing what is worse. But it would be placing the matter comparatively on very low ground, if we advocated the creation of an increased fleet of Government transports like the Himalaya, merely because of the great comfort experienced by the troops conveyed in that vessel. That is no unimportant consideration, of course; but in discussing matters relating to the efficiency of the Army and Navy at the present time, we confess still more important considerations force themselves upon us. Some few witnesses, indeed, pleaded before the Transport Committee in favour of sailing vessels, as generally more commodious and comfortable than steamers, making the comparison between the common steam and sailing vessels hired for conveying troops; but when cross-examined they were obliged to say, they excepted the Himalaya. This, of course, is giving up the point; for it might truly be said that it is only since our experience of the Himalaya that a strong feeling has arisen, that the Government ought to possess a larger fleet of transports. And even were the Himalaya less comfortable than it is, we should still say the same, because of her capaciousness and speed alone. Fortunately, large vessels like her have the advantage in every respect, and there is every reason to suppose that, as regards internal arrangements and comforts, even the Himalaya may be greatly improved upon in future vessels of her class, and also still greater speed attained; the result of which will be economy in health and time; and this, in the movement of armies, is of greater consequence than economy in money merely, while it has a pecuniary value besides.

The few witnesses, who said a word in favour of sailing vessels before the Transport Committee, and the little they had to say, rendered it in our opinion superfluous to discuss the point; but we observe that the proposals of one of the witnesses have lately been reprinted in the form of a pamphlet, and thus obtained a notice they could not have looked for while standing in the Committee's Blue Book, surrounded by all the evidence on the other side. This plan is nothing else than the formation of a Government transport service out of old sailing frigates, of which a list of thirty-eight is given (some built as far back as 1807 and 1809), from which sixteen might be selected to be fitted as troop-ships for service between England and India. Of course this plan would be nominally cheap and—we fear, that is all that can be said for it. But it purports to be based upon a recommendation of the Committee which sat in 1858 to inquire into the "transport of troops to the East Indies." That Committee were of opinion that "steamers should for the future be always made use of as far as possible in urgent cases; but for the transmission of the ordinary reliefs, the Committee would not recommend the adoption of so costly a mode of transport." On reading this, Mr. Rowley Richardson, of the Transport Department, considered that the Committee's views might be carried into effect by converting our old sailing frigates into troop-ships, and, as he estimates, at an annual saving of 115,000*l*. But we need not go minutely into this plan, as we find in the able paper of Mr. Willis of the same department, that he estimates a saving of 122,000*l*. a year on the transport service if performed in Government steamers; while he condemns the proposal to convert our old frigates (which have an average age of 38 years) into troop-ships, and points out the ruinous expense of fitting and keeping in repair such worn-out vessels, which would also sail very slowly and make long voyages, thus adding materially to the expense of conveying the troops, whose services would be lost the while. The most extraordinary thing is that such a proposal should be professedly based upon the recommendation of the Committee of 1858, while the most important part of this recommendation is utterly ignored. It was chiefly, perhaps, because of the outcry raised against empolying sailing vessels to a great extent in conveying troops to India on the outbreak of the mutiny, that the Committee was appointed; and nothing can be plainer than the words of their recommendation that, "steamers should for the future be always made use of, as far as possible, in urgent cases." What then becomes of a plan which leaves us just as we were, without providing us with the steamers necessary to be used in cases of emergency? It is because of our late Indian experience, and because we see a clear-headed administrator not far from our shores, proceeding rapidly to complete his projected fleet of 72 steam-transports, 32 of which are already afloat, that we think it essential even for our safety that our Government should possess some eight or ten additional Himalayas, which, "for the future, may be used in urgent cases." Having such a fleet, of course we should use it for ordinary reliefs, in ordinary times, and thus (as estimated by Mr. Willis) "utilise the service of three full regiments each year," from the mere shortness of the voyages made by such vessels. If, in addition to these vessels, we require others, let us hire troop-ships as we do now, and on ordinary occasions sailing vessels; but save us from these ancient slow-sailing frigates! We believe the recommendation of the Committee of 1858 had exclusive reference to hired vessels; but in these days, and in war matters, even two years become antiquity. We have also a few "ancient mariners" among us still maundering about wooden ships, and old soldiers "babbling of green fields," ignoring modern projectiles, and the rapid transport of troops and artillery, which we must now provide against. We need not therefore be surprised, notwithstanding what is going on across the Channel, if we find advocates for sailing transports to be cheaply manufactured out of old and useless frigates. We are thankful, however, to think that the Duke of Somerset has an opinion of his own in this matter, to which we may probably attribute the fact, that we are to have swift sailing and large steamers to convey our troops, instead of a conversion on a large scale of old sailing frigates into troop-ships. When any emergency occurs we shall then employ our permanent fleet of steam transports upon the most urgent services, at a moment's notice, and hire vessels for other purposes. And, if engaged in a lengthened war, we could gradually draw from our regular transports the seamen who man them, and fill their places with our new-raised men, by which means our transports will also become an efficient reserve for the Navy. In such vessels we could also have numbers of cadets and boys under training, with far better results than in the present training-ships in harbour; and as they would be continually making short voyages, like ordinary merchant ships, they might be used with the greatest advantage for drawing men for the first time into the Navy, and initiating them into all the comforts and regularity of a man-of-war.

The week has seen the celebration of the two famous cavalry charges at Balaclava by a dinner of some of the officers who survived the day, the privations, and maladies of the winter, and of some of those who have carried into private life the honours bestowed on their participation in those brilliant feats of arms, as well as their regrets, *ennui*, or satisfaction on leaving the Service. Although the rush among the Russian guns, and the heroic immolation of the Light Cavalry Brigade has secured for those daring and desperate horsemen the largest share of the admiration and sympathy of the country, and has monopolised the whole of the Laureat's eulogy, in a military sense the success of the charge of the Heavy Brigade, ordered by Lord Lucan and conducted by General Scarlett, was so complete, that we think the glory of their companions might have been as well purchased by the exhibition of less indiscretion. It is useless now to attempt to analyse the material results of that admirable exploit. Nor is it of much benefit to select for animadversion those who ought to have shared in the active combat, as they have participated in the honours and decorations of the day. The facts are known to the Army, and there is no advantage in going outside to speak publicly of such matters. But it would not be uninstructive to consider how it has been, that a very noble effort of discipline and courage should have been eclipsed by the blaze of the swords and lances which glittered fitfully and unavailingly for a few moments amid the smoke of the Russian batteries. There is many an honest "heavy," who struck many a good blow, and went deep into the heart of the Muscovite horse, at this moment little known or thought of, whilst his comrade of the Light Brigade is the "hero" of his circle, because he may have scrambled away from the Cossack lances by a frantic clutch to the neck of a loose horse, and then have retired altogether from the Service as soon as he could leave it. We are almost inclined to fear it was the amount of the butcher's bill that gave such flavour to the feast,—just as De Lacy Evans's most gallant and well-conducted repulse of the Russian sortie on Inkerman, on the 26th Oct., has been little regarded, because it was covered by the vulture's banquet on the sad but glorious 5th Nov. We do not for a moment pretend to say that the daring and self-devotion of the Light Brigade does not entitle it to the honours it has as a body received, but we think the public forget there were two charges on that day, and that one was as perfect in its action as the other was unproductive in its results. The memory of the day itself can never die; and it is some satisfaction to observe that all the officers who partook of its dangers or obtained its glories, are not alike in public estimation, or in their position in the eyes of the country.

We regret to hear that the yellow fever has been committing sad ravages at M'Carthy Island, River Gambia. Among the deaths which have to be deplored are those of Staff Assistant-Surgeon Thomas Clayton Beale, who was attacked on the 19th of July, and died on the 21st; Staff Assistant-Surgeon Trestrail, who was taken ill on the 2nd of August, and expired on the 7th; Staff Assistant-Surgeon Charles D. Campbell, who was seized on the 19th of August, and who sank under the effects of the scourge on the 25th. The only European remaining alive on the island up to the last accounts, which come down to the 19th of September, was Captain Frazer, who had also suffered from a severe attack, but was convalescent. The remittent fever, which is usually so prevalent in the island, had been observable, but no cause can be assigned for the outbreak of the pestilence which had assumed so malignant a form.

THE ARMY.

Royal Artillery. In consequence of the destined removal of Captain Mercer's No. 3 field battery, 4th Brigade, from head-quarters, Woolwich, to New Zealand, Major G. Davis, V.C., commanding the 7th battery, 15th Brigade Garrison Artillery, at Gosport, is ordered to repair to Woolwich on receipt of further orders to that effect, and assume the command of a new battery to be organised for the purpose of replacing Captain Mercer's battery. The new battery will be equipped with Armstrong guns. —On Tuesday Lieut.-Colonel Mitchell, with Lieutenants Lane and Mackay, and 62 men of the No. 2 Brigade, arrived from Dover, via Hastings, at Bexhill, a station on the London, Brighton, and South Coast Railway, in order to make the necessary preparations for a new experiment with artillery on a Martello Tower, No. 49, about two and a-half miles from that station. One half of the men are billeted at Powell's Hotel, in the village of Bexhill, about a stone's throw from the station, and the remainder at a place, where there are a few houses, called Little Common, which is in the immediate vicinity of No. 49 Tower. They will be employed in fitting up a four-gun battery, consisting of two 68 and two 84-pounders of the ordinary description of cannon, the object being to compare their efficiency with that of the Armstrong guns lately tried at Eastbourne. Part of the *matériel* arrived yesterday at Bexhill from Dover at 4·50 p.m., and it is thought the preparations will occupy about a week. The operations are under the direction of Colonel Burke Cuppage, and as the presence of the Duke of Cambridge is anticipated, His Grace will doubtless fix the day for the experiment, which is as yet uncertain.—The following are the names of the recipients in the Royal Artillery of the medal and gratuity for "long service and good conduct" for the current year:—Sergt.-Major Henry Nelson, Sergt.-Major John M'Donald, Sergeant William Huggins, Sergt.-Major Charles Serbutt, and Gunner David Cupar, of the Depôt; Gunner-Sergt. Neil M'Beath, 3rd Brigade; Sergeant Bernard Doolan (10*l.*), Coast Brigade.—His Royal Highness the General Commanding-in-Chief has approved the following promotions and appointments of master-gunners:—Master-Gunner J. Crabbe, of the second class, at Hurst Castle, to be master-gunner of the first class at Portsmouth, vice Naish, appointed adjutant of a Volunteer corps; Master Gunner Peter M'Leish, of the third class, at Portsea Lines, to be master-gunner of the second class at Hurst Castle; Sergeant J. Thornley, of the Coast Brigade, to be master gunner of the third class at Portsea Lines.—Michael Ryan and Henry Whitford, gunners of the 3rd brigade, underwent a final examination at the Royal Court, Guernsey, says the *Guernsey Star*, and were committed for trial on the following charges:—1. Of having, on the night of the 24th-25th of September, broken into the shop kept by Mr. Corrigan, at the Tourgand, and stolen therefrom six bottles of cordials, a box of cigars, and three shillings in money. 2nd and 3rd. Of having on the night of the 26th-27th September broken the shutters of Mr. Charles Lucas's shop, Pollet Street, and of the shop of Mr. Nicholas Martel, in the Bordage, with the intent of entering the several premises and committing a robbery therein.—The half-yearly inspection of the Royal Artillery in the South-West District has just been completed by Colonel F. Dunlop, C.B., in command of the force stationed in the district. The force comprises—Field Artillery, one mounted battery, and two batteries of the 8th Brigade. Garrison Artillery—10th Brigade, eight batteries; 15th Brigade, six batteries. Coast Brigade, one division, and the Suffolk and Dublin Militia Artillery Regiments. The guns now mounted on the various works are upwards of 700. There are also two field batteries of Armstrong guns, and one of smooth bore 9-pounders. Ten men from Woolwich have been embarked in the Megæra at Portsmouth for Gibraltar, and thirty-two men and two women for Malta. have proceeded in the Megæra to Malta.

Royal Engineers. The 35th company of the Royal Engineers returned to Chatham from the Camp at Aldershot on the 16th inst., having been relieved by the 33rd company. A portion of these latter men will be employed in instructing the infantry in throwing up field-works on the heights of Hungry Hill near Cæsar's Camp. A detachment of 3 officers and 100 men, are told off weekly for this duty in succession from each regiment in the camp. Nothing is likely to prove more useful to the soldier than instruction in the free use of the pick and shovel; and the work performed bears testimony to the advantage which the Service derives from the adoption of so sensible a system. While thus employed the men receive fourpence a day for wear and tear of clothes. The Royal Engineer Field Train left camp at Aldershot on the 16th inst., to return to their winter quarters at Chatham. In consequence of the representations made to the Government of the necessity of having an increased number of Sappers and Miners of the Royal Engineers stationed at Corfu, for the purpose of prosecuting the engineering and other public works now in progress at that island, the authorities have decided on augmenting the number of troops belonging to that branch of the Service now doing duty in the Ionian Islands, where the 9th and 29th companies of Royal Engineers are at present stationed. Orders have accordingly been forwarded to Colonel H. D. Harness, C.B., Director of the Royal Engineer establishment at Chatham, directing him to select a detachment of the most skilful mechanics and artisans from the detachments now at head-quarters, in order that they may be at once forwarded to Corfu, where there is a great demand for well-skilled men of the Royal Engineers. The men employed in this service will receive extra pay, in addition to several other advantages. The entire arrangements having been completed for the transfer of the department of the Assistant-Adjutant-General of the Royal Engineers from Chatham to Whitehall, the whole of the officers of the staff attached to the Assistant-Adjutant-General's office, as well as the clerks, have been removed from Brompton barracks to the Horse Guards, where the duties connected with that department will for the future be carried on. The 27th company, under command of Captain A. William Durnford, having completed their course of field-work instruction, the company proceeds to Gibraltar to relieve one of the companies there, which returns to head quarters at Brompton. Orders have been received from the War Office for all the companies on the home stations to be called in to join the head quarters establishment. They are to be relieved by other companies at Brompton. It is also proposed to send an additional company to Portsmouth, and also to Plymouth, for the purpose of expediting the works carrying out at those places of the new fortifications.

1st Regiment, 1st battalion. Lieutenant Maxwell and Captain Willis, have leave of absence from the depôt at Colchester until the 31st December.

11th Regiment. It is rumoured in military circles that the 2nd battalion, now stationed at Portsmouth, will proceed to the Cape of Good Hope to relieve the 85th, which latter regiment will reinforce the forces in New Zealand. We trust this assistance will not arrive too late; and England, considering the size of her army in comparison to her immense possessions, may be congratulated that her mutinies and troubles do not come upon her all at once, but one at a time, when she is able to grapple with and overcome them.

16th Regiment, 1st battalion. Captain Annesley Cary died on Monday last, after a few days' illness, from disease of the heart. His body was interred on Wednesday last, with full military honours; the bands of the 16th and 18th Regiments attending, as well as detachments of officers from all the regiments in Shorncliff camp, as also the whole of the officers of the deceased's regiment. The corpse was borne to its last resting-place in Chinton Churchyard on a gun drawn by six black horses of the Royal Artillery, and his pall was borne by Captains Magnay, Bostock, Lea, and Rooke, the senior captains of the regiment. The mournful procession as it marched from the camp to the wailing notes of the "Dead March in Saul," had a singularly picturesque effect. A large number of the inhabitants in the immediate neighbourhood were spectators of the funeral, and the sudden death of this young officer has cast quite a gloom over his brother officers in the camp, amongst whom he was universally respected. A firing party of 100 men preceded the procession, under the command of Captain Healy, two subalterns and four sergeants forming part of it.

18th Regiment, 2nd battalion. The non-commissioned officers of this battalion, at Shorncliff, have lately presented to Sergeant-Major Hunter, who is retiring from the regiment, as a token of their esteem and regard, a silver tea and coffee service; also a pair of gold bracelets to Mrs. Hunter. The testimonial was handed to the gallant sergeant-major after a handsome supper, which was given on the occasion. Quartermaster-Sergeant McGuire officiated as president, and Sergeant-Major Mitchell occupied the vice-chair. The gallant chairman concluded an eloquent speech by the following complimentary sentence: "Sergeant-Major Hunter, you have left nothing undone that was capable of being done, and it must be a consolation to you, now retiring from the din and bustle of military life, to be able to say that your conscience will not upbraid you in the quiet calm of your old age with even the slightest act of neglect."

19th Regiment. We regret to hear that a very large number of prisoners are awaiting trial in Portsmouth garrison belonging to this regiment. For a long time past the 15th brigade of the Royal Artillery at Gosport had monopolised the honour of submitting the greatest number of bad characters to trial by court-martial, but it has now lost this not to be coveted distinction. We believe this brigade, on its first formation, had as many as 40 men at one time in the military prison for selling their kits; but under the vigilant eye of Colonel Franklin, C.B., good order and discipline are beginning to preponderate among the heterogeneous mass collected in April last from all the batteries on home service, and which was entrusted to the gallant colonel to lick into shape.

23rd Fusiliers. On the 16th inst., at Malta, about 7 o'clock p.m., three soldiers of this regiment assaulted Mr. Thomas Corlett, of the firm of Seddall and Corlett, who at the time was passing through Strada San Paolo, and snatched his watch chain from his person. They attempted to escape, but were immediately arrested by the police. On the 18th instant, John Murray, a private in this regiment, having been found guilty of theft, qualified as to time, was sentenced to one year's imprisonment with hard labour.

25th Regiment, 1st battalion. Four officers and and 40 men from Athlone, have embarked in the Megæra, to join the service companies at Gibraltar.

45th Regiment. A very melancholy accident occurred on the 13th inst. at Aldershot, by which the life of a corporal of the 45th Regiment was sacrificed by the carelessness of another. It appears that while a detachment of that regiment was shooting for their annual prizes, the officers in charge, at the close of one part of the competition, proceeded to the target to compare the marks upon it with the register of the shots. While thus employed, the deceased complained to his comrade that he could not manage to hit the target at all that day; to which the other replied, "that it was owing to his not keeping the sight of his rifle upright." He therewith invited him to take some snap-shots at him, by which he might correct the adjustment. Unhappily, while doing this his own rifle, which he had, contrary to orders, loaded, and held at the trail, went off, and shot the other right through the temple, dead. The unhappy man could not account for the piece going off, nor did he know whether the hammer was at the full cock or not. Upwards of 60,000 men have already been trained to the use of the rifle at this station, and this is the first accident that has occurred, which, however, cannot in any way be attributed to the training which the soldier receives. We shall be glad to hear that Mr. Chevalier's electric targets are arrived at this and at all other stations where musquetry instruction on a large scale is conducted, as independently of the extreme accuracy of the registration of the hits, and the saving of time, they will prevent the necessity of officers leaving their men for the purpose of examining the targets at the termination of stated periods of the firing.

Royal Marines. Second Lieutenant Kinsman, of the Plymouth division of Royal Marine Light Infantry, has been promoted to the rank of First Lieutenant, and appointed to the Woolwich division, vice Lieutenant Woodriff, placed on half-pay. The following memorandum has been received at Woolwich:—"With reference to the Royal Marine Circular of the 9th of May, 1859, referring to lodging money, the Lords Commissioners of the Admiralty have been pleased to signify that increased lodging allowance at the rate of 4*d.* a day shall be paid to the married non-commissioned officers, drummers, privates, and gunners of the Royal Marines, who are compelled to live out of barracks for want of accommodation, in the following proportions:—3 out of 4 or 5 sergeants per parade company, 4 out of 5 or 6, 5 out of 8 or 9, and 6 out of 10 or upwards, and to other married non-commissioned officers and men at the rate of 8 per cent. of the whole number on shore of married and single men, as well as all men who may happen to be in garrison belonging to other divisions. The remaining non-commissioned officers and married men are to receive the 2*d.* a-day lodging allowance as at present. By command of their Lordships, S. Robert Wesley, Deputy Adjutant-General."

50th Regiment. Captain Ellis, Ensigns Fleury and Rolleston, 62 men, 5 women, and 4 children, embarked yesterday at Portsmouth, on board the hired transport-ship, Herefordshire, for conveyance to Ceylon.

52nd Regiment, Light Infantry. Colour-Sergeant J. Thomas, of this regiment, who has recently returned from India, was, on Monday evening, at Chatham, presented with a silver sugar basin, cream ewer, cruet stand, six silver tea-spoons, a pair of salt spoons, sugar tongs, and two silver candlesticks, the proceeds of a subscription by the staff, colour-sergeants, and sergeants of the regiment in India, as a mark of their respect and regard. Colour-Sergeant Thomas was with the regiment at the taking of Delhi, and was severely wounded, and has upwards of twenty-one years' service. Sergeant-Major Pangburn presented the articles in the mess-room, in the presence of a considerable number of non-commissioned officers of the garrison. Sergeant Thomas leaves the 52nd to join the staff of the 1st Derby Militia.

66th Regiment. Lieutenant Spearman will be absent from the depôt at Colchester till the end of the year, and he has received permission to proceed to France during the period of his leave of absence. Ensign Mitchell, of this regiment, has been appointed Instructor of Musketry to the 9th Depôt Battalion, during the absence on leave of Lieut. Whyte, 1st battalion 1st Royals.

72nd Highlanders. A detachment left Chatham on Monday, and embarked on board a steamer at Gravesend for Leith, *en route* to Aberdeen.

75th Regiment. The *North West Gazette* states "that a court of inquiry is sitting upon H.M.'s 75th Regiment. It appears that the officer commanding entertains an idea that the whole of the officers of his regiment have entered into a combination against him. We are afraid that it must result either in the removal of the commanding officer or in the whole of the officers at present doing duty with the head-quarters being brought to a court-martial."

93rd Highlanders. A detachment left Chatham on Monday for Gravesend, to embark on board a steamer for Leith, *en route* to Aberdeen.

97th Regiment. Ensign M. Davies will be absent on leave from the depôt at Colchester until the end of the year.

100th Regiment. Seventy-six men, 3 women, and 4 children have embarked in the Magera, from Parkhurst Barracks.

9th Depôt Battalion. Staff *Assistant-Surgeon* Walls, of this battalion, has received orders to hold himself in readiness to embark for China on board the ship Sultana, off Tilbury, in medical charge of a detachment of the Military Train about to proceed to the seat of war. A large party of men belonging to the several depôts in this battalion have joined their respective quarters after service at Landguard Fort, the encampment there having been broken up. Staff Assistant-Surgeon Quinlan, attached to the 9th battalion, and Staff Assistant-Surgeon Mullen, to the 10th, having reported their arrival, have received orders to go on duty with their respective battalions.

Army Hospital Corps. Mr. Alfred Pope, at the purveyor's office at Fort Pitt, Chatham, has received orders to proceed to China in charge of a draught of the Army Hospital Corps.

Assistant-Staff-Surgeon Gaussen, from Walmer, has proceeded to Malta in the Megæra.

The next examination of candidates for direct commissions by the Council of Military Education is to commence on Monday next at the Royal Hospital, Chelsea.

By our last advices from China we find that Major Morrison, who had a snug staff appointment at Canton, had thrown it up, and had joined the service companies of his battalion in the field.

With a view of affording amusement and instruction during the long winter months, a General Order has been published, announcing that lectures would be given to the soldiers of the garrisons throughout the kingdom, and inviting such officers, who may wish to give their services for this purpose, to send a list of such apparatus as they will require for the explanation or elucidation of their subjects. We hope to hear that the invitation has been as freely accepted by the officers, as we are sure it will be gratefully apppreciated by the men.

Major-General Ridley, C.B., who lately succeeded Major-General A. Dalzell in command of the Cork district, is on a tour of inspection, and will visit Limerick on the 25th.

General Sir George Brown, G.C.B., who is visiting the coasts of Ireland, will inspect the forts on the lower Shannon on the 28th. He is at present inspecting Bantry and Valentia bays, being accompanied by Colonel Brownrigg, C.B., Assistant-Adjutant-General, and Colonel Wetherall, C.B., Deputy-Quartermaster-General.

The corporal-majors and staff of the 1st Regiment of Life Guards gave a supper at the Cape of Good Hope Tavern, in Albany Street, Regent's Park, on Wednesday evening, the 17th instant, to Corporal-Major Charles Champion, on his leaving the regiment, he having been appointed a yeoman warder of the Tower; on which occasion a handsome silver cream-jug was presented to him, as a farewell token of their espect and esteem.

Major-General Percy Douglas having notified his intention of inspecting the garrisons of Guernsey and Alderney, Commander Philip de Saumarez placed H.M.'s ship Dasher at His Excellency's disposal for this duty.

Mr. Samuel Pearson, Crescent Road, Plumstead, foreman of the Lancaster Shell Department, Woolwich Arsenal, writes as follows:—"I must now inform you that the Lancaster shells are not cast, but that they are wrought-iron, made out of plates 24 inches by 15 inches, and weighing 112

Digitized by Google

pounds each. One edge of the plate is 1¾ inch thick. The first process is the scarving and bending the plate; second process is the welding and swaging them into the form of a cylinder, and nine men working at one furnace could weld and swage on an average eighty per day, at one shilling and eightpence per shell. Therefore, from the weight of the plates (and no cranes are used in the handling of them), and the quantity per day, likewise the intense heat required for making good the welding of the cylinder, you may form an idea as to the amount of physical exertion required. There are a number of other processes before the shell is completed, but those already mentioned are quite sufficient to speak about; suffice it to say that I have known seven men at one process to make 100 per day at one shilling and eightpence per shell. In conclusion, I beg to state that there are total abstainers in Woolwich who are ready to work with any men that the publican can bring, either at the forging of marine or Lancaster engines, and thereby prove whether or no the men who drink intoxicating drinks, or the total abstainers, can stand the most severe physical exertion."

LIEUTENANT WILLOUGHBY. — The *Bombay Gazette* of September 26, 1860, in a postscript, corrects the statement that Mrs. Willoughby, the mother of Willoughby of Delhi, is in pecuniary distress, as both she and her widowed daughter are in the receipt of comfortable pensions.

ROYAL ARTILLERY.—We believe it was understood that on the formation of the new Coast Brigade of the Royal Artillery, no men should be transferred to it who were not old soldiers of proved good character. Judging, however, from the following, extracted from the Channel Islands papers, it would not appear that in all cases a very good selection had been made; and as these men are often placed in isolated positions, we think it is much to be regretted:—"We copy from a contemporary the following account of the manner in which the 'Coast Brigade' of the Royal Artillery execute their duty in Alderney, as displayed by a trial which took place before the Court of that Island on the 6th instant:—'John Dowraing, a gunner in the Coast Brigade, who is stationed at the fort called Houmet Herbé with another soldier of the same corps, was produced upon the charge of having, on the evening of the 25th ult., stolen a bale of tobacco, weighing 64 pounds, belonging to a certain Frenchman. From the evidence of several witnesses it appeared that there were three or four boats at anchor in the bay near Houmet Herbé on the evening alluded to, a French boat being among the number. The accused, the other occupant of the fort, and two other soldiers of the Coast Brigade, found themselves there—the whole of them being armed with their carbines, which were ball-loaded. They went alongside the French boat, and asked to be treated with liquor. A bottle of brandy was given them by the crew, and the accused became inebriated. After this he went to the back of one of the houses at Mannez, and hid himself amongst some furze. A Frenchman carrying a bale of tobacco, passed that way, and he fired off his carbine, upon which the Frenchman got frightened, dropped the bale, and hurried away. The accused took possession of it, and to several persons from Mannez who were present, he offered to dispose of the tobacco for 1*l.*, and declined to take a lesser sum, which was tendered, and which his comrades advised him to accept. Ultimately he carried the bale under his great coat to the fort, but omitted to make any report to his superiors, or to any one else, respecting the transaction. The next day the Frenchman went to the accused, and offered him ten shillings for the restoration of his property; but he refused to give it up for any sum under fifteen shillings. Indeed, it appeared that his design was to extort money for the complainant.' Notwithstanding that the charge against the prisoner was clearly proved the Court held they could not convict, because the stolen goods were not before the Court, and an acquittal was therefore pronounced."—*Guernsey Star.*

SHORNCLIFF CAMP.

It is one of the curious anomalies of the British Service that, although no expense is spared for carrying out the system, and the British soldier costs more in the abstract than the soldier of any other power in Europe, or perhaps in the world, yet in the matter of minor comforts for officers, non-commissioned officers, and men, a cheese-paring economy is practised, quite at variance with the liberal provision made by Parliament, and which is the result of what we may call a too literal rendering of what is put down as the law. In "the Queen's Regulations and Orders for the Army, Edition December 1859," under the head of "Interior Economy of a Regiment," it is laid down as an axiom:—

Section 82: "That the commanding officer is also to form a sergeants' mess, as the means of supporting their consequence and respectability; there are few situations where this beneficial arrangement cannot be carried into effect; but where local circumstances may render it impracticable, the reasons which may have prevented its adoption are to be explained at the half yearly inspection. All articles to be supplied to the sergeants' mess are to be paid for on delivery." Common-sense people reading this Regulation would naturally suppose, as the commanding officers of regiments are thereby called upon to superintend the formation of sergeant's messes, that, in the permanent barracks built for troops; or if not there, at least in the model camps, such as Aldershot, the Curragh, Shorncliff, or Colchester, which have of late years been formed nominally for the improvement of the British Army; some endeavour would be made for carrying out this very desirable regulation by the War Department providing sergeants' mess-rooms for each battalion or regiment stationed in permanent barracks or in model camps. Will it be credited that, as far as observation goes on the part of the writer, in the majority of these model camps no sergeants' mess-room is provided, but in lieu thereof the sergeants are compelled to take one of the soldiers' huts, with no accommodation for cooking, save and except the stove which is served out from the barrack-master's stores, fixed, it may be, in the centre of the room; or if moved for convenience to either end, it is done so at the hazard of the sergeants being mulcted in barrack-damages by the barrack-master department when going over the quarters at a change of troops. It may be added that nothing is done to the hut or huts thus selected by the barrack authorities to make them more comfortable for the sergeants; anything required beyond the four bare walls must come from the mess-fund—thus entailing another drawback from the already scanty pay of the sergeants of the British Army.

In each range of huts at Shorncliff, however, a capacious room has been erected for the purposes of a regimental school; but the church at the south-west side of the camp has been lately fitted up to serve the purposes of a general school for the whole camp; advantage has therefore been taken of the schoolrooms by the commanding officers of two of the regiments on the camp, who have given them over as mess-rooms for their sergeants, whilst the others are obliged to content themselves with a solders' hut as stated above. What we would suggest, therefore, is this, that the barrack department would officially give over the schoolrooms in each range for the purpose of sergeants' messes, and that some effort would be made to give effect to Her Majesty's Regulations, by fitting them up in some comfortable manner for the purposes of sergeants' mess-rooms.

COLCHESTER CAMP.

The Hon. Alexander Gordon, C.B., unattached, whose commission dates 1854, and who stands in the Army List as Deputy-Quartermaster-General, will assume the command of this camp on Thursday next, November 1st, vice Major-General Blucher Wood, promoted.

Within the last few days Captain A. C. Gleig, Assistant-Inspector of Military Schools, has paid a visit to the boys' and girls' schools in this camp, with the general arrangement and conduct of which he expressed himself highly pleased.

With a view to the intellectual improvement of the men in camp, periodical lectures are delivered in the schoolrooms of the battalions upon popular and interesting subjects; and if the success of the experiment be judged of by the attendance and by the interest evinced in the entertainment, then it must be pronounced perfect.

During the week several men attached to the Army Hospital Corps have been ordered to Chatham, preparatory, it is thought, to embarkation for foreign service.

The intention of Government to greatly enlarge this camp, and make it the head-quarters of military strength for the eastern district of England, has brought into being a scheme for opening a more direct and rapid communication with the military depôt at Weedon, and with the whole of the midland counties. The North-Western Railway Company, by the formation of an extended line from Clare and Haverhill, propose to effect a junction with their own railway through Bedford; and they contemplate forming a branch line from the trunk of the Eastern Counties, crossing a valley before it reaches Colchester, and running that branch to the back of the camp. By this means troops will be forwarded to any of the Midland Counties, to Weedon, or to the North, without the necessity for passing through or near London. The land has been surveyed, and the promoters of the scheme appear sanguine of success, and hope to get the assistance of Government in carrying out the project.

The present strength of the garrison is—9th battalion, 23 officers, 86 non-commissioned officers and drummers, and 771 privates, making, with 76 in hospital, a total of 993; 10th battalion, 29 officers, 74 non-commissioned officers, 877 privates, and 83 in hospital—total, 1034: giving a grand total in camp of 52 officers, 160 non-commissioned officers, and 1967 rank and file.

The Army Gazette.

WAR OFFICE, PALL MALL, OCTOBER 23.

7th Regiment of Dragoon Guards—Ensign George Henry Bacchus, from the 12th Foot, to be Cornet, vice O'Dowd, promoted.

18th Light Dragoons—Edward Bacon, Gent., to be Cornet, without purchase, vice Liebert, promoted.

Military Train—Andrew Rutherford Warren, Gent., to be Ensign, without purchase.

11th Regiment of Foot—Lieutenant Francis Armstrong to be Captain, by purchase, vice Abraham Martin, who retires; Ensign George Coote to be Lieutenant, by purchase, vice Armstrong. The commission of Lieutenant Francis W. Osborne, as Adjutant, to bear date the 19th of August, 1860, instead of the 18th of September, 1860, as stated in the *Gazette* of the latter date.

13th Foot—Henry Hart, Gent., to be Ensign, without purchase, vice King, promoted.

14th Foot—Captain William Russell Russell, from the 58th Foot, to be Captain, vice William Alexander Dobie, who exchanges.

18th Foot—Albert James Alexander Jackson, Gent., to be Ensign, without purchase, vice Stevenson, promoted; John George Butts, Gent., to be Ensign, without purchase, vice Nicolls, promoted.

22d Foot—Ensign Percy Sandford Nevile to be Lieutenant, by purchase, vice Dolmage, who retires.

25th Foot—Major Francis Fane to be Lieutenant-Colonel, by purchase, vice Samuel B. Hamilton, who retires; Captain Charles James Stewart Wallace to be Major, by purchase, vice Fane; Lieutenant George Kirwan to be Captain, by purchase, vice Wallace.

26th Foot—Captain Edward James Upton, from the 72d Foot, to be Captain, vice Captain and Brevet Lieutenant-Colonel William M'Donald, who exchanges.

29th Foot—Captain John Robert Grimston, from the 57th Foot, to be Captain, vice Edward Gorton, who exchanges.

39th Foot—Major and Brevet-Colonel John De Lacy, from half-pay unattached, to be Major, vice Thomas Wright Hudson, promoted, without purchase, to an unattached Lieutenant-Colonelcy; Captain and Brevet-Major William Leckie to be Major, by purchase, vice Brevet-Colonel John De Lacy, who retires; Lieutenant Thomas Westropp Bennett to be Captain, by purchase, vice Leckie; Ensign Richard Albert Vercoe Pope to be Lieutenant, by purchase, vice Bennett.

40th Foot—Percy Cartwright, Gent., to be Ensign, without purchase, vice Dudgeon, promoted.

49th Foot—Ensign Charles Cæsar Welman, from the 77th Foot, to be Ensign, vice Henry Topp, who exchanges.

51st Foot—Captain George Bliss M'Queen from the 60th Foot, to be Captain, vice Percy Chaplin, who exchanges.

53d Foot—Lieutenant William Henry James Clarke to be Captain, without purchase, vice Brevet Lieutenant-Colonel Joseph Maycock, deceased; Ensign Samuel James Nicholls to be Lieutenant, without purchase, vice Clarke.

54th Foot—Bennet Andrew Hume, Gent., to be Ensign, without purchase, vice Purnell, whose appointment, on the 21st of September, 1860, has been cancelled.

57th Foot—Captain Edward Gorton, from the 29th Foot, to be Captain, vice John Robert Grimston, who exchanges.

58th Foot—Captain William Alexander Dobie, from the 14th Foot, to be Captain, vice William Russell Russell, who exchanges.

60th Foot—Captain Percy Chaplin, from the 51st Foot, to be Captain, vice George Bliss M'Queen, who exchanges.

72d Foot—Captain and Brevet Lieutenant-Colonel William M'Donald, from the 26th Foot, to be Captain, vice Edward James Upton, who exchanges.

76th Foot—Lieutenant John M'Dermid Allardice to be Instructor of Musketry, vice Lieutenant John Henry Tripp, promoted.

77th Foot—Ensign Henry Topp, from the 49th Foot, to be Ensign, vice Charles Cæsar Welman, who exchanges.

79th Foot—Lieutenant William John M'Crawfurd to be Captain, by purchase, vice Brevet Major Henry Holford Stevenson, promoted to an unattached majority, by purchase.

82d Foot—Captain Frederick Richard Soly Flood, from half-pay unattached, to be Captain, vice Brevet Major William Robarts Farmar, appointed Captain of a company of gentlemen cadets Royal Military College.

83d Foot—Charles Lucius Smith, Gent., to be Ensign, by purchase, vice Brymer, promoted.

1st West India Regiment—Captain James Shortall Macaulay to be Major, by purchase, vice Robert Follett Synge, who retires; Lieutenant George Augustus Vaughan, from the 33d Foot, to be Captain, by purchase, vice Macaulay.

UNATTACHED.

Captain and Brevet Major Henry Holford Stevenson, from the 79th Foot, to be Major, by purchase.

BREVET.

Lieutenant-Colonel William Neville Custance, C.B., 6th Dragoon Guards, to be Colonel in the army.

Major Sir Edward Fitzgerald Campbell, Bart., 60th Foot, to be Lieutenant-Colonel in the army.

Captain Henry Scott, 18th Light Dragoons, to be Major in the army.

Captain George Dowden Dickson Cleveland, 98th Foot, to be Major in the army.

Captain Charles David Cuninghame Ellis, 60th Foot, to be Major in the army.

Captain Richard John Evans, 27th Foot, to be Major in the army.

Captain Charles David Rich, 9th Light Dragoons, to be Major in the army.

Captain Frederick Richard Solly Flood, 82d Foot, to be Major in the army.

The undermentioned promotions to take place consequent on the promotion of Colonel Richard John Stotherd, Royal Engineers, to be Major-General in succession to Major-General W. C. Ward, Royal Engineers, promoted to be Lieutenant-General, vice Lieutenant-General Sir C. W. Pasley, K.C.B., Royal Engineers, promoted to be General, vice General F. R. Thackeray, C.B., Royal Engineers, who died on the 19th of September, 1860:—

Brevet Lieutenant-Colonel Francis Gregor Urquhart, 1st Foot, to be Colonel.

Major Morley Stratford Tynte Denis, 76th Foot, to be Lieutenant-Colonel.

Captain Thomas William Prevost, half-pay 42d Foot, Staff Officer of Pensioners, to be Major.

The undermentioned promotions to take place consequent on the death of Lieutenant-General Sir Harry G. W. Smith, Bart., G.C.B., Colonel-Commandant Rifle Brigade, on the 12th of October, 1860:—

Major-General John Scott, C.B., Colonel 3d Dragoon Guards, to be Lieutenant-General.

Brevet-Colonel Frederick Horn, C.B., from Lieutenant-Colonel half-pay 20th Foot, serving on the staff of the army at Malta, with the temporary rank of Major-General, to be Major-General.

Lieutenant-Colonel Alexander Murray, 87th Foot, to be Colonel.

Major Charles Barnard Hague, 67th Foot, to be Lieutenant-Colonel.

Captain John Desborough, Royal Artillery, to be Major.

Memorandum—Brevet Lieutenant-Colonel Owen Lloyd Ormsby has been permitted to retire from the Service, by the sale of an unattached majority, he being about to become a settler in Canada.

WAR OFFICE, PALL MALL, OCTOBER 26.

1st Regiment of Dragoons—Ensign James Henry Herbert Croft, from the 29th Foot, to be Cornet, vice Harvey, promoted.

4th Light Dragoons—Lieutenant William Hone Davis, to be Captain by purchase, vice Edward William Blackett, who retires; Cornet Charles Matthew Calderon, to be Lieutenant, by purchase, vice Davis.

6th Dragoons—Sergeant-Major Charles Wooden, from 17th Light Dragoons, to be Quartermaster, vice Mountain, deceased.

8th Light Dragoons—Ensign Frederick Helyar, from 6th Foot, to be Cornet, vice Tonnochy, promoted.

17th Light Dragoons—Edward Corbett, Gent., to be Cornet by purchase, vice Goldsworthy, promoted.

18th Light Dragoons—Ensign Thomas Albert Bray Wright, from the 64th Foot, to be Cornet, vice Harris, promoted.

12th Regiment of Foot—Ensign Townsend George Gun to be Lieutenant by purchase, vice William Dummer Jarvis, who retires; Herbert Trist Cooper, Gent., to be Ensign by purchase, vice William Stewart Hamilton, removed to 90th Foot.

13th Foot—Ensign Matthew John Bell to be Lieutenant by purchase, vice Francis Drewe Edwards, who retires; Ensign George Kemmis to be Lieutenant by purchase, vice Haslett, who retires.

22nd Foot—Captain James Falconer, from the 74th Foot, to be Captain, vice Henry George Lyon Campbell, who exchanges; Lieutenant Thomas Colclough McCormick, from the 3rd West India Regiment, to be Lieutenant, vice George Hamilton French, who exchanges.

25th Foot—Ensign Charles Robert Leslie to be Lieutenant without purchase, vice Abel Henry Woodroofe, superseded for being absent without leave; Ensign Robert Crossman to be Lieutenant by purchase, vice Kirwan, promoted.

26th Foot—Lieutenant Lewis Cubitt, from 95th Foot, to be Lieutenant, vice Morris Robinson, who exchanges; Ensign Oswald Cresswell to be Lieutenant by purchase, vice the Honourable William Harry Bruce Ogilvy, who retires; Ensign Howard Molyneux Edward Brunker, from the 15th Foot, to be Ensign, vice Cresswell.

33rd Foot—Ensign Marcus Lynch to be Lieutenant by purchase, vice Vaughan, promoted by purchase in the 1st West India Regiment.

43rd Foot—Staff Assistant-Surgeon Robert Alexander Peter Grant, to be Assistant Surgeon, vice Charles Dodgson Madden, M. D., appointed to the Staff.

50th Foot—Ensign William Henry Barker to be Lieutenant by purchase, vice Frederick L Barwell, who retires.

53rd Foot—Captain Frederick Arthur Walter to be Major by purchase, vice Thomas Moubray, who retires; Lieutenant John Maxwell Macneill to be Captain by purchase, vice Walter; Ensign Francis Tuach Rolls to be Lieutenant by purchase, vice Macneill; William Norman Leslie, Gent, to be Ensign by purchase, vice Rolls; William Ainsworth, Gent, to be Ensign without purchase, vice Nicholls, promoted.

57th Foot—Staff Assistant-Surgeon John Alfred Illingworth to be Assistant-Surgeon, vice William Ferguson, appointed to the Staff.

60th Foot—Ensign Charles Bateman Prust to be Lieutenant by purchase, vice the Honourable Jenico Preston, who retires; Charles Gathorne Hardy, Gent., to be Ensign by purchase, vice Prust.

68th Foot—Staff Assistant-Surgeon Oliver Codrington to be Assistant-Surgeon, vice Augustus Patrick Meyers Corbett, appointed to the Staff.

74th Foot—Captain Henry George Lyon Campbell, from the 22nd Foot, to be Captain, vice James Falconer who exchanges.

83rd Foot—Staff-Assistant-Surgeon Edwin Drew to be Assistant-Surgeon, vice Edward O'Connell, appointed to the Staff.

95th Foot—Lieutenant Morris Robinson, from the 26th Foot, to be Lieutenant, vice Lewis Cubitt, who exchanges.

100th Foot—Captain and Brevet-Major Thomas Matthias Luz Weguelin to be Major, by purchase vice Brevet-Lieutenant-Colonel James Henry Craig Robertson, who retires upon half-pay; Lieutenant Constantine McDougall Moorsom to be Capt., by purchase, vice Brevet-Major Weguelin; Ensign Horatio William Lawrell to be Lieutenant, by purchase, vice Moorsom.

Rifle Brigade—Ensign Horatio John Thomas Walpole, from the 16th Foot, to be Ensign, vice Wilson, promoted.

1st West India Regiment—Lieutenant Angus William Mackay, to be Captain, without purchase, vice John Owens, deceased; Ensign George Frederick Gavin to be Lieutenant, without purchase, vice Mackay; Sergeant-Major Thomas Nicholson, to be Ensign, without purchase, vice Gavin.

2nd West India Regiment—Ensign and Adjutant Robert Straker Turton to be Lieutenant, without purchase, vice William Henry McCoy, deceased; Thomas Barker Knipe, Gent., to be Ensign, without purchase, vice Turton.

3rd West India Regiment—Lieutenant George Hamilton French, from the 22nd Foot, to be Lieutenant, vice Thomas Colclough McCormick, who exchanges.

MEDICAL DEPARTMENT.

Assistant-Surgeon William Ferguson, from the 57th Foot, to be Staff-Assistant-Surgeon, vice Oliver Codrington, appointed to the 68th Foot.

Assistant-Surgeon Augustus Patrick Meyers Corbett, M.D., from the 68th Foot, to be Staff-Assistant-Surgeon, vice Edwin Drew, appointed to the 83rd Foot.

Assistant-Surgeon Charles Dodgson Madden, M.D., from the 43rd Foot, to be Staff-Assistant-Surgeon, vice John Alfred Illingworth, appointed to the 57th Foot.

Assistant-Surgeon Edward O'Connell, from the 83rd Foot, to be Staff-Assistant-Surgeon, vice King John Parr, appointed to the 1st West India Regiment.

Digitized by Google

For Assistant-Surgeon John McLeod Cameron, M.B., from the 27th Foot, to be Staff Surgeon, vice Bradshaw, placed on half-pay, as stated in the *Gazette* of 16th October, 1860, read Assistant-Surgeon John McLeod Cameron, M.B., from the 27th Foot, to be "Staff-Assistant-Surgeon, &c."

BREVET.

Lieutenant-Colonel Charles Albert Denison, 52nd Foot, having completed 5 years service as Deputy-Adjutant-General at Madras, with the rank of Lieutenant-Colonel, to be Colonel in the Army.

Paymaster Maxwell Reeve, of the Military Train, to have the honorary rank of Captain under the Royal Warrant of 27th January, 1860.

THE PRUSSIAN ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I beg to send you the subjoined table, in the hope that you may find it sufficiently interesting for your journal. You will note the great relative number of commoners in the Artillery, Engineers, and Navy, while the contrary is the case with the Infantry and Cavalry.—I am, &c.,

A SUBSCRIBER.

TABLE OF THE GENERAL AND STAFF OFFICERS OF THE PRUSSIAN ARMY IN OCTOBER, 1860.

Showing the relative numbers of Princes, Nobles, and Commoners. Compiled from the Prussian Army List for 1860.

Army.	Field-Marl., and Generals with F.M. rank.				Generals.				Lieut.-Generals.				Major-Generals.				Colonels.				Lieut.-Colonels.				Majors.

9 of the Princes included in the table are of the Prussian Royal Family—viz., 2 Generals with F.M. rank, 2 other Generals, 4 Lieut.-Generals, and 1 Admiral.

MUSKETRY INSTRUCTION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Hythe and its system have been in active operation for some time, and with so good an effect, that if a soldier only obeys the orders laid down for his instruction, he cannot help hitting the object aimed at. The continental armies have, under different names, their corps of sharpshooters. "Licet et ab hoste doceri." Why should not our rifle regiments be modelled on a footing to equal them? During our Indian campaign we had recourse to the picked shots in the different brigades, who were sent forward to clear the front. Every man who now enlists into our infantry goes through an annual course of musketry instruction, and according to the number of points he obtains, is placed either in the 3rd, 2nd, or 1st class. Every man is also enlisted for a particular regiment, and the only difference consists in the standard height of each recruit. The same class of men are enlisted for the Line and the Rifles. It may not be generally known, but it is an ascertained fact, that the short rifle issued to our rifle regiments cannot compare at long ranges with the long Enfield. How, then, is it possible for rifle regiments to show their superiority (as marksmen) over others?

According to the order now in force, no recruit is forwarded from the depôt battalion to which he may be attached, to the head-quarters of his regiment, until he has completed a course of musketry instruction. What I would propose is, that, instead of the present system of enlisting for rifle regiments, the ranks of these regiments should be recruited by having posted to them the men of the depôt battalion who succeed in being placed in the 1st class. By taking men in this way before they have joined their respective corps, you would not endanger the *esprit de corps* which every soldier should have for the regiment in which he is to serve. Even as artisans are always paid according to their skill and superior style of workmanship, so should the pay of our rifle regiments exceed that of other corps. By this means an impetus would be given to men to distinguish themselves in their practice. How useful might our rifle battalions be made were the men all first-class shots. In comparing the different points of merit, as shown in the return from Aldershot, which appeared in the ARMY AND NAVY GAZETTE, we we cannot help remarking with surprise the extraordinary position assumed by the first battalion of the Rifle Brigade. This battalion, the pride of riflemen of yore, and the father of the existing brigade, might well be expected to head every list where shooting is a point of competitive honour. It is equipped with the short Enfield; and if it can be proved that this is an inferior weapon to the long rifle with which the Line are armed, no time should be lost in providing a rifle which will restore their ancient prestige to these gallant soldiers. Many a "Robin Hood" and "William Tell" among them may be labouring under disadvantages entirely beyond his power of rectifying; and if the battalion were called to take the field on active service, their duty would call them to the van wherever arms of precision were wanted to decide the fate of battles and perhaps of empires; and the country would have loud cause of complaint if they were unable, at such a momentous crisis, to sustain their ancient reputation. It is a matter to which the attention of H.R.H. the General Commanding-in-Chief cannot be too earnestly directed.—I am, &c.

A SUBALTERN.

PENINSULAR SOLDIERS' TRIBUTE OF RESPECT TO THE LATE DUKE OF RICHMOND.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Permit me to suggest through your columns a graceful act for the owners of Peninsular medals, or their eldest sons, who are entitled to wear them at ceremonials on the right breast. It is to request permission of the Duke of Richmond to attend the funeral obsequies of the late Duke, unto whom Peninsular heroes (or their descendants in numerous cases) are indebted for the tardy act of justice it remained for Victoria the First to consummate through the energetic, continuous, and, at last, successful appeals of the late Duke. Perhaps some Peninsular hero will take the initiative, and arrange where the medal-wearers are to meet, and fall in with the funeral *cortège*. The display would be as interesting as grateful.—I am, &c.

PENINSULAR MEDAL.

CAVALRY EXPENSES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I observe in your number of Saturday last, that you advert to the difficulty which the existing examinations are said to oppose to the officers of the 2nd Life Guards. No less than four young gentlemen who had accepted commissions in that regiment are said to have been rejected by the Board of Military Education. Some people will affirm that this fact tells fatally against the system of an educational test for admission into the Service; others will with more reason congratulate the Commander-in-Chief at having been thus protected from the intrusion of four dunces into the Army.

But it should be borne in mind that when a regiment earns the reputation which the 2nd Life Guards appears now to enjoy, no reasonable man will allow his son to join such a corps, and it can only recruit its officers from the class of ready-money men, anxious to obtain for their cash the social *status* which the fact of being a cornet of the household cavalry may confer upon them. Such a class as this are not very likely to be well, or even decently educated. If they succeed in entering the corps, they divide their time pretty equally for a year or two between lorettes, hunters, and race-horses, and then sell out and slope abroad insolvent—Hamburg and Baden-Baden being generally their first stage in foreign travel. It would be worth while to inquire how many cornets of this description have purchased into and sold out of the Household Brigade within the last ten years, before we attribute its present state of unpopularity to the dreaded educational test.

If the persons who condemn that test as excessive wish to obtain accurate information as to its intensity, I beg to refer them to "the Report of the Board of Military Education, 1860." They will there see that the existing test for admission is not a special test, that it is a general test framed with the concurrence, and by the advice of the masters of Eton, Harrow, Rugby, and Westminster, as "a moderate test for boys of average intellect," and that the Eton masters have actually protested against its lowness and insignificance, as encouraging idleness in boys who knew they were destined for the Army! The youths who are scared out of the Service by such an educational shadow as this, can scarcely have been very desirable recruits.—I am, &c.

H.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It is easy to quote the words of the Duke of Wellington, the intentions of the Minister for War and the Commander-in-Chief, but acts, not flimsy words, are wanted to restore the cavalry to an efficient state, and to save many cornets who, on joining, find their unavoidable expenses amount to 15*s.* or 16*s.* a day, whilst their pay is only 8*s.* (from which Income Tax is deducted). Their brother officers like to sit up and drink; so pay they must, if not a drop of wine passes their lips. How can one young man place himself in opposition to the colonel and officers (I say one, for he must not combine)? He dare not complain to the Horse Guards; what do they care about cornets? He would be hunted down by two packs in lieu of one. Where is all to end? His family have probably enough to do to pay for uniforms, plain clothes, and the endless entrées; be sure it will end in his running into debt; and not only one more officer will be lost to the Service, but he will become a sign-post to others not to enter. I lately called on the army agents and obtained the following reply, "No officer can live in the cavalry under 300*l.* a-year, besides his pay; some have 600*l.* In India 100*l.* may do, with a credit of 200*l.* on landing."—I am, &c.,

GUARDIAN.

THE NAVY.

ADMIRALTY, OCTOBER 25.

PROMOTION.

Lieutenant to be Commander on the Retired List—Samuel Hornigold Laston, 1815, who entered the Navy in 1806.

APPOINTMENTS.

Commander—John Francis Ross to the Desperate, 8, screw, at Devonport.

Lieutenants—Arthur Salwey to the Donegal; G. R. Bell and Thomas C. Cholmeley to the Hawke; Richard Chambers to the Southampton; Richard Fletcher Broaderick (additional), for disposal, and C. P. Davis to the Marlborough; Willoughby W. Howell to the Formidable; Charles E. T. Woodman to the Asia; Lieutenant Alfred J. Cheek to the Centurion.

Masters—Edward L. B. Williams, from the Indus, to the Desperate; John C. Salfleet (additional) to the Indus.

Surgeons—Daniel Saunders to the Desperate; John Andrews (b) to the Valorous; Edward H. Cree to the Orion.

Paymasters—Alexander Allen to the Industry; Henry Pengelley to the Atholl; Charles P. Fellow (additional) to the Chesapeake.

Assistant-Surgeons—C. H. Racon (acting) to the Nile; Dr. William Johnston (acting) to the Desperate.

Second Master—Selwyn S. Sugden to the Quail.

Midshipmen—Cæsar Hawkins, H. G. M. Dalbon, W. G. P. O'Callaghan, to the Miranda; F. M. S. Osborne and A. W. Benyon to the Bacchante, for disposal; B. F. Clarke to the Ariel; R. P. W. Powney and F. J. Eastaer to the Forte, for disposal.

Assistant-Paymaster—William Flood, from the Pembroke, to the Miranda, 15, screw sloop, at Sheerness.

Clerks—Edward H. Whyte to the Pembroke, 60, screw, coast-guard ship at Harwich; Arther Hughes to the Desperate.

Chief Engineer—James G. G. Dunn to the Desperate.

Second-Class Assistant-Engineers—Henry A. Henri and Hugh Duncan to the Desperate; John M'Cool (acting) to the Cornwallis, for the Fly.

Third-Class Assistant-Engineers—James Daly and Frank Holden (acting) to the Desperate, John Miller (b) (acting) and Joseph Stocker (acting) as supernumerary to the Indus.

Aboukir, 90, screw-liner, at Devonport, Captain D. Curry, was taken out of dock at Keyham on Thursday.

Agamemnon, 91, screw, Captain Thomas Hope, was in the Bay of Naples on the 19th inst.

Alacrity, 4, screw, Commander J. K. E. Baird, was at Beyrout on the 13th inst.

Amphion, 36, screw steam-frigate, Captain Thomas Cochran, left Naples on the 13th inst. for Palermo.

Ardent, 3, paddle-wheel steam-sloop, Commander John E. Parish, was in the harbour of Rio de Janeiro on the 18th of September.

Arethusa, 51, converting into a screw-steamer at Chatham, has had several additional hands placed on her in order that she may be completed by the month of March next.

Argus, 6, paddlewheel steam-sloop, Commander Herbert F. W. Ingram, has been ordered from Malta to Gibraltar to relieve the Scourge.

Bombay, 81, in dock at Chatham, undergoing the process of conversion from a sailing-ship into a screw steamer, has several hundred hands employed on her, in order that she may be completed early in the ensuing year. She is to be furnished with machinery of 400 horse-power.

Bulldog, 6, paddle-wheel sloop, Captain Sir F. Leopold M'Clintock, on special surveying service, on the coast of Greenland, rendered, in the month of August last, essential service to the American schooner Nautilus. The Nautilus visited Greenland, having on board Professor Chadbourne, with several young students from Massachusetts, who intended to pass their vacation in exploring the Arctic regions. The Nautilus had only two sailors on board, as the students preferred to do the whole duty of the ship; but on her arrival she was closely wedged into a field of floating ice, out of which she was fortunately assisted by Sir Leopold M'Clintock, who had arrived in that quarter to survey the proposed line of telegraphic communication, by the Faroe Isles, Iceland, and Greenland, to North America. Captain Young, with the Fox, having Colonel Shaffner, the proprietor of that line, on board, was also daily expected to arrive from Iceland, when the necessary steps would be taken to complete the survey.

Buzzard, 6, paddle-wheel steam-sloop, Acting Commander John Trevenen, was in the River Plate on the 14th of September.

Cæsar, 90, screw, Captain T. H. Mason, left Beyrout in company with the Neptune and Marlborough, on the 12th inst., for Malta.

Caradoc, 2, iron paddle-wheel steam dispatch vessel, Lieut. and Commander John B. Scott, left Malta suddenly on the 18th inst. with dispatches for Naples.

Coquette, 4, screw, has undergone very extensive repairs at Portsmouth. Nearly the whole of her planking is on her, and she has a gang of caulkers employed on her bottom. She will be ready to receive her boilers shortly.

Cressy, 80, screw, Captain Thomas Hervey, was on the 19th inst. shortly expected in the Bay of Naples.

Curaçoa, 31, screw steam-frigate, Captain Augustus Phillimore, was in the harbour of Rio de Janeiro on the 18th of September.

Desperate, 8, screw, which is at Devonport, has been commissioned by Commander John F. Ross (1856), and is to have a complement of 170 officers and men. Her present destination is unknown, but it is said that she will probably reinforce the North American Squadron. This ship has always hitherto been the command of a post-captain.

Donegal, 101, screw-liner, Captain H. Broadhead, at Devonport, was paid wages on Wednesday, and leave of absence granted to the crew.

Doris, 32, screw, Captain E. Heathcote, arrived at Beyrout on the 9th inst.

Edgar, 91, screw, flag-ship of Rear-Admiral Erskine, Captain James E. Katon, is refitting alongside the jetty at Portsmouth. On Wednesday, a seaman fell from the mizentop; most fortunately his fall was broken by striking

Digitized by Google

a post in his descent, and from thence into the water. A noble fellow (a messmate) instantly sprang overboard, and held the man up until further assistance was rendered, when both were rescued from their perilous position. The man, although severely bruised, is likely to recover.

Emerald, 51, screw frigate, Captain Arthur Cumming, anchored at Spithead on Monday last.

Exmouth, 90, screw liner, Captain James A. Paynter, was at the Island of Candia on the 28th of September.

Firebrand, 6, paddle-sloop, Commander J. M. Bruce, has returned to Portsmouth from the Scheldt.

Firefly, 4, steam-vessel, Commander A. L. Mansell, was at Beyrout on the Coast of Syria on the 13th inst.

Foxhound, 4, screw, Commander A. Mitchell, arrived at Plymouth on Monday, from Portsmouth, on her way to the Mediterranean, for which she sailed on the following day. She took out supernumeraries for the fleet.

Geyser, 6, paddle steam-sloop, Commander Jackson, having had her defects made good at Devonport, steamed out of harbour on Monday, and anchored in the Sound.

Greyhound, 17, screw, Commander F. W. Sullivan, was at Beyrout on the 13th inst.

Hannibal, 91, screw, flag-ship of Rear-Admiral Mundy, C.B., Captain Arthur Farquhar, was in the Bay of Naples on the 19th inst.

Himalaya, 6, iron screw troop-ship, Captain John Seccombe, after landing the Persian ambassador at Portsmouth under a salute of 19 guns, entered the harbour on the 20th inst., and is now lying alongside for the purpose of effecting some repairs in her machinery, which will take a fortnight to complete. It is not improbable, however, that these will be hurried on, and that she may take a regiment out to New Zealand. His Excellency Mirza Jaffer Khan, who has before visited England, left behind him a most favourable impression on the minds of the English officers with whom he was brought in contact. He speaks English very fairly, and when at Woolwich, in 1845, commended himself to the authorities by the courtesy of his manners and bearing. We allude to this, regretting that our old guest should have complained that he did not receive at Malta that attention to which he considered his rank entitled him at the hands of the governor. But the fact is, of late years, our interests in the East have so largely increased, and so many ambassadors, rajahs, begums, beys, and khans, have passed through the Mediterranean on their way to the modern Rome, that these dignitaries "come and go" without the sensation to us which their progress through their own country causes. Steamers and railroads have destroyed all this romance for us, and it is very possible the Governor of Malta was not aware of having omitted any marks of civility, or respect, or honour, which his visitors receive in accordance with their rank and the custom of our service; and we are sure, at any rate, from a knowledge of the gallant general, that it was from no want of hospitality, but from inadvertence, that any possible mistake which may have occurred, was committed.

Industry, steam store-ship, Master-Commander Hodges, arrived at Plymouth on Monday from Woolwich, and sailed on Tuesday for Ascension.

Intrepid, 6, screw steam-sloop, Commander Joseph H. Marryatt, left Naples on the 17th inst. for Malta.

James Watt, 91, screw-liner, Captain Edward Codd, is ordered home, but a contemporary states that she has left Malta for Corfu.

Jason, 21, screw, at Devonport, went out for trial of her engines on Monday, but from the state of the weather was obliged to return into harbour without testing them. She went out again on Tuesday, when a successful trial was made. She returned to harbour in the evening.

Lapwing, 4, screw, Commander M. F. O'Reilly, was at Beyrout on the 13th inst.

Leopard, 18, paddlewheel steam-frigate, Captain James F. B. Wainwright, flag-ship of Rear-Admiral Sir Stephen Lushington, K.C.B., was at Rio de Janeiro on 18th Sept.

Liffey, 51, screw, Captain G. W. Preedy, C.B., arrived at Beyrout in company with the Doris and the Racoon on the 9th inst.

London, 90, screw, Captain Henry Chads, was in the Bay of Naples on the 19th inst., but was expecting to be relieved by the Queen from Malta.

Madagascar, sailing store-ship, Captain Richard D. White, was in the harbour of Rio de Janeiro, on the 18th Sept.

Marlborough, 131, screw three-decker, flag-ship of Vice-Admiral W. F. Martin, Commander-in-Chief in the Mediterranean, Captain William H. Stewart, C.B., left Beyrout on the 11th inst., for Corfu.

Mars, 80, screw, Captain J. N. Strange, sailed from Gibraltar on the 13th inst. for Malta.

Megæra, 6, screw troop-ship, Commander Henderson, embarked on Wednesday her troops for Gibraltar and Malta, alongside the dockyard at Portsmouth, and sailed on Thursday. The following officers accompany the detachment of the 1st battalion 25th Regiment:—Captain Everett, Ensigns Chisholm, Dawson, and Pender.

Mohawk, 4, screw steam-sloop, Commander Edward H. Howard, arrived at Naples from Malta on the 17th inst. with dispatches.

Neptune, 91, screw, Captain F. A. Campbell, was at Beyrout on the 13th inst.

Oberon, 3, iron paddle-wheel steam-sloop, Lieutenant and Commander Frederick G. C. Paget, was in the River Plate on the 14th of September.

Orion, 91, screw liner, Captain John J. B. E. Frere, arrived on the 14th inst. at Malta, and left again on the 19th for Corfu, to join the Admiral.

Orpheus, 21, screw steam corvette, which has been fitted at Chatham, with engines of 600-horse power, by Messrs. Humphrey & Co., has been tried at her moorings, opposite to the dockyard, and everything has answered admirably.

Osborne, 1, admiralty yacht, Master Commander George H. K. Bower, arrived at Portsmouth on Sunday last from attending on Her Majesty.

Penguin, 5, screw steam gun-vessel, made a trial outside Plymouth Breakwater, on Wednesday, and returned to her moorings in the steam ordinary in Hamoaze. Her engines appeared to answer very well.

Queen, 86, screw, Captain Charles F. Hillyar, was by the latest accounts from Naples expected there with stores from Malta. It was stated that she would relieve the London. Her mainyard was repaired, and she got away from Malta on the 16th instant, with the expectation of making a rapid passage to Naples.

Racoon, 21, screw, Captain W. C. Chamberlain, arrived at Beyrout on Tuesday, the 9th inst., and found two French lines-of-battle there, viz., the Redoubtable and the Donawerth, and the frigate Descartes. A court-martial was held on board the Racoon on the 12th inst., to try Lieutenant Medd of that ship for sleeping on his watch, who was sentenced to be dismissed from the ship, and to be placed at the bottom of the list for two years. Messrs. Weston and Thomas, two of the Racoon's midshipmen, passed on the 12th inst., with the greatest honours. The Racoon is expected to winter on the coast of Syria.

Reindeer, 17, screw steamer, is progressing at Chatham, the shipwrights having commenced planking her.

Renown, 91, screw, Captain Arthur Forbes, was in the Bay of Naples, on the 19th inst.

Spy, 3, brigantine, Lieutenant and Commander Augustus Tabuteau, was at Bahia on the 14th of September.

St. George, 90, screw liner, Captain the Hon. Francis Egerton. The artisans of the Devonport dockyard are scraping the sides of this ship preparatory to her being painted, when she will complete her equipment.

St. Jean D'Acre, 101, screw-liner, Captain the Hon. Charles E. J. B. Elliott, C.B., was at Malta on the 19th inst. The following is an extract of a letter referring to the very sickly state of the crew, to which frequent reference has been made of late:—"It is found almost impossible to entirely clear out H.M.S. ship St. Jean d'Acre at Malta. They have cleared her holds, and got all they could on deck, but the boilers and engines remain in their place, so that for sanitary purposes she cannot be said to be sufficiently cleared. However, they have found quite sufficient sources of putrid smells to account for the diseases among the men. The vessel's planks are every way found to be perfectly sound; but between the vessel and the lining there was found a quantity of sawdust and shavings, which had apparently been there since the vessel was built, and much impeded the ventilation. Over two hundred of the crew have been sent from her with chest complaints. It attacked the strongest and healthiest men in the ship, and in many cases proved fatal; but its attacks were confined to those who slept in the influence of the bad smells; for instance, the chief engineer, who messed and slept with the ward-room officers, has kept in good health; while the others, who messed and slept within the influence of the smells, have all been attacked. It is not quite a week since the officers and crew were handed over to the Hibernia, and the change has been wonderful. Not only are there no new cases, but her sick list has sunk from 108 to 76, and the officers and men feel that they have escaped from its influence, look cheery, and have worked with a hearty good will in clearing the St. Jean d'Acre out. She is, by orders from England, to be sent immediately to Gibraltar.

Supply, 2, iron screw steam, store ship, Master-Commander W. H. Balliston, arrived at Malta on the 18th inst. from Woolwich and Plymouth, last from Gibraltar.

Tartar, 20, screw corvette, Captain John M. Hayes, which was reported as having sailed from Portsmouth for the Pacific station, is still at Spithead. She has been detained for the purpose of receiving a freight of specie, which she is ordered to convey to British Columbia.

Termagant, 25, screw steam-frigate, Captain Robert Hall. By accounts from San Francisco dated the 26th of September, we find that an attempt had been made to place the Termagant in the Government dry dock at Mare Island, when one of the sections gave way, followed by the others, and the whole dock soon became a complete wreck, from which the ship was with difficulty extricated. It would cost 200,000 dollars to repair the damage.

Trafalgar, 90, screw, Captain E. G. Fanshawe, went into Portsmouth Harbour from Spithead on Wednesday, to make good defects.

Undaunted, 51, improved screw frigate, 600 horse-power, building at Chatham, is progressing very fast, and is nearly completed, but no day has yet been named on which she will be launched.

Victor Emmanuel, 91, Captain W. T. C. Clifford, C.B., left Beyrout for Malta on the 12th inst.

Victory, 101, flag-ship at Portsmouth, Captain R. Coote. This time-honoured ship, according to custom, decorated her trucks and cap of her bowsprit, on Sunday last, in commemoration of the ever-to-be-remembered battle of Trafalgar. The Victory was built at Chatham nearly a century since, and the thorough repair she underwent at Portsmouth dockyard some few months back will render her useful for many years to come; her timbers being in a very sound state.

The old Undaunted, 36, sailing-frigate, has been placed in No. 1 dock at Portsmouth to be broken up. She would have lasted for some years as a floating target; but it will be remembered that on a recent occasion, after two 8-inch shells charged with molten iron had been fired into her amidships from the Stork, gun-boat, at 400 yards' distance, she was speedily on fire, and although several powerful floating engines were on the spot in readiness, they were not of the slightest use in subduing the flames, and the gun-boat was ordered to scuttle her to save as much of the hull as possible; and now, with her bare ribs exposed, and her planks covered with grass, and all manner of marine infusoriæ, glistening in the sun with a thousand brilliant colours, she presents a study for a painter's brush, of which a skilled hand would make a most effective picture. Was it not the Undaunted which, when commanded by Captain Usher, carried the great Napoleon to Elba? If so, will none of our living artists, as Turner did the old Temeraire, rescue this famous relic of the great French war from oblivion? It is said that other vessels of her class, now lying up in the harbour will soon be brought forward to undergo a similar fate.

Lieutenant Buller (flag-lieutenant to Vice-Admiral Fanshaw Martin, Commander-in-Chief in the Mediterranean), invalided from the Marlborough, on the coast of Syria, passed through Malta on the 11th October in the Peninsular and Oriental Company's steam packet Ripon, from Alexandria, bound to Southampton. Mr. M'Dougall, master, R.N., employed during the last eight months in surveying in the waters of Ceylon, was a passenger by the same steamer. We understand that he has discovered several dangerous rocks not previously laid down in any charts.

Rear-Admiral Sir Thomas Pasley, Bart., has returned to Devonport from leave, and has re-hoisted his flag on board the Royal Adelaide, Captain Hall, and assumed the command of the port, pending the commencement of his official duties by the new Commander-in-Chief, Vice-Admiral Sir Houston Stewart.

Rear-Admiral Stopford struck his flag on board the Royal Albert, at Plymouth last week, on a short leave, and left for London.

COURT-MARTIAL.—A court-martial was held on Thursday week on board the Impregnable, 104, guard ship, in Hamoaze, for the trial of John Kinsman, first-class gunner of the St. George, on a charge of having been drunk on board his ship on the morning of the 9th of October last. The court was composed of Captain Henry Broadhead, Donegal (president), third officer in command of Her Majesty's ships and vessels in the port; Captain Astley Cooper Key, C.B., Indus; Captain Arthur William Jerningham, Cambridge; Captain Edward Southwell Sotheby, C.B., Conqueror; Captain Lord Frederick Herbert Kerr, Impregnable; Captain W. King Hall, C.B., Royal Adelaide; and Captain Henry Downing Rogers, C.B., Centurion. William Eastlake Esq., officiated as deputy-judge-advocate, Mr. Hamilton (from the firm of Beer and Rundle) attended for the prisoner by the permission of the court. Mr. John Stirling, surgeon, deposed that on the 9th of October he went to the prisoner's cabin, where he discovered a strong odour of spirits. The prisoner was drunk, and he ordered a watch to be placed over him. The prisoner denied the charge of drunkenness preferred, and said he had taken only two glasses for the night. While at Portsmouth his wife died, leaving four young children; this preyed greatly on his mind, and produced nervous excitement. Certificates of character and service were then put in, and the court was cleared for a short time. Upon being re-opened the charge was declared to be proved, and the prisoner was sentenced to be reduced from the rank of first-class gunner to that of the second-class, and to be dismissed the St. George.

CHATHAM DOCKYARD POLICE.—Lieutenant John Wise, R.N., who has been 27 years director of the dockard police, is promoted to the rank of commander, and will retire on the receipt of his superannuation. Lieutenant Wise has been in the service since 1805; he served for many years in the coastguard and blockade service.

JAMAICA.—We have received the following in a private letter from Jamaica:—"There are no ships of war at present in Port Royal Harbour. The Perseverance and the Barracouta were here up to yesterday, the 21st September, and both have left with black troops; the former with the 5th and 6th companies of the 2nd West India Regiment for Africa, and the other vessel with the head-quarters of the regiment under the command of Colonel Whitfield for Nassau, New Providence; there the gallant colonel will likewise assume the duties of commandant. While the Barracouta was at the ordnance wharf, Kingston, embarking the soldiers to be transferred to the Perseverance, which latter vessel was coaling at Port Royal, a sailor fell from the main-yard, and the poor fellow died about twenty-four hours after. Major-General Pringle Taylor and his staff, as well as the heads of the civil departments of the Service, are nearly all now resident in the mountains, having deserted the hot stifling plains for the cooler air of the higher regions. The battery of the Royal Artillery has also been removed to Newcastle, several cases of yellow fever having suddenly broken out in Port Royal, where it is usually stationed. Commodore Dunlop, who was appointed to succeed Commodore Kellett, C.B., has not yet arrived out, although he has been expected for the last nine or ten months, and it is said that the public business is much impeded by his continued non-arrival."

FIFTY-FIFTH ANNIVERSARY OF TRAFALGAR.—The members of the Royal Naval Club of 1765 dined at Willis's Rooms on Monday night, to commemorate the great battle of Trafalgar. Admiral Sir Edward Chetham Strode, K.C.B., presided on the occasion, with all the spirit and energy of bygone days. This much-respected gallant officer is the last of Nelson's Agamemnons, having served as lieutenant of that celebrated ship in 1795. Although in his 86th year, Sir Edward did the honours with much effect, and paid, in the course of his proposing the toast of "The Duke of Cambridge and the Army," a high compliment to the Rifle Volunteer movement. The following officers were present at the meeting:—Admirals Sir George Back, H. Gossett, and E. Stanley; Captains T. V. Anson, T. B. Bond, Sir E. Belcher, R. Douglas (Trafalgar officer), J. Davies, C. Gayton, J. Hudson, C. H. Jay, H. Layton, W. M'Ilwaine, G. C. Mends, W. Morris (b), J. W. Noble, C. Rayley, J. Reeve (Trafalgar officer), R. Robertson, J. Sykes, M. H. Sweny (Trafalgar officer), T. D. Stewart, J. H. Brown, T. P. Clarke, T. Creser, Sir W. Dalyell, Bart., P. H. Dyke, L. Dennys, A. N. Fairman, J. Geary (Trafalgar officer), W. Greet, G. Howes, C. Haydon, J. J. Keeling, W. Miller, J. A. Mends, A. T. Mann, H. Pengelley, G. Spong, J. Sanders, George Sayer, F. C. Strode, James F. L. Wood, and T. Woods.

No further orders have been received at Chatham respecting the large steel-plated vessel of war which is to be constructed at that dockyard. The plans and drawings of the new frigate are still in the hands of the authorities at the Admiralty. Mr. Scamp, since his return from Malta, has been busily engaged with the proposed plans for enlarging the dock in which it is intended to construct the ship, but up to this moment these are not finally settled.

We learn from Beyrout that H.M.S. Marlborough left that place on the 11th of October for Corfu, where orders have been given for eight line-of-battle ships to assemble. The Dutch screw steam-frigate Admiral Van Wassanear came into Malta on the 18th inst. from Alexandria. After anchoring she saluted the flag of Rear-Admiral Codrington, which compliment was returned by his flag-ship, the Hibernia. All the Dutch vessels of war stationed on the coast of Syria will winter in Malta. The Prussian man-of-war steamer Loreley arrived on the 18th from Gaeta. A French transport, with reinforcements for Syria, arrived on the 18th, and proceeded on the day following.

A correspondent, writing from Malta on the 19th inst., says, "By the time this reaches you, Mr. Scamp, of the Admiralty Works Department, will be again in England, and will have laid before the authorities his report in reference to the contemplated improvements in this harbour. I suspect very erroneous impressions have been entertained as to the practicability of the work, and the cost; the

Digitized by Google

arrangements, however, that have been made with Mr. Scamp during his stay here of a few weeks, have dispelled all doubtful apprehensions. The work appears to consist chiefly of deepening and extending the Great Harbour, by dredging and constructing plant-walls, and forming wharfs to the extent of nearly two miles, and forming a direct communication from the Grand Harbour to the Quarantine Harbour. There are three contractors here from England, who are obtaining the particulars for enabling them to estimate tenders for the work, and Mr. Scamp has adopted the following method for proving to the competing parties, with what facility, dispatch, and economy, works of that kind required can be executed in this island. To prove the capability of the two dredging vessels provided by Government, he has had one worked, and the mud, &c., raised, deposited in the required spot at sea. A portion of the wharf-work will be constructed in what is now land, but subject to the influence of water, and part will be constructed in the sea; he has had a sample of each constructed, to prove with what facility the materials can be obtained, and the work can be executed with both below and above water. Part of the stone has been excavated and removed by carting, to show the cost of such work. Stone has been excavated in two places in the edge of the canal, to show with what facility it can be obtained for the extension of the harbour. Mr. Scamp's intimate acquaintance with the material and people of the island, has enabled him to do all this with great facility and dispatch, and the examples shown will no doubt be of incalculable value by enabling contractors to know the lowest cost at which such extensive works can be done, by bringing into use the plant and appliances usually employed. The drawings and other particulars have been prepared by Mr. Scamp for the guidance of the contractors in forming the lowest estimates. We understand that in carrying out these works arrangements will be made for docking ships of all classes, and repairing their machinery."

A Glance at the Navy.—A correspondent of experience and practical knowledge writes to us as follows:—"We have often been lead to inquire the cause of the unpopularity among the British seamen of the Royal Navy; we have digested the Minutes of the Committee and Royal Commission on manning the Navy; we have gone into the company of the seamen afloat and on shore; we have recounted the number of desertions annually, the number of boys trained for the Service, the thousands of pounds paid as "bounty," the recent improvements granted; and yet with all these the Navy is still unpopular and deficient in numbers. And after our minute inquiries we draw our conclusions: First, the boys trained in the Navy have exceedingly good training, and are well adapted for every purpose as seamen and gunners, on board or in the field, none excelling them. But we don't train a sufficient number, and those we do train we let slip through our fingers, or, in other words, out of the Service, after their first period of service has expired; and, as the present term of engagement is rather long, viz., ten years after the age of eighteen, many desert ere they complete their engagement. Secondly, the seaman has nothing to look forward to beyond the rank of a warrant-officer, and in that capacity he can see no charms; plenty of hard work, anxiety, care, responsibility, everyone's blame but no one's credit, or, in other words, in everybody's watch but nobody's mess, and with no hope or chance of freedom till sixty years of age; and this must be a continuous service from the first entry, either actively employed at sea or in harbour, no half-pay, and then at that age their retirement is insufficient to keep them. Then we would ask, where is the stimulus to bind the seaman to the Navy? In fact, we have none; no admiral's flag in the distance; and the situation of a warrant-officer is more frequently despised than sought for. To prevent an annual waste of public money in training boys for other services, it would be much more beneficial to expend a proper sum to improve the position of the warrant-officers, and thereby keep your most efficient seamen in the Navy to aspire to that rank."

The Navy Gazette.

ADMIRALTY, October 19.

Corps of Royal Marines—Second Lieutenant Edward Kinsman to be First Lieutenant, vice Woodriff, placed on half-pay.

NAVAL LEAVE OF ABSENCE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Taking for granted that as your paper is called the Army and Navy Gazette you are as indefatigable in advocating the claims of the latter Service as the former, and in such a case as the following, you will endeavour to get the two Services put on an equal footing. The case I refer to is that of leave for officers. In the Army every officer is entitled to a certain amount of leave during the year, at least two months, and the Government clerk is also allowed his six weeks; but for the unhappy naval officer, who is either Channel-cruising or something worse there is no such indulgence. It is true that after a six months' cruise he may get ten days' leave, and that as a favour. I feel sure, sir, that this only requires to be respectfully pointed out to the Admiralty (and the press only can do that) to be remedied. A circular granting officers six weeks' leave during the winter months I am sure would meet with universal approbation and thankfulness from the profession. But for the antiquated idea were exploded that a lieutenant is required to pace an empty deck all night (the ship being safely moored in Portsmouth Harbour or Hamoaze), three out of six lieutenants might very well be spared during the winter.—I am, &c.,

A Naval Officer.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Your advocacy of leaves of absence in the Navy would be well received by some of your readers. The injustice to naval officers is apparent. In fact no one ought to go into the Navy who is not from the south of England, owing to the present system of leaves. An officer having to go from 400 to 600 miles to see his relatives, is hardly there four days when it is time to go back, before his leave at the present rate expires. This is shameful, and is felt by all the Navy.—I am, &c.,

An Old Reader.

ROYAL NAVAL MEDICAL SUPPLEMENTAL FUND.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—As the question of the abolition of this fund is giving rise to some rather unpleasant feelings among us, I would crave the indulgence of a short space in your widely circulated paper to say a few words on this subject. The great stumbling block in the way of settling matters amicably is the question as to what the annuitants, present and prospective, are entitled; some maintain they are only entitled to 26*l.* 13*s.* 4*d.* per annum, while others say 40*l.* A brief sketch of the history of the fund may serve to put the matter in a clearer point of view. In 1817 the fund was established, under Order in Council, by which two things were decreed, viz., that the widow annuitants were to have 40*l.*, and that all naval medical officers were to contribute (*nolens volens*) a shilling per week to the fund. In course of time it was discovered that the fund was insolvent, and the directors (in 1845) applied to Parliament for relief from such portion of their liabilities as they were unable to meet, and so be able to carry on business; the relief was granted by an Act authorising, for a certain number of years, the patron and president to reduce the annuities to any sum they might think fit, down to two-thirds of 40*l.*, of which power they immediately availed themselves to their fullest extent. The Act in a few years expired, and the fund still being unable to meet its liabilities the directors were compelled to apply for a renewal, which was granted by Parliament for some years longer; this Act also expired, and was again renewed for a period of ten years in the session of 1859. While, however, the discussion was going on relative to applying for a renewal, it was strongly recommended by many to apply for a winding-up Act, and have done with the thing altogether. This proposition had many supporters, and a committee of six members was appointed to take it into consideration; the committee was to call in a seventh, as chairman, who was to be a civilian. The gentleman they selected was Mr. J. Tidd Pratt. It was he who proposed that a circular should be sent to every medical officer in the Navy, inviting each to record his vote for or against the winding-up. The majority voted for abolition; the committee, therefore, recommended that the fund should be wound up as soon as possible, having due regard for vested rights. A committee was, thereupon, appointed, Mr. J. T. Pratt being their chairman, to report upon the best mode of winding-up, having due regard to vested rights. The report was read at the last general meeting of the directors, but it was not adopted, so that the committee's labour and our time are thrown away. The reasons given for its non-adoption were numerous, but the chief were, that it assumed that 26*l.* 13*s.* 4*d.* was all that the annuitants were entitled to; that it ignored the fact that the Naval medical officers were bound to pay 1*s.* per week each as long as they lived; and that it proposed turning over the interests of the present insured members to an assurance company, of which, by the way, the worthy chairman of the committee is a director. This last I consider objectionable indeed; but the two former could be, and ought to be met in an amicable spirit. Let a number of us who are in favour of abolition form ourselves into a committee, and ascertain exactly the rights of all parties, and offer to those interested that which is likely to be accepted as a fair discharge of all obligations, and then, when all are agreed as to terms, we can go to Parliament for a winding-up Act, which, on the basis of the committee's report, I feel we could not get in the face of so much opposition. We are told that the president has given as his opinion that the fund cannot be wound up; but if my suggestion is carried out, I think there would be no difficulty in the matter; however, I feel that the offers or proposals should come from our side, and be made in all fairness and honour.—I am, &c.

An Abolitionist.

A WINTER IN THE CHANNEL.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I trust that you will use your influence to point out to the Admiralty the evil consequences that must follow from allowing the Channel Squadron to winter in such places as Portland, Spithead, or Plymouth Sound. The bare remembrance of last winter is sufficient to make one shiver, and also to look forward with apprehension to the results of another. It appears from all the ships refitting, and receiving new running rigging, and replacing stores, that it is the intention of the Admiralty of sending us somewhere. It is said that the reason the Admiralty will not allow the ships to winter in the harbours of Portsmouth and Plymouth is that there is no room! Why, sir, between the Victory and St. Vincent alone there is room for all the Portsmouth division of the fleet, viz., five ships. You may depend there never will be room as long as it is the dockyard officials' interest to keep them as far from their establishment as possible. Our harbours are full of old yellow hulks, which are of no earthly use, except when a ship is to be commissioned; and the necessity for that is now done away, as ships are commissioned already rigged and fit for service. The men are now paid monthly. Without giving them lots of leave during the winter, and plenty of sea work during the summer, there will be a great deal of discontent and drunkenness.—I am, sir,

A Lieutenant, R.N.

CAPTAINS ON RESERVED LIST, R.N.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—As "Trafalgar," in his letter which appeared in your Gazette of Saturday, 13th inst., has made a statement respecting the position of officers promoted to the rank of captains on the reserved list by Sir James Graham, which betrays his total ignorance of the subject, permit me to explain through your columns to him, when that noble baronet invited commanders to accept such promotions, he intimated to them that as reserved captains they would have to forego any claim they had previously advanced for the commanders' out-pension of Greenwich; but that it did not imply they would not become elegible for the pension attendant on the higher rank (which "Trafalgar" wishes it to be supposed by his remark). I beg to state for his information, that an officer, who was so promoted by Sir James Graham, only in May last applied for the captain's out-pension of Greenwich, and received the following answer:—"Admiralty, 9th May, 1860.—Sir,—I have received and laid before my Lords Commissioners of the Admiralty your letter of the 4th inst., and I am to acquaint you that your name is noted for the out-pension of Greenwich. (Signed) G. W. Romaine."

Now this, I trust, will satisfy "Trafalgar" that he has committed a grave error by the remark he made; and I hope it will also convince you of the real position of reserved captains, and induce you to deem the claims of those officers as a class, in their present struggle to obtain justice, worthy of your support in a manner that cannot be misconstrued.—I am, &c.

A Captain on Reserved List.

THE MILITIA.

MILITIA STAFF-SERGEANTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—The staff-sergeants of militia have just had an increase of pay—an act of tardy justice. It came when the Government found out they could not get sergeants to join the staff of militia regiments for 1*s.* 6*d.* per day, that is to say, for half what they could earn as day-labourers working in the fields. Well, they have gone one step in the right direction; let them just take one more step; the cost will be very small, but the boon will be very gratefully accepted by an excellent class of non-commissioned officers. What I mean is, there are many deserving sergeants who were transferred from the line to the militia, whose pension is under 2*s.* per day—say from 1*s.* 9*d.* to 1*s.* 11*d.*—who, if they had not volunteered to join the militia staff by the promise of many benefits, would have remained in their regiments till they were entitled to a pension of 2*s.* per day:—why not let the five years these men have served in the militia make up for the time wanted to complete their time from 1*s.* 9*d.* to 2*s.*? the cost to the country would be about 200*l.* per annum, and it would be a great encouragement to good sergeants to join militia staffs. The same rule might apply to granting medals, at the cost of 100*l.* a year.—I am, &c.,

A Staff-Sergeant.

Channel Islands.—An official return has lately been made of the strength of the Guernsey, Alderney, and Sark militia; which we find, including all ranks, amounts to 4872 men. When it is remembered that the whole of this force is, with the exception of the Artillery, armed with the Enfield rifle, in the use of which the greater part of the men have already attained a fair degree of proficiency, it will be readily understood that the above total represents a defensive body equal to at least 10,000 men armed on the former system. Lady Panmure, on a recent visit to Guernsey this summer, offered a gold watch as a prize to the best marksman in the Militia; but by some unaccountable mismanagement, which no one seems able to explain, the competition, to the great chagrin of the Militiamen, has never come off; nor can they ascertain that any day will be fixed for the shooting. It is probable that the serious accident which happened to His Excellency the Lieutenant-Governor is the cause of the delay; as General Slade, taking the deepest interest in Militia matters, would very naturally wish to be present on the occasion. But as the gallant officer has had offered up in the island churches thanks for his lucky escape and recovery, we hope soon to be able to record the name of the fortunate yet skilful marksman in this journal.

The Militia Gazette.

WAR OFFICE, PALL MALL, October 23.

Norfolk Artillery Regiment of Militia—John Stanley Mott, Gent., to be First Lieutenant, by augmentation.

WAR OFFICE, PALL MALL, October, 26.

The Royal Midlothian Yeomanry Cavalry—Cornet John Turnbull, to be Lieutenant, vice Robert Hay, promoted; John Alexander Born Callander, Gent., to be Cornet, vice Turnbull, promoted; Charles William Ramsay Ramsay, Gent., to be Cornet; Sholto George Watson Douglas, Lord Aberdour, to be Cornet.

Royal Flintshire Militia—Ensign Charles William Shackle to be Lieutenant; Ensign Ralph Richardson the younger to be Lieutenant.

Royal Brecknock Rifle Regiment of Militia—John Williams Morgan, Esq., to be Lieutenant.

Memorandum—King's Own Light Infantry Regiment of Militia—Her Majesty has been graciously pleased to accept the resignation of the Commissions held by Captain Charles Mackinnon Walmisley and Lieutenant Edward Vernon.

Warwickshire Yeomanry Cavalry—Her Majesty has been graciously pleased to accept the resignations of the Commissions held by Lieutenant John Digby Wingfield Digby, and Cornet John Newdigate Francis Astley.

Durham Artillery Militia—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Second Lieutenant Arthur Munro.

Memorandum—Her Majesty has been graciously pleased to accept the resignations of Captain John William Thomas Locke and Captain Thomas Peach, both of the 1st Derbyshire Militia.

The Wings and Fins of War-Ships.—When we recollect how many years it has taken to get the screw into use in the Royal Navy, and how hopeless it is to get such a change wrought by private individuals possessing the enterprise and capital requisite, and how vitally important it is to the nation to possess an undamageable means of propulsion in their warships, even though those means be more costly or less effective than the screw—it behoves the Government not to neglect the series of experiments which may set the question at rest. But there does not seem any reason why steam-power should be less economically convertible to the purpose of propulsion by an internal screw-pump out of the way of risk, than by an external screw-pump, exposed to risk, not only from the enemy's shot, but from its weak attachment to the vessel and its exposure to fouling any floating substance.—*Once a Week.*

The Elswick Ordnance Company have lately purchased above five acres of land to the east of their present works in Newcastle-on-Tyne, on which it is understood they purpose erecting a series of commodious buildings for fitting up and finishing the Armstrong guns before they are shipped to Woolwich. Heretofore the guns have been sent from Elswick in an unfinished state, the carriages and other fittings being added when they reached Woolwich. In the new works about to be erected it is intended that the guns for the future shall be fitted up and finished before they leave the Tyne.

VOLUNTEERS.

A very convenient bottle and sandwich case, intended as a canteen for Volunteers, has been registered by the maker, Mr. Bussey, of Dunn's Passage, New Oxford Street. Although there is not much likelihood of the Volunteers being exposed to the vicissitudes of warfare, their experience of mimic campaigning at Camden Park will make those who were present appreciate any contrivance by which without adding any great weight or unsightly appendage to the uniform, they can in future carry a store of solid and fluid nutriment in long marches on field days. The canteen, of course, is not intended for the rough work of the horrid little wooden barrel which our soldiery are condemned to carry, but it is exceedingly well adapted for its purpose; and we think it will be found far more useful to tourists and Alpine travellers, and pedestrians in general, than the flasks and tin boxes now in use. It is, we are told, approved of by Mr. Sidney Herbert, Lord Ranelagh, Lord Grosvenor, and others.

METROPOLITAN.

2ND (SOUTH) MIDDLESEX RIFLES.—Several foreigners of high rank have lately visited the grounds at Beaufort House, narrowly inspecting the establishment. The magnificent butt, built of solid masonry, upwards of 300 feet broad by 40 feet high, excited their most unqualified admiration, and they departed evidently impressed with considerable respect for the permanency of the Volunteer movement. Great activity prevails at head-quarters, and the members of the corps, refreshed by their recent holiday, have returned full of vigour and determination to master thoroughly the most minute details of their new profession. Last Saturday witnessed a strong muster, the command being taken by the noble and popular commandant. Saturday, the 27th, will be a great gala day at Beaufort House. Inventors desirous of exhibiting their discoveries are invited to attend.

9TH (WEST) MIDDLESEX RIFLES.—Regimental orders for the week ending November 3rd, 1860: Company drill, with manual and platoon exercise for Nos. 3 and 6 companies, at Portman Barracks, on Monday and Thursday evenings, 7 to 2, p.m.; Battalion drill and Adjutant's parade on Tuesday, 7 to 9, p.m., at St. John's Wood Barracks; Recruit and Company drill for No. 8 at Allen's Riding School, on Wednesday, at 7 p.m., and Saturday, 4 to 7 p.m. The New Orderly Rooms at 70, Seymour Place, are open daily from 11 till 4, and 6 till 9 p.m., for the instruction of recruits and cadets; Company drill for Nos. 1, 2, and 4 Companies on Thursdays at 7 p.m., at St. John's Wood Barracks; No. 5 Company drill two evenings at University College, and No. 7 Company at Haverstock Hill; Commanding Officers parade on Saturday, and march out for field exercise, with blank cartridge muster, at 4·15, punctually, at Lord's Cricket Ground. Classes for musketry instruction meet daily; the practice-ground is available for the use of members who have passed the course, every day except alternate Tuesdays. A large room at 70, Seymour Place, is now open every day from 11 a.m. till 10 p.m., for fencing, bayonet-exercise, single-stick, &c. The foils, masks, sword-sticks, &c., are supplied for the use of members, free of expense. A reading room is also attached.

14TH (HIGHGATE) MIDDLESEX RIFLES.—On Saturday a magnificent silver bugle (subscribed for by the ladies of Highgate) was presented by Miss Angela Burdett Coutts to the Highgate Rifle Corps. The event came off on the grounds adjacent to Holly Lodge, the present residence of Miss Coutts, and formerly the residence of the late Duchess of St. Albans. The beauty of the day attracted a vast concourse of spectators, in addition to the gentry of the district, and it is computed that there were at least from 5000 to 6000 persons on the ground to witness the proceedings. Shortly before three o'clock, the battalion, under the command of Captain Wilkinson; the Highgate, under Captain Langdale; the Hornsey, under Captain Walker; and the Hampstead, under the command of Captain M'Innes; marched into the upper field, and immediately afterwards the guests at the mansion, preceded by the full band of the Coldstream Guards, in their state uniforms, started for the presentation tent, on arriving at which they were received with general cheering. Miss Burdett Coutts was accompanied by Mr. W. H. Bodkin, in his uniform as deputy-lieutenant of Middlesex, the Right Hon. the Lord Mayor of London, Archdeacon Sinclair, the Reverend Mr. Dalton (the rector of Highgate), and a large concourse of ladies and gentlemen. In front of the presentation tent was erected a projecting platform covered with scarlet cloth, at the end of which was a flagstaff, bearing a splendid union jack, and other decorations. The company having taken their seats, the battalion, after a few manœuvres, fell in in contiguous columns, and marched up in column, and on arriving within a short distance of the presentation tent, deployed and formed into line. The Hampstead and Hornsey companies then wheeled right and left, forming two sides of a square, the Highgate corps, in the centre, facing the tent, forming the third portion. The ranks were then opened, and the salute was given, the band of the 29th (North) Middlesex Rifles in the rear playing "Rule Britannia." Miss Burdett Coutts then came forward to the front of the platform, leaning on the arm of Mr. W. H. Bodkin, deputy-lieutenant, to present the bugle, amidst enthusiastic cheering, and addressed the Volunteers in the following terms:—"Captain Wilkinson and Gentlemen—The ladies of Highgate have honoured me by the request that I should be their spokeswoman on the present occasion. We feel that this local gathering is the faithful exponent of those sentiments of gratitude and respect which the far-sighted and sensitive patriotism of the Volunteer movement calls forth amongst the whole body of your countrywomen. It has allayed those fears, excited by repeated warnings, of the unprotected state of the country in the event of a general European war, or whenever the exigencies of Her Majesty's service required the presence of the Army in distant parts of her empire, or in the absence from our shores of that fleet of ours, through which (under God) I believe no enemy will ever force his way. These warnings, apparently unheeded, sunk deep into the national heart, and we see to-day the result, as we may see it through the length and breadth of the land, in the presence of a force whose services no gold could purchase, willing and able to stand side by side with trained and disciplined troops. We owe this (and deeply and gratefully do we acknowledge it) not to the sudden impulse merely of brave men under the pressure of immediate danger, but to the quiet determination of men ready to make sacrifices in time and to avert insult as well as disaster from all dear to them. We earnestly pray that Europe be long spared the calamity of war. May the sweet sounds of this silver bugle, which I now have the honour to present to you as a token of our esteem, and of the interest we feel in this corps, only mingle with the peaceful sounds and occupations of the neighbourhood, carrying a sense of security to every heart. But if, indeed, it must sound a harsher note, then we feel that the defenceless state of its donors will stimulate your courage to endurance and resistance, and I doubt not that these fields would soon echo to its blast of victory, for you will fight in an united people's most righteous cause—'the defence of their Sovereign, their liberties, and their homes.'" Several rounds of hearty cheering burst forth at the conclusion of this speech, and Miss Coutts, in the name of the ladies of Highgate, then presented the bugle to Captain Wilkinson, amidst reiterated applause. The bugle, which is an exceedingly massive and splendidly chased instrument, bore the following inscription:—"14th Middlesex (Highgate) Rifle Volunteers, the gift of the ladies of Highgate, presented by Miss A. Burdett Coutts, October 20th, 1860." Captain Wilkinson made the following reply: "Madam and Lady Subscribers—As commanding officer, it becomes my duty, as it is my privilege, to return you the grateful acknowledgments of the Highgate Corps for the very handsome present we have received at your hands. It has been the ruling principle of this corps to avoid as much as possible all affectation of the pomp and pageantry of soldiering. We have preferred simplicity both in uniform and accoutrements. It is not, therefore, the silver and gold—it is not the mere ornament conferred upon our parade display by your beautiful present—but it is the fact of its being, as you have said, the exponent of sentiments of affectionate approval of our exertions, of sympathy with our cause, which renders it of priceless value in our eyes. Our motto is 'Defence not Defiance,' our rallying cry 'Hearths and Homes.' We aspire to no higher glory than that which we receive to-day, the esteem and support of those whom we love and cherish, whom we are banded together to defend, who are the light and life of our hearths. You have made us truly express the motives which led to the formation of the corps, and the sentiments which animate us. Rely upon it we will endeavour to act up to both. No unworthy note shall ever be sounded from this bugle. In our parades of peace its tones will awaken the echo of respect and social virtue. We shall think of the givers, and remember that of all men the Volunteers are pre-eminently bound to maintain and illustrate the character of the Christian and the gentleman. In time of war, should that sad calamity arise, its tones will remind us of the responsibilities to which we have pledged ourselves. Our arms will be nerved with tenfold vigour, our hearts warmed with tenfold daring, by the thought of the loved and cherished, and as you have forcibly said, madam, the 'defenceless interests committed to us for protection.'" Captain Wilkinson then commented with much feeling upon the presence of the children of the National and British schools, who had been invited to attend; and said that whatever might be the opinion as to the discretion of extending the Volunteer movement amongst the very poor classes, there could be no question as to the propriety and advantage of asking their children to be present at such a spectacle—of asking them to recognise in the Volunteers their own defenders — of reminding them that the Volunteers are banded together, not to defend exclusively the palace of the noble and the mansion of the rich, but equally and emphatically the cottage of the poor. Captain Wilkinson (addressing Miss Coutts) continued: "I have said, madam, that the presence of these children to-day is strongly suggestive of your own personal sympathies. Forgive me if I dwell for a moment on a part of my subject which I approach with much delicacy, but which if I was to omit I should be justly reproached by my comrades for neglect of duty. You have been so long and so prominently at the head of all that is good and noble—you have so illustrated your name by deeds of pious charity and munificent liberality, that you have become, as it were, public property. Your name is known through the length and breadth of this vast empire, and where it is known it is loved and honoured. Next to the Queen on her Throne there is no lady in the land from whom we should have considered it a greater privilege to receive this gift, and while, to the multitude of subscribers, we gratefully acknowledge the universality of the kind sentiments you bestowed on us, we feel that the lady subscribers have conferred great additional value upon the present by permitting us to connect with it the individual association of the name of Miss Coutts." Captain Wilkinson concluded by again expressing his acknowledgments and his assurance that the future of the corps would prove it not to be unworthy of the favour and sympathy invariably shown to it by the ladies of Highgate. At the conclusion of this address, Captain Wilkinson resumed the command, and the battalion, having been ordered to retire some distance, broke into open column, and then into quarter distance column, marched past in slow and quick time, with the band of the North Middlesex playing "Should our praise of Freedom's Isle." Mr. W. H. Bodkin said he was deputed, in the name of Miss Coutts, to thank the whole of the Volunteers assembled for their attendance, and for the very great delight she had experienced in having had the honour to perform the part she had done that day. The way in which the evolutions had been performed would he was informed by military gentlemen of high standing in the Army, have been no discredit to any of Her Majesty's troops, and he had a still further pleasing duty to perform, and that was to announce that it was the intention of Miss Coutts to give two silver challenge cups to be shot for by the Highgate Rifles—one for the elder and more advanced, and another for the junior members of the corps. Miss Coutts not only entertained the rich upon this occasion, but the poor were not forgotten, and a stage was specially erected for the National School children of the district, who were also amply supplied with refreshments. On the march from Highgate to town, the Hampstead corps, which preceded the North Middlesex, drew up in the Kentish Town Road, prior to separating, and presented arms, the band playing "Auld Lang Syne," and the corps cheering each other as they passed.

20TH (EUSTON) MIDDLESEX RIFLES.—On Saturday, at half-past two o'clock, the funeral of Corporal John Donovan took place. The mournful *cortége* started in the following order:—The band, the hearse, with on each side three members of the company of the deceased; the firing party, bearing their arms reversed, and with white scarfs and hatbands; the mourning coaches, with the family of the deceased; the remaining members of his company; a detachment of the London Irish, fifty in number, under the command of Lieut. Tully, who attended as a mark of respect to the memory of a fellow countryman; a company of the 29th (North) Middlesex, under Sergeant-Major Morton and Colour-Sergeant Spinks, of the 4th company; about five hundred members of the 20th, without arms; and bringing up the rear, all the officers and covering sergeants. At the gate of St. Mary's Roman Catholic Cemetery, Kensal Green, the body, which was here removed from the hearse and borne by his comrades, was met by the curate, and the procession again moved on to the chapel, where the coffin, on which was laid the cap, plume, and belts of the deceased, was deposited. The in-door service having been performed the procession moved to the grave, where, when the office was concluded, the firing party delivered three parting volleys over the last resting-place of their comrade.

28TH (LONDON IRISH) MIDDLESEX RIFLES.—On Saturday this corps assembled at Burlington House, at the usual hour, and under the command of Major Verner, proceeded, headed by the band, to Hyde Park, for blank cartridge practice. Six rounds were served out to each of those present, about 200 in number. On the arrival of the regiment at the park, the Queen's (Westminster) were seen ahead, and as the Irish corps passed, the Queen's drew up and presented arms, a compliment which the Irish returned by carrying their rifles. At the last volley of the London Irish the Queen's burst into a spontaneous cheer, which was taken up most enthusiastically by a large crowd. After the return to Burlington House, Major Verner addressed the men, urging them to devote themselves with more attention to their drill. After the customary drill on Tuesday evening of the members of this corps at Westminster Hall, a general meeting was held for the purpose of adopting immediate steps to found a suitable memorial of their late comrade, Captain Jones. In the absence of Colonel the Marquis of Donegal from London, Major Verner presided on the occasion, and in a very feeling manner stated the objects for which they had that evening assembled, and strongly exhorted those who regarded the memory of their late friend and companion to do that which he would have done, if still amongst them, to make their corps second to no other in the metropolis. After paying a deserved tribute to Captain Jones's memory, Major Verner concluded by calling on the Hon. Secretary to the meeting (Mr. Denis O'Connor) to read the reports of the preliminary meetings, and the letters he had received from the Marquis of Donegal, the Earl of Arran, Doctor West, Honorary Surgeon to the corps, &c. Mr. Morgan John O'Connell, in a very effective address, proposed the following resolution, which was seconded by the Rev. R. H. Atherton, one of the chaplains to the corps, "That, in the opinion of this meeting, it is desirable that the London Irish Rifle Volunteers should record in some substantial manner their sense of the loss they have sustained in the recent melancholy death of their lamented comrade Captain Jones, of the 1st company, and that a subscription be forthwith opened to enable the members of the corps to erect a suitable memorial of a gentleman whose services have been already alluded to in such emphatic and well-merited terms in the regimental orders issued by Lieut.-Colonel the Marquis of Donegal." Mr. R. M. Montgomery, a member of the council of the corps, passed a high eulogy on Captain Jones, and concluded by proposing that a committee consisting of some of the leading members of the corps be appointed to carry the foregoing resolution into effect. The resolution was seconded by Mr. F. Bigg, F.I.A., &c. On the motion of Captain Ward, seconded by Dr. Allen, the Marquis of Donegal, Dr. O'Connor, Lieut. Tully, and Mr. Dines, were appointed trustees of the fund, to which the bankers of the corps, Messrs. Puget, Bainbridge, & Co., were appointed bankers, to whom all subscriptions are to be paid. The secretary announced that the subscriptions amounted to 120*l*. On the motion of Dr. O'Connor, seconded by Lieutenant Irwin, a vote of thanks was accorded with acclamation to Major Verner for his very courteous conduct in the chair, which the gallant gentleman acknowledged in a neat address. Since the meeting the subscription list has been considerably increased.

32ND (GUARDS) MIDDLESEX RIFLES.—This corps, known to the public as the "Six-Foot Corps," have resumed their drill at Hungerford Hall under a special advantage, the officers having attached themselves during the vacation to line regiments at Aldershot and Southsea to qualify for their duties. One of them, Lieutenant Thompson, will attend the School of Musketry at Hythe during the next term, commencing December 5. Several military men and "six-footers" from other corps have applied to join for the ensuing year, and it is expected that the Volunteer Guards will by next season have doubled their present effective strength.

1ST (SOUTH KENSINGTON) MIDDLESEX ENGINEERS.—This young and promising corps, numbering now over 500 members, marched out the first time since the vacation, on Saturday last, under the command of the major (M'Leod of M'Leod), accompanied by its band, composed entirely of Volunteers. The regiment, which is daily increasing in strength, is making rapid progress in its drill, &c. The uniform (scarlet with blue facings), though the least expensive of any corps yet established, is remarkable for its simple yet soldierlike character, being almost identical with that of the Garibaldi Volunteers.

KENT.

1ST CINQUE PORTS RIFLES.—The ceremony of consecrating and presenting colours to this corps (Hastings and St. Leonard's) took place in the Music Hall, Hastings, on Tues-

Digitized by Google

day. The hall was crowded, and large numbers of the clergy and gentry of the neighbourhood were present. The Countess of Waldegrave, in the name of the ladies of the borough, presented the colours, which consisted of a large white silk banner and two battalion aids. All three flags had the Cinque Ports arms in the centre, in gold and silver; the larger one having also the St. George's cross in red, according to the Royal order recently discovered in the Cinque Ports archives by Mr. Thomas Ross. The address was read by the Hon. and Rev. Samuel Waldegrave, Bishop of Carlisle (elect), on account of her ladyship suffering from a severe cold. The Rev. John Parkin, M.A., of Halton church, and private chaplain to the late Earl Waldegrave, performed the religious ceremony. The colours were received by Ensign Roch, and acknowledged by Lieutenant Crake.

LANCASHIRE.

LIVERPOOL (THE CUNARD) ARTILLERY.—For some time past the members of this corps, having completed their preliminary gun drill, have, whenever the weather and the state of the tide were favourable, been embracing the opportunity to improve themselves in ball practice. This has been afforded them at the Liverpool North Fort, which, being in close proximity, to the Cunard Company's works, the men have been enabled to turn out at short notice. This they have done in their ordinary working attire, and yesterday the 1st, 2nd, and 3rd companies turned out. The target was a barrel moored at 1800 yards distance, and from its position not more than six of the fort guns could be brought to bear. At an elevation of 4 deg. all the shots, spherical 32lb. balls, passed over the target, but most of them were in a good line, slightly to leeward of the target, a strong southerly breeze blowing at the time. On the previous practising day one of the shot cut the flagstaff right through, while another penetrated completely through both sides of the barrel. At the preceding day's practice the flag was also shot away. The general drill, efficiency, and the stalwart bearing of this corps meet with deserved commendation.

NORTHUMBERLAND.

3RD NORTHUMBERLAND RIFLES.—This corps underwent a satisfactory inspection at Morpeth on Monday afternoon. The review took place in the Brewery Field, near Howard Terrace. It began at 3 o'clock. The corps made a highly creditable appearance, and were complimented by Major Harman for their proficiency. There was a numerous crowd of spectators, including several clergymen of the town and some of the neighbouring gentry. The Bellington corps kept the ground.

WILTSHIRE.

1ST (SALISBURY) WILTSHIRE RIFLES.—The Committee of the 1st Wilts (Salisbury) Volunteer Rifle Corps have just passed a resolution with the view of increasing the numerical strength of their force, and at the same time accommodating a somewhat large class of persons, who from finding it inconvenient to provide the means of meeting the necessary expenditure for uniform and accoutrements all at once on first entering, have hitherto been unable to take part in the Volunteer movement.

YORKSHIRE.

The movement at this place has received considerable impetus from the recent rifle contest at York. The suggestion that the inmates of colleges, public schools, and other large educational establishments, should co-operate with and assist the Volunteer movement, is about to be carried out in York. The youths at St. Peter's college in this city have expressed a wish that a company should be formed out of the inmates of the school, and be then annexed to the York corps. The suggestion has been cordially responded to, and active steps are now being taken to bring about so desirable a result.

ST. GEORGE'S RIFLES.—In consequence of Lieut.-Colonel Lindsay not having received permission from the Ranger of Hyde Park to erect a small daïs, or anything else, upon which to display the various prizes to be presented by Sir Hamilton Seymour to the St. George's on Monday the 29th in Hyde Park, the ceremony will not take place there, and there will be no parade in the Park. The presentation will take place at the head-quarters of the corps in the grounds of Burlington House, Piccadilly. The tickets already issued are available.

FIELD DAY OF SUSSEX VOLUNTEERS.—On Friday week a grand parade and field-day of the 1st Battalion of Sussex Volunteers took place at Broadwater, near Worthing. The battalion comprised the 8th Sussex (Storrington), under the command of Sir Charles Goring, Bart.; the 9th Sussex (Arudel and Littlehampton), under the command of Lieutenant Evans, accompanied by Ensign Warren and Assistant Surgeon Dr. Evershed; the 10th Sussex (Chichester), under the command of Captain Raikes, accompanied by Ensign James Powell, Mr. Sturges Jones, assistant-surgeon, and Battalion Sergeant-Major Pratt; the 11th Sussex (Worthing) under the command of Captain Gaisford, accompanied by Lieutenant Crofts, Ensign Martin, and Assistant-Surgeon Dr. Sharpe; a small detachment of the 12th Sussex (Westbourne), under the command of Lieutenant Osmond; the 15th Sussex (Bognor), under the command of Lieutenant Fitzgerald, accompanied by Ensign O'Bryen Lomax. The battalion assembled at half-past one o'clock, p.m. As soon as the companies were equalised the Major-Commandant, Lieutenant Colonel Oliver Nicolls, took command, wheeled the battalion into line, and with Captain Matthews, Adjutant of the battalion, rode down the ranks to inspect the different companies. The battalion drill was much curtailed on account of the very unfavourable state of the weather, and at one time it was almost doubtful whether the light infantry movements which had been arranged should be carried out. But not to be daunted by a little rain, the black part of the battalion consisting of the Storrington, Chichester, and Westbourne Corps, marched off, and took up their position in a field to the north of Broadwater Common. Advantage was taken of a hedge to conceal the skirmishers, who were now thrown out; and another hedge near to the top of the hill covered the support from view. The white soldiers, consisting of the Arundel and Littlehampton, Worthing, and Bognor Corps (in light uniforms), formed the attacking party, and were not long in discovering where their enemy lay, and as rapidly threw out their skirmishers, who, advancing with much steadiness, soon dislodged their opponents from their place of concealment, whence they had commenced a sharp fire. The retiring blacks were closely followed up and pursued across the next field to behind the hedge, where the supports had been concealed and thrown out in skirmishing order to relieve their comrades, who had commenced the fight, the latter now forming the supports. The whites neared this edge, from which they again dislodged their enemy. The field-day being at an end, each party marched down by different routes to Broadwater-Green, where they formed column, and officers were called to the front and addressed by the commandant, who desired them to convey to their respective companies his approval of the steadiness of their movements, particularly as they were labouring under the disadvantages of so unfortunate a day for drilling. Order was then given to pile arms, when officers and men sat down together to a capital cold dinner awaiting them in a large tent pitched on Broadwater Green. The dinner was well served by Mr. Brown, landlord of the Malsters' Arms, Broadwater. Lieut.-Colonel Nicolls presided, and was supported by Captain Sir Charles Goring, Bart., Lieutenant Evans, Lieutenant Crofts, Captain and Adjutant Matthews, Lieutenant Fitzgerald, Lieutenant Osmond, Ensign O'Bryen Lomax, Ensign Martin, and Assistant-Surgeons Dr. Sharpe, Dr. Evershed, and Mr. Sturges Jones. At the conclusion of the repast, the Commandant proposed "The Health of Her Majesty the Queen," the gallant riflemen cheering lustily. "The Health of the Major-Commandant of the Battalion" (Lieut.-Colonel Nicolls) was then given by Sir Charles Goring, Bart., and was warmly responded to. Several other toasts were proposed, and cordially received. The bands of the 9th, 10th, and the bugle band of the 11th (Mr. Blackman and Mr. Bishop, masters of the two former), played as the several companies marched past, and gave "God Save the Queen" on the general salute being given. Private Frederick Sharpe, of the 9th Sussex, the winner at Wimbledon, of the silver medal and Whitworth Rifle (his portrait, it may be remembered, was presented to him by Her Majesty the Queen), was in the ranks. Corporal William Sadler, who won the 50*l.* prize at Wimbledon, in firing at a distance of 600 yards, was also in the ranks of his corps, the 10th Sussex.

VOLUNTEER CADET CORPS.—A very general feeling has been expressed that Volunteer Cadet Corps should be formed in connection with the different Volunteer battalions. This has not escaped the attention of the officers of the South Middlesex, and the Hon. Edward Curzon and the Hon. C. Vereker have been present at the drilling of the boys of the Queen Elizabeth's Grammar School, at Horselydown. The inspection took place in the presence of the hon. the warden, Mr. Landell, one of the governors, who has been mainly instrumental in forming the cadet corps and band, and the Rev. Mr. Johnson, the head master. After hearing the cadet band play in their practice-room the lads were mustered in companies of 50 in the Cloisters. The senior companies were put through their manual, and platoon, and such evolutions as the space in the school grounds afforded. One company was then told off for sword exercise, into the spirit of which the youths seemed most fully to enter. The whole corps afterwards formed fours, and marched, with their band at their head, to the drill-ground, where, after parading past and going through some battalion drill, they returned to the school yard, and were dismissed. The Hon. E. Curzon and the Hon. C. Vereker both expressed themselves highly pleased with the steadiness and efficiency of the boys, and of the style of playing of the band. In consequence of the report of the two officers at their head-quarters at Beaufort House, Walham Green, the colonel, Lord Ranelagh, has authorised the engagement of the cadet band, lately formed at Kensington, for the South Middlesex Volunteers, and it is expected that their cadet corps will soon form a strong battalion.

On Wednesday a grand review and sham-fight by the Hants and Isle of Wight Volunteer corps took place on Compton Down, near Winchester. The troops composed a division as follow:—Hants Mounted Rifle Volunteers (Lieut.-Colonel Bower); Winchester College Rifle Corps (Captain Pound); Artillery Battalion, comprising Bitterne Artillery (Major Maguire); 1st Battalion 60th Rifles, Southsea Artillery (Captain Nicol, Hants Militia, Adjutant); 12th Hants, Bishops Waltham (Lieutenant Chawler); 4th Hants, Havant (Captain Davison); 2nd Hants, Southampton (Lieut.-Colonel Grimstone); 14th Hants, Lyndhurst (Captain Bassett); 17th Hants, Lymington (Captain Lefevre); 1st Hants (Colonel Faunce); 13th Hants, Andover (Captain Humphrey); 11th Hants, Romsey (Colonel Henderson); 15th Hants, Yeatley (Captain Mason); 21st Hants, Alton (Captain Rivers); 18th Hants, Basingstoke (Captain Hervey); 16th Hants, Alresford (Captain Marx); 7th Hants, Fareham (Captain Cowran); 5th Hants, Portsmouth (Major Valancey); 6th Hants, Gosport (Captain Purvis); Isle of Wight Battalion,—Cowes (Captain Graham), Newport (Captain Estcourt), Ryde (Lieutenant Randall), Ventnor (Lieutenant Fisher), Nunwell (Captain Sir Henry Oglander), Sandown (Captain Farnell), and a few from Freshwater. Lieut.-Colonel M'Donald, Rifle Depôt Battalion, was in command of the 1st brigade; Captain M'Donald doing duty as brigade-major; the 2nd brigade being under the command of Major Wombwell, also of the Rifle Depôt Battalion, Captain Stotherd, 60th Rifles, being brigade-major. The division was under the command of Lieutenant-Colonel Luard, assistant-inspector Rifle Volunteers, the inspecting officer being Lord William Paulet. The Marchioness of Winchester was on the ground in a carriage-and-four with outriders, and numerous members of the aristocracy and gentry were also present. The various corps having formed line an inspection took place, after which the entire body marched past in open column; they then formed in close column, and the sham fight began. The enemy, consisting of recruits; from the Rifle Brigade and 60th Rifles, under Captain Hill, were posted on a rising ground known as the Round Tower, and began by throwing out skirmishers, the staff reconnoitring. The attacking party then spread out in *échelon*, a skirmishing party preceding the artillery, then advanced, and, with the 14th and others, formed squares and prepared to receive cavalry. The Hants Mounted Rifles then charged the enemy, but the remembrance of the Balaclava disaster should have taught them not to charge past squares in *échelon*, the enemy having retreated and formed squares. Various manœuvres were then gone through with great success, and to the evident delight of the populace, who got in the way and out of it with marvellous celerity, the exertions of the troop of Lord Eversley's troop of Yeomanry Cavalry, under the command of Captain Wyndham Portal, being inadequate to the task allotted to them of keeping the ground clear. The fight being over, the various corps formed three sides of a square, the public making the fourth, and Lord William Paulet, in an energetic speech, assured them that it was a source of great gratification to him, more particularly as a resident in the county, to see so fine a body of Rifle Volunteers as then stood before him, and bearing so soldierly an aspect. He had seen numerous bodies of Volunteer corps, but was proud to be able to say truthfully that the Hants Volunteers were second to none in the kingdom. It would be his duty and pleasure to report to the Secretary of State of the Hants Volunteers; but he was bound to remind them that constant drill was requisite, and as they had got over the drudgery of their profession continuous drill would be comparatively easy. With some further opportune remarks the noble lord thanked them for their attendance, and dismissed them to their respective parades. The troops gave three hearty cheers for the Queen, and paid a similar compliment to Lord William Paulet and Colonel Luard. Refreshments were provided at several of the hotels in Winchester at the cost of the Marquis of Winchester, and in the evening a grand ball took place, which was numerously attended. The total number of Volunteers on the ground was 2600, and the spectators were at least 10,000, many of whom were of different regiments.

In Essex the services of the Waltham Abbey, Loughton, and Buckhurst Hill Company have been officially accepted, and the corps has been numbered the 22nd in the county. The corps has attained a total of 80 effectives, and 300*l.* has been subscribed to meet the necessary expenses. Sir Charles Wake has granted an admirable site for a rifle range at Forest Side, Waltham Abbey. The Witham Company have had their last field-day for the season at Terling Place, the seat of Lord Rayleigh.

The Earl of Yarborough, Lord-Lieutenant of Lincolnshire, intends to give one or more prizes to each of the three battalions of Volunteers in that county, to be shot for in the spring of next year. The Countess of Yarborough will also offer a cup to each battalion, to be shot for at the same time as the Lord-Lieutenant's prizes.

A good deal of activity continues to be displayed in Suffolk in connexion with the movement. The 1st Suffolk battalion, consisting of the Sudbury, Hadleigh, Bury St. Edmunds, and Eye corps, are to be reviewed this week on Mellis Green. The Mayor of Eye (Mr. C. F. Costerton) has offered a silver cup to be shot for by the members of the Eye company.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, OCTOBER 23.

Honourable Artillery Company of London—The Rev. Thomas Hugo to be Chaplain, vice the Rev. John H. Knox, deceased.

1st Battalion of Staffordshire Rifle Volunteers—James Maxey Buchanan, Esq., to be Adjutant, from the 10th of July.

3rd Durham Rifle Volunteers—George Alexander Warburton, Esq., late Captain 19th Foot, to be Adjutant, from the 2nd of August.

City of Norwich Rifle Volunteer Corps—G. N. Micklethwait, Esq., to be Adjutant, from the 23rd of July.

1st Battalion Cornwall Rifle Volunteers—Robert Hallowell Carew, late Captain 36th Regiment, to be Adjutant.

2nd Battalion Cornwall Rifle Volunteers—John Osborne Barnett, late of the 42nd Regiment, to be Adjutant.

Prince Albert's Own Leicestershire Yeomanry Cavalry—The Right Hon. Richard William Penn, Earl Howe, to be Lieut.-Colonel Commandant, vice Keck, deceased.

20th Norfolk Rifle Volunteer Corps—Sir Robert Jacob Buxton, Bart., to be Captain; Thomas Beevor, Esq., to be Lieutenant; Alfred John Edward Bowyer Smijth Clerk, to be Ensign.

21st Norfolk Rifle Volunteer Corps—Edmund Hooke Wilson Bellairs, Esq., to be Captain; George Forrester, Gent., to be Lieutenant; Edmund Larke, Gent., to be Ensign; Robert James Tunale, Gent., to be Honorary Assistant-Surgeon.

3rd Durham Rifle Volunteers—John Masters, Gent., to be Ensign.

15th Durham Rifle Volunteers—Charles Hutton Potts, Gent., to be Lieutenant; Richard Benson, Gent., to be Ensign.

1st Battalion of Staffordshire Rifle Volunteers—28th Company—Edward Smith Walters, Gent., to be Honorary Assistant-Surgeon.

1st Battalion of Hertfordshire Rifle Volunteers—William Purey Cust, late Captain of the 4th Hertfordshire Rifle Volunteers, to be Major-Commandant.

1st Middlesex Engineer Volunteer Corps—Captain M'Leod of M'Leod to be Major; First Lieutenant Richard Burchett to be Captain, vice M'Leod of M'Leod, promoted; Second Lieutenant Edward Stanley Poole, to be Captain; Richard Anthony Thompson, Esq., to be Captain; Allen Ransome, Esq., to be Captain; James Kenyon Feile, Gent., to be First Lieutenant, vice Burchett, promoted; George Francis Duncombe, Gent., to be Second Lieutenant, vice Poole, promoted; Thomas Clack, Gent., to be First Lieutenant; Henry Sandham, Gent., to be First Lieutenant; Samuel William Worssam, Gent., to be First Lieutenant.

19th Middlesex Rifle Volunteer Corps—Philip Read, Gent., to be Adjutant, from the 6th of September, 1860; Lieutenant Frederick James Furnival, to be Captain; William Shaen, Gent., to be Lieutenant; William Hastings Hughes, Gent., to be Ensign; Charles Synge Christopher Bowen, Gent., to be Ensign.

41st Middlesex Rifle Volunteer Corps—Samuel Green, Gent., to be Ensign.

45th Lancashire Rifle Volunteer Corps—Frederick Witter, Gent., to be Ensign.

8th Lancashire Artillery Volunteer Corps—Captain-Commandant William Clay to be Major; First Lieutenant Charles Inman to be Captain; First Lieutenant Edward Cox to be Captain; First Lieutenant Joseph Bond Morgan to be Captain; Second Lieutenant William Rathbone Duncan to be First Lieutenant; Second Lieutenant William Bartlett to be First Lieutenant.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the commission held by Lieutenant Viscount Grey de Wilton in the Duke of Lancaster's Own Regiment of Yeomanry Cavalry, and of that held by Assistant-Surgeon Joseph Bray Gilbertson in the 11th Lancashire Rifle Volunteer Corps.

1st Herefordshire, or Hereford Company of Rifle Volunteers—John Alexander Forbes Suter, Esq., to be Lieutenant, vice Richard Arkwright, Esq., promoted; Henry Childe Beddoe, Esq., to be Ensign, vice John Alexander Forbes Suter, Esq., promoted.

8th Herefordshire, or 2nd Hereford Company of Rifle Volunteers—Richard Clarkson, Esq., to be Lieutenant; James Phillipps, Esq., to be Ensign; Henry Vevers, Esq., to be Honorary Assistant-Surgeon.

2nd Cumberland Artillery Volunteers—The Rev. Rolla Charles Meadows Rouse to be Honorary Chaplain.

5th Cumberland Rifle Volunteers—Michael Waistell Taylor, Gent., to be Honorary Assistant-Surgeon.

Memorandum—Her Majesty has been pleased to accept the resignation of the Commission held by Honorary Assistant-Surgeon James Galloway in the 5th Cumberland Rifle Volunteer Corps.

Kent Rifle Volunteers, 26th Corps—Lieutenant Farrell to be Captain, vice Storrie, deceased; Lieutenant Butter to be Captain, vice Toms, resigned; Ensign Bell, to be Lieutenant, vice Butter, promoted.

1st Battalion, 27th Corps—John Inman Fincham, Gent., to be Captain; Ensign Charles Stubbing, to be Lieutenant; George Brown, Gent., to be Ensign, vice Stubbing, promoted; Francis Sturgess, Gent., to be Ensign.

1st Company of the Caithness Artillery Volunteers—Eric Sutherland Sinclair, Esq., M.D., to be Honorary Assistant Surgeon, vice Ellison, resigned.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the Commission held by James Ellison, M.D., as Honorary Assistant-Surgeon in the 1st Caithness Artillery Volunteer Corps.

22nd Hampshire Rifle Volunteer Corps—Walter Clark, Gent., to be Ensign.

Wiltshire Volunteer Rifle Corps—17th Company—Oliver Calley Maurice, Gent., to be Honorary Assistant-Surgeon.

2nd Oxford Rifle Volunteer Corps—Lieutenant Thomas Mallam to be Captain, vice Bowyer, resigned; Ensign Alfred Green Holmes to be Lieutenant, vice Mallam, promoted; Colour-Sergeant Joseph Jones Bickerton to be Ensign, vice Holmes, promoted.

5th Oxfordshire Rifle Volunteer Corps—Augustine Batt to be Honorary Assistant-Surgeon.

[The following appointment is substituted for that which appeared in the "Gazette" of the 19th October inst.:—]

1st Corps of Northumberland Artillery Volunteers—Andrew Leslie, Esq., to be Captain.

Memorandum—Renfrewshire Rifle Volunteers—1st Battalion—22nd Corps—The name of Ensign Robertson, who was gazetted on the 5th instant, is Robert William Robertson, and not William Robertson.

WAR OFFICE, PALL MALL, October 26.

[The following Appointment is substituted for that which appeared in the *Gazette* of the 19th October instant.]

1st Oxfordshire Rifle Volunteer Corps—William Frederick Foxcroft Jones, Esq. (lately Captain in Wiltshire Militia, and formerly Lieutenant 52nd Foot), to be Adjutant, from 21st August, 1860.

Memorandum—Oxford University Rifle Volunteer Corps—Her Majesty has been graciously pleased to accept the resignations of the Commissions held by Lieutenant Charles Thomas Luck and Ensign William Frederick Traill, respectively.

[The following appointment is substituted for that which appeared in the *Gazette* of the 23rd October instant.]

19th Middlesex Rifle Volunteer Corps—Philip Read, Gent., to be Adjutant, from the 6th September, 1860.

19th Middlesex Rifle Volunteer Corps—Ensign John George Cooke to be Lieutenant, vice Furnivall, promoted; Ensign George Tansley to be Lieutenant.

Memoranda—West Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the Commission held in this Corps by Lieutenant William Alldis Kinnebrook.

Queen's Westminster Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the Commission held in this Corps by Lieutenant Francis Beilby Alston.

Suffolk Artillery—Frederick George Wilkinson, Esq., to be Captain, vice Harvey resigned. Her Majesty has accepted the resignation of John Bolger, Gent., in the above regiment.

2nd Suffolk Artillery Volunteer Corps—John Elliott Snow, Gent., to be First Lieutenant; Edward Henry Rust D'Eye, Gent., to be Second Lieutenant

17th Company of Cheshire Rifle Volunteers—William Rayner, Esq., M.D., to be Honorary Assistant-Surgeon.

7th Company of Leicestershire Rifle Volunteers—Theophilus John Levett, Gent., to be Lieutenant.

7th Hampshire Rifle Volunteer Corps—Edmund King, Gent., to be Ensign, vice Butler, resigned.

12th Surrey Rifle Volunteers—Lieutenant Edward William Browne to be Captain; Ensign Charles Morris to be Lieutenant.

5th Company of Surrey Rifle Volunteers—The Reverend Henry Simpson Blunt to be Honorary Chaplain.

3rd Manchester or 40th Lancashire Rifle Volunteer Corps—Charles Henry Minchin, Gent., to be Lieutenant; John Begg Shaw, Gent., to be Ensign.

43rd Lancashire Rifle Volunteer Corps—Frederick Melland, Gent., to be Honorary Assistant-Surgeon.

1st Lancashire Engineer Volunteer Corps—William Hargreaves, Manifold, Gent, to be Assistant Surgeon.

11th Lancashire Rifle Volunteer Corps—Edward Livesey Dixon, Esq., to be Surgeon.

Memoranda—Lancashire Artillery Volunteers—The 9th and 12th Corps have been united for administrative purposes, and now form the 2nd Brigade; the 5th and 22nd Corps have also been united for similar purposes, and form the 3rd Brigade.

Lancashire Rifle Volunteers—The 12th Company of the 1st Manchester or 6th Lancashire having been transferred to the 46th Corps, the 46th has been united with the 67th and 76th for administrative purposes, and those three Corps now form the 4th administrative Battalion.

Erratum—In the *Gazette* of the 12th instant, for "Edward Harpur," read "Edward Harpin," appointed to an Ensigncy in the 1st Lancashire Rifle Volunteer Corps.

7th Monmouthshire Rifle Volunteer Corps—Lieutenant John Henry Willmett to be Captain; Ensign Henry Burton to be Lieutenant; Ensign Wyndham Jones to be Lieutenant; Philip Woodruff, Esq., to be Captain; Philip Thomas Woodruff, Gent., to be Lieutenant; John Layburne, Gent., to be Ensign; James Edwards Gething, Gent., to be Ensign; John Brewer, Gent., to be Ensign.

Second Division of the Fourth Company of Northamptonshire Volunteer Rifle Corps—Lieutenant William Griffiths Hollis to be Captain.

5th North Riding of Yorkshire Rifle Volunteer Corps—William Swire, Esq., to be Ensign.

21st Rifle Volunteers—William James Burgess, Esq., to be Lieutenant; Charles Thomas Burgess, Esq., to be Ensign.

1st Rifle Volunteers—Champion Russell, Esq., to be Captain, vice Hamilton, resigned.

3rd Durham Rifle Volunteers—Memorandum—The name of the gentleman appointed Lieutenant in this Corps is Martin Wiener, and not Martin Warner, as previously gazetted. And the name of the gentleman appointed Ensign in this Corps is John Marsters, and not John Masters, as previously gazetted.

Memorandum—London Rifle Volunteer Brigade—Major William Anderson Rose is transferred from the 2nd to the 1st Battalion.

SIR DUNCAN MACDOUGALL AND THE ORIGIN OF THE VOLUNTEERS.

[We insert the following letter in reference to the remarks in the Army and Navy Gazette of last week on the Volunteer controversy. We wish "the autocrat," in all sincerity, the enjoyment of better health, and its ordinary concomitant, and many years extension of his long and useful life, notwithstanding the ferocity of his adjectives and substantives; and we are almost so far disposed to disregard the first law of nature as to desire he may become as he was in his younger days.]

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—The state of my health has prevented me from sooner addressing you.

I observe in the Army and Navy Gazette of the 13th inst.—to which paper I have hitherto been a subscriber—that some most uncourteous and unbecoming remarks have been made on my subscribing towards a testimonial to be presented to Lieut.-Colonel Bousfield, as one of the most deserving, enthusiastic, and successful promoters of the Volunteer movement; but I venture to feel assured that they obtained insertion inadvertently on your part.

No man possessing proper feelings could bring himself to publish in a newspaper insolent and flippant remarks on the proceedings of another, without making himself thoroughly master of all the circumstances of the case.

Those who knew "the autocrat of 112, Eaton Square," in his younger days, can inform the author of the remarks in question how that despot would have acted had such a paragraph appeared in a newspaper at that period.

The evident malignant animus of the writer has led him not only to give publicity to his impertinent remarks in a newspaper, but likewise to circulate the paper containing them, as appears by a letter I have received from Liverpool, from which the following is an extract:—

"I have had forwarded to me (marked) a copy of the Army and Navy Gazette of the 13th inst., in which there is a vulgar attack on you. The writer appears to be very ignorant, or he ought to have known that if your appeal on Colonel Bousfield's requisition had no influence in the matter, why should the War Department address a letter to you, informing you that 'a circular had been issued to Lord-Lieutenants,' &c.? I take it to be a simple question—did the War Department send a similar letter to any other gentleman? If not, Lord Derby's Government clearly acknowledged you to be the instrument that moved them to adopt the course pursued."

Any one who reads the proceedings of the meeting that was held in St. Martin's Hall on the 16th of April, 1859 (which appeared at length in the *Morning Advertiser* of the 18th, as well as in other papers), will, I think, readily allow that I have as legitimate a right as any other man to express an opinion regarding the promoters of the Volunteer movement.

That public meeting, the very first held on a subject so vitally important to the welfare and honour of Great Britain, instantly led the press to call the attention of the country to the defective state of our defences; and, without the slightest doubt caused, as the War Minister said twenty-four days afterwards, in his Circular of May 12, 1859, "Her Majesty's Government to consider the propriety of permitting the formation of Volunteer Rifle and Artillery Corps."

To Mr. Alfred Richards is due the entire merit of originating and convening that important meeting which gave the first great public impulse to the Volunteer movement, a measure that was at first sneered at and ridiculed by many persons who now profess themselves to be its warm supporters.

Lieut.-Colonel Bousfield's renewed offer of service having immediately followed that meeting, was, I think I am justified in saying, the immediate cause of the appearance of the Circular which at that period was under the consideration of the Government.

The "ukase" now "issued by the autocrat of 112, Eaton Square," is (as far as his present information enables him to judge), that the individuals who are the most entitled to national gratitude as promoters of the Volunteer movement, are Mr. Alfred Richards, Lieut.-Colonel Bousfield, and the Editor of the *Morning Advertiser*, as no other newspaper has so long, so zealously, and so powerfully advocated placing Great Britain in such an attitude of defence as would render her invulnerable against all the nations of the world combined in arms against her.

But the formation of Rifle and Artillery Volunteers only goes half the length of what I considered it to be my duty, as an old soldier, to urge on ministers for eight years, in consequence of my experience at home and abroad having made me perfectly acquainted with the great facility of giving intelligent men, in the course of a few days, an organisation and discipline sufficient to ensure their becoming efficient defenders of their country.

Should my long life be spared for a short period, I feel assured I shall have the gratification of seeing the remainder of my suggested defensive system, as far as regards the *personnel*, carried into full effect, *viz:*

That every man, without exception, from the prince to the peasant, should be by law compelled to take his full and fair share in the defence of his country, by contributing towards it either (according as he may think proper to select) by his personal service or by his purse, in the following manner:

1st. That the regular militia should be raised by ballot, and all men between the ages of 16 and 50 to be liable to it, with the exception of those serving in a Volunteer corps—a measure that would instantly lead to a large increase of the latter force—the Volunteers.

2nd. That all men not belonging to a Volunteer corps should be enrolled in a sedentary militia (as is the case in the North American Republic, as well as in our transatlantic provinces), and subject to a pecuniary penalty for non-attendance when legally called out, graduated according to the value of property protected by them from invasion, the amount arising from such penalties to be placed in a fund, which, I think, would prove sufficient to provide for the men cheap and serviceable blouses to be worn over their usual clothes, forage cap, and accoutrements; nothing further being required for a sedentary militia, with the exception of arms, which might be stored in securely protected depôts, together with the accoutrements, blouses, and forage caps, for the purpose of being issued for exercise, or in the event of actual or threatened invasion.

3rd. That, as was the case in Nova Scotia when I was inspecting field-officer in that province, the sedentary militia should consist of two classes, the first to be composed of men between the ages of 18 and 45, and the second of men between the ages of 16 and 18, and 45 and 60.

The first class was called out without pay 4 days annually, 2 days being allotted to company and 2 to battalion drill. The author of the impertinent remarks alluded to, and other persons who know nothing about the matter, may probably ridicule the idea of men acquiring in four days a sufficient degree of organisation and subordination (the latter a most important element) to render them valuable auxiliaries to our glorious regular Army, the regular Militia, and Volunteers; but for the information of such persons I shall now state that, in that limited period, the Militia of Nova Scotia, when under my command, moved in brigade with troops of the Line—the 52nd Regiment and Rifle Brigade—their formations being made as rapidly and as cohesively.

Lieut.-General Sir Frederick Love, who is at present Inspector-General of Infantry, was at the same time Inspecting Field-officer of Militia in the neighbouring province of New Brunswick, and he can testify to the Militia which was then under his command having become equally expert in the course of a training of four days.

It should be borne in mind that it is not only against a large invading force that we should be securely protected, but likewise against the predatory attacks of an enemy at all parts of our extensive coasts.

Under a general national defensive organisation such as is above alluded to, when every man's services would be rendered available for the protection of his locality, no enemy could assail any part of our coasts without his landing being instantly opposed and probably prevented; and if by any chance he effected a disembarkation, his destruction would be the result, instead of our being, as the Duke of Wellington said, "constantly liable to insult and to have contributions levied on us along the whole extent of our seaboard."—I am, &c.,

D. MacDougall.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—In the article headed "Volunteers" in your journal of the 13th inst., the writer says, with reference to the claims of Lieut.-Colonel Bousfield to be considered the originator of the Volunteer movement, and Sir Duncan MacDougall's commendation of that gentleman's efforts—"Will Mr. Richards accept the challenge?" In answer to this, I can only say that I am very happy to congratulate Lieut.-Colonel Bousfield on the part which he took in the movement, and on the gratifying acknowledgment made by those who are aware of it.

Far be it from me to detract from Lieut.-Colonel Bousfield's merits in writing to the Government to bring the agitation which existed throughout the country to a practical issue. Nor do I think it likely that Lieut.-Colonel Bousfield will seek to ignore my share in the initiation of the movement, or say as another gentleman, its sole patentee by advertisement, volunteered to state lately, that he had never till within a week heard my name in connection with the matter.

Sir Duncan MacDougall has said that he forwarded Lieut.-Colonel Bousfield's offer of service to the Government on the 28th of April, 1859. On the 16th of April the meeting convened by me at St. Martin's Hall took place, at which Sir Duncan MacDougall was himself present. Between the 16th and the 28th, that meeting had aroused all England; it had been reported throughout Europe, and I do not fear to incur the charge of exaggeration when I say that a hundred leading articles had been published on it by the newspapers of this country.

With regard to the sentiments and opinions which led me to convene that meeting, in spite of the sneers and ridicule with which I was assailed, I have an opportunity of submitting them to you, sir, and the public generally through the generous appreciation of a witness of my exertions. I send you herewith a copy of his pamphlet. Believe me, I do not wish to enter into a controversy. I am more than satisfied with Mr. Leverson's advocacy. I never sought to attack even Mr. Busk's pretensions, until he provoked it by a most friendly assassination of my humble efforts in the Volunteer cause, which he stated in one of your contemporaries to be a "quaint delusion." With regard to Sir Duncan MacDougall, I cannot help regretting the flippancy with which the writer in your able paper assails him. He avers of Sir Duncan that he "seems to correspond with every one about everything." I certainly am not aware that Sir Duncan has written on general topics; I thought he confined himself to military matters and the defences of the country. At all events, he came from a sick room to the meeting of the 16th April, 1859, and brought with him Sir Allan MacNab and General Pringle Taylor. I honour him for his patriotism, courage, and devotion.

For the rest, "*suum cuique*" be the motto. I certainly did rush into print to state that Lord Elcho was not, as I had the amusing privilege to hear him styled by Mr. Bernal Osborne, the "founder of the Volunteer movement." Had Sir Duncan MacDougall, Lieut.-Colonel Bousfield, Captain Busk, V.R., or myself, been the sole writer, speaker, urger, and promoter of the Volunteer movement, that movement never would have had birth, at least in this generation. Perhaps the Emperor of the French, as I long since suggested, has a better claim to dub himself the "founder" than anyone else.

As to the immediate cause or occasion of the movement, I do not hesitate to affirm that the meeting of April 16th alarmed the country, set the newspaper press at work, produced leading articles in the *Times* and other newspapers, and evoked the general question of "What is our position should we be invaded?" That meeting started Captain Busk lecturing, Lieut.-Colonel Bousfield memorialising, the War Office circularising, Tennyson singing, and "riflemen forming" throughout the land. How much of this would have occurred, or at what date, had the meeting of the 16th not taken place, it is not for me to consider, and it certainly never will be discovered individually. I remain satisfied with facts.—I am, &c.

Alfred B. Richards.

ENGLISH VOLUNTEERS IN FRANCE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—If the inclosed story of English Volunteers in France be true, the sooner, for the credit of the country, such absurd doings are put a stop to by public opinion the better.—I am, &c.

A Soldier.

The following letter has been addressed to the editor of the *Boulogne Messenger*:—"You have no doubt seen lately in this town a number of English Volunteers parading the streets in full uniform. Will you be good enough to inform us what they are doing here in that garb, with swords, pouch, belts, &c.? The latter in cavalry and rifle regiments never worn except on duty. May I therefore ask if they are on duty here? Are they reconnoitering the different forts, batteries, approaches, &c. To say the least of it, it is excessive bad taste, displeasing and insulting to the French. The youngest ensign of the line would not be guilty of such weakness as to display his uniform, and armed, in a foreign country. There is now a panic in England of an invasion of the French, but that is likely to be reversed. These valiant heroes are actually invading France in squads, in uniform, and armed with swords, belts, and perhaps pistols. They ought really to be ashamed of themselves; their countrymen here are certainly ashamed of them, and they are well ridiculed by the French. I was asked by one who and what they were; and to save the English character, I said I thought they must be German musicians, which they certainly much resemble. It is really no wonder that the English are so much disliked on the Continent."

A Briton.

THE ELECTRIC LIGHT AT PLYMOUTH.

In consequence of the determination of the Government to ascertain the utility, for military and naval purposes, of the electric light as improved by Professor Way, the authorities appointed Captain Ross of the second battalion of the 5th Foot, Deputy-Assistant-Quartermaster-General at Aldershot, and Lieutenant Philip H. Colomb, flag-lieutenant to Sir T. Pasley, Bart., to make experiments with the light.

These two gentlemen have, as a committee, been most industriously and sedulously occupied at Plymouth for the last three weeks (when severe weather has prevailed), in thoroughly testing the capabilities of the invention. Captain Ross has been on duty at the telegraph station in the redoubt, at Mount Wise, Devonport, and Lieut. Colomb on board the paddle-wheel steam-tug Confiance, J. Sleep, master. The lighting apparatus on shore was fitted inside the station window with the sash thrown up, and on board the steamer it was suspended by gimbals from a frame fixed right aft, on the taffrail; the battery being amidships, just abaft the funnel. In both cases the batteries (Bunsen's) consisted of about 40 Ebonite cells, inside which were amalgamated zincs, and the porous wedgewood cells for the charcoal. The sulphuric acid used was one to seven, the nitric acid in the porous cells, full strength. The cost of material, including the mercury, has been estimated at about 2*s.* per hour. The great peculiarity of the invention consists in the manner in which the electric fluid, from the battery, is made to operate on the mercury.

A cylindrical cistern, capable of containing many pounds of mercury, is suspended from above. It has underneath a trap to control the stream which passes through a nipple, having an orifice barely capable of receiving a very fine cambric needle. The stream of mercury drops into a small cup, which is enclosed in an air-tight glass funnel of the ordinary size used with lamps, and it is where the stream is falling into the cup that the light is exhibited. The cup is sustained on a perpendicular wire, which is wormed for the purpose of being raised or lowered. As the mercury overflows the cup it falls into a waste-pipe and is deposited below in a cistern, whence it is from time to time returned to the upper cistern. The size of the stream is regulated by the hole through which it passes, and the velocity of the current by the tap and the pressure in the cistern above; the distance through which it falls is regulated by the perpendicular wormed wire below.

The positive pole of the battery is attached to the lower cistern, the negative pole to the upper, and the electricity thus passes through the falling stream of mercury.

Were the electric fluid to be applied to an iron wire of the same size as the stream indicated, the wire would, as is well known, be fused and consumed immediately. It is not so with the mercury, which is volatilised and constantly distilled and re-distilled, and, with very little loss, condensed again in the lower reservoir, whence it is from time to time conveyed back to the upper cistern.

The light produced is about three-eighths of an inch in diameter, or the size of a silver threepenny piece. It possesses an intense diamond brightness; at a distance much like a star; near by, it casts a livid appearance over the countenance, and cannot be looked at without much inconvenience.

The operators have the means of checking and renewing the electric fluid, at will, and by the adoption of an agreed code can communicate with each other under ordinary circumstances with great facility. The usual course adopted was for the Confiance to come down Hamoaze and bring up near the Royal William Victualling Yard, which is about one-eighth of a mile from the Mount Wise redoubt. After a preliminary communication, if all was right, she would proceed to the merchant anchorage in Plymouth Sound, about two miles off, and occasionally go outside the Breakwater.

Some of the experiments have been witnessed by Major-General Hutchinson, Commander of the forces in the West, his family, and staff; by Lieut. H. M. Miller, flag-lieutenant to Port-Admiral Sir Arthur Fanshawe; Admiral Robert F. Stopford, of the Royal Albert; Commander Brown, Master-Attendant, and Commander Paul, Assistant-Master-Attendant, of the Devonport Dockyard; and on Friday last after his return from leave of absence, by Rear-Admiral of the Red, Sir Thomas Pasley, Bart., Superintendent of the Devonport Dockyard, doing duty at present as Port-Admiral at Plymouth.

Owing to a variety of circumstances the operations have been occasionally interrupted. The acids for the battery are not easily replenished in Plymouth, and the weather has been extremely boisterous, although on the part of the Government this was highly advantageous. The Confiance, which is constructed for towing, has very ponderous engines, which involve heavy rolling propensities. The effects of the rolling and pitching on the lighting apparatus were almost entirely counteracted by the gimbals of the lamp.

The means of telegraphing were, however, maintained on most occasions. Among others at 9 p.m., on the night of the 4th of Oct., the Confiance went into the Channel, south half-west from Mount Wise, more than 16 miles, when the light could be seen distinctly, and, on a later occasion, communications were made with facility at a distance of 12½ miles.

The experiments have been conducted throughout without the aid of a glass. During daylight, 4·30 p.m. on the 19th, it could be distinguished without the aid of a glass two and a half miles distant. The experiments on the 19th, the last made, were continued up to 11 p.m. under the immediate inspection of Admiral Pasley.

The report of the committee will be looked for with much interest—by military and naval officers especially. Professor Way alleges that, from positions sufficiently elevated, communications across the British Channel could be easily maintained with his invention.

Captain Ross and Lieutenant Colomb are to continue their services as a committee, for the purpose of establishing a system of communication, by night and day, with the light, between the land and sea forces.

"The 'Annals' are invaluable to the soldier who desires to know the history of his profession."—*Times.*
"These volumes supply a store of profitable reading to the soldier or sailor."—*Saturday Review.*
"A lucid summary of all the most important operations (naval as well as military) of the eighteenth century."—*Army and Navy Gazette.*
W. Mitchell, Military Bookseller, 39, Charing Cross, London, S.W.

BOX OF MILITARY BLOCKS, illustrative of the Field Exercise and Evolutions of the Army, 10*s.* 6*d.*
A CATALOGUE OF MILITARY BOOKS SENT ON APPLICATION.
W. Mitchell, Bookseller and Publisher, 39, Charing Cross, S.W.

ELSTOB'S RIDING BELTS, Hunting Drawers, Breeches, Knickerbockers, Elastic-seated Riding Trousers, 32*s.*; Bedford Cords, best quality, 42*s.*; Belts and Drawers, 21*s.* each.—12, AVERY ROW, BROOK STREET, NEW BOND STREET, W., (Exactly opposite Ford's Hotel in Brook Street).

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

RIFLE & ARTILLERY DUTY-BUGLES, TRUMPETS, &c.—Volunteer Corps are respectfully informed that the patterns approved by Her Majesty's War Department can now be had of the Makers, Messrs. RUDALL, ROSE, CARTE, & CO. Price, with Lines and Tassels complete, Two Guineas.
SILVER BUGLES, for Presentation, from Twenty Guineas.
ELECTRO-PLATED BUGLES, in Case, Four Guineas.
BUGLE and TRUMPET-MAJOR DUTY-BOOKS, 3*s.* each, giving instructions, and all the regulation sounds.
DRUM MAJOR DUTY-BOOK, 4*s.* FIFE-MAJOR DUTY-BOOK, 3*s.*
PERCIVAL HUNTING-HORNS in Copper and Sterling Silver.
RUDALL & CO.'S PRICE LIST, with Guide for the Formation of Bands, and Corps of Flutes and Drums, and Estimates of Cost, sent free per post.
Military Musical Instrument Manufactory, 20, Charing Cross, London, S.W.

RIFLE VOLUNTEER BANDS.—Officers in command are invited to apply to BOOSEY & SONS for a LIST OF THEIR MILITARY MUSICAL INSTRUMENTS, forwarded free.—Boosey & Sons, 24, Holles Street, W.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

MONEY ADVANCED on BILLS, PROMISSORY NOTES, POST-OBIT BONDS, or other securities, and at 5 per cent., on property derived under wills or settlements, without publicity or delay. Confidential applications may be addressed to Mr. Morris, Solicitor, 11, Beaufort Buildings, Strand, opposite Exeter Hall, W.C.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, OCTOBER 27, 1860.

It was with no little astonishment we saw this week, in the columns of our great contemporary, that Mr. Whitworth had been so much neglected, or that he had found it so difficult to secure attention on the part of the Government, as to consider himself fairly entitled to offer his arms of precision to the notice of the Emperor of the French. Such, at least, might be taken to be the meaning of the statement to which we beg to direct notice,—if it were possible that on a matter of such importance any public or professional indifference should exist. All the world has heard of Mr. Whitworth. Every one of the trials of his artillery has been reported; his wonderful length of range, the merits of his system of construction, the advantages of his guns as compared with those of Sir W. Armstrong, and the precision and simplicity of his method, have been duly notified and settled; and those of the public who take an interest in such matters have no doubt been asking themselves why the Government did not secure the immense superiority which the results of the trials made known to them seemed to promise to the possessors of his weapons. Very likely their perplexity was acuminated by something like indignation, when they read that Mr. Whitworth had been so much impeded in his attempts to obtain the recognition and adoption of his arms by the Government of England, that he had been almost forced to lend his bow and arrows to Ulysses. Now, we must confess we are rather incredulous that the War Office would willingly incur the responsibility and unpopularity which would attach to any department of the public service, that impeded the attempts of such a man as Mr. Whitworth to bestow on his country the increment of force in war with which the possession of the advantages attributed to his guns and his rifles would incontestably bestow, if they were as they seem to be, fairly possessed by them.

In fact it remains to be proved, or rather it is on the face of it rather improbable, that any department of the Government would wittingly throw impediments in the way of the public service. If they did so, no censure can be too severe, and no unpopularity too great. We may add, that not less uncertain will be the exposure in store for them. It must be clearly understood, however, that the department of Government charged with the direction of public money for the national defence have judicial as well as administrative functions. It is not enough that a man should come to them and say he can effect a certain result. The officers of the department have a duty as well as a right to demand, not merely the proofs of his assertion, but to test the proofs by the machinery at their disposal. If Mr. Whitworth obtains the assent of the French Government to try his guns, he may be satisfied he will not be permitted to conduct the trial by his private machinery. We are aware that the Admiralty have been most anxious to buy the guns Mr. Whitworth has already made. We believe that the sanction of the War Office for the purchase has been given, and that Mr. Whitworth has been asked to sell the guns. There is no difficulty about the price, though the guns carry a very high figure. If our information be correct, the only impediment which has arisen to the possession by the Admiralty of these guns has not arisen from the action of the War Office. The public will remember that long ago there were rumours of a contest or competition between Mr. Whitworth and Sir W. Armstrong in the journals, and to this day no such crucical experiment has ever taken place. A programme was drawn out, but it was objected to in points of small detail, which were supposed to be satisfactorily met; but there has been a delay, not attributable to the War Office, so great, that the trial may be considered postponed *sine die.* It is surely not unreasonable that the authorities should ask for the possession of one of Mr. Whitworth's pieces of ordnance, to be tested by the only means they can recognise or admit? Have they had one of the Whitworth guns made over to them? Can they buy one? From whence come the obstacles to the Admiralty when they wish to procure a gun for trial on board the Excellent?

Supposing we admit the range and other properties of the Whitworth gun, are we to admit that Mr. Whitworth is to be the sole judge of the properties which constitute a perfect gun for service in the field? Is he to decide questions which require for their solution that practical knowledge and experience which we may fairly assume are more likely to be possessed by professional men, so far as service qualities are concerned, than by an amateur, however great his acquirements as a mechanician? If we allow Mr. Whitworth to do so, he will assuredly find that French artillerymen, at the head of whom is the Emperor, will not be so complaisant.

With regard to the rifles, we have reason to think that impediments have arisen which are not justly attributable to the War Office, or to the departments which are charged with the special consideration of such questions. Long ago, when Mr. Whitworth first sent a batch of his rifles to the Small Arms Department for trial, he did not permit the trial to take place, because he was

Digitized by Google

anxious to effect some improvements and make some alterations in his rifles, and they were therefore at his request returned to him for that purpose. Very recently Mr. Whitworth made over to the Government a number of rifles for trial; but it was understood that each rifle would cost more than three times as much as the Enfield manufactured by the Government machinery. No trial which has taken place—and there have been many of various kinds—could at all warrant the result that, as service rifles, tho Whitworth was anything like three times as good as the Enfield rifle. But, even supposing that the Whitworth had some special excellence which would justify the Government in adopting it as an arm of precision for special corps of sharp-shooters, a question arose which merits grave consideration. If we assume the Whitworth rifle would cost 10*l.*, whereas the price of the Government Enfield was only 3*l.* odd, one can easily understand what was the force of the objection made by the Superintendent of the Government small arms manufactory to the adoption of the former, when he contended that at a far less cost he could produce at the Government works a rifle which would be equal to the Whitworth. The advantages of range, which imply a low trajectory as a general rule, may be counterbalanced by defects in the qualities of the piece for service in the field. We do not say the Whitworth is disqualified in that respect, but we do assert that Colonel Dixon has a fair right to test his improved rifles. Mr. Whitworth has an undoubted right to the fairest test, but he cannot be admitted as judge and referee in his own court, and in his own suit. If he has not had a fair trial the country will see that justice shall be done to him. We have no interest in the case, except that we desire to see the British soldier provided with the best arms for the field that the wealth and skill of the country can afford, and if we are mistaken in thinking that the Government has on the whole done its best to secure the same object, our columns shall be freely open to our own confutation.

When the Assistant-Surgeons were admitted into the ward-room, and were declared by the Admiralty entitled to cabins, an old officer of our acquaintance asserted that "the Service was going to the devil." Some years have now rolled on since these gentlemen have had an opportunity of contrasting the comforts of their present quarters with the privations and annoyances to which they were subjected in a midshipman's berth, and the efficient state to which Her Majesty's ships have been brought, proves that our friend has been mistaken in his gloomy forebodings. The Assistant-Surgeons are comfortable; the Navy is popular with the medical profession, and the voice of agitation, which for so lengthened a period was loudly raised in the successful endeavour to depict the wrongs endured by these gentlemen, has been stilled, and the Universities of Ireland and Scotland are not backward in complying with the demand made upon them by the Medical Director-General of the Navy, whenever the exigencies of his department warrant an appeal to them. We are no friends to combination except in cases which require the application of strong measures, when every reasonable effort has been exhausted to bring about a laudable object, and even then personal interests must be subservient to public good. The case of the Naval Instructors has been more than once alluded to in the columns of this journal, and we are inclined to think that had there been a McWilliam among them to press their claims for an impartial hearing on the First Lord of the Admiralty, there would have been no necessity on our part to step forward again as their advocates before a tribunal which holds their fate in its hands. The reforms that are needed, as far as we can gather from the observations we have made, are a different system of payment from that which now exists; the permission to retire after fifteen years' service, and a uniform corresponding with the rank to which, as educated gentlemen, they are entitled. We cannot suppose that there would be any real difficulty in making these slight concessions, and if the authorities at Whitehall are in earnest in their wish to retain this class of officer in the Service, they must give a willing ear to the mild remonstrances which have been addressed to them. We have ascertained that the Edgar, flag-ship of Rear-Admiral Erskine; the Centurion, the Conqueror, the Cressy, and Aboukir, all large line-of-battle ships—and which should, under ordinary circumstances, have a large number of youngsters requiring scholastic aid on board—are without naval instructors. There are many smaller vessels, equally entitled to carry an officer of this rating, in a similar predicament; but the ships above named will answer the purpose of proving that a very considerable number of young gentlemen now being trained up for the naval service of their country are left without that instruction which it is supposed they are receiving. We are not surprised to hear that captains will occasionally be pleased at not having the extra anxiety of a schoolmaster, nor that the lads themselves prefer a long holiday to the tediousness attendant on a regular system of study; but we cannot afford to concede such indulgences. We have resolved that our young officers shall pass examinations before they become entitled to their commissions, of a character which embraces attainments unheard of in the olden time, and which cannot be mastered without the assistance of professors of no mean acquirements. There are three points which, in dealing with the question of naval instructors, should have weight with their Lordships. The time allowed to a midshipman to acquire all that is demanded of him to pass his examination for a lieutenant's commission has been reduced from five to six years. The nature of this examination has been made so difficult that no amount of cramming at the eleventh hour, as in former times, will avail the unfortunate candidate; and, strange as it may appear, we have actually thrown every possible impediment in the way of gentlemen from entering the Navy, who, with an equal amount of consideration shown to the medical officers, would have been glad to have removed the difficulty which threatens to be more serious than is probably contemplated.

We have received several communications in reference to the remarks which appeared in the last number of the ARMY AND NAVY GAZETTE respecting the unfortunate occurrence, too public to be passed over, which is said to have taken place on board the Forte. Some of our correspondents assure us that the offence imputed to one of the most gallant officers in the Service was never committed, and that it was merely in intent, probably, they say, on one side only. Others aver that the conduct of another person justified the course of the gallant officer and gallant lady. We confess that we can only deal with the question on the grounds which induced us with great reluctance to allude to it at all; and that according to our light, the duty of a public journalist interested in the honour and welfare of the profession, was simply to discuss a matter which was the talk of every club house in its relations to the position a British officer sailing under his own flag, and acting as host to the wife of the Queen's representative, who was taking a passage on board his ship. Who that loves Nelson does not regret that he ever cast anchor in the Bay of Naples?

We understand that the Commission for settling the organisation of the Anglo-Indian Army is drawing up its second and final Report, or, rather, is engaged on the supplement of the original plan, which did not embrace many points of importance. The present regiments will be allowed to "die out," as enlistment is stopped, and we are rather curious to know what will ultimately become of historical regiments like the Bengal, Madras, and Bombay European Fusiliers according to the programme of the Commissioners; which, on these points, so far as we hear, will fail to be satisfactory to those interested in the reputation of these gallant corps.

It has been decided by the authorities at the War Office and the Horse Guards, that subalterns who have served for a twelvemonth in an embodied militia regiment, shall be entitled to pass into the line, by, or without purchase, as they may be entitled, without passing the examination which is required on the part of candidates coming from civil life, and that an examination of a modified form shall be substituted in their case, in consideration of the amount of experience of military duties which their career in the militia must have given them.

It gives us great satisfaction to observe that the ridiculous and unfeeling order for the removal and destruction of soldiers' "pets" which was issued in a divisional command in India has not received the sanction of Sir Hugh Rose, and that His Excellency has rebuked the indiscreet interference of the very gallant general who issued the ukase against monkeys, deer, parrots, and such "small deer" in a General Order from Head Quarters.

In reference to some reports which we have heard, and statements which have been circulated, that it is intended to send cavalry regiments to India, we think it not unnecessary to say that no such intention exists on the part of the authorities, and that it is more likely they are of opinion the number of cavalry regiments now in India is in excess of the proportion required for the Service.

General Lord Clyde, who is now in town, has experienced considerable benefit from his trip to Vichy.

Mr. Secretary Herbert is expected in town immediately on his way to pay a visit to Her Majesty at Windsor Castle.

The report of the Recruiting Commission has been submitted to Her Majesty, and has received her sanction.

In about two years, all the artillery in Great Britain will be provided with Armstrong guns.

The Royal Commission appointed to inquire into the state of the dockyards has been peculiarly unfortunate in losing its chairman. Mr. Ricardo, who promised to discharge his duties in a business-like and efficient manner, retired from the post to which he had been elected after a few days' experience of the work laid before him. Mr. Frederick Peel was nominated his successor, and he has been compelled to resign in consequence of his appointment to the responsible office of Secretary to the Treasury; and at present the Commission is doing its best without a president, although we do not imagine this state of things is intended to last, for if any good is really to result from the examinations of public servants which have already taken place, care must be taken to provide a proper person to fill the chair now vacant.

On Wednesday evening the Admiralty issued letters to the following iron-ship building firms, calling on them to send in tenders, on or before the 5th November, for the construction of two iron-cased frigates; viz., Messrs. Samuda, Messrs. Westwood, Baillie, Campbell & Co., and the Thames Yard Company, all of London; Messrs. Napier & Co., of Glasgow; Messrs. Laird, of Birkenhead, and Messrs. Palmer, of the Tyne. These two new ships are to be as nearly as possible similar to the Warrior, now in the course of building. The ship which it is intended to construct at Chatham dockyard, will also be of the same class.

There is on the 5th of December to be a competitive examination at Portsmouth for senior marine cadetships. At present we have reason to believe sixteen nominations have been made, so that there will be six disappointed candidates. The competitive system has the advantage of having received the recommendation of a Committee of the House of Commons; and if it holds good in the case of marine cadetships, why should it not equally apply to naval cadetships? The subject is deserving of consideration.

Vice-Admiral Sir Houston Stewart, K.C.B., the new Commander-in-Chief at Devonport, left London yesterday afternoon, and will hoist his flag (white at the fore) this morning on board the Cambridge gunnery-ship. Sir Arthur Fanshawe will strike his flag, and hand over the duties of the port to his successor.

The annual promotions from the royal yacht have been decided upon, and this lucky vessel will supply another commander to the Navy List in the person of Lieutenant Samuel P. Townsend (1852) and three lieutenants in Messrs Henry Salmond, Arthur Williams and John H. Vidal, all of the seniority 1859.

We are informed, on authority which is perfectly reliable, that the Emperor of the French has decided upon building, with as little delay as possible, a number of steam iron-cased gun boats.

His Royal Highness the Prince of Wales was expected to embark on board H.M.S. Hero, on his return from America, on the 17th instant, and if favoured with westerly winds across the Atlantic may be looked for in the Channel about the end of th month. The Royal Squadron consists of the Hero, the Ariadne, and Flying Fish; and it is currently reported that the division of ships belonging to the Channel Squadron, now lying in Plymouth Sound, will proceed to sea for a short cruise, with a view of falling in with the Prince, and offering him the first welcome on his approach to the shores of England.

It would appear that the manufacture of Red Tape in France has lately received a check, so far as the administration of naval affairs is concerned; for we find by *Le Toulonnais* that a commission, consisting of a Rear-Admiral, other officers, and two deputies has been nominated, with the view of removing many obstructions which have hitherto stood in the way of the rapid execution of public business at the French Admiralty.

MARTELLO TOWERS ON THE EASTERN COAST.—It has been officially announced that very shortly a body of Artillery will be sent down to the eastern coast to try experiments with new guns, and a new description of shot, upon the Martello towers which skirt the shore at the mouth of most of the large rivers. These circular buildings are generally supposed to be of great strength, but the experiments tried on the Sussex coast a few months since proved that they are incapable of resisting the fire of heavy artillery, and also exploded the old theory that this rotundity of form caused the balls to fly harmlessly off the surface. We shall in due time publish the results of the experiments as they are tried.

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From our own Correspondent.]

Naples, 20th October.—The event *par excellence* of this week is the arrival of the English legion of Volunteers, or excursionists, as they were facetiously designated when advertising for recruits. The steam-ship Emperor arrived in the Bay on Sunday last, at about 9 a.m., with a portion of the British Volunteers on board, and was followed later in the same day by the Milazzo, another steamer carrying the remainder of that force. The arrival of these disinterested sympathisers with the Italian cause has been looked forward to by the inhabitants of Naples as an event to be acknowledged by a grand festa, illumination, &c. The necessities of active service, however, have taken precedence of the festa, and the illumination is postponed *sine die*, or, at all events, until the return of the English from the front, whither they were sent on the morning of Tuesday last, at 2 a.m. To resume, however, the regular narrative:—As soon as the Emperor arrived orders were issued that her red-coat freight was to remain on board until the following morning. The only exception to this rule was in the case of an officer of some little notoriety, named Styles, then *pro tem.* Major—the brevet rank being rather owing to the upward pressure resulting from the number of captains beneath than *permissu superiorum*. The officer in question was sent on shore under arrest, and remained at the Hotel de Rome, pending the holding of a court of inquiry touching certain charges connected with his late mission to England. Between the arrest of Major Styles and the time of landing appointed for the next morning, rumour was very busy, and more than one false prophet predicted that the English would not disembark without Styles—in fact, that the very existence of the corps was wrapt up in the Styles question, and that it would become a mutinous rabble if deprived of the services of an officer so identified with its being. The course of time, however, so often unfavourable to modern prophets, saw the volunteers landing on Monday morning as was arranged, and marching past the Hotel de Rome, where the presence of one of their own number as sentry could not fail to have reminded them of the unpopular arrest. To the credit of their loyalty be it spoken, the English volunteers, numbering some 800 men, proceeded from the landing place by the Strada del Gigantea to the Palace square, followed by a large body of the National guards under arms, the procession being preceded by bands of music. A dense crowd, composed of the most respectable citizens, eagerly pressed forward to welcome the arrival of the long-expected British legion, and to crown several of the officers with garlands. The weather so good at times in favouring royal progresses and ovations, was strangely inauspicious, and a drizzling rain continued to fall during the whole progress of the march from the landing-place to the palace, and as almost every civilian present had gone out provided against the change of weather, a thousand green umbrellas were hoisted, and went moving about from place to place, protecting the owners without doubt, but by no means enhancing the scenic effect of the procession. At length the red coats were drawn up in line facing the royal palace, and the National Guards in rear of them. Padre Gavazzi, who was present, was requested by some of the principal citizens to convey to them in English an expression of welcome on the part of the inhabitants. This gifted orator,—whose popularity at Naples is almost unbounded, and who, notwithstanding the unmeasured abuse of the *Saturday Review*, is diligently advocating daily the union of Italy under the constitutional rule of Victor Emmanuel, and who ever speaks of Garibaldi in the highest terms of admiration, and is sustaining in his own way as important a part *in the* national struggle for liberty,—at once expressed his readiness to comply with their request. Unfortunately, however, Colonel Peard, was at Caserta with Garibaldi, and the officer in acting command either did not understand the purport of the application that was made to him for permission, or was "drest" in a little brief authority, and so refused; a mistake that would not have occurred had Colonel Peard been present, whose better management would not have kept his men exposed to a wetting rain for nearly an hour, half of which time they were standing in line in the square. When the men were tired standing, and the heavens were tired raining, a move was made to the barracks appointed for the reception of the volunteers, and their march was resumed. In passing through the Strada Toledo, and especially when opposite the Caffe di Europa, the cheering was loud and long; the balconies were filled with spectators, and the streets, notwithstanding the unfavourable nature of the morning, were crowded with multitudes of all classes, shouting themselves hoarse with the cry of "Viva Inghilterra," as they accompanied the Englishmen to their barracks. Orders were received during the course of the day from Caserta that the volunteers should march at 2 a.m. on the following morning, in consequence of which they have moved up to the front. A telegraphic dispatch from General Milvitz to General Türr, at Naples, the same day, ran as follows:—"The enemy has attacked the left of San Angelo, and has been repulsed. We are ready along the whole line to receive them in case of fresh advances.—St. Maria, 15th Oct., 11·45 a.m." The attack commenced about dawn. Two battalions of the Neapolitan troops, the 6th and 14th "Cacciatori," followed by two companies of another corps, began the attack upon the brigade of Basilicata, the latter being reinforced by the 1st regiment of the line (Piedmontese) and by a company of Bersaglieri, and were, after three hours of a brisk fire, successfully repulsed. A general attack along the whole line was expected, and the troops which, after fifteen days of advance post duty, had been allowed to fall back on Caserta, were rapidly brought up again. The loss on the National side was slight—4 killed and about 30 wounded. The Royalists' loss was greater, and they have left twelve prisoners in the hands of their enemies. From the prisoners it has been learned, if their account be true, that the Royalist force in Capua amounts to 16,000 men, and that there are five regiments of cavalry there, that is, two of hussars, two of dragoons, and one of lancers. Cajazzo is defended by foreign troops. The bread of the besieged is of the worst quality and condition, and many of the inhabitants of Capua have already begun to be in want. Francesco II. was in Capua on Thursday, the 11th. The population is favourably inclined to his cause; and as the order of routine is, that the whole garrison hears mass on Sunday, and afterwards has an exciting and bellicose sermon preached to them, it will not be wondered at that their sorties have almost all taken place upon Monday, especially as the sermon is reported as always winding up in the same way—namely, that Garibaldi will be soon crushed, and the faithful soldiers of the King will at the same time obtain victory, Naples, five days' sacking now, and heaven hereafter.

On the morning of the 16th instant, General Garibaldi reviewed the forces at Caserta, beginning with Türr's division, including the English regiment and another Hungarian. After a minute inspection of the different regiments, the officers belonging to all the corps were assembled around Garibaldi so as to form a square, when, turning to the Italians, he said, "Soldiers! it is a great satisfaction to see around me you, my valorous brethren in arms. We have till now driven away the enemies of the country with the rapidity of the wind. We are now under the walls of Capua, and in a short time we shall have purged the remainder of the soil. I depend upon you, and the thanks of the country belong to you." Then, pointing to the English officers, "We have there," said he, "as companions, a nation which entertains sincere sympathy for us, and has the courage of the lion: that nation has been from the very first on our side. Generous nation! you are amongst our sincere friends, and in the name of the country I thank you." Lastly, turning towards the Hungarian officers, he said, "Here is presented to us a no less noble and valorous nation, of which each representative is a hero, they joined us, and defended our cause with their blood and with their life. Our country not only feels the most profound gratitude, but assuredly regards it as a sacred duty to make their cause our own. And, *per Dio*, I shall make it mine." The general raised his hat as he pronounced the words I have italicised, all the officers present raising theirs also, cried with enthusiasm, "Eljen Garibaldi!" The troops now began to defile, passing before the general in beautiful order, viva-ingas they passed, until the Hungarian cavalry came, when raising their sabres towards heaven, they rent the air with their cry of "Eljen Garibaldi;" the whole ceremony closing with the playing of the Inno di Garibaldi, or hymn of Garibaldi, which is now not only sung in all the theatres, but played on all the military bands. Yesterday, Friday, the Neapolitans made another sortie, and were as usual, repulsed. Garibaldi had 50 killed and wounded: 2 officers and 6 men of the English regiment were killed. Of the two officers, one has been recognised as Mr. Tucker, interpreter to the brigade, shot through the forehead, and Captain Dickson is reported to be the other.

WOOLWICH.

Visit of the Grand Duke Michael.—On Wednesday the whole of the troops in garrison at Woolwich, comprising the Batteries of Royal Horse Artillery, the Foot Artillery, and Field Train Batteries, and a squadron of the 16th Lancers, assembled on parade at half-past 9 o'clock, every preparation having been made to carry out the complete details of a field-day, in the presence of His Royal Highness the General Commanding-in-Chief, and His Imperial Highness the Grand-Duke Michael of Russia. A guard of honour, with the colours and band of the regiment, was stationed in front of the barracks, and at ten o'clock His Imperial Highness the Grand-Duke Michael, attended by Count Zouboff, Comte Lewacheff, and Baron Wallem, with His Royal Highness the Duke of Cambridge, was received by a royal salute of 21 guns and the usual presentation of arms. The Royal Horse Artillery and Batteries then took up a position in review order at the south end of the common, near the Royal Military Academy, the entire force being under the command of Major-General Sir Richard Dacres, K.C.B., and the 16th Lancers being appointed to keep the ground. His Royal Highness the Duke of Cambridge, who wore an undress uniform, and His Imperial Highness the Grand-Duke and staff, then took up a position at the royal standard, and the several batteries marched past at slow and quick time, the entire force being also minutely inspected front and rear in the usual manner. The batteries of Royal Horse Artillery and the field batteries then proceeded to carry out the evolutions of a field-day, five of the batteries on the ground being fully equipped with nine-pounder Armstrong guns, and a succession of firing with blank cartridge was kept up from various points of the common during the performance of the complete details of a sham fight—the several evolutions of attack, defence, retreat, and pursuit being carried out in a manner which elicited the marked admiration of the illustrious visitors. Only three of the batteries in action retained guns of the old service pattern, and the practice with nine-pounder rifled ordnance, although with blank cartridge, fully exhibited the wonderful power of these weapons, and the change which they are destined to effect in military tactics, especially on a battle-field. The field-day evolutions terminated about 12 o'clock, when the troops retired to barracks; and His Imperial Highness and staff, with the Duke of Cambridge, Major-General Sir R. Dacres, and other officers, then rode across the common to the Royal Military Repository, where the illustrious visitors inspected the various objects of interest, including numerous war trophies, and witnessed a series of drill practice by a detachment of the depôt brigade. Their Royal Highnesses then returned to the barracks, when, after taking leave of the commandant, the Duke of Cambridge left in his carriage for town, and His Imperial Highness and suite then inspected the several departments of the garrison, accompanied by General Dacres and staff. After viewing the monument now in course of erection to the memory of officers of the Royal Artillery, who fell in action during the Crimean war, His Imperial Highness and suite visited the Royal Military Academy, and proceeded thence to the Royal Arsenal, where they were received by Colonel Tulloh, R.A., superintendent of the royal carriage department; Major Clark, Captain Boxer, superintendent of the laboratory department, Mr. Anderson, of the Armstrong gun factories, and other heads of departments. The Grand-Duke and suite then proceeded through the numerous factories and workshops of the carriage department, minutely inspecting the powerful and complicated machinery with which the establishment abounds, and subsequently visited the Armstrong gun factories, where the utmost activity now prevails in the manufacture of heavy ordnance for the naval service. His Imperial Highness occupied about three hours in his progress through the numerous departments of this vast national manufactory and storehouse of warlike munitions, and appeared deeply interested by the scene. After taking leave of Colonel Tulloh and the officers who accompanied him through the Royal arsenal, His Imperial Highness and suite proceeded in carriages to town at half-past five o'clock.

Artillery Changes.—It is rumoured in this garrison that the brigades of field batteries now serving in the United Kingdom will be changed next spring in the following order:—The 8th brigade, whose head-quarters are now at Aldershot, will move to Ireland. The Irish brigade (the 9th) will go to Woolwich, and the 4th brigade, now serving there, will relieve the 8th at Aldershot. It is also said that the batteries of the 7th brigade, which are distributed over Canada, Bermuda, Halifax, the West Indies, and Jamaica, are to change round at the same time, if not before; and although the bracing climate of Canada will refresh men serving in the West Indies, the wisdom of sending their comrades, who have already passed through several Canadian winters, direct to tropical heat, which is never less than 84° in the shade at the best of times, may well be questioned. Yellow Jack, who feeds on the sudden contrasts of heat and cold, will not be able, we fear, to withstand a temptation thus offered; and we trust the fiat for his hideous banquet is not yet gone forth. We believe it is not intended to make any change in the lieut.-colonels commanding at the different stations.

Artillery for New Zealand.—Captain Mercer's battery of the 4th Brigade has been placed under orders to proceed to New Zealand at an early date. This battery has handed over their horses, and such non-commissioned officers and men as are too old for foreign service, to 2nd Captain C. P. Rotton, the first on the list for promotion to the rank of 1st captain, and he will when promoted proceed probably to Aldershot, and there form the nucleus of a new battery. Volunteers for this purpose, as well as for filling up Captain Mercer's battery, have been called for from the different field brigades. It is expected that the battery for New Zealand will proceed overland, and Veterinary-Surgeon Anderson, who has hitherto been attached to the batteries in the south-west district, is under orders to join it. We hope that Captain Mercer, with his 12-pounder Armstrongs, will persuade Messrs. Heki & Co. to hold our artillery in greater respect than they have hitherto done.

Recruiting Royal Artillery.—Orders have been transmitted to the different brigades of the Royal Artillery to furnish recruiting parties for the great recruiting stations of the regiment. Strong rumours of an increase to the regiment are afloat; and it is not improbable but that an augmentation will take place when the Militia Act expires in the spring, and the time for disbanding the Militia Artillery regiments consequently arrives. Several of the depôt companies are now 600 strong, and the Militia regiments of Artillery will furnish a large number of well-drilled men for the new brigades. The appointments of brigade-major at *Woolwich*, and firemaster at Biddy's Hard, Portsmouth, now held by Major Shaw, and Lieut.-Colonel Romer, R.A., will soon be vacant. There are an immense number of applicants for them, especially for the latter, which is one of the best things held by an artillery officer. Lieut. Cooke, R.A., has on the recommendation of a medical board, been granted leave of absence by the Commander-in-Chief until the 17th January, 1861.

Colonel Lake.—We learn with pleasure that that popular and esteemed officer, Colonel Lake, C.B., R.A., who while on duty some time back was struck down by a paralytic stroke, has almost entirely regained his usual health.

ALDERSHOT.

A miserable summer is now heralding in the prospect of a still more wretched winter. Although this is very properly the camp of instruction for the British soldier, and every regiment on joining is now well aware that an unusual amount of work and of zeal in performing that work is expected from it, yet there is a time and season for all things; and the old proverb of "all work and no play makes Jack a dull boy," applies to the soldier as fairly as to anyone else. At present there appears no prospect of the cessation of the usual field-days, which have ceased at all other stations with the usual half-yearly inspections. Not that the British soldier minds the work, and would very likely be as soon out manœuvring as lolling about the huts; but it is the wear and tear of his clothes which ought to be taken into consideration while learning his drill in a country long saturated with heavy rains, and which in many places is little better than a "slough of despond." In all this heavy work the men's shoes particularly suffer, and it would be nothing but fair that in a new place such as this, where stones and gravel are continually renewed on half-formed roads and parades, an extra pair of boots should be supplied to the soldier. Both the Secretary of State for War and the Prime Minister have each expressed in Parliament this season that there is "nothing like leather:" if, acting on their belief, they would authorise a little of that commodity to be baled out, they would probably prevent the men from falling back on their natural "buff," a resource to which many of them would gladly yield if permitted, considering the state of their accounts, which hold little prospect of Christmas cheer. There are few men in the camp who ever keep out of debt, and at the best of times a penny a day is all the soldier can claim. The musketry instruction which had been suspended during the drill season, has been resumed; and a pendant to the Order, authorising winter leave, directs that it is not granted until the target practice is completed. If this Order remains in force, a large slice of this indulgence will be consumed, and we suggest that an efficient officer with each company will fulfil every demand and requirement of the service, without infringing on the usual number of officers permitted to be absent at one time.

Ex Hujus Horto Carpere Flores Sis Memor.—We have much pleasure in noticing the great success which has attended that excellent institution the French Hospital, at Aldershot. Established about three years ago, with a view of affording assistance to the wives of soldiers labouring under the disadvantage of loving their lords

Digitized by Google

"well but not wisely," the experiment has succeeded so well, that great desire was expressed to place it on a more permanent basis. A committee was formed, in which every regiment and department in the camp is represented; and it is a matter of great rejoicing to find that a working committee of ladies have nobly come forward to give their services as visitors. The Government originally provided the building, beds, utensils, &c., and the comforts which the institution affords were added by private subscription among the military in the station. Women (married) with leave have the first claim, and then urgent cases of distress among those married without leave are then considered. The funds of the hospital are in a most flourishing condition, permitting linen and clothes to be sold under cost price to women leaving the establishment; and we trust that the soldiers and their families fully appreciate the kindness which has prompted their superiors to establish this truly Christian charity, which, when well known, we doubt not will be imitated in other large military stations.

It has at length been determined to provide suitable huts in each camp for the general officers. One in the south camp has been lately completed with considerable taste and comfort, and the one in the north camp will also soon be fit for occupation. Plans are also proposed for erecting a residence for the lieutenant-general commanding. The site proposed is on the Farnborough road, opposite the north camp, commanding an excellent view of all the regimental lines, and affording easy access to the principal drill grounds. The estimate for this building is 9000*l.*, to which, judging from the usual value of other estimates, a considerable per centage must be added before we know the total damage. We suggest the question, whether it would not be better at once to purchase Aldershot Manor, which would offer an excellent residence for an officer of high rank. At present the lieutenant-general commanding has no less than three miles to traverse between his house and the camp, a distance entailing a time and an exertion which cannot tend to advance in any way the interests of the public service.

Preaching and Practising.—Great improvements are being made in the artillery range at Aldershot, in order to enable the gunners of the Royal Horse Artillery and field batteries there stationed, to practice with the Armstrong gun with safety to the surrounding neighbourhood. The targets being placed under the hill at Cæsar's camp, the line of fire tends most unpleasantly towards the Bishop of Winchester's schools, and the town of Farnham. A short time back some children near this school found a shell embedded in the sandy soil which is the chief characteristic of this part of the country, and unwittingly tossing it about as a plaything, it exploded, killing one or more, and wounding others dangerously. The slopes of the face of Cæsar's hill are therefore now being scarped in order to receive the shot and shell, and prevent them from ricocheting over the surface of the inclined slope. Not long ago, while the Artillery were at practice with the Armstrong gun, a number of spectators were at the top of Cæsar's camp to witness the precision of the fire, when—lo, to their amazement a shell went close by them, bounding over the surface of the hill. Amid the flutter which ensued, a gallant colonel galloped up to reassure their shattered nerves, protesting that such an occurrence was unprecedented, and could never happen again, when almost as he spoke another whizz announced the approach of a second of these unwelcome visitors. From a hasty glance at the enemy, their eyes reverted to their friend the colonel; when, alas! it was seen that his own belief was not quite equal to his preaching, for, like a spread eagle, on the ground, spurs upwards, he demonstrated the advantage of presence of mind combined with absence of body on these occasions. The present range, when completed, will afford practice up to 2500 yards, which, for particular purposes can be increased to nearly 4000.

MALTA.

We regret to hear that a misunderstanding, between the officers commanding the Royal Artillery and Royal Engineers at Malta, has led to a rupture of the joint mess establishment which has prevailed among the officers of both branches for many years past. It was not without great regret and opposition that this was effected; nor is Malta the only place where mess separation of the two scientific branches has been the order of the day. Gibraltar, Chatham, Dover, and other places, have lately witnessed similar scenes; and it is certainly strange that men, educated as boys together, and continually brought into professional contact during their military career, cannot agree upon subjects where good taste and common sense ought to be sufficient guides, with perhaps a little forbearance and absence of party feeling, when privilege questions are raised on either side. It is the more to be wondered at, since it is to their mutual advantage that they should live together, in gaining a better and cheaper mess with increased numbers, and sharing the casual expenses of mess guests, inspection dinners, &c. Experience, however, would apparently show that practice and theory do not here coincide, and that it is better one of the two branches should hold the executive, and the other become honorary members of the established mess.

On Monday a review of the Volunteers of North Staffordshire, and Macclesfield, and Congleton (Cheshire) took place at Leek. About 1000 riflemen, together with the Leek troop of Yeomanry Cavalry, took part in the proceedings. The Volunteers were divided into two battalions, the first (Cheshire) under the command of Sir Charles Shakerley, Captain of the Congleton Volunteer Corps; the second (North Staffordshire), commanded by Captain Buchanan, Adjutant to the battalion. Lieutenant-Colonel Buller held the chief command, assisted by Major Walters (Liverpool Volunteer Artillery Corps), Lieutenant Campbell, and Captains Midgley and Adams (Staffordshire Yeomanry Cavalry). The movements were those of brigade, this being the first time the Staffordshire Volunteers ever took part in brigade drill. The movements were effected with very great precision and efficiency, especially the skirmishing by the Cheshire battalion. At the close of the review Lieutenant-Colonel Buller said he had been astonished, and so had Major Walters, a gentleman very well qualified to judge, at the way in which they had gone through their movements. The ground was covered with spectators, and the weather being fine, the review passed off very successfully.

ARMY ORDERS.

In consequence of the great changes produced in the Service by the abolition last year of the Boards of Respective Officers, who, consisting of the commanding Officers of the Royal Artillery and Royal Engineers, and the Ordnance Storekeeper, conferred together on all points connected with the armaments and expenditures necessary for carrying on the public Service, the following Orders have been issued, and it will be seen they will supply a gap which has already been too long left open:—

Circular Memorandum.

Addressed to General Officers in Command of Troops, and Officers Commanding Royal Artillery and Royal Engineers.

Horse Guards, S. W., 13th October, 1860.

General No. 78.

It having been brought to the notice of His Royal Highness the General Commanding-in-Chief, that there are no definite instructions as to the points on which Officers Commanding Royal Artillery and Commanding Royal Engineers should confer when projects for additions or alterations to works of defence are being prepared; His Royal Highness has, with the concurrence of the Secretary of State for War, approved of the following instructions on the subject, viz.:—

When an Engineer Officer receives orders to draw up plans for a battery, or for alterations to existing works of defence, he should consult with the Officer Commanding Royal Artillery as regards the position and relative importance of the work, the number and nature of the guns and their direction of fire, the number of traverses, and position of magazines, whether guns should be casemated or not, or whether they should fire through embrasures, or be mounted "*en barbette*;" all these being subjects for joint consideration.

The position of Artillery Stores, Shell-filling rooms. Side-arm sheds, their internal arrangements, the distance between the guns, and general form of embrasures, are points which perhaps belong more exclusively to the province of the Artilleryman than to that of the Engineer; but it is to be observed that the circumstances of the site may sometimes prevent the latter Officer planning the work precisely as the former would most desire; and a joint consultation is the best mode of arriving at a satisfactory conclusion.

Any remarks which the Officer Commanding Royal Artillery may have to offer upon the subject, should accompany the plan when transmitted for approval, should there be any difference of opinion.

All points of construction should be left to the Engineer, who is responsible for the proper execution of the work.

His Royal Highness cannot impress too strongly on the Officers of these branches of the Service the necessity for a cordial co-operation in carrying out these professional duties in which the services of Artillery and Engineering are so intimately connected.

By Command of His Royal Highness the Duke of Cambridge,

James Yorke Scarlett,
Adjutant-General.

Circular Memorandum.

Addressed to the Royal Artillery and Royal Engineers.

Horse Guards, S.W., 3rd Oct., 1860.

General Number 74. Staff College, 10—(1860).

Referring to the Circular Memorandum from this Department, dated 14th ultimo, No. 67, Staff College, 9—(1860), it is hereby notified that the Candidates will, in the first instance, report themselves to the Governor of the Royal Military College at Sandhurst.

By Command,

James Yorke Scarlett,
Adjutant-General.

Lucifer Matches.

The following Order is directed to be read at three separate parades in all forts, garrisons, and quarters.

General Order.—No. 767.

Horse Guards, S.W., 26th Sep., 1860.

Clothing for Store. 5—(1860).

Lucifer matches having been found in the pocket of a Great Coat recently returned into Store at the Tower, His Royal Highness the General Commanding-in-Chief finds himself compelled to direct attention to the Circular Instruction, dated War Office, 20th January, 1859, No. 375, and to desire that Commanding Officers will impress upon Officers, Non-Commissioned Officers, and Soldiers under their command, the serious consequences that may result from inattention to the instruction referred to—an extract from which is subjoined for their special information and guidance, viz.:—

"Numerous instances having occurred of lucifer and other matches being found in the pockets of articles of clothing returned to Store, I am directed by Secretary Major-General Peel to request that you will cause all clothing to be thoroughly searched before sending it into Store, and to cause any matches or other articles discovered therein to be immediately removed."

By Command of His Royal Highness the General Commanding-in-Chief,

James Yorke Scarlett,
Adjutant-General.

Royal Artillery.—434.

The following Orders have been issued in reference to promotions, removals, and alterations:—

Horse Guards, S.W., 20th October, 1860.

General Regimental Order.

1. Her Majesty has been pleased to approve of the following promotions in the Royal Regiment of Artillery, viz.:—

Second Captain Henry Renny to be Captain, vice G. R. C. Young, removed to the Half-Pay List.

Lieutenant William George Martin to be Second Captain, vice Renny.—Dated 27th September, 1860.

Second Captain Arthur Thornton Gratwicke Pearse to be Adjutant, vice Ravenhill, who resigns the Adjutancy only.—Dated 26th September, 1860.

2. Lieutenant F. L. G. Little, of the 7th Brigade, is raised to increased pay therein, vice Martin,—Dated 27th September, 1860.

3. His Royal Highness the General Commanding-in-Chief has appointed Second Captain R. H. Newbolt to the Horse Brigade, vice Major Grylls, who resigns his appointment in that branch in consequence of ill health.

Second Captain T. P. Carey is transferred from No. 1 Battery, 6th Brigade, to No. 1. Battery, 11th Brigade, vice Newbolt, and Major Grylls is, therefore, posted to the former battery in the room of Carey.

Second Captain and Brevet Major T. S. P. Field is transferred to the Depôt Brigade, vice Pearse, and Second Captain Ravenhill is, therefore, posted to No. 5 Battery, 11th Brigade.

Second Captain F. G. E. Warren is transferred from Major Barstow's Battery, 4th Brigade, to Major Hastings' Battery, 11th Brigade, in place of Captain Renny, and Second Captain W. G. Martin will, therefore, join the former Battery.

4. Referring to the War Office Circular of 7th November, 1859, No. 498, His Royal Highness the General Commanding-in-Chief, with the concurrence of the Secretary of State for War, has appointed the following Officers to be Inspectors of Warlike Stores and Firemasters at the under-mentioned Stations, viz.:—

To be Inspectors and Firemasters—Captain R. Boyle, Malta; Captain C. Hardy, Halifax; Captain T. Mahon, Quebec; Lieutenant E. T. Warry, Gibraltar.

To be Assistant Inspector and Firemaster—Captain C. B. Le Mesurier, Corfu.

The appointment of Officers to the remaining Stations named in the Circular referred to will be notified as soon as the Officers have passed through the course of instruction, and received certificates of competency, from the respective Superintendents of the manufacturing departments.

As there are at the present time several vacancies not yet provided for, any Officers who may be desirous of the appointments are requested to submit their wishes to their Commanding Officers, who, (if they have no objections thereto) will forward the names to this Office.

5. The Secretary of State for War having decided that in all cases the Lodging Allowance to Instructors of Volunteer Artillery Corps shall be for the future paid by the public, the same is notified for general information and guidance.

6. Officers Commanding Royal Artillery at the Stations and in Districts concerned, will obtain the sanction of the Officers Commanding the Troops to the following removals, viz.:—

Captain Renny, from Bengal to Woolwich.
Major Field, from India to Woolwich.
Second Captain Carey, from Malta to India.
Major Grylls, from India to Malta.
Second Captain W. G. Martin, from Gosport to Shorncliff.

7. His Royal Highness The General Commanding-in-Chief has approved of the following promotion and appointment of Master Gunners, viz.:—

Master Gunner John Crabbe of the 2nd Class at Hurst Castle, to be Master Gunner of the 1st Class at Portsmouth, vice Naish, appointed Adjutant of a Volunteer Corps.

Master Gunner Peter McLeish of the 3rd Class at Portsea Lines, to be Master Gunner of the 2nd Class at Hurst Castle.

Sergeant Joseph Thornley of the Coast Brigade to be Master Gunner of the 3rd Class at Portsea Lines.

9. Referring to the General Regimental Order of the 7th July last, the following alterations are to be made in the names of recipients of the Medal and gratuity for "Long Service and Good Conduct," for the current year, viz.:—

Depôt Brigade.—For Sergeant John McKenzie *read* Sergeant Major Henry Nelson.
For Sergeant John McLernon, *read* Sergeant-Major John McDonald.
For Sergeant W. G. Lawson, *read* Sergeant William Huggins.
For Sergeant William Johnson, *read* Sergeant-Major Charles Serbutt.
For Gunner George Heycock, *read* Gunner David Cupar.
Omit Gunner John Crussells.

3rd Brigade.—For Sergeant Richard R. Reville, *read* Sergeant Neal McBeath.

Coast Brigade.—For Gunner Bernard Doolan, 5*l.*, *read* Sergeant Bernard Doolan, 10*l.*

10. A new Pattern Rocket Scale, adapted to all descriptions of Rockets—submitted by Captain Jerningham, R.N.—has been approved for service, and one of these new Scales, with bits, has been demanded for each Battery of the Horse Brigade on Home Service, in exchange for the Brass Scales and Bits now in possession.

Authority, dated War Office, 2nd October, 1860.

11. A New Vent Piece for 12-Pr. Armstrong Guns has been approved under authority dated "War Office, 22nd September, 1860, 80—a—827, and steps have been taken to have the Vent Pieces now in use exchanged for those of the new pattern.

Under the same authority Primers are to be discontinued as a part of the Ammunition of 12-Pr. Armstrong Guns, and application has been made for the return to Store of the Primers and Blue Bags now with the Batteries equipped with Armstrong's 12-Pr. Guns.

12. By authority, dated War Office, the 17th September. The Secretary of State has approved of the Carriages of Batteries of Field Artillery on Home Service being painted in the Spring instead of the Autumn, as heretofore directed under Circular dated War Office, the 26th June, 1858.

13. Two sets of Men's Harness, one heavy and one light, prepared under the direction of the Ordnance Select Committee, have been sealed as patterns to govern future supplies.

By Command of His Royal Highness the Duke of Cambridge;

Charles Bingham,
Deputy Adjutant-General.

Barrack-Mastership of Fort George, Jamaica.—Mr. George G. Munro, who was out in the Crimea, under the Ordnance, has been appointed Assistant Military Storekeeper and Barrack-Master at Forts William, George, and Augustus. His name will be recollected in connection with Captain Gordon at Balaclava, where he was instrumental in saving valuable stores from destructive fires, supposed to be the acts of incendiaries.

DEATH OF THE DUKE OF RICHMOND, K.G.

We regret to announce the death of the Duke of Richmond, K.G. That estimable nobleman expired at 20 minutes before 2 o'clock yesterday afternoon, at the family mansion in Portland-place. For some months past the duke's health has occasioned much anxiety to the members of the family. In August last he proceeded to Gordon Castle, but was unable to participate in the sports of his friends, and thus hopes that were entertained that change of air would prove beneficial were not realised. The lamented duke returned from Scotland about a fortnight ago in a still weaker state, and has since been gradually sinking. We believe he died from dropsy.

The deceased, Charles Gordon Lennox, Duke of Richmond, Earl of March, and Baron of Settrington, all in the county of York, in the peerage of England; Duke of Lennox, county Dumbarton; Earl of Darnley, county Renfrew; and Baron Methuen, of Torbolton, county of Ayr, in the peerage of Scotland; and also Duke d'Aubigny in the peerage of France (the second duke having inherited that dukedom from his grandmother, who received that title from Louis XIV. in 1683), was the eldest son of Charles, fourth duke, by Lady Carlotte Gordon, eldest daughter of Alexander, fourth Duke of Gordon, and was born in Whitehall Gardens, 3rd August, 1791, so that his Grace was in his 70th year. The lamented deceased married, 10th April, 1817, Lady Caroline Paget, eldest daughter of the late Field Marshal the Marquis of Anglesey, by his first marriage with Lady Caroline Elizabeth Villiers, third daughter of George, fourth Earl of Jersey, by whom, who survives her devoted husband, the duke leaves surviving issue Charles Henry, Earl of March, M.P. for West Sussex (now Duke of Richmond); Lord Henry Gordon Lennox, M.P. for Chichester; Lord Alexander Gordon Lennox; Lord George Gordon Lennox, M.P. for Lymington; Lady Caroline Amelia, married to the Earl of Bessborough; Lady Augustus Catherine, married to his Serene Highness Prince Edward of Saxe Weimar; and Lady Cecilia Catherine, married to Lord Bingham. The late duke succeeded to the dukedom on the 28th August, 1819, on the death of his father, who died from the effects of a bite of a dog in Canada, of which dependency he was Governor-General.

At an early age the deceased nobleman adopted the army for his future career, and entered the 52nd Regiment as ensign. He joined the army in Portugal in July, 1810, as aide-de-camp and assistant military secretary to the Duke of Wellington, with whom he remained until the close of the war in 1814, and was present in all the skirmishes, affairs, general actions, and sieges which took place during that period, amongst which were the battles of Busaco and Fuentes d'Onor; storming of Ciudad Rodrigo, storming of Badajos; battles of Salamanca, Vittoria, and the Pyrenees; the first storming of San Sebastian, action at Vera, and battle of Orthes. At the last-mentioned battle, having left in July, 1814, the Duke of Wellington's staff in order to obtain a practical knowledge of regimental duty in the field, he served with the 1st battalion of his regiment, the 52nd Light Infantry, and on which occasion he was severely wounded in the chest by a musket ball, which has never been extracted. He was sent home with duplicate dispatches of the battle of Salamanca, and the capture of Astorga by the Spaniards; and with the dispatches of Vera, and the entrance of the army into France. During the campaign in the Netherlands he was aide-de-camp to the Prince of Orange (the late King of the Netherlands), and was present with him at the battles of Quatre-Bras and Waterloo. After the Prince of Orange was wounded at Waterloo he joined the Duke of Wellington's staff as aide-de-camp, and remained with the illustrious duke during the rest of the campaign. The late duke, for his military services, had received the silver war medal and eight clasps for Busaco, Fuentes d'Onor, Ciudad Rodrigo, Badajoz, Salamanca, Vittoria, Pyrenees, and Orthes. The duke was mainly instrumental in obtaining that commemorative decoration for the officers who had participated in the series of victories during the Peninsular war from 1806 to the spring of 1814, by his energetic advocacy of their claims in the House of Lords. On the 1st of June, 1847, Her Majesty granted the silver war medals under a general order, which gave great satisfaction among the gallant officers whose claims had been for so many years passed over. The late duke was, with the exception of the Marquis of Exeter, the senior Knight of the Garter, having received that illustrious order in 1828. He was Lord-Lieutenant and Custos Rotulorum of Sussex, Vice-Admiral of the coast of Sussex; Colonel of Royal Sussex Artillery and Light Infantry Battalions of the Militia, which his Grace had held from December, 1819; was an Aide-de-Camp to the Queen, High Steward of Chichester, Chancellor of Marischal College, Aberdeen, and Hereditary Constable of Inverness Castle. On inheriting the large estates of his maternal uncle, the last Duke of Gordon, he assumed the name of Gordon by Royal letters patent for himself and all his then surviving issue.

In politics, of late years he was a supporter of the Earl of Derby and the Conservative party, and was a determined opponent of the repeal of the corn laws. The lamented duke had, however, sixteen years before, supported the Reform Bill, and held the office of Postmaster-General in Earl Grey's Administration, and formed a member of the Cabinet from 1830 to 1834. He also gave his support to Lord Melbourne's Government. On the Earl of Derby taking office as First Lord of the Treasury in March, 1852, the Duke of Richmond was solicited to take office, but declined the proffered honour, as he conceived that Lord Derby could find a more useful person in the conduct of public affairs. The late duke was a most useful member on the committees of the House of Lords, and for many years devoted much of his time in that public service.

The deceased nobleman was a zealous agriculturist, and was one of the founders of the Royal Agricultural Society of England, of which society he was a trustee. Both on his large domains in Sussex and in Scotland he was revered by his tenants as one of the best of landlords. His Grace was one of the princely supporters of the turf, the annual races at Goodwood Park affording scope for the display of his generous hospitality. By his honourable bearing and frank manners on all occasions he had endeared himself to a large circle of friends, who will never fail to cherish his memory.

The Earl of March, his successor in the dukedom and patrimonial estates, was born 27th February, 1818, and married, 28th November, 1843, Frances Harriet, eldest daughter of Mr. Algernon F. Greville. The present duke was formerly in the army, and was aide-de-camp to the late Duke of Wellington and Viscount Hardinge. He has represented West Sussex in the House of Commons from July, 1841. In March, 1859, he was appointed President of the Poor Law Board, and was made a Privy Councillor. By his elevation to the House of Lords a vacancy occurs in the representation of the western division of Sussex, in the lower house of the legislature.

THE QUADRILATERAL FORTRESSES OF UPPER ITALY.

Under the heading "The Quadrilateral Fortresses of Upper Italy, their Importance for Germany, for Switzerland, and the Balance of Power in Europe," Captain Aresin, of the Austrian General Quartermaster's Staff, devotes an article of considerable length in the last number of the *Oesterreichische Militär-Zeitschrift*, to the four celebrated fortresses. Their possession is a vital question to Austria, and the writer endeavours to point out their importance as a frontier line to Germany. This article is, apart from the present critical state of the relations between Austria and Sardinia, important in two respects. Politically, it conveys the views of the Austrian government; strategically, it gives valuable information.

After a preliminary treatise on international law and the necessity of maintaining the balance of power in Europe, the Austrian writer enters fully into his subject.

Of all continental states, France possesses the happiest conditions of defence. Strong in her geographical position in case of a European war, she has but one front, and her battle-ground is only in one direction. In the south-east she has strong natural frontiers, the belt of the Maritime Alps; and by the annexation of Savoy and Nice, has placed one foot against Italy. The centre of this front is covered by the neutrality of Switzerland. She has made sure of one of the best entrances to that land through Porrentruy by her stronghold at Belfort. The other good entrance through the valley of the Rhone she has acquired by the annexation of North Savoy. The remainder of France's defensive front is covered by the Rhine, the Vogesen, and Ardennes, with the triple belt of fortresses, the chief points of which are Strasbourg, Metz, and Lille. Paris and Lyons form two centres in her defensive net-work. France is, moreover, compact, not intersected by slips of foreign territory; her population is brave, warlike, ambitious.

Prussia is geographically dismembered. Her territory runs far into that of other states, encircles them, or is encircled by them. If this configuration is favourable to attack, Prussia is, however, from her European position, a negative conservative state, and therefore, acting a defensive part, bears only the disadvantage of the geometrical form of her land frontiers.

Austria, as actually constituted, has, as regards defence, a somewhat happier configuration; but, like Prussia, placed between great military powers, she has on no side any secure natural line of defence.

Both states must therefore replace the want of natural barriers by an immense outlay of money and energy.

A state with a conservative policy, Austria limits herself strictly to the maintenance of her rights, and the fulfilment of her duties as a great power. True to this policy Austria has not deemed it necessary to cover by far the greater portion of her frontiers with artificial barriers. Only in Upper Italy, on a battle-ground upon which she has been repeatedly attacked by her western neighbour states, and where the most unfavourable conditions of the indirect defence of the south frontier of Germany threaten her military existence in the highest degree, she has by art formed a strong position, and thereby rendered possible a direct and easy defence of her German auxiliaries.

Between the Lake of Garda, the Alps, and the Pô, there is a strategical defile of from 7 to 8 miles * in width, through which any hostile operations against Tyrol or Vienna must pass to attain their object. On no other point can an enemy get through with his main army; he must go through this gate. Above the Lake of Garda, as long at least as Switzerland is able to maintain her neutrality, he can only make incursions with detached parties, sufficient to annoy the Austrian communications in the valley of the Adige, or likely to be annihilated. In the south, below the mouth of the Mincio, as far as the sea, the field for operations is narrowed by the rice-fields of Ostiglia, and the "Valli grandi Veronesi," flanked on both sides by fortresses, and even an attack on the Ferrara side would be extremely hazardous. This important gate of Austria and of South Germany is closed by the line of fortifications on the Mincio and Adige, by the celebrated Quadrilateral.

This barrier is of so formidable a nature that it will bring to a dead stand the operations of the finest army in the world; it would render it necessary for such an army to have recourse to all the processes of long weary sieges, and it could not advance further until all the fortresses were carried and the defile open. Tyrol and the whole plain of Venetia are now one immense intrenched camp. The defences of this strategical defile have cost more than 10,000,000*l.* sterling. The immense power of this capital transformed into fortifications has given strength to the Quadrilateral, namely: Mantua, Peschiera, Verona, and Legnano. These fortifications are concentrated within an area of fourteen square miles. They are so connected with each other, that they can act in concert and support each other against an enemy. As long as Austria has possession of these fortresses she can hold her own. A force of 100,000 men in the Quadrilateral is capable of keeping 200,000 men at bay for months. As long as Austria holds the Mincio line, she may look placidly upon every attack, and send her contingent, if necessary, to help Germany on the Rhine. By maintaining Venetia, Austria covers by a strong position the south frontier of Germany from the Stelfer-Joch to the mouth of the Isonzo.

A defeat of Austria in Italy (continues the Austrian writer) will be felt on the Rhine, throughout the whole of Germany, in Belgium, and even in Holland. With Austria conquered, Germany falls; should Austria lose the Quadrilateral, this side of Germany is open to receive the blow of the enemy. Without Venice and the coast-lands, Trieste and the Dalmatian littoral would not be tenable. The Adriatic would thus be lost, as also the connection with the Mediterranean one of the great pulses of the maritime existence of Austria.

The position of Switzerland is next considered.

The neutrality of Switzerland is guaranteed by the treaties of 1815. What have become of that neutrality now? It was instituted in the general interests of Europe for the maintenance of the balance of power.

The advantages which the occupation of Switzerland would give to France in case of a European war are so great that she could not eventually fail to make use of the strategic superiority it would give her. The two gates of Switzerland, the Porrentruy and the valley of the Rhone, are open to her. Savoy is already in her possession, and the neutrality of North Savoy, which was guaranteed by treaties, has been disregarded. From the Lake of Geneva, from the valley of the Rhine, the Jura is doubled, the high plains of Switzerland, so important for the defence of South Germany, easily attained, with the Upper Rhine open to attack from the rear. Without firing a shot, Baden and Würtemberg would be lost to Germany, the German line of defence thrown back on the strategic defile of Stockach and Ulm. On the other side, through the valley of the Rhone, France comes into possession of the passes of the Great St. Bernard, the valley of Dora-baltea, over the Simplon to the Tessin, over the St. Gothard to the Rhine and Inn, and threatens any army in the rear that might have made progress against its army in *the valley of the Pô*.

After pointing out the detriment which has occurred not only to Switzerland, but to all Europe, by the recent cession of territory to France, the Austrian writer maintains "that the political independence of Switzerland depends now only upon, and is intimately connected with, the fate of the Quadrilateral fortresses of Upper Italy."

Whoever holds those fortresses is master of the Tyrol. That land once in French hands, or in the hands of French allies, Switzerland would be separated from Austria, and the other conservative states, of which she is one, be isolated, surrounded by French armies, dominated by French influence, and fall under a French protectorate. That Switzerland feels this is proved by the fact that she is erecting forts against the Porrentruy, and organising a federal army of 72,000 men. But will this save her? Her only safety in the opinion of the Austrian writer is to be found: "In at once voluntarily abandoning her neutrality, and in reply to the annexation of North Savoy, to form a defensive alliance with the German Confederation."

The importance of the Quadrilateral to Germany is great:

1. Because in proportion to Austria's defensive position in Venetia, she can regulate the strength of the army she can send to assist her confederates on the Rhine.

2. Because the attack of the enemy, according to who holds the Quadrilateral, must take place either on the Rhine, or deep in the interior of Germany, at the passes of the Tyrol in Bavaria.

Germany and Austria are militarily to each other what a shield and sword are to the body. Germany without Austria, Austria without Germany—shield or sword must fall. The defensive strength of Austria is in this respect the defensive strength of Germany.

The proximity of war is not concealed by the Austrian writer.

In March, 1859, (he says) there was still a possibility of avoiding war if the moral re-action in Europe had come forward boldly against aggression. Even in May, 1859, the victory of 70 millions of Germans against France and little Piedmont, that is to say, against the warlike power of 44 millions of men, was certain. Now, in 1860, the power of both states has increased. In the next war the battle will be no longer against 44 millions, but against the armies of a population of nearly 60 millions of souls, united by a common interest, led by one will. Every delay, like the offer of the Sibyl's books, adds to the sacrifices which a by no means improbable war will cost—adds to the price that will have to be paid for victory.

* A German mile is equal to 3 English.

STEAM RAMS.

Vice-Admiral Sartorius, to whom in a measure must be conceded the merit of bringing prominently under the notice of the country the peculiar advantages of iron-built vessels for warlike purposes, has written a long letter to our contemporary the *Times*, and we regret that our restricted space will not permit us to give it *in extenso*. We however subjoin a few extracts, the importance of which will be fully appreciated by naval men whether belonging to the Executive or the Engineering classes:—

As it is clear the iron walls must supersede wooden ones, let us examine which of the two actual arrangements of the former is the most efficient—the steam frigate, iron-cased, with the usual masts, yards, and sails, of a line-of-battle ship, only using her guns; or the modification of the steam frigate, which also uses artillery, and is expressly built for speed and strength, and weight sufficient to sink by concussion, and with a rig subordinate to that important quality. I give my reasons in the following observations to show why I think the latter (steam ram) is infinitely superior for service, less expensive in construction, and much less in maintenance.

The iron-plated steam ram can make use of guns as the steam frigate, equal in calibre, and if required, equal in number. She can use more guns from each extremity than the steam frigate from her bow or stern; therefore, whether retreating or pursuing, the steam ram is more formidable, even when she trusts to her guns alone.

A single steam ram can effect with her beak an amount of destruction in a few minutes which would take many steam frigates to effect very imperfectly in as many days, if at all. She could get in among a fleet at night, sink two or three ships and disperse the rest. She could run into a harbour, such, for example, as Cherbourg, by one entrance and out by the other, sink some of the ships at anchor in the outer road by her beak, and set fire to others by her incendiary projectiles.

The steam rams should have both extremities the same (I proposed a screw and rudder at each end, and also paddle wheels for Channel service); she could run in or out among the enemy's vessels, and advance or back with the same velocity and quickness. If attacking at night, with masts lowered, she could not be seen until felt, could launch out her incendiary projectiles into the town and harbour, and there would be no masts, sails, or rigging to obstruct their flight in every direction. Guarded by loop-holed and bullet-proof towers to afford refuge to her people when boarded, and boiling water made to be ejected from them, it would be impossible to take the steam ram.

No steam frigate could do all this. A steam ram, when prepared for action (she has, of course, no bowsprit), with her masts lowered, the rigging, the little she has, frapped in amidships, and without any kind of outside projection, can clear instantly any vessel she may fall alongside of, or that she has run into. If boarded, the boarders must be killed or scalded. As no wreck can hang overboard, her screw cannot be fouled. The steam-frigate falling alongside of her enemy, and either vessel losing masts and yards, they must get entangled, and their screws fouled by their wreck; there would then be nothing to prevent a fresh ship from running alongside and effecting an easy conquest of the steam frigate.

The steam ram cannot possibly foul her screw by the wreck of the vessel she destroys. Her working screw must be the whole length of the vessel from the locality of the wreck or the vessel struck, and every stroke of the screw backing removes her further from that locality. The foremost rudder and screw blades, in preparing for the attack, are placed and fixed fore and aft. I have the opinions of some of our ablest ship-constructors that the stern piece can be made so strong as effectually to protect screw and rudder from all harm where the concussion takes place. It has been said also that if the steam ram were going at a high speed against a large vessel the force of the blow or concussion would throw the engine out of gear and render it useless. This opinion is abundantly refuted by innumerable facts. We hear, unfortunately, almost every day of steamers, some that have run down other vessels, upon rocks, and going at 11 or 12 knots against stone walls, as at Birkenhead, or into a stone pier, mounting up the stones on either side as if it had been an earthquake, as at New York, and in every case the engines have never been injured or inutilised until either the bottom has been beaten in by the rocks or the fires have been extinguished by the water rushing in, but the engines have never, and even the stem of the vessel has but seldom, been much the worse for the shock. We must recollect that all these cases of collision or wreck have occurred with merchant vessels of ordinary construction and strength, and as such, therefore, are far inferior in solidity and strength to what the war steamers would be expressly built and prepared for purposely effecting what has been so often unintentionally done. The beak of the steam ram rushing upon a large ship with the momentum of 3000 or 4000 tons, can never encounter a sudden check; it is the gradual crushing blow—the side yielding to it, the vessel struck heels over, and is more or less driven before the blow. I am persuaded a man in the gun-room of the steam ram could hardly know that a collision had taken place. It is again said that the application of the principle of the steam ram has never been tried. I point out as my answer the cases of collisions I have alluded to. Every steam-vessel that has destroyed another by running into that vessel, is to all intents and purposes a steam ram.

The steam frigate has only one apparent advantage over the steam ram, and that will disappear on examination—namely, the line-of-battle ship's masts and sails enable her to make long voyages; but the steam ram has her five or six schooner-masts, and, if required for a long voyage, topmasts gafftop sails, stay-sails and square sails can be added, so that she will spread almost as many yards of canvas as the line-of-battle ship. To resist invasion or protect seaports and harbours the steam ram is tenfold more serviceable than the steam frigate or any other description of vessel or shore battery.

As protection for harbours the steam ram is unquestionably the most effective, indeed infallible, for no description of vessel can escape from its blow. Amid all the incongruities so abundantly occurring during and since the Russian War in public matters, particularly in military or naval matters, none can more readily excite a smile than when the Government wished to know from the sub-committee on coast defences what would be the most effective mode of protecting Portsmouth harbour and arsenal from being bombarded by shot-proof vessels coming into Spithead and throwing shells and incendiary projectiles over the town. A plan and estimate was seriously sent in for forming a complicated work of booms, chains, nets, and innumerable anchors, to spread over so large a place as Spithead, at a cost of 500,000*l.*! like a net for catching tunny fish. The difficulty of keeping all this cumbrous complication in working order in winter and storm, and the impossibility of spreading out the trap with sufficient quickness to catch the interlopers, who necessarily would come on very suddenly, the enormous inconvenience of embarrassing this important roadstead with all this mass of materials, seemed to have escaped the attention of the committee, as well as the simple remedy—namely, to oppose them by the same kind of vessels. As these would be constructed for harbour protection alone, they could be made more powerful and handy than those of the enemy.

PORTSMOUTH.

In consequence of the crowded state of the footpaths in the narrow streets and sallyports of Portsmouth, caused by the large body of its inhabitants inclosed within its ramparts, forbidding any expansion or improvement of the thoroughfares of the city, the following General Order has been issued by the Lieut.-Governor, Major-General Lord William Paulet, C.B., for the guidance of troops, who, in considerable bodies, are constantly, in the discharge of their duties, moving between the various barracks and parades within the walls:—"In wet weather, and when the streets are very dirty, commanding officers are to cause their men to walk in single rank on either side of the street, keeping off the curb-stone of the pavement. This order applies to regiments marching to and from chapel, as well as to parties marching to their respective guards. Guards, or other parties on fatigue, or other duties, will not be marched through a sally-port, but through the nearest large gateway."

Captain Sir William Wiseman, R.N., Bart., and Lieut.-Colonel F. Campbell, of the Royal Artillery, both of the Ordnance Select Committee, have been down at Portsmouth during the last week, for the purpose of witnessing experiments upon the Sirius, old frigate, fitted with the various iron-proof armour submitted to Government by inventors.

The Lines of Portsmouth.—The last field-day which Major-General Lord William Paulet, C.B., commanding the South-West District, held at Southsea, played the mischief with the embrasures of the heavy batteries of the Portsmouth lines facing the Common. The engineers assured his lordship that if he directed the artillery to open a general fire along the lines, he would cause great damage to the parapets; to which his lordship very properly replied that the parapets were intended for use, and that if the embrasures would not stand blank cartridge firing, they certainly could not be worth much. Accordingly a *feu d'enfer* was opened on the heads of the retreating garrison, as it fell back through King William's Ravelin, and the result, as the engineers predicted, has been the blowing away of a number of the faces of the embrasures in question, which workmen are now repairing, and which, like the carpenter's nails, John Bull will find in his next annual bill. But it is very questionable whether it is any longer worth while to undergo the expense of repairing these works, whose utility was of the time of Cromwell's Ironsides, and not of the present era of modern warefare. An enemy in possession of the beach would shell the dockyard by firing over them; and they contain in their *enceinte* neither arsenal, nor stores, nor magazines, nor anything worth defending. Every future shilling spent there is money thrown into the sea.

Orders have been received here from the War Department to subject the monster gun known as "Horsfall's" to a still further proof than that it has already undergone. In 1857, when first cast, it was subjected by Major Vandeleur to a proof of 40 lbs. charge, and then nearly 100 rounds were fired with an increased charge of 50 lbs. The experiments were then stopped in consequence of an ominous crack of three inches long appearing in the under side of the metal. The gun was mounted on the Clarence Esplanade at Southsea, to the west of the castle, and large parties of artillerymen have been for several days past digging holes for the purpose of receiving anchors for holding the fore and back gauge of a 40 feet shears, which will be used in lifting the monstrous brute from its present bed. When we add that the gun weighs 22 tons, and consider the labour of loading it with a 13-inch solid shot, and 28 lbs. of powder, the unlikelihood of a second shot ever being had at a passing vessel, the difficulty of moving it if disabled, and the enormous expense of the whole matter from the beginning, it will not excite surprise to hear that the principle is considered erroneous among scientific professional men. The "monster" will be removed to the neighbourhood of Lump's fort, and there proved with 80 lbs. of powder; and if it bursts, it is not probable that Government will invest in a second edition of the unwieldy brute. On Monday afternoon, the 22nd inst., a whole battery of the Royal Artillery was employed on the Esplanade to test the strength of the tackle. The falls and stoppers being duly prepared, and men laid on by detachments, the order to move round was given by Captain Torriano, R.A., under whose superintendence the work was done, to the parties at the crab capstans. In a short time it was apparent that the forty-feet shears had received the weight of the gun, but no sooner was it clear of the trunnion holes, than the straining and tremendous tension of the new tackle caused it several times to return to its original bed, before the ropes ceased to give. This being effected, the gun rose out of its trunnion holes, the falls and stoppers having been duly applied to the main fall tackle once, to renew the coil on the upper part of the capstan axletree. As everything appeared to hold well, the word was given to ease off gently, and the monster returned to its own bed again. The skidding is all ready for removing it to the barge, when orders arrive from London to that effect. Colonel Mundy, Commanding 10th brigade of the Royal Artillery, and many officers of Artillery and Royal Marine Artillery, were present during the operations.

Gosport.—Major-General Lord William Paulet, C.B., inspected the 15th brigade of the Royal Artillery on Haslar Common, on the 22nd inst. The brigade having gone through the usual evolutions, and marching past, were addressed by the General, who said he found no fault with their appearance on parade, but that he regretted to be obliged to advert to the conduct of the men during the past half-year, as evidenced by the extraordinary number of courts-martial which had been held for the punishment of offenders. The General further said that he was determined to break the neck of the insubordination and drunkenness which had pervaded to such a fearful extent; and warned the men they would sooner be tired of braving the law than he would be of applying it. It is but just to add that his lordship's remarks in no way reflected on Colonel Franklin, C.B., and the officers of the brigade. As it was raised in April last, from contributions from all the other heavy brigades; and as it is not probable captains of batteries would part with their best men, it was pretty soon ascertained that the selection was anything but agreeable to the feelings or pockets of the officers appointed to the new brigade. Men noted for bad character and conduct were soon seen strutting about with the stripes of the non-commissioned officers on their arm; and at one time there were no less than forty men in the military prison for selling their kits. This is a sample of the work which was cut out for the gallant colonel. We are already aware that a better order of things is beginning to prevail; so much so that we shall be very much mistaken if on his next inspection his lordship will not find occasion to use very different language to that in which he felt it his duty to address the brigade at the present inspection. The General inspected at the same time the No. 1 battery of the 10th bridage, stationed at Black Horse Fort, under the command of Captain Hodson, R.A.; and at the end of this day there remained only the Suffolk Artillery, Colonel Shafto Adair, to be reviewed, in order to conclude the whole of the present half-yearly inspection of the forts, barracks, hospitals, &c., of the S.W. district, which is now garrisoned by upwards of 14,000 men.

Three gunners of No. 2 battery, 10th brigade Royal Artillery, stationed at Fort Victoria, Isle of Wight, about three months ago, having a grudge against the landlord of a public house in Yarmouth, seduced him into a room where they were drinking, and on their locking the door, fell upon the unhappy man, and nearly beat him to death. We are glad to perceive that at the Winchester assizes just held these ruffians were found guilty, and each sentenced to one year's imprisonment with hard labour; and only regret that there is no law which will rid the Service altogether of men who so disgrace it.

A very serious row occurred a few nights ago in one of the low public-houses in the back-slums in Portsea, in which several sailors belonging to men-of-war in the harbour were severely stabbed by others. A few nights previously one of the Suffolk Artillery was knocked down by a sailor, stabbed, and his head kicked in. We revert to these matters with a view of asking whether, considering that soldiers are no longer to walk about with their side-arms when off duty, it would not be equally advisable to keep Jack's knife on board ship, when he is out on the loose, and often quite incapable of taking care of himself?

Garrison Order.—*Portsmouth, Oct.* 18, 1860.—District Order.—In consequence of the inclement state of the weather, the Major-General Commanding sanctions the issue of the winter allowance of fuel for one week, commencing the 20th inst.—[N.B., A very considerate thing on the part of his lordship.]

H.M.S. ship Diadem, Captain Cockburn, is still in No. 8 dock, under the hands of the workmen, who are busily employed in caulking her deck and waterways; this being the first time she has undergone this operation since she was put into commission, upwards of three years ago. Her bows are found to be very leaky, and her condensers are out of order. She will probably be ready to leave the dock and enter the basin by Saturday next. The workmen employed in her, state that they have seldom seen a vessel so clean and in such thorough good order, everything down below being in its proper place, and up to the work in every way. She was reported before, by the Admiral, as one of the cleanest ships in the Navy; and we take leave to assert that an opinion from the working men of the dockyard is not less conclusive to the point, and perhaps even more complimentary to her officers and crew, who are temporarily turned over to the Bellerophon hulk, pending the Diadem's repairs.

The Hyacinth, once a crack corvette, and celebrated for her swiftness and sailing powers in the West Indies some 15 years ago, has been converted into a floating coal depôt, and is now lying in the harbour awaiting orders to proceed to Portland, where she will receive the cargoes of colliers, and supply with her derricks the requirements of the Channel Fleet. *Sic transit gloria mari.*

Staff College.—We learn with regret that some of the advantages which were likely to accrue to the public service from the establishment of the above institution, are likely to prove nugatory, in consequence of the principles on which it was first sought to attract officers to qualify themselves for the staff of the Army not being strictly adhered to; or rather, we should say, being set aside whenever a convenient opportunity presents itself. We take the case of officers who have studied at the college being promoted to the rank of Regimental Field Officers, when they must then elect either to serve with their own regiments, or to go on half pay, if still desirous of staff employment. Many officers choose the latter alternative, in the firm reliance that they will succeed to vacancies held by field officers. To the dismay, however, of many of the aspirants, these vacancies are filled up by officers who have never studied at the college, and the explanation given is that lieutenant-colonels are wanted for these appointments. We do not mean to assert that this is invariably the rule, but it is the stereotyped reply whenever a "put off" is convenient. It is, therefore, evident that no amount of qualification will enable some men to earn their bread without a due admixture of the old leaven of interest in it; and we should be glad to know how majors, who accepted the original conditions of the contract, and are now on half-pay, are to obtain the benefit of their labours. We affirm that the point is vitally connected with the welfare of the Staff College.

MUNIFICENT LIFE-BOAT GIFTS TO SCOTLAND.

A benevolent gentleman, resident in Edinburgh, has just communicated to the National Life-boat Institution his intention to defray the cost, amounting to upwards of 500*l*, of a complete first-class life-boat station, including boat, stores, transporting carriage, and boat-house. The station will, at his request, be established on the Mull of Cantire, on the west coast of Scotland, where some fearful shipwrecks, with loss of life, take place nearly every winter, six wrecks having occurred in that neighbourhood during the past twelve months. Being mounted on a transporting carriage, the life-boat can easily be made available for all accessible points round that peninsula. The donor stipulates that the establishment shall hereafter be kept up in an efficient state, jointly by the National Life-boat Institution and the residents of the locality. A lady resident at Lasswade Bank has also promised the Life-boat Institution to pay the cost (200*l*.) of a new life-boat, to be planted at Irvine, which is likewise situated on the west coast of Scotland. Last February a frightful wreck of a French vessel, named the Success, of Nantes, occurred on Irvine Bar, when every one of her unfortunate crew perished from the want, as it was believed, of an efficient life-boat. The Institution forwarded a day or two ago a new life-boat and transporting carriage to Thurso, on the extreme north of Scotland. The cost of the boat is the munificent gift of A. W. Jaffray, Esq., of St. Mildred's-court. He also defrayed the cost of the St. Andrew's life-boat, which, during the heavy gale of the 3rd inst., rendered important services to several fishing-boats from Backhaven. Their crews have subsequeutly sent, with expressions of much gratitude, 3*l*. to help to defray the cost of the maintenance of the lifeboat. Mr. Jaffray has also, in conjunction with his father, paid the expense of the life-boat which the Society sent about a month ago to North Berwick, near Edinburgh, where again four or five poor creatures perished last winter from a wreck through the want of a life-boat. The Institution has another lifeboat, the gift of a benevolent lady, ready to be sent to Buckie, an important fishing town on the north-east of Scotland, near which place, three or four years ago, 42 poor fishermen perished. The Institution has now life-boats at the following places on the Scotch coast:—Ayrshire, Ayr; Caithness-shire, Thurso; Banffshire, Buckie, Banff; Elginshire, Lossiemouth; Aberdeenshire, Fraserburgh; Fifeshire, St. Andrew's; Haddingtonshire, North Berwick. It is a singular circumstance that nearly every one of these boats is the gift of private persons, who, with one or two exceptions, have no connection with Scotland. After a life-boat is established in a locality it is estimated that about 40*l*. a year are required to keep it in an efficient state and ready for instantaneous use. To enable, therefore, the Institution to accomplish and perpetuate its important and philanthropic objects, it earnestly solicits the pecuniary aid and the general co-operation of all humane persons who can feel for, and have the power to aid, those whom it has pleased Divine Providence to afflict by casting them helplessly on our coasts. Contributions are received by all the London bankers, and at the office of the Institution, 14, John Street, Adelphi, W.C.

THE REGENT'S ALLOWANCE. — The Secretary of State for War has had under his consideration lately the position of officers quartered in the Channel Islands in respect to their Regent's allowance, which has hitherto been never granted to regiments or companies quartered there. It has, however, been represented to him that of late years, and more particularly since the new tariff on wine duties has come into operation, the difference between the expenses of messes stationed in England and in the islands is only very slight; and that railways and steamers have levelled all distinctions and advantages which some favoured localities once enjoyed. And, moreover, as by the new regulation the Regent's allowance is no longer to be exclusively devoted to the lessening of the first cost of wine, but to the decreasing of the general expenses of the mess, it would be invidious to exempt a small portion of Her Majesty's dominions from the benefit it is intended to effect. These considerations has at length weighed with the right honourable gentleman, and orders have been given to extend the allowance to troops quartered in Jersey, Guernsey, and their dependencies.

SHOEBURYNESS.—The Artillery officers who are now studying at Shoeburyness, and going through the "long course" there for the purpose of qualifying themselves under Colonel Gardner, R.A., for instructors of artillery to their different brigades, will finish their work at Christmas, and it is expected that a fresh batch of young officers will be required to volunteer their services to fill the vacancies in the studies. There has hitherto been no lack of gentlemen anxious to improve their opportunities of acquiring solid information in the practical part of their profession.

The entire force of the Chatham garrison was reviewed on Wednesday on Chatham lines by Major-General Eyre, in command of the district, each of the troops being furnished with ten rounds of blank ammunition. The movements of the day, which included a variety of brigade, light infantry, and other manœuvres, were under the direction of General Eyre, and occupied upwards of two hours.

His Royal Highness the General Commanding, with the concurrence of the Secretary of State for War, in reference to the War Office Circular of the 7th of November, 1859, No. 198, has appointed the following officers to be Inspectors of Warlike Stores and Firemasters at the undermentioned stations:—Captain R. Boyle, Malta; Captain C. Hardy, Halifax; Captain T. Mahon, Quebec; Lieutenant E. T. Warry, Gibraltar. To be Assistant-Inspector, Captain C. B. Le Mesurier, Corfu. The appointments of officers to the remaining stations named in the Circular referred to will be notified as soon as the officers have passed through the course of instruction, and received certificates of competency from the respective superintendents of the manufacturing departments. As there are at the present time several vacancies not yet provided for, any officers who may be desirous of the appointments are requested to submit their wishes to their commanding officers, who (if they have no objections thereto) will forward the names to the Horse Guards.

SIR ARCHIBALD ALISON ON RIFLE CORPS.

On Friday week the oath of allegiance was administered by Sir A. Alison in the City Hall, Glasgow, to the 60th, 61st, and 93rd Lanarkshire Highland Rifle Volunteers, and 14th Lanarkshire Artillery. A brilliant assemblage of ladies and gentlemen occupied the platform, galleries, and the sides of the body of the hall, to witness the proceedings. The formal part of the proceedings being over, Sir Archibald addressed the companies. It was with feelings of the deepest interest that he rose to express his warmest thanks for the manner in which he had been spoken of on that occasion, and to them all for the kind reception they had given him. He had done no more than was his simple duty as a magistrate of the Queen. If there was one feeling more than another which must penetrate the soul of a lover of his country it was to see so large a body of men standing forth to defend his native land against its enemies, and to transmit to latest posterity its religion, its liberties, and its laws. He felt proud at the honour of being enrolled a member among their ranks. All his life he had a warm heart towards Highlanders, and he had no small share of Highland blood in his veins. His ancestors had fought at Bannockburn for the independence of Scotland, and he was happy to say that his sons had followed the example of their ancestors; they had won all their honour at the head of a Highland regiment. They (the Volunteers before him) had now discharged an important and a solemn duty; they had assembled to take the oath of allegiance to their Sovereign at a period of no ordinary difficulty — at a period when war was threatening in Europe, and no one could say how soon the mimic warfare of the late Volunteer review might be changed to the stern realities of war. But in such an event they would, he believed, show themselves not unworthy of the name of Highlanders in nobly standing forth in defence of their country. The sight before him forcibly recalled to his mind a similar scene which occurred eleven months before, when for the first time he had the pleasure of meeting a body of Volunteers in that room. There were 1200 Volunteers then assembled—by far the largest number that had been seen together in Great Britain; and it was thought at that time by the most sanguine supporters of the movement that 4000 men might be raised in Lanarkshire for the defence of our Queen and country. Before ten months had expired he had the pleasure of seeing 21,500 Volunteers defiled before the ancient palace of their kings, and whose gallant bearing and conduct showed them to be worthy of the high eulogium pronounced by our Sovereign, that she never had seen so noble a sight, and never expected to see such another. He must say that he regarded with no small pride and satisfaction the leading part this county and city had taken in this great movement. At Edinburgh 9000 men in arms arrived from Glasgow and the adjoining parts of the county out of a population of 700,000. Lanarkshire and Renfrewshire had turned out 1 in 70 of the whole population in arms, and 1 in 100 of the population of Scotland was turned out, while England had only turned out 1 in 190. If the whole country had turned out in the same proportion as Lanarkshire and Renfrewshire the Volunteers would number 300,000; and if in the same proportion as the whole of Scotland, the number would be 200,000; but at present there were only 130,000 in the whole empire. Scotland in general, and Lanarkshire in particular, had afforded a great and noble example to the nation. He did not assert with confidence that we were the originators of the movement, but we were the persons who adopted it and carried it first into execution. The detractors of the movement were at first overwhelmed, and said nothing for a long time; but now they were beginning to make themselves heard. They said the Volunteer movement was a menace of the country; it was raising up a warlike spirit among the population, distracting our youth from their civic occupations, and must lead to dangerous and ruinous consequences, by involving us in war with other countries. But the idea that the Volunteer movement was intended as an aggressive movement, or as a menace to others, was erroneous. The Volunteers were not to be employed out of the county in which they were organised, except in the case of actual invasion. He maintained that the Volunteers were the real peace-makers, and the real war-makers were those who opposed them. The real peace-makers were those who, to avert the horrors of war from our hearths, took arms in their hands, and used the motto of our Scottish kings, "*Nemo me impune lacessit.*" Look at the events of the last half century. After Waterloo we had 40 years of peace, and what followed? The nation, as Lord Palmerston had said, reposed upon its laurels. But under the policy of the peace-at-any-price party the nation would have been left absolutely powerless. Look at the Crimean War. Russia, whose ancestors had long had an eye upon Turkey, said that now was the time to take that country; the old English lion might roar, but it would not use its claws, and, therefore, now was the time to make war. A dreadful war arose, and that war was owing to the peace-at-any-price party. Nana Sahib, seeing the condition of this country in respect to our inefficiency of regular troops, said, now was the time to raise the standard of revolt, to drive the infidels into the sea, and murder every one they could find. The Indian revolt very nearly lost us our Indian possessions, and through the Manchester peace-at-any-price party that was brought about. But by the good providence of God another party appeared in the field and extinguished the dangers which threatened our country by the peace-at-any-price party. Who were they? They were the mountaineers of Scotland, and their leader Sir Colin Campbell. The 42nd behaved nobly at Cawnpore, the 76th at Jhansi, the 78th at the relief of Lucknow, and the 93rd extricated the captives from the hands of the Sepoys, and saved the women and children; and with a force of 5000 only, in the face of 60,000 entrenched to the teeth, brought them forth in safety. He wished there was the same prospect of security in Europe that we had now in India; but he much feared that the horizon in Europe was overcast, and perhaps a severe contest awaited us in our own quarter of the globe. That very day they had read in the papers that Russia and Austria had concluded an alliance offensive and defensive; and a war was beginning between the north and the south—in the south, headed by Napoleon, a man of great ability and great power, but actuated by one principle, which he proclaimed when he came from Strasbourg. He represented that principle to be universal suffrage, the dynasty of Napoleon, and the defeat of Waterloo. A gallant, a brave, and an honest man, a brave general, and an honest republican, overturned a monarchy; but he was put aside by Napoleon, and Sardinia stepped in and took possession of the country. He (Sir Archibald) was afraid a great war was arising on the Continent between the northern and the southern country—on the one side Austria and Russia, and on the other France, Spain, and Italy. He believed they would be very equally matched, but we had equal cause to dread both. The only way possible for this country to maintain her position in Europe was by assuming an attitude of defence. There was another reason why the Volunteer movement was of most essential importance. The whole army of Great Britain was 220,000 men. Of these 80,000 must be absorbed by India, 40,000 in the other colonies, leaving 100,000 in the British Islands; 30,000 were required in Ireland, and 35,000 at least in the fortified harbours to preserve our fleet, so that 35,000 only remained against a power who could bring 200,000 against us if he had command of the sea. There was another reason for maintaining a Volunteer force. A great discovery had been made lately in the naval art. He had the pleasure lately of going over the great war vessel now building in the Clyde, and he was informed by Mr. Napier, the builder, that the plates on the sides of that vessel would withstand the effects of a 68-pounder at a distance of 50 yards. Those iron-plated vessels might sail with impunity, dealing out death and destruction, through any ordinary fleet, and sink them without sustaining injury themselves. The French were increasing the number they possesed of such vessels, and these vessels, he held, were intended to be used against England. Therefore, the necessity was greater than ever that there should be no jealousy whatever between the regular Army and the Volunteers, for the best officer of the regular Army would be one who had the greatest respect and esteem for the Volunteers, and the best Volunteer would be he who most owned the value and importance of the regular Army. After a few more remarks on the high estimation in which he held the Volunteer force as a powerful defence of our country, Sir Archibald concluded by again expressing thanks at being enrolled a member of their corps, and if the time ever came when danger threatened this city, he would not be the last to join the ranks of the Glasgow Volunteers.

NAVAL COAST VOLUNTEERS.

[We have been favoured with copies of the following letters, which we make public with the greatest pleasure, as creditable alike to Mr. Llewelyn Turner of Carnarvon, whose praiseworthy exertions in raising Naval Coast Volunteers are recognised by the Board of Admiralty, and to their lordships, who have thus shown a proper appreciation of his services. It is most gratifying to find a gentleman of local influence and the officers of H.M. Ships Blenheim and Majestic thus co-operating heartily together, and we trust their good example will be generally followed in other Coast Guard districts.]

Admiralty, 16th October 1860.

SIR,—I am commanded by my Lords Commissioners of the Admiralty to express to you their Lordships' gratification at the accounts they have received from Captain Tatham of your zealous and patriotic exertions, in assisting, in raising and keeping together a fine body of Royal Naval Coast Volunteers belonging to the town of Carnarvon. I am, &c.,

W. G. ROMAINE.

Llewelyn Turner, Esq., Mayor of Carnavon.

Royal Welsh Yacht Club, Carnarvon, Oct. 20, 1860.

SIR,—I have the honour to acknowledge the receipt of your letter of the 16th instant, conveying to me the gratifying announcement of the approbation of the Lords Commissioners of the Admiralty of my conduct, and I have to assure their Lordships how highly I appreciate the honour they have conferred upon me.

Having filled the office of Rear-Commodore of this Club from the date of its formation in 1847, I have felt it my duty to do all in my power to raise men for the Naval service.

With this view I convened a meeting of seamen last summer, for the pupose of explaining the conditions of the "Naval Reserve," which I did in the course of an address, pointing out the folly of so many men joining the American service. The number of seamen in this port in winter being very considerable, I have arranged to hold meetings during the winter months, in which I have been promised the able co-operation of Captain W. R. Mends, C.B., commanding Her Majesty's ship Majestic, to whose district I understand Carnarvon is to be transferred.

It is due from me to Captain Tatham to mention to their lordships the high terms in which the volunteers speak of the judicious treatment they receive on board his ship.

I have the honour to be, Sir,
Your most obedient servant,
LLEWELYN TURNER.

W. G. Romaine, Esq., Admiralty.

The members of the 4th Surrey (Brixton and Streatham) Rifles have recently presented to Sergant-Major Baker and Drill-Sergeant Haylock, of the 1st Battalion Grenadier Guards, a gratifying testimonial, in the shape of two powerful field-glasses, as a mark of the appreciation in which they hold their services in bringing the corps into its present efficient state. The corps is in possession of an excellent range, extending to 550 yards, and target practice is regularly carried on. Various prizes, including a Ladies' prize, a handsome silver challenge cup, presented by J. T. Oxley, Esq., a Westley Richards' rifle, and also several other prizes for shooting, and judging distance, are to be competed for immediately. We understand all the commissioned officers of this corps have been instructed in battalion drill, at the Guards' Barracks, and, indeed, that the rules of the corps require that they should obtain certificates of competency after attending some such course of instruction; such a rule is well calculated to increase the efficiency of any corps, and cannot be too highly recommended for general adoption. The enrolment of members and cadets still continues.

The Vice Chancellor of the University of Cambridge has presented a silver cup to be shot for by the Cambridge University Volunteers. The match will take place on 31st inst.

THE BRITISH CEMETERIES IN THE CRIMEA.

The following correspondence has been addressed to the editor of our daily contemporary:—

(To the Editor of the "Morning Post.")

SIR,—It is proposed to raise a subscription for the purpose of presenting a testimonial to Colonel Gowen, who has taken such great interest in the preservation of the tombs of British officers in the Crimea. He has caused several of them which were in a dilapidated state to be repaired, has planted cypresses and other ornamental trees around them, and has gone to considerable expense, for which he has refused to accept any repayment. I am confident that the relations and friends of those who so nobly fell in the Crimea in support of the honour of England, as well as all who admire the heroism displayed by those gallant men, will gladly join in offering a token of respect to Colonel Gowen for the trouble he has taken in protecting from desecration their last resting places.—I am, &c.,

MONTAGUE GORE.

Palace Chambers, St. James's Street, Oct. 20.

"29, Stanley Gardens, Kensington Gardens, Aug. 11, 1860.

"My Lord,—I have the honour to represent, with reference to the state of the cemeteries of British officers buried in the Crimea, that I received, in November last, instructions to proceed from Theodosia to Sebastopol, to examine into the condition of the cemeteries of the British Army.

"On my arrival there I found that a part of the cemeteries had been used by the inhabitants for cattle folds and vineyards. The gravestones in many instances were knocked down and broken, the walls destroyed, and, in one instance, the body of an officer had been exhumed.

"Colonel Gowen, of the United States army, was at that time engaged in rebuilding the walls, and resetting the tombstones, and he has since then expended a large sum in restoring various cemeteries to their original state, and in planting cypresses and other ornamental trees around the graves. I enclose copy of a letter I have since received from him, and can fully confirm what he says with regard to the restorations he has effected.

"A person has now, I believe, been stationed on the spot to protect the cemeteries from further injury.—I have the honour to be, my lord, your lordship's most obedient humble servant,

"ROBERT CHARLES CLIPPERTON,
H.M. Vice-Consul, Theodosia.

"Lord Frederick Paulet, &c."

(Enclosure.)
